CO1	recall the reaction mechanism involved in simple organic preparations	K1
CO2	identify the appropriate reagent required for organic preparation	K2
CO3	analyse the purity by determination of melting and boiling points	K3
CO4	interpret UV-visible and IR spectra to evaluate the structures of simple organic compounds	K4
CO5	synthesise specific organic compounds, purify them and confirm the structure using spectral data	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Organic Preparations 1.1 Acetylation of Aniline 1.2 Benzoylation of amines/phenols 1.3 Preparation of glucosazone 1.4 Hydrolysis of ester 1.5 Oxidation of benzaldehyde 1.6 Preparation of methyl orange 1.7 Nitration of nitrobenzene to m-dinitrobenzene	K1-K6	14	1-5
2.	Purification of organic compounds 2.1 Crystallisation (from water and alcohol) 2.2 Distillation 2.3 Determination of melting and boiling points	K1-K6	8	1-5

UNIT	CONTENT	CL	Hrs	CO
3.	Spectral analysis of simple organic compounds (To be tested internally) 3.1 Identification of functional groups using UV-visible and IR spectral techniques (Spectra to be provided).	K1	4	1

PHYSICAL CHEMISTRY PRACTICAL – II

CODE: 23CH/MC/P862

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To impart the skills required to handle instruments
- To enhance the skills required to determine the strengths of given sample potentiometrically and conductometrically
- To give an understanding of chemical kinetics and use them to calculate the rate constant and order of the reaction
- To determine the standard electrode potential of $\text{Cu}^{2+}|\text{Cu}$ electrode

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the theory and principles of physical chemistry experiments	K1
CO2	demonstrate the theoretical concepts in physical chemistry through experiments	K2
CO3	calculate the standard electrode potential, strength of samples, rate constants, order of reaction from experimental data	K3
CO4	analyse the experimental data with that of theoretical values	K4
CO5	estimate the strength of a sample conductometrically and potentiometrically, standard electrode potential, Freundlich adsorption isotherm constants, rate constants and order of reaction from experimental data	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	1.1 Theory and principles behind the experiments. 1.2 To prepare and standardise various solutions	K1-K3	3	1-3
2.	Potentiometry and Conductometry 2.1 Determination of Fe^{2+} in the given sample potentiometrically using potassium dichromate by Potentiometry 2.2 Determination of strength of the given acid using quinhydrone by Potentiometry 2.3 Determination of standard electrode potential of $\text{Cu}^{2+} \text{Cu}$ electrode	K1-K6	20	1-5

UNIT	CONTENT	CL	Hrs	CO
	2.4 Determination of strength of strong acid by Conductometry 2.5 Determination of strength of weak acid by Conductometry 2.6 Determination of strength of weak and strong acid by Conductometry			
3.	Chemical Kinetics and Adsorption Isotherm 3.1 Determination of rate constant and order of acid catalyzed hydrolysis of ester 3.2 To study the kinetics of iodide – persulphate reaction (equal concentration) and determine the rate constant and order of the reaction. 3.3 Determine the rate constant of hydrolysis of ethyl acetate by sodium hydroxide (saponification of ester) 3.4 Verification of the Freundlich isotherm for the adsorption of acetic acid on activated charcoal	K1-K6	16	1-5

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Canticle of creatures Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family

- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SYLLABUS

(Effective from the academic year 2023-2024)

PHARMACEUTICAL CHEMISTRY

CODE: 23CH/ME/PH45

CREDITS: 5

L T P: 4 0 1

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enable understanding of the concepts in pharmaceutical chemistry
- To facilitate understanding of the working of various drugs for specific diseases
- To introduce the principles and methodologies involved in computer aided drug design
- To introduce the concept of drug design and development

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamental principles of organic chemistry and apply them to pharmaceutical chemistry	K1
CO2	discuss the causes and treatment methods of various diseases and differentiate between classical and modern methods in drug design	K2
CO3	illustrate the properties of active pharmaceutical ingredients and CADD principles used in drug designing	K3
CO4	analyse important drug molecules along with their therapeutic uses in classical and modern drug development	K4
CO5	relate the properties of various drugs with their pharmacological activity	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Pharmaceutical Chemistry 1.1 Definitions - Pharmacy, Pharmacology, Pharmacodynamics, Pharmacokinetics, Antimetabolites, Mutation, Pharmacognosy, Toxicology, Pharmacotherapeutics, Chemotherapy, Therapeutic Index and Active site. Classification of Drugs	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	1.2 Pharmacological aids – Preservatives (sodium benzoate), Sequestrants (Calcium EDTA) and Antioxidants (Esters of Gallic acid) 1.3 Routes of administering drug, Dosage forms, Slow-release drug formulation. Storage of drugs - factors affecting stability of drugs. 1.4 ADMET properties of drugs 1.5 Effect of unsaturation, chain length, isomerism and functional groups on pharmacological activity.			
2.	Common Diseases and their Treatment 2.1 Viral infections - AIDS, Covid-19, Dengue 2.2 Bacterial infections – Urinary tract infections, tuberculosis, sepsis. 2.3 Haematological agents - Anaemia – Causes and Control – Anti-anaemic drugs. Blood Pressure, Hypo and Hypertension - Causes, Prevention and Treatment; antihypertensive agents - Aldomet, Reserpine. 2.4 Cardiovascular diseases: Cardiac glycosides - Digoxin; antiarrhythmic drugs - Quinidine-structure, dosage, therapeutic uses. 2.5 Antianginal agents - nitriles; vasodilators -Sodium nitroprusside, papaverine, nicotinic acid	K1- K5	14	1-5
3.	Drugs of Importance 3.1 Analgesics: Narcotic – Morphine, Pethidine and Methadone - Source, structure and uses. Non-Narcotic Drugs - Antipyretic and Anti-Inflammatory Agents - synthesis, characteristics and uses (Aspirin, Paracetamol, Phenylbutazone and Ibuprofen), Non-steroidal anti-inflammatory drugs (NSAIDS). 3.2 Anaesthetics - Conditions of an ideal anaesthetic agent, Stages of anaesthesia. Types of anaesthetics, nitrous oxide, cocaine and barbiturates. 3.3 Antibiotics: Structure and therapeutic uses of Penicillin, Streptomycin, Tetracycline and Chloramphenicol. Resistance to antibiotics. 3.4 Diabetes - Types and Causes, Hypoglycaemic Agents – Biguanides and sulphonyl ureas 3.5 Types and Treatments of Cancer, Antineoplastic Drugs – Antimetabolites (methotrexate, fluorouracil), Plant products (Vinca Alkaloids and Paclitaxel), Hormone and Radioactive Iodine therapy.	K1- K5	16	1-5
4.	Drug Discovery and Design 4.1 Drug discovery – classic steps and modern method. Lead molecule, target structure and validation methods. Principles of rational drug discovery.	K1- K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
	4.2 Drug Targets: Cell structure in brief, drug target-Proteins, nucleic acids, drug targets at molecular level, intermolecular bonding forces - electrostatic bonding forces, hydrogen bonding, dipole-dipole and ion-dipole interactions, van der Waals interaction, Repulsive interaction, role of water and hydrophobic interactions 4.3 Introduction to Computer Aided Drug Design (CADD)			
5.	Practical (To be tested internally) 5.1 Synthesis of Aspirin 5.2 Estimation of Iron / Vitamin A / Phosphorous by Colorimetry / Spectrophotometry 5.3 Separation of Analgesics (Ibuprofen, Paracetamol, Aspirin) by Thin Layer Chromatography (TLC) 5.4 Identification of blood group 5.5 Monitoring blood glucose and blood pressure	K1- K5	13	1-5

POLYMER CHEMISTRY

CODE: 23CH/ME/PL45

CREDITS: 5

L T P: 4 0 1

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enable understanding of the basic techniques and mechanisms of polymerisation
- To facilitate understanding of the chemistry of polymers and their manufacturing techniques
- To introduce the properties and degradation techniques of polymers

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	relate the chemistry of polymers and polymerisation techniques	K1
CO2	illustrate the types, mechanisms, kinetics, and techniques of polymerisation, molecular weight and degradation of polymers.	K2
CO3	classify polymers based on techniques, occurrence, molecular weight and degradation	K3
CO4	explicate the structure, properties, and applications of polymers, determination of molecular weight, glass transition temperature, kinetics of polymerisation, degradation in polymers and mechanisms of vulcanisation	K4
CO5	interpret molecular weight, glass transition temperature and degradation in polymers.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Polymers 1.1 Classification of Polymers Based on Origin/Occurrence, Chemical Structure, Physical Properties, Mechanical behaviour, Polymerisation Process, Arrangement of Monomers and Thermal Properties. 1.2 Natural and Synthetic Fibers: Types, Regenerated Cellulose Acetate Fibers, Nylon. 1.3 Structure, Properties and Applications of PU, PVC, Poly Acrylates, PMMA, Silicones, Plastics, Emulsions, Resins	K1-K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
2.	Chemistry of Polymerisation 2.1 Types and Mechanism of Addition, Condensation, Free Radical, Ionic and Coordination Polymerisation 2.2 Kinetics of Free Radical and Ionic Polymerisation Kinetic Chain Length 2.3 Synthesis of Graft and Block Co-Polymers. 2.4 Techniques of Polymerisation- Bulk, Solution, Suspension, Emulsion, Melt Polycondensation, Solution Polycondensation, Interfacial Condensation, Solid and Gas Phase Polymerisation. 2.5 Stereospecificity in Polymers, Tacticity	K1-K5	15	1-5
3.	Molecular Weight and Properties of Polymers 3.1 Molecular Weight of Polymers-Number Average and Weight Average, Molecular Weight Distribution, Determination of Molecular Weight 3.2 Glass Transition Temperature-State of Aggregation and State of Phase Transitions, Factors Influencing Glass Transition Temperature, Importance of Glass Transition Temperature, Heat Distortion Temperature. 3.3 Crystallinity of Polymers: Crystalline Behaviour, Degree of Crystallinity 3.4 Reactions of Polymers-Hydrolysis, Acidolysis, Aminolysis, Addition and Substitution Reactions (One Example Each) 3.5 Cyclisation, Cross-Linking and Reactions of Specific Functional Groups in the Polymer	K1-K5	15	1-5
4.	Polymer Degradation 4.1 Types of Degradation - Thermal, Mechanical, Ultra Sound, Photo Radiation and Chemical Degradation Methods 4.2 Rubber-Natural and Synthetic-Structure, Mechanism of Vulcanisation 4.3 Biodegradable and Non-Biodegradable Polymers	K1- K5	12	1-5
5.	Practical (To be assessed internally) 5.1 Systematic analysis of polymers 5.2 Synthesis of Phenol-Formaldehyde Resin/Urea Formaldehyde Resin 5.3 Synthesis of Polymethylmethacrylate (PMMA) 5.4 Determination of the Molecular Weight of Polyvinyl Alcohol (PVA) using Oswald Viscometry	K1-K5	13	1-5

OBJECTIVE OF THE COURSE

- To provide basic knowledge in computing techniques and software and their relationship to chemistry
- To enable students to apply computing techniques and software to solve problems in Chemistry
- To familiarise on existing databases and their application in cheminformatics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recognise the short cut keys and tools in MS word, MS Excel, MathCad, Chemdraw, Chem 3D Pro and Origin.	K1
CO2	discuss the different tools used in MS word, MS Excel, MathCad, Chemdraw and Chem 3D Pro and databases used in drug discovery and molecular structure representations.	K2
CO3	apply different tools in MS Excel, MathCad, Chemdraw and Chem 3D Pro software to solve numerical problems, graphical problems and to draw reaction schemes/mechanisms.	K3
CO4	analyse the nature of compounds, 2D and 3D structures, stereochemistry using Chemdraw & Chem 3D Pro, shapes of orbitals using Polar plot and 3D plot wizard in MathCad and the data given by statistical and graphical tools in MS Excel and MathCad software.	K4
CO5	evaluate theoretical and experimental data of physical and analytical chemistry problems through MS Excel and MathCad, ¹ HNMR, ¹³ C NMR and Mass fragmentation patterns of compounds using Chemdraw and Chem 3D Pro.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Data Processing and Analysis 1.1 Elements of Computer Architecture - Creating, Editing, Naming, Renaming and Locating Files, Folders, Directory 1.2 Components of Excel - Spreadsheets, Database, Chart & Building Workbooks 1.3 Building Formulae, User Made and Statistical Functions, Formatting Cells 1.4 Managing and Organizing Data - Creating Link, Analysing Data 1.5 Solving numerical problems in Chemistry (Precision and Accuracy), Standard Deviation using Spectral Data	K1 – K5	15	1-5
2.	Introduction to Graphs 2.1 Introduction to Charts - Types, Creating Charts from a Table, Reviewing Graphs 2.2 Solving Problems through Plotting graphs and using Theoretical and Experimental Data. Trend Line Addition and Determining the Slope and Intercept 2.3 Demonstration of ORIGIN software	K1 – K5	15	1-5
3.	Introduction to MathCad 3.1 Eigen Values and Eigen Vectors of Matrices 3.2 Differential and Integral Calculus 3.3 Histograms, Extrapolation and Interpolation in Graphs, Curve Cutting Integration methods 3.4 Regression Analysis of Experimental Data and its Related Techniques 3.5 Solutions for Simultaneous Equations by Matrix Methods	K1-K3	10	1-3
4.	CHEM Draw & CHEM 3D Pro 4.1 Using CHEM DRAW for Writing Chemical Equations and Representing Schemes of Reaction Mechanisms, Editing, Transporting as Picture to Word Document 4.2 Using CHEM 3D PRO for Building Molecules and for Measurement of Bond Angles, Bond Energy, Energy Minimization 4.3 Use of Internet in Chemical Research - XRD, IR, NMR Data	K1 – K5	15	1-5
5.	Molecular Mechanics (To be tested internally) 5.1 Introduction to Cheminformatics - 2D Databases - Explore -Structure, Substructure, property and similarity search	K2 - K3	10	2-3

UNIT	CONTENT	CL	Hrs	CO
	5.2 Representation and manipulation of 2D Molecular Structures, 3D Databases: experimental data sources, Chemical Databases – CHEMDB, KEGG LIGAND, CAS REGISTRY, Chemical finding methods – structure, sub structure, similarity in structure and reaction

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600086

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SYLLABUS

(Effective from the academic year 2023-2024)

FOOD CHEMISTRY

CODE: 23CH/ME/FC45

CREDITS: 5

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To create awareness of the chemistry of different constituents of food
- To provide understanding of food laws, chemical bases of food component reactivity and functionality
- To facilitate skill development for manipulating the chemical and/or functional properties of foods

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	CO DESCRIPTION	CL
CO1	recall the constituents of food, nutritional aspects of diet, food laws and quality control	K1
CO2	illustrate the knowledge of the constituents of food, food additives, nutritional and balanced diet, food laws and food quality control	K2
CO3	analyse the effectiveness of a diet from its constituents	K3
CO4	evaluate the calorific value of food containing various constituents, the presence of adulterants and the type of diet based on BMR	K4
CO5	integrate the calorific value of food, the diet associated with it, effect of adulterants in accordance with food laws.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Constituents of Food 1.1 Carbohydrates and lipids- composition, classification, sources, functions, physical & chemical parameters., functions of sugar in food (Browning reaction), changes during cooking and processing. Lipids – composition, nomenclature, saturated, unsaturated fatty acids, classification, food sources, functions of fats. Physical and chemical properties, emulsions, Role of food lipids in flavour.	K1- K5	16	1-5

UNIT	CONTENT	CL	Hrs	CO
	<p>1.2 Proteins – composition, classification sources, functions, denaturation, and protein deficiency, determination of protein quality.</p> <p>1.3 Minerals and Vitamins - Sources, functions, bioavailability and deficiency of the following minerals - calcium, iron, iodine, fluorine, sodium and potassium (elementary treatment). Vitamins - classification, sources, functions and deficiencies (A, D, E, K, C, B complex - riboflavin, thiamine, Folic acid, B₆ and B₁₂). Effect of cooking on vitamins and minerals</p> <p>1.4 Water as a nutrient, function, sources, requirement, structure, water balance – effect of deficiency. Moisture in food: Hydrogen bonding, Bound water, Free water, Water activity and Food stability</p>			
2.	<p>Food additives</p> <p>2.1 Definitions of Food Additives, Classification and Functions - Legitimate uses of additives in foods, Intentional and Non-Intentional additives, Indirect food additives, Food in formulation. Additives such as colour, preservatives (Class I and Class II preservatives as per FSSAI), antioxidants, emulsifiers, sequestrants, Humectants and stabilizers-Uses</p> <p>2.2 Significance of natural pigments in food – Chlorophylls, Carotenoids. Pigments in food and their industrial applications.</p> <p>2.3 Flavours – Types of food flavours-natural and artificial, flavours generated during processing, Low calorie and non-nutritive sweeteners, flour improvers and acidulants- uses and functions in formulations</p> <p>2.4 Toxicological evaluation of food additives</p>	K1- K5	12	1-5
3.	<p>Nutrition and Balanced Diet</p> <p>3.1 Nutrition – Food as source of Energy –energy value of food Unit of energy, food as a source of energy, energy value of food, the body's need for energy, Utilization of food for energy requirements, calorific value of food –Respiratory quotient of food B.M.R (Basal Metabolic Rate). Activities – factors influencing BMR, specific dynamic action (SDA) of food. Thermogenic effect, Energy requirements of young women (age group -18-25; 26-46; 46 -60)</p> <p>3.2 Nutritional value of carbohydrates and Protein, diets and its components, the protein requirements – biological value of proteins, supplementary value of proteins– Fibre in the diet, dietary sugars – nutritional aspects of lipids.</p>	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	3.3 Millets - Types, components, functions and significance, Millets as a supplement to rice and wheat.			
4.	Food quality control 4.1 Quality Control and its importance, Quality Assurance 4.2 HACCP (Hazard Analysis Critical Control Point)) Food Laws- PFA, Salient features of P.F.A., Misbranded / adulterated Food, Brief Outline of Labelling Provisions Under PFA, Food Acts - BIS, FPO, Essential Commodities, Consumer Protection, Agricultural Produce (AGMARK), FSSAI 4.3 Role and Functions of Implementing Agencies with references to Indian Scenario. Tips to Consumers for Buying Safety Food 4.4 Sensory Characteristics of Food, Factors affecting Food Acceptance - Sensory and Psychological. Objective Method of Sensory Evaluation	K1- K5	12	1-5
5.	Practical (To be assessed internally) 5.1 Simple healthy preparations using millet and quinoa <ul style="list-style-type: none"> • Salad • Dosa • Idly • Ladoo • Quinoa dosa • Pongal 	K1- K5	13	1-5

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SYLLABUS

(Effective from the academic year 2023–2024)

PROJECT

CODE: 23CH/ME/PR45

CREDITS: 5

OBJECTIVES OF THE COURSE

- To provide understanding of the principles and concepts of the project topic
- To facilitate critical thinking and problem solving
- To impart skills required to carry out chemical reactions in a laboratory
- To encourage independent research and report writing

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	CO DESCRIPTION	CL
CO1	define the research problem and plan the course of action	K1
CO2	demonstrate critical thinking, problem solving and analytical reasoning to solve scientific problems	K2
CO3	perform chemical reactions in a laboratory using standard procedure and safety precautions	K3
CO4	communicate the results of the scientific work done in oral and written format	K4
CO5	design and carry out scientific experiments, record and analyse the results of the experiments	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

GUIDELINES FOR PROJECT

- Project should be done individually.
- Each student will choose a topic of her interest and the student will be assigned to a supervisor
- The project will require practical work with the submission of a project report. It should include experimental lab work.
- The duration of the project work is one semester
- The project report should be submitted in the prescribed format containing a minimum of 30 pages.
- The report should be enhanced with graphs, spectra, tables and/or photographs
- Each candidate has to give three periodical reviews to the internal guide on the scheduled dates prescribed by the Department

- Each candidate will submit 3 hard copies of the project thesis and submit on the scheduled date.
- The student will appear for viva voce before a panel comprising the External Examiner, supervisor and Head of the Department

PATTERN OF EVALUATION

INTERNAL

Total Marks: 50

CONTENT	COGNITIVE LEVEL	MARKS
Research statement and methodology	K1-K2	10
Documentation	K1-K4	15
Periodic review	K1-K6	25

EXTERNAL

Total Marks: 50

CONTENT	COGNITIVE LEVEL	MARKS

COSMETICS AND PERSONAL CARE

CODE: 23CH/GE/CP22

CREDITS: 2

L T P: 2 0 0

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To introduce the concept of cosmetology
- To enable understanding of the importance of personal care
- To stimulate interest in the chemical formulations used in cosmetics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	list the different aspects of skin, hair, personal care and cosmetics	K1
CO2	classify different types of hair, skin, beauty treatments and cosmetics	K2
CO3	select the correct cosmetic for personal care	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1.	Skin Care 1.1 Skin - Structure and Functions- pH and Moisture Balance, Maintenance of Skin 1.2 Types of Skin - Dry Skin, Oily Skin, Wrinkled Skin 1.3 Cleansing of Skin, Creams and Lotions, Astringent and Skin Tonics, Skin Lighteners, Depilatories, and Food Habits Related to Skin Care.	K1-K3	8	1-3
2.	Scalp and Hair Treatments 2.1 Structure of Hair, Growth and Type of Hair 2.2 Shampoos and Conditioners, Hair Styling Products, Hair Ironing and Methods of Colouring/ Dyeing- Precautionary Measures 2.3 Personal Care and Cleanliness of Hair.	K1-K3	8	1-3

UNIT	CONTENT	CL	Hrs	CO
3.	Beauty Treatments 3.1 Facials – Types, Advantages and Disadvantages 3.2 Lipstick, Eyeliner, Mascara, Eye Shadow - Chemical Composition 3.3 AHA Exfoliation, Facial - Galvanic, High Frequency, Aroma Therapy 3.4 Toxicology of Cosmetics 3.5 Demonstration by Experts in the Field of Cosmetology	K1-K3	10	1-3

FOOD QUALITY AND DETECTION OF FOOD ADULTERATION

CODE: 23CH/GE/FA22

CREDITS: 2

L T P: 1 0 1

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable understanding of the legislative aspects in food quality control
- To communicate the importance of buying safe food and understanding nutritional labels
- To use the simple Home Kit to detect food adulteration in common food items

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall food laws and the role and functions of the implementing agencies in India	K1
CO2	recognize the functions of food additives, importance of food labels and simple tests to detect adulterants in common food samples	K2
CO3	demonstrate the simple Home Kit to detect food adulteration	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1.	Food Quality Control 1.1 Quality Control and its importance, Quality Assurance, HACCP 1.2 Food Laws: Prevention of Food Adulteration Act, BIS Act, FPO Act, Essential Commodities Act, Consumer Protection Act, Agricultural Produce Act (AGMARK), FSSAI, Drug License and WHO Standards 1.3 Salient Features of P.F.A., Misbranded Food, Brief Outline of Labeling Provisions Under P.F.A 1.4 Role and Functions of Implementing Agencies with references to Indian Scenario. Tips to Consumers for Buying Safety Food 1.5 Sensory Characteristics of Food, Factors affecting Food Acceptance - Sensory and Psychological. Objective Method of Sensory Evaluation	K1-K3	9	1-3

UNIT	CONTENT	CL	Hrs	CO
2.	Food Additives 2.1 Artificial Sweeteners – Saccharin, Cyclamate, Aspartame, Food Flavours – MSG, Esters, Aldehydes and Heterocyclic Compounds, Antioxidants, Food Colours – Permitted and Non-permitted colours, Emulsifying Agents, Preservatives, Leavening Agents - Baking Powder and Yeast	K1-K3	4	1- 3
3.	Practical (to be tested internally) 3.1 Assessment of Food Quality - Sensory Evaluation Rating Test – Hedonic, Numerical Scoring Test, Descriptive Test – Flavour Profile 3.2 Detection of Adulterants: Chicory and Tamarind Seed Powder in Coffee Powder, Non-Permitted Colours in Tea and Dhal, Metanil Yellow in Turmeric Powder, Kesari Dhal and Toor Dhal, Castor Oil in Coconut Oil, Papaya Seeds and Rotten Pepper in Pepper, Brick Powder in Chilli Powder, Washing Soda in Jaggery, Vanaspati in Ghee, Chalk Powder in Salt and Sugar, Non-Permitted Colours in Jams, Jelly, Juices and Saccharin in Supari	K1-K3	13	1-3

**General Elective Course offered by the Department of Chemistry for
B.A. / B.Sc. / B.Com. / B.V.A Degree Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

BASIC NUTRITIONAL CHEMISTRY

CODE: 23CH/GE/BN22

CREDITS: 2

L T P: 2 0 0

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable understanding of the fundamental aspects of nutrition
- To introduce healthful lifestyle as a way of living
- To create awareness of the consequences of overnutrition and malnutrition
- To communicate the importance of nutritional labels and allergy warnings

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	outline the importance of nutrition in the maintenance of good health	K1
CO2	discuss the role of nutrients and their properties	K2
CO3	apply nutrition concepts to improve the health of self and community	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1.	Nutrition and Health 1.1 Definition - Nutrition, Health and Disease; Nutrients – Macronutrients - Carbohydrate, Protein, Fat, Water - Micronutrients - Vitamins and Minerals 1.2 Under Nutrition, Over Nutrition, and Malnutrition; Diet Recommendations for Optimal Health 1.3 Mandatory and Optional Inclusions on Nutrition Labels, Claims on Labels, Allergy Warnings	K1- K3	9	1-3
2.	Indicators of Health 2.1 Body Mass Index (BMI) – Calculation, Limitations; Body Fat and its Distribution 2.2 Health Risk – Obesity, Underweight - Anorexia Nervosa, Bulimia, Binge Eating Disorder 2.3 Recommendations for Weight Management - Dietary, Behavioural, and Physical Activity	K1- K3	7	1-3

UNIT	CONTENT	CL	Hrs	CO
3.	Nutrition through Life 3.1 From Childhood to Adulthood 3.2 Dietary Food Trends - Functional Foods, Conventional Foods, Modified Foods and Medical Foods 3.3 Popular Diets - GM Diet, DASH Diet, Gluten-Free Diet, Low-Carb Diets, The Macrobiotic Diet, the Mediterranean Diet, Vegetarian and Vegan Diets	K1- K3	10	1-3

FORENSIC CHEMISTRY

CODE: 23CH/GE/FC22

CREDITS: 2

L T P: 2 0 0

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable understanding of the fundamental aspects of criminology and forensic science
- To create awareness of the different types of explosives and firearms
- To communicate the importance of collecting evidence and the methods of analysing them

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	name physical and biological evidence and describe the various methods to process them	K1
CO2	describe the role of evidence, firearms and explosives in forensic science	K2
CO3	apply scientific methods in crime detection	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Criminalistics 1.1 Investigating the Crime Scene - Documenting the Scene and the Evidence, Recognition of Physical Evidence Collection, Preservation, Inventory, and Transportation of Physical Evidence 1.2 Investigating and Processing Physical Evidence - Types of Evidence, the Modern Crime Lab, Functions of a Forensic Scientist, Characteristics of Physical Evidence	K1- K3	6	1-3
2.	Trace, Physical and Biological Evidence 2.1 Forensic Identification of Hair, Fibre, Paint and Glass 2.2 Fingerprints - Characteristics of Fingerprints, Methods for Developing Fingerprints, Preservation of Fingerprints, Handwriting, Typed and Word-processed documents, Photocopied Documents	K1- K3	10	1-3

UNIT	CONTENT	CL	Hrs	CO
	2.3 Forensic Methods for Determination of Metals and Gunshot Residue, Techniques for the Analysis of Inorganic Materials, Drugs of Abuse 2.4 Forensic Toxicology- Measurement of Blood, Alcohol Breath Test for Alcohol 2.5 Biological Fluids - Blood, Semen, Saliva. Forensic DNA Typing			
3.	Fire - Arson and Explosives 3.1 Firearms - Ammunition, Ballistics, Laboratory Examination of Firearm Evidence 3.2 Arson - Evidence from Fire affected Area – Combustible Burning Characteristics – Nature of Combustion 3.3 Explosives – Classification of explosives – low explosives and high explosives. Homemade explosives. Military explosives. Blasting agents, Synthesis and characteristics of TNT, PETN and RDX. Explosion process. Bomb scene management. Evidence from the Scene of Explosion, Post blast residue collection and analysis. Blast injuries. Detection of hidden explosives	K1- K3	10	1-3

CHEMISTRY IN EVERYDAY LIFE

CODE: 23CH/GE/CE22

CREDITS: 2

L T P: 2 0 0

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To impart knowledge about the chemicals used in everyday life
- To create an awareness about food additives and hazards of non-permitted food additives
- To introduce the chemistry and toxicology of cosmetics
- To promote interest in entrepreneurship in food products, nutraceuticals and cosmetics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define terms in food additives, pharmaceuticals and cosmetics	K1
CO2	explain the role and functions of food additives, pharmaceuticals and cosmetics in everyday life	K2
CO3	apply the concepts of food additives, pharmaceuticals and cosmetics in the maintenance of good health	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1.	Food Additives 1.1 Food Colours - Permitted and Non-Permitted, Artificial Sweeteners – Aspartame, Saccharin and Cyclamate, Preservatives - Natural and Synthetic, Flavours – Monosodium glutamate. 1.2 Stabilising and Suspending Agents - Gelatine, Pectin. Toxic Effects of Food Additives	K1-K3	9	1-3
2.	Pharmaceuticals and Nutraceuticals 2.1 Antimalarials, Antipyretics, Analgesics, Antiseptics, Antibiotics-Antacids, Antihistamines, Chemotherapy – Definition and Therapeutic Uses. Diabetes - Types and Causes 2.2 Nutraceuticals – Vitamins - Water and Fat Soluble, Minerals and Trace Elements, Antioxidants. Role of Nutraceuticals in Disease Prevention- Diabetes and Cancer	K1-K3	8	1-3

UNIT	CONTENT	CL	Hrs	CO
3.	Cosmetics 3.1 Skin Products, Soaps and Shampoos –Creams and Lotions, Lipstick and Hair Dye 3.2 Perfume – General Formulation, Deodorants and Antiperspirants 3.3 Toxicology of Cosmetics	K1-K3	9	1-3

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SYLLABUS

(Effective from the academic year 2023-2024)

INDUSTRIAL CHEMISTRY

CODE: 23CH/UI/IC23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To enable understanding of the classification and applications of fuels
- To introduce the steps involved in industrial waste management
- To facilitate understanding of paper and dye industries
- To present the properties and applications of synthetic polymers

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Outline the processes involved in fuels, waste treatment, synthetic polymers, oils and waxes and the paper and dye industries.	K1
CO2	Discuss the classification of fuels, industrial waste treatment methods, properties of synthetic polymers, oils and waxes, papers and dyes.	K2
CO3	Demonstrate the applications of fuels, waste disposal, oils and waxes, papers and dyes.	K3
CO4	Analyse the properties of fuels, methods used for waste disposal, recycling of polymers, types of oils, fats, soaps and waxes and environmental impact of the paper and dye industry.	K4
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse		

UNIT	CONTENT	CL	CO
1.	Fuels and Combustion 1.1 Introduction - Classification of fuels, characteristics of a good fuel. Calorific value of a fuel. Solid fuels-wood. 1.2 Coal - Classification of coal, analysis of coal and its significance 1.3 Liquid Fuels: Petroleum, cracking, advantages of catalytic cracking over thermal cracking, synthetic petrol	K1- K4	1-4
2.	Industrial Waste and Treatment Process 2.1 Types of industrial waste, treatment of disposal of industrial waste or effluent with organic and inorganic impurities.	K1- K4	1-4

UNIT	CONTENT	CL	CO
	2.2 Characterization of waste water by physical and chemical characteristics 2.3 Primary treatment: Sedimentation, neutralization, coagulation, equalization, grid removal. 2.4 Secondary treatment: Aerobic treatment, oxidation ponds, oxidation ditches, trickling filters, activated sludge process, aerated lagoons, anaerobic treatment. tertiary treatment: reverse osmosis, electrodialysis, desalination 2.5 Industrial Effluents: Characteristics and treatment options for effluents from various industries: Textiles and dyes, paper and pulp, leather, food and dairy, fertilizers, electroplating industries, distilleries 2.6 Sewage treatment 2.7 Water conservation, recycling of waste water and rain water harvesting		
3.	Synthetic Polymers 3.1 Requirement of a fibre, difference between natural fibre and synthetic fibre, properties 3.2 Applications of synthetic fibre – nitro cellulose, rayon, cuprammonium acetate, rayon, viscose rayon, nylon 66 and terylene. 3.3 Different types of plastics, recycling of plastics	K1- K4	1-4
4.	Oils, Fats, Waxes and Soaps 4.1 Distinction between oils and fats. Classification and properties of animal fats and oils. Difference between animal, vegetable and mineral oil, essential oils and classification of waxes 4.2 Soaps and detergents - classification, cleansing action of soaps and detergents. Enzymatic detergents, non-degradable and biodegradable detergents	K1- K4	1-4
5.	Papers and Dyes 5.1 Types of paper - paper stability, environmental impact of paper, applications of paper- thickness, weight and size of paper 5.2 Classification of dyes, general methods of applications of dyes on fibre 5.3 Dyes as food colours - yellow aniline dyes, metanil yellow, beta-oxalyl-amino alanine and lead chromate	K1- K4	1-4

SYLLABUS

(Effective from the academic year 2023-2024)

DRUGS AND DISEASES

CODE: 23CH/UI/DD23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To provide understanding of medicines used in everyday life
- To introduce the role of drugs in common diseases
- To facilitate understanding of the therapeutic uses of drugs

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Define important terms used in the study of Pharmaceutical Chemistry	K1
CO2	Describe common diseases and their treatment processes	K2
CO3	Illustrate the use of drugs in various health disorders	K3
CO4	Analyse different drugs based on their mechanism of action	K4
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse		

UNIT	CONTENT	CL	CO
1.	General Introduction to Drugs 1.1 Definitions: Pharmacy, Pharmacology, Pharmacodynamics, Pharmacokinetics, Antimetabolites, Bacteria, Virus, Fungi, Mutation, Pharmacognosy, Toxicology, Pharmacotherapeutics, Chemotherapy, Therapeutic Index 1.2 Classification of Drugs-Biological, Chemical and Commercial Classification, Prescribed Drugs and over-the Counter-Drugs. Side Effects and Contra Indications	K1- K4	1-4
2.	Common Diseases and their treatment by Drugs 2.1 Some Common Diseases: Insect Borne – Malaria; Air Borne Diseases – Whooping Cough, Measles, Common Cold and TB; Waterborne Diseases - Cholera, Typhoid, Dysentery - Aetiology, Symptoms, Prevention and Remedy	K1- K4	1-4

UNIT	CONTENT	CL	CO
	2.2 Some Common Disorders of the Digestive System – Jaundice; Respiratory System - Asthma; Nervous System - Epilepsy - Prevention and Treatment 2.3 Aids – Causes, Prevention and Treatment		
3.	Blood and Haematological Agents 3.1 Blood Pressure, Hypertension - Cause, Prevention and Treatment, Antihypertensive Agents – Aldomet and Reserpine 3.2 Clotting of Blood - Mechanism, Haematological Agents, Anaemia – Causes and Control, Anti-anaemic Drugs 3.3 Cardiovascular Diseases - Cardiac Glycosides – Digoxin, Antiarrhythmic Drugs - Quinidine - Dosage and Therapeutic uses, Calcium Blockers	K1- K4	1-4
4.	Drugs of Importance – I 4.1 Anaesthetics: Types - General – Nitrous Oxide, Ether, CHCl ₃ , Halothane; Local - Cocaine, Intravenous - Advantages and Disadvantages 4.2 Antiseptics and Disinfectants - (Phenols, Chloramines, Bleaching Powder, Boric Acid, Iodine, Zinc Oxide, Dyes-Crystal Violet) 4.3 Analgesics, Anti Pyretic and Anti-Inflammatory Agents - Narcotic and Non-narcotic drugs – Morphine. Source, Activity and uses of Pethadine, Aspirin, Paracetamol, Phenyl Butazone and Ibuprofen	K1- K4	1-4
5.	Drugs of Importance – II 5.1 Antibiotics - Classification - Therapeutic uses of Chloramphenicol, Penicillin - Streptomycin, Tetracyclines, Erythromycin, Amoxycillin, Ciprofloxacin 5.2 Antidepressants - Sedatives and Hypnotics - (Barbiturates), Types of Diabetes, Hypoglycaemic Agents, Sugar Substitutes 5.3 Antineoplastic Drugs - Types, Common Causes and Treatment of Cancer - Antineoplastic Agents; Antihistamines	K1- K4	1-4

SYLLABUS
(Effective from the academic year 2023 – 2024)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CEHNNAI – 600 086

DEPARTMENT OF BOTANY

PROGRAMME DESCRIPTION

The B. Sc. Programme in Plant Biology and Plant Biotechnology offers a comprehensive blend of classical and contemporary branches in botany and biotechnology. The first year focuses on the study of the lower groups of plants and on the basics of biotechnology. The second year deals with an in-depth study of branches like taxonomy, anatomy and phytotherapy. The final year includes the study of genetics, ecology, cell and molecular biology, microbiology, physiology and applied biotechnology. Regular practical sessions with tests and examinations are held at designated times. On completion of the programme, the student will have a thorough knowledge of the subject in both theory and applications through practical work, which in turn will provide a platform for a promising career as well as higher studies in botany and biotechnology.

VISION OF THE DEPARTMENT

Encourage students to become self-reliant individuals and meet modern challenges with rich knowledge and experience through innovative research, teaching and learning in plant science.

MISSION OF THE DEPARTMENT

- To strengthen the teaching-learning process through innovative practice, scientific inquiry and the spirit of academic discovery.
- To instill values and provide holistic education to students with an enhanced focus on underprivileged communities.
- To provide excellent infrastructure and human resources to create a better educational environment.
- To impart entrepreneurial and life skill training in order to aid employability.
- To sensitise students to environmental challenges and the need to conserve natural resources

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600086

DEPARTMENT OF BOTANY

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Sc. Plant Biology and Plant Biotechnology Programme, the students will be able to

PSO1	Comprehend the impact of plant science on society and the need to conserve the plant diversity
PSO2	Analyse, interpret and critically assess the utility of plants for the future health care and food production
PSO3	Identify and analyse the morphological structure, anatomical features and reproduction of the different forms of plant life
PSO4	Acquire sound knowledge and develop skills in recognizing, identifying and classifying plants and gain awareness on the biodiversity and ecosystems
PSO5	Demonstrate entrepreneurial and practical skills in advanced techniques in plant sciences and pursue research in plant science and plant biotechnology and equip the students to compete in various competitive examinations

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT
BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023-2024)

ALGAE, FUNGI AND LICHENS

CODE:23BT/MC/AF14

CREDITS:4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- recognize and appreciate the diversity of lower plants.
- outline the classification of Algae and Fungi.
- summarize the structure and life cycle patterns of selected forms of Algae, Fungi and Lichen.
- understand Lichen structure and reproduction, comprehend its symbiotic relationship and its uses.
- explore the economic importance of Algae, Fungi and Lichens.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and summarize the general characteristics and classification of Algae, Fungi and lichens	K1
CO2	explain and Illustrate the characteristic features, life cycle of forms prescribed in the syllabus	K2
CO3	analyse and differentiate the morphological, anatomical, reproductive and economic importance of selected Algae, Fungi and Lichens	K3
CO4	compare the life cycle of selected forms of Algae and Fungi	K4
CO5	discuss and compile the life cycle of selected forms of Algae and Fungi	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	ALGAE 1.1 General Characteristics of Algae 1.2 Classification of Algae (F.E. Fritsch, 1935) 1.3 Characteristics features of Algal Classes 1.4 Detailed study of the Thallus Organisation, Reproduction and Life cycle pattern of the following forms (excluding the developmental stages): Myxophyceae – <i>Nostoc</i> 1.5 Chlorophyceae – <i>Volvox</i> , <i>Chlorella</i> , <i>Cladophora</i> <i>Caulerpa</i> and <i>Chara</i>	K1 – K5	13	1-5
2	ALGAE 2.1 Bacillariophyceae – <i>Navicula</i> 2.2 Phaeophyceae – <i>Sargassum</i> 2.3 Rhodophyceae – <i>Gracilaria</i> 2.4 Economic importance of Algae	K1- K5	13	1-5
3	FUNGI 3.1 General Characteristics of Fungi 3.2 Classification of Fungi (Alexopoulos and Mims, 1979) 3.3 Characteristics features of Fungal classes 3.4 Detailed Study of the Thallus Organisation, Reproduction and Life Cycle Pattern of the following forms (excluding the developmental stages): Chytridiomycetes – <i>Synchytrium</i> 3.5 Plasmodiophoromycetes - <i>Plasmodiophora</i> 3.6 Oomycetes – <i>Albugo</i>	K1 – K5	13	1-5
4	FUNGI 4.1 Ascomycetes – <i>Aspergillus</i> , <i>Peziza</i> 4.2 Basidiomycetes - <i>Puccinia</i> , <i>Agaricus</i> 4.3 Economic importance of Fungi	K1- K5	13	1-5
5	LICHENS 5.1 General characteristics of Lichens 5.2 Classification of lichens 5.3 Structure and Reproduction – <i>Usnea</i> 5.4 Ecological importance of Lichens	K1- K5	13	1-5

PATTERN OF ASSESSMENT

No Unit should be left out

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the binomial)	K1	1 – 10	10 (10 x 1 = 10)
B (4 out of 5 to be answered)) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	11 – 15	8 (4 x 2 = 8)
C (Internal choice) Paragraph	K3 / K3	16 or 17	6 (1 x 6 = 6)
	K4 / K4	18 or 19	6 (1 x 6 = 6)
D (Internal choice) Essay	K5 / K5	20 or 21	20 (1 x 20 = 20)
Total			50

Other Components:**Total Marks: 50**

Quiz/ Assignment/ Seminar/ Scrapbook/ Poster presentation/ Model making

End- Semester Examination:**Total Marks: 100****Duration: 3 hours**

Section	Cognitive Level	Question number	Mark distribution
A Objective (Choose the correct answer, Fill in the blanks, True or False, Match the following,)	K1	1 - 20	20 (20 x 1 = 20)
B (8 out of 10 to be answered) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	21 - 30	16 (8 x 2 = 16)
C (Internal choice) (Two questions at each level with Internal choice) Paragraph	K3 / K3	31 or 32, 33 or 34	12 (2 x 6 = 12)
	K4 / K4	35 or 36, 37 or 38	12 (2 x 6 = 12)
D (Two questions at each level with Internal choice) Essay	K5 / K5	39 or 40, 41 or 42	40 (2 x 20 = 40)
Total			100

ALGAE, FUNGI AND LICHENS-PRACTICAL

CODE: 23BT/MC/P112

CREDITS: 2

L T P:0 0 3

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

To enable the students to

- identify the microalgae in a mixture and to differentiate microscopic and macroscopic fungi
- classify the Algal, Fungal and Lichen forms based on morphology.
- acquire the skill of sectioning of Algal, Fungal and Lichen specimens
- examine and analyse the vegetative and reproductive structures of various forms of algal, Fungal and Lichen through microscopic preparations.
- acquire the skill of preparing herbarium

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify Algae, Fungi and Lichens using key identifying characters	K1
CO2	classify the Algal, Fungal and Lichen forms based on morphological features	K2
CO3	examine the morphological, anatomical and reproductive structure of Algae, Fungi and Lichens	K3
CO4	demonstrate the practical skills in preparation of fresh mount and identify the forms in Algae, Fungi and Lichens	K4
CO5	develop practical skills in identification of forms in Algae, Fungi and Lichens and acquire the skill of herbarium preparation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	ALGAE Morphological study of the following Algal forms – 1. Myxophyceae - <i>Nostoc</i> 2. Chlorophyceae - <i>Volvox</i> , <i>Chlorella</i> , <i>Cladophora</i> , <i>Caulerpa</i> and <i>Chara</i> 3. Bacillariophyceae - <i>Navicula</i> 4. Phaeophyceae - <i>Sargassum</i> 5. Rhodophyceae - <i>Gracilaria</i>	K1- K5	13	1-5
2	FUNGI Morphological study of the following Fungal forms - 1. Chytridiomycetes - <i>Synchytrium</i> 2. Plasmodioph oromycetes - <i>Plasmodiophora</i> 3. Oomycetes - <i>Albugo</i> 4. Ascomycetes – <i>Aspergillus</i> , <i>Peziza</i> 5. Basidiomycetes - <i>Puccinia</i> , <i>Agaricus</i>	K1- K5	13	1-5
3	LICHENS A general study of various types of Lichens – 1. Crustose 2. Foliose 3. Fruticose	K1- K5	13	1-5
4	FIELD TRIP & HERBARIUM 1. Field trip to observe the Algae, in its natural habitat and submission of herbarium sheets 2. Herbarium - Algal specimen (1sheet), Fungal infected plants (2 sheets) and photograph of as many Algae and Lichens to be submitted at the time of examination 3. Visit to Algal and Fungal industries to gain knowledge on their importance	K1- K5	13	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 3 hours

Section	Question	Marks Allotted	Cognitive Levels
A	Identification and Sectioning	16	K5
	Mounting and Slide submission	4	K4
B	Algal mixture	5	K3
C	Spotter (Algae, Fungi and Lichens)	15	K1
D	Submission of Record work	10	K2
Total		50	

End-Semester Examination:**Total Marks: 50****Duration: 3 hours**

Section	Question	Marks Allotted	Cognitive Levels
A	Identification and Sectioning	16	K5
	Mounting and Slide submission	4	K4
B	Algal mixture	5	K3
C	Spotter (Algae, Fungi and Lichens)	15	K2
D	Spot at sight (Algae, Fungi and Lichen)	6	K1
E	Herbarium submission	4	K2
Total		50

OBJECTIVES OF THE COURSE

To enable the students to

- Describe the morphological and anatomical features Algae and Fungi
- Elucidate the life cycle patterns of lower plants
- Recollect and summarize the principles of plant systematics
- Identify and classify the various types of plant diseases
- Familiarize and appreciate the importance of sustainable agriculture

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and explain the general characteristics of Algae and Fungi, identify the plant diseases of crop plants; to explore suitable control measures, derive the family and describe them in technical terms and list the agricultural practices	K1
CO2	illustrate the structural details of lower forms, identify the causal organisms of plant diseases, assign the plants to the respective families, summarize the cultural practices in agriculture.	K2
CO3	analyse the vegetative and reproductive structure of Algae and Fungi; categorize the common plant diseases and their control measures	K3
CO4	construct and compare the life cycle patterns of Algae, Fungi and flowering plants; Evaluate the characteristics of flowering plants, summarize the practices involved in sustainable agriculture.	K4
CO5	compile the characteristic features of Algae, Fungi and Angiosperms; Explore and appreciate the economic value of Angiosperm	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Algology 1.1 Salient features of Algae 1.2 A detailed study of the Life Cycle of the following Algae (no development) a. <i>Nostoc</i> b. <i>Chara</i> c. <i>Sargassum</i>	K1- K5	10	1-5
2	Mycology 2.1 Salient features of Fungi 2.2 A detailed study of the Life Cycle of the following Fungi (no development) a. <i>Rhizopus</i> b. <i>Aspergillus</i> c. <i>Agaricus</i>	K1- K5	10	1-5
3	Plant Pathology 3.1 A study of the causal organism, symptoms and control measures of the following plant diseases: a. Citrus Canker b. Leaf curl of Papaya c. Red Rot of Sugarcane	K1- K5	10	1-5
4	Taxonomy 4.1 A general outline of Bentham and Hooker's Classification 4.2 A study of the salient features of the following families and their economic Importance: a. Annonaceae b. Cucurbitaceae c. Apocynaceae d. Lamiaceae e. Euphorbiaceae f. Musaceae	K1- K5	11	1-5
5	Agricultural practices 5.1 Preparation of Soil 5.2 Organic Farming 5.3 Biofertilizer 5.4 Biopesticides – Bacterial and Plant based 5.5 Mushroom Cultivation- Oyster	K1 –K5	11	1-5

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable the students to

- Identify and describe the morphological, anatomical and reproductive structures of lower plants
- Observe and differentiate the morphological and anatomical features of Algae, Fungi through permanent slides
- Identify the plant pathogen through visualization of infected parts of the plants
- Assign and classify the plants to respective families based on the characters
- Dissect and describe the plants in technical terms and familiarise and appreciate the importance of sustainable agricultural practices

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect and summarize the general characteristics of Algae and Fungi; Identify plant disease; observe salient features of plants belonging to different families	K1
CO2	examine the Taxonomic characters of Angiosperms; Illustrate the vegetative and reproductive structures of Algae and fungi; Distinguish the plant disease based on symptoms.	K2
CO3	dissect the floral parts of the given Angiospermic plants; compare and analyse the structure of Algae and Fungi.	K3
CO4	summarize the characters of Algae and Fungi; compare the salient features of Angiospermic families	K4
CO5	develop the skill of observation by visualising morphological, anatomical structures of Algae and Fungi; Construct floral diagram and floral formula for the families; apply the concept of sustainability in agriculture	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	ALGAE Identification, Observation and Sketching of the following Algal forms - 1. <i>Nostoc</i> 2. <i>Chara</i> 3. <i>Sargassum</i>	K1- K5	6	1-5
2	FUNGI Identification, Observation and Sketching of the following Fungal forms - 1. <i>Rhizopus</i> 2. <i>Aspergillus</i> 3. <i>Agaricus</i> PLANT PATHOLOGY Identification, observation and sketching of the following- 1. Citrus Canker 2. Leaf curl of papaya 3. Red Rot of Sugarcane	K1- K5	8	1-5
3	TAXONOMY 3.1 Derivation (Assign the plants to their respective families) 3.2 Description in Technical Terms of Plants belonging to the Families mentioned in the syllabus 3.3 Dissection of flowers, observation and sketching of floral Parts, construction of floral diagram and floral formula	K1- K5	10	1-5
4	AGRICULTURAL PRACTICES Demonstration of microbial quality of the Biofertilizers available in the market (<i>Rhizobium</i> and <i>Azospirillum</i> , <i>Azotobacter</i>)	K1- K5	2	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 3 hours

Section	Question	Marks Allotted	Cognitive Level
A	Dissection of floral parts	15	K5
B	Derivation of family	5	K4
C	Spotter (Algae, Fungi, Plant Pathology and Agricultural practices)	20	K1-K3
D	Practical record submission	10	K2
Total		50	

End-Semester Examination:**Total Marks: 50****Duration: 3 hours**

Section	Question	Marks Allotted	Cognitive Level
A	Dissection of floral parts	15	K5
B	Derivation of family	5	K4
C	Spotter I (Algae and Fungi)	20	K3
D	Spotter II (Plant pathology and Agricultural practices)	10	K1-K2
Total		50

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23BT/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

- 1.1.1 **Six tastes** – Natural guide map towards proper nutrition
- 1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

GENERAL ZOOLOGY I-PRACTICAL

CODE: 23ZL/AC/P111

CREDITS: 1

L T P: 0 0 2

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable students to

- understand and examine the morphology and anatomy of invertebrate and chordate specimens through dissection, simulation and audio - visual demonstrations
- mount the mouthparts of insects and different types of scales of fishes
- identify and classify invertebrate and chordate specimens based upon their distinctive characteristics
- identify various parasites and insect vectors based on their distinctive features and life cycle
- familiarize students with the habits and habitat of invertebrate and chordate fauna of the campus and create awareness on biodiversity conservation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall and identify various Invertebrates and Chordates based on their distinctive characteristics and biological significance	K1, K2
CO 2	associate and illustrate the location and organization of organs and organ systems in Invertebrates and Chordates	K3
CO 3	apply the knowledge to compare the structure, functions and adaptations of various Invertebrates and Chordates	K4
CO 4	analyze the structural and functional organization of Invertebrates and Chordates	K5
CO 5	compile a document of campus fauna and use practical skills for displaying the dissections and mounts	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

BRYOPHYTES, PTERIDOPHYTES AND GYMNOSPERMS

CODE: 23BT/MC/BP24

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- recognize and appreciate the diversity of cryptogams
- outline the classifications of Bryophytes, Pteridophytes and Gymnosperms
- summarize the structure and life cycle patterns of selected forms of Bryophytes, Pteridophytes and Gymnosperms
- understand the Geological Time Scale, types of fossils and fossilization, stelar evolution, heterospory and seed habit
- explore the ecological and economic importance of Bryophytes, Pteridophytes and Gymnosperms

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and recognize the general characteristics, classification, life cycle patterns, fossil forms in Bryophytes, Pteridophytes and Gymnosperms	K1
CO2	distinguish the salient features of Bryophytes, Pteridophytes and Gymnosperms and compare types of fossilization, stelar evolution, heterospory, seed habit and their ecologic and economic importance	K2
CO3	illustrate the characteristic features and reproduction of selected forms of Bryophytes, Pteridophytes and Gymnosperms and apply the knowledge on the study of fossils, life cycles, stelar evolutions and their uses	K3
CO4	analyze the morphology, anatomy, reproduction in Bryophytes, Pteridophytes and Gymnosperms and compare the geological time scale, various fossil forms and stelar evolution with their ecological and economic importance	K4
CO5	compare the salient features, fossil forms and life cycles of Bryophytes, Pteridophytes and Gymnosperms with stelar evolution, heterospory and seed habit.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Bryophytes 1.1 Classification of Bryophyta (Proskauer, 1957) Characteristic features of classes – Hepaticopsida- Anthocerotopsida and Bryopsida 1.2 A Detailed Study of the Thallus Structure, Anatomy and Reproduction of the following (no developmental study) Hepaticopsida – <i>Marchantia</i> , Anthocerotopsida - <i>Anthoceros</i> and Bryopsida- <i>Polytricum</i>	K1-K5	13	1-5
2	Pteridophytes 2.1. Classification of Pteridophyta (Reimers, 1954) 2.2 Characteristic features of classes Lycopsida, Sphenopsida and Pteropsida 2.3. A Detailed Study of the Plant Body, Anatomy and Reproduction of the following: (no developmental study): Lycopsida – <i>Lycopodium</i> and Pteropsida – <i>Marsilea</i> 2.4 Stellar Evolution	K1- K5	13	1-5
3	Gymnosperms 3.1 Classification of Gymnospermae (Bierhorst, 1971) 3.3 Characteristic features of classes 3.3 A Detailed Study of the Plant Body, Anatomy and Reproduction of the following (no developmental study): Cycadopsida – <i>Cycas</i> , Coniferopsida – <i>Pinus</i> and <i>Gnetum</i>	K1- K5	13	1-5
4	Fossils 4.1 Introduction and Geological Time Scale 4.2 Types of Fossils and Fossilization: Compression, Impression, Incrustation, Petrification and Compaction 4.3. Fossil forms – Bryophytes – <i>Nanniatidita</i> (whole structure) Pteridophyta: <i>Lepidodendron</i> , <i>Calamitis</i> <i>Lepidostrobus</i> and Gymnosperms: <i>Williamsonia</i>	K1- K5	13	1-5
5	Life Cycle Patterns and Economic Importance 5.1 Life cycle patterns in Bryophytes, Pteridophytes and Gymnosperms 5.2 Heterospory and Seed Habit 5.3 Ecological and Economic importance	K1- K5	13	1-5

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the binomial)	K1	1 – 10	10 (10 x 1 = 10)
B (4 out of 5 to be answered)) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	11 – 15	8 (4 x 2 = 8)
C (Internal choice) Paragraph	K3 / K3	16 or 17	6 (1 x 6 = 6)
	K4 / K4	18 or 19	6 (1 x 6 = 6)
D (Internal choice) Essay	K5 / K5	20 or 21	20 (1 x 20 = 20)
Total			50

Other Components:

Total Marks: 50

Quiz/ Assignment/ Seminar/ Scrapbook/ Poster presentation/ Model making

End- Semester Examination:**Total Marks: 100****Duration: 3 hours**

Section	Cognitive Level	Question number	Mark distribution
A Objective (Choose the correct answer, Fill in the blanks, True or False, Match the following,)	K1	1 - 20	20 (20 x 1 = 20)
B (8 out of 10 to be answered) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	21 - 30	16 (8 x 2 = 16)
C (Internal choice) (Two questions at each level with Internal choice) Paragraph	K3 / K3	31 or 32, 33 or 34	12 (2 x 6 = 12)
	K4 / K4	35 or 36, 37 or 38	12 (2 x 6 = 12)
D (Two questions at each level with Internal choice) (Internal choice) Essay	K5 / K5	39 or 40, 41 or 42	40 (2 x 20 = 40)
Total			100

BRYOPHYTES, PTERIDOPHYTES AND GYMNOSPERMS – PRACTICAL

CODE:23BT/MC/P222

CREDITS: 2

L T P: 0 0 3

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

To enable the students to

- Gain expertise in hand sectioning techniques.
- Study the diversity of Bryophytes, Pteridophytes and Gymnosperms.
- Understand the morphological and anatomical structure of Bryophytes, Pteridophytes and Gymnosperms.
- Develop comprehensive skill in micro slide preparation.
- Gain insight into the fossil forms prescribed in the syllabus.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the forms of Bryophytes, Pteridophytes and Gymnosperms based on their morphological identity.	K1
CO2	understand and recognize the major group of non-vascular and non-cryptogams	K2
CO3	illustrate the structural variation in fossil forms.	K3
CO4	identify and illustrate the morphological and anatomical features Bryophytes, Pteridophytes and Gymnosperms.	K4
CO5	assess the skill of hand sectioning; evaluate the micro slide preparation and art of drawing; and interpret the key characters.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	BRYOPHYTES 1. Hepaticopsida – <i>Marchantia</i> 2. Anthocerotopsida - <i>Anthoceros</i> 3. Bryopsida - <i>Polytrichum</i>	K1-K5	10	1-5

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to

- understand the potential of microbes in Industrial Biotechnology
- gain insights on large scale production of fermentation products
- familiarize the operations involved in the types of fermentors and culture media
- understand the process related to food industry
- demonstrate the steps involved in the production of novel and healthy foods

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define the significance of microbes in food, dairy and fermented products	K1
CO2	compare and classify the various products from microbes and the types of fermenters	K2
CO3	identify the various aspects of microbial technology and apply the knowledge to cultivate the novel and healthy foods	K3
CO4	categorize the principles of fermentation and analyse products from microbial industries	K4
CO5	evaluate to process of fermentation technology and compile the cultivation, processing, purification and application of food, dairy and fermented products	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Microbial Technology 1.1 Scope of Microbial Technology 1.2 Fermentation: Media composition, Media formulation and Media optimisation 1.3 Principles of Fermentation: Submerged, Solid state, Batch, Fed-batch & Continuous culture 1.4 Structure and types of Fermenter	K1-K5	11	1-5
2	Fermented Foods-I 2.1 Probiotics- Benefits and Advantages 2.2 Manufacture of Yoghurt 2.3 LAB and their importance in Health and Medicine 2.4 Nutraceuticals and their Importance	K1-K5	11	1-5
3	Fermented Foods- II 3.1 Manufacture of Cheese 3.2 Types of Cheese: Cheddar, Camembert and Roquefort 3.3 Mould Fermentation- Preparation of Soysauce 3.4 Fermented Vegetable: Preparation of Sauerkraut	K1-K5	10	1-5
4	Agricultural Biotechnology 4.1 Genetically Modified Food - Bt brinjal & Bt cotton 4.2 Single Cell Protein- <i>Spirulina</i> 4.3 Algal Biofertilizers	K1-K5	10	1-5

OBJECTIVES OF THE COURSE

To enable the students to

- describe the morphological, anatomical and reproductive feature of lower plants
- identify the life cycle patterns of Bryophytes, Pteridophytes and Gymnosperms
- study the internal structure of higher and lower plants
- explain the functional mechanism of higher plants
- explore the basic techniques in horticulture

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify the salient features recall the anatomy of lower plants and Angiosperms; Physiology and list the various Horticulture techniques.	K1
CO2	explain the stages life cycle of lower forms; distinguish the anatomical characters; describe physiological concepts and demonstrate the techniques in Horticulture.	K2
CO3	relate the distinguishing characters of lower and higher forms of plants; illustrate the functional mechanism of higher plants and apply the knowledge on Horticultural practices	K3
CO4	categorise the lifecycle patterns of lower forms; differentiate and explain the internal features of angiosperms; elucidate the role of physiological process and Horticultural techniques	K4
CO5	assess the life cycle patterns in lower forms; compare the anatomical features; summarise the functional mechanism in the plants and evaluate the horticultural techniques	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Bryophyta, Pteridophyta and Gymnosperms 1.1 Salient features of Bryophytes, Pteridophytes and Gymnosperms 1.2 A detailed Study of the Life Cycle (no developmental study) of <i>Funaria</i> 1.3 A detailed Study of the Life-Cycle (no developmental study) of <i>Lycopodium</i> 1.4 A detailed Study of the Life-Cycle (no developmental study) of <i>Cycas</i>	K1-K5	14	1-5
2	Anatomy 2.1 Classification of Meristem, Simple and Complex tissue and types of Vascular bundles 2.2 Primary Structure of Dicot Stem and Root 2.3 Primary Structure of Monocot Stem and Root 2.4 Leaf: Isobilateral and Dorsiventral 2.5 Structure and types of Stomata	K1-K5	10	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**General Core Course Offered to students of
B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23BT/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- articulate the interdisciplinary context of environmental issues
- adopt sustainable alternatives that integrate science, humanities and social perspectives
- appreciate the importance of biodiversity and a balanced ecosystem
- calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3

(6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

GENERAL ZOOLOGY II

CODE: 23ZL/AC/GZ24

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable students to

- understand the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging
- comprehend the various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals
- understand the basic concepts in Genetics, different patterns of inheritance, types of mutations, types and applications of stem cells and related ethical issues
- comprehend the mechanisms involved in different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccination
- understand certain evolutionary strategies and human evolutionary stages

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K1
CO 2	outline the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K2
CO 3	apply the knowledge to describe the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and	K3

COs	DESCRIPTION	CL
	interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	
CO 4	analyse the mechanisms involved in physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells and related ethical issues, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K4
CO 5	evaluate the mechanisms involved and elaborate on the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells and related ethical issues, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Animal Physiology 1.1 Introduction - Chromophores: mechanism of colour change in cold blooded vertebrates - Bioluminescence: mechanism, examples and significance 1.2 Adaptations to diving and high altitudes 1.3 Exercise Physiology: respiration in exercise and cardiovascular system in exercise 1.4 Physiology of ageing: causes - changes in major systems	K1 - K5	10	1 - 5
2	Animal Behaviour 2.1 Introduction- Animal Associations: Commensalism, Mutualism, Parasitism and Predation 2.2 Play: General Attributes of Play and Examples - Courtship Behaviour: Steps and function - Courtship in birds (Sandgrouse, Bower bird, Baya weaver bird, Asian Koel & Indian Peafowl) 2.3 Learning Behaviour: Forms of Learning 2.4 Abnormal Behaviour in Domestic and Zoo Animals	K1 - K5	10	1 - 5

UNIT	CONTENT	CL	HRS	CO
3	Genetics 3.1 Introduction – Human Chromosomes – Lethal Genes: types and examples 3.2 Patterns of Inheritance: Autosomal Dominant (Hypercholesterolaemia), Autosomal Recessive (Albinism), X- linked Dominant (Hypophosphatemia), X- linked Recessive (Duchenne Muscular Dystrophy), Y-linked (Hypertrichosis) and Mitochondrial inheritance (Kearns Sayre Syndrome) 3.3 Mutation: Classification - Chromosomal aberrations (Types and Examples) 3.4 Stem Cells: Sources and Types, Applications and Ethical issues	K1 - K5	11	1 - 5
4	Immunology 4.1 Immune System: Introduction - Innate Immunity and Acquired Immunity (Humoral and Cell Mediated Immunity) 4.2 Types of Antigens - Antibody Classes and their Biological Activity 4.3 Hypersensitivity reactions: types - Autoimmune disorders: Causes and Significance (eg. Rheumatoid Arthritis) 4.4 Vaccines: Types - National Immunisation Schedule (NIS) for infants, children and pregnant women	K1 - K5	10	1 - 5
5	Evolution 5.1 Introduction to Evolution - Coevolution 5.2 Mimicry and Colouration: Types and significance 5.3 Distribution of Animals - Types, barriers and methods of dispersal of animals 5.4 Stages in Human Evolution - Cultural history	K1 - K5	11	1 - 5

SYLLABUS

(Effective from the academic year 2023 - 2024)

GENERAL ZOOLOGY II - PRACTICAL

CODE: 23ZL/AC/P221

CREDITS: 1

L T P: 0 0 2

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable students to

- Understand the basic principle involved in the estimation of oxygen consumption by an aquatic animal and calculate the rate of oxygen consumption
- Comprehend the principle and procedure to observe the Barr body in squamous epithelial cells, to determine the blood groups and to detect the presence of HCG in the urine sample of pregnant women
- Develop the necessary skills for analysing the behaviour, pedigree of some human inherited traits/diseases/disorders, Mendelian traits and Karyotypes
- Identify and describe specific examples for bioluminescent organisms, animal associations, immune cells, coevolution, mimicry and colouration and stages of evolution in man
- Write a report on the inheritance pattern of Mendelian traits, genetic diseases/disorders and maintain an observation and record book

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO 1	Submit a record of practical work carried out in the laboratory and/or report on pedigree analysis and Mendelian traits	K1
CO 2	Illustrate and describe the bioluminescent organisms, immune cells, animal associations and evolutionary adaptations	K2
CO 3	Demonstrate the skills to identify the Barr body in squamous epithelial cells, to determine the blood groups and to detect the presence of HCG in the urine sample	K3
CO 4	Analyse the behaviour of animals, pedigree of some human inherited traits/diseases/disorder, Mendelian traits and normal and abnormal Karyotypes	K4
CO 5	Estimate the oxygen consumption in an aquatic animal with reference to body weight	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	i. Oxygen consumption in an aquatic animal with reference to body weight.	K5	8	CO 5
2	i. Time Budgeting of Courtship and Play Behaviour ii. Pedigree Analysis of some human inherited traits/disorders/diseases iii. Study of any five Mendelian Traits iv. Observation and identification of Karyotypes: Normal male and female, Turner's, Klinefelter's and Down's syndrome karyotypes	K4	6	CO 4
3	i. Squamous epithelium squash preparation – Barr body ii. ABO - Blood Grouping and Rh – Typing iii. Pregnancy test: ELISA- Qualitative Test for Pregnancy	K3	6	CO 3
4	Observations and Identification of the following spotters: i. Bioluminescent animals - Comb Jelly, Firefly and Angler fish ii. Animal Associations: Parasitism - <i>Wuchereria bancrofti</i> and <i>Sacculina</i> on Crab Mutualism - Sea Anemone on Hermit Crab Commensalism - <i>Echeneis</i> Predation – Octopus iii. Immune cells - Basophil, Neutrophil, Eosinophil, Phagocyte and Dendritic cell iv. Coevolution: a) Plant and Pollinator - <i>Centropogon</i> flower and Hummingbird b) Predator and Prey - Rough-skinned Newt and Garter Snake v. Mimicry and Colouration: a) Batesian mimicry - Crimson Rose/Common rose and Common Mormon b) Mullerian mimicry - Bees and Wasps b) Protective Colouration - Sand Grasshopper c) Aggressive Colouration - Poison Dart Frog vi. Stages in the evolution of man	K2	3	CO 2
5	i. Reports on Pedigree analysis of some human inherited traits/disorders/diseases and Mendelian traits ii. Maintenance of an observation and record book of practical work is an integral part of the syllabus.	K1	3	CO 1

PATTERN OF ASSESSMENT**Continuous Assessment Test:****Total Marks: 50****Duration: 3 hours**

(Effective from the academic year 2023–2024)

TAXONOMY OF ANGIOSPERMS AND ECONOMIC BOTANY

CODE: 23BT/MC/TE34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- describe the vegetative and reproductive morphology of angiosperm plants
- summarize different systems of classification and nomenclature rules for plants
- develop the understanding in herbarium and key preparations techniques
- enable students to understand and identify the importance and morphological features of plants
- explore economic importance of plants in terms of food, medicine and commerce

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recognize the fundamental concept on morphology; recollect technical description and nomenclature of angiosperm plants	K1
CO2	classify taxonomic structure, hierarchy and examine systems of classification and nomenclature rules	K2
CO3	identify the diagnostic features of various angiosperm plants and interpret their family characters	K3
CO4	analyze the diagnostic features and explain the economic importance of selected families	K4
CO5	evaluate and create taxonomic key & herbarium specimens by compiling the knowledge on plant identification	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Classification and Plant Morphology 1.1 Overview of Plant Morphology - Habit, Roots, Stems, Leaves, Inflorescence, Flowers and Fruits 1.2 Phenetic (Linnaean, Bentham and Hooker) and Phylogenetic (Angiosperm Phylogeny Group IV (APG IV) Systems of Classification 1.3 Introduction to Chemotaxonomy, Numerical taxonomy and Molecular taxonomy	K1-K5	13	1-5
2	Nomenclature and Herbaria 2.1 Plant Nomenclature: Binomial and Polynomial, ICN – Typification, Effective and Valid Publication, Author Citation; Important Botanical Gardens – Kew Gardens, London; Acharya Jagadish Chandra Bose Botanic garden, Calcutta. 2.2 Herbarium Techniques: Collection, Pressing, Drying, Poisoning, Mounting and Preservation of Plant Specimens; Important Herbaria – BSI, Coimbatore; Rapinat Herbarium, Trichy 2.3 Taxonomic Keys (Intended and Bracketed keys) and their uses	K1-K5	13	1-5
3	A Detailed Study and Economic Importance of the following Families: 3.1 Polypetalae - Annonaceae, Rutaceae, Fabaceae (including the subfamilies) and Cucurbitaceae. 3.2 Gamopetalae - Rubiaceae, Sapotaceae, Apocynaceae and Asclepiadaceae	K1-K5	13	1-5
4	A Detailed Study and Economic Importance of the following Families: 4.1 Gamopetalae -, Solanaceae and Lamiaceae 4.2 Monochlamydeae –Amaranthaceae and Euphorbiaceae 4.3 Monocotyledones – Orchidaceae and Poaceae	K1-K5	13	1-5
5	Economic Botany 5.1 A Brief Study of the Morphology, Processing and Uses of the following: Beverages (<i>Camellia sinensis</i>), Sugar (<i>Saccharum officinarum</i>), Oil (<i>Arachis hypogaea</i>) 5.2 Botanical name, Common name, Family, Morphology of useful part and Uses of :Cereals(<i>Triticum aestivum</i> , <i>Oryza sativa</i> and <i>Avena sativa</i>), Millets (<i>Sorghum bicolor</i> , <i>Setaria italica</i> and <i>Eleusine coracana</i>), fibre yielding plants (<i>Gossypium</i> spp, <i>Corchorus</i> spp and <i>Cannabis sativa</i>) and dye yielding plants (<i>Indigofera tinctoria</i> , <i>Acacia catechu</i> and <i>Haematoxylum campechianum</i>) 5.3 Botanical name, Common name, Family, Morphology of useful part and Uses of :Oil yielding plants(mustard, <i>Sesamum indicum</i> and <i>Cocos nucifera</i>)Medicinal plants (<i>Asparagus racemosus</i> , <i>Catharanthus roseus</i> and <i>Withania somnifera</i>) spices and condiments (<i>Piper nigrum</i> , <i>Coriandrum sativum</i> and <i>Laurus nobilis</i>)Uses of Fumitories and Masticatories (<i>Nicotiana tabacum</i> , <i>Areca catechu</i> and <i>Piper betle</i>)	K1-K5	13	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023–2024)

PHYTOTHERAPY AND ETHNOBOTANY

CODE: 23BT/MC/PE33

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to.

- gain knowledge on herbal drug preparation, quality of raw material and list the guidelines for good manufacture practices.
- identify the commonly used medicinal plants, their phytochemical and pharmacological applications
- understand the significance of ethnobotany, bioprospecting and role of AYUSH
- observe the role of ethnobotany and ethnic tribes in conservation of biodiversity and study importance Traditional Knowledge, Intellectual Property Rights and Biopiracy
- describe the of dhatu in physical beauty and hair care through the knowledge of Ayurveda

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the methods of drug preparation and organoleptic study using the herbal plants and examine their ethnobotanical concept.	K1
CO2	understand the ethnobotanical knowledge of tribes and relate it for herbal preparations, pharmacognosy and research.	K2
CO3	apply the method of drug preparation through herbal plants and discover various concepts of ethnobotanical research	K3
CO4	analyse the ethnobotanical knowledge of plant compounds and explain the method of herbal preparation	K4
CO5	summarize the concept of Traditional Knowledge, phytochemical analysis and evaluate the herbal preparations.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Origin of Herbs in Health Care 1.1 Basic Principles of Ayurveda and Siddha: Panchamahabhutas, Tridhosha Concept, Malas, Agni, Prakruti 1.2 Drug Preparation: Ashwam, Arishtam, Taila, Churnam, Leghyam, Bhasmam, Infusion and Decoction, Poultice: Salves, Compresses, Mouthwash 1.3 Adulteration, Detection and Standardization of Herbal Drugs 1.4 Validation of Herbal Drugs and Good Manufacturing Practices	K1-K5	11	1-5
2	Organoleptic Study Vernacular Name, Binomial, Family, Active Principle and Medicinal Uses of the following: 2.1 Roots and Underground Stem: <i>Rauwolfia serpentina</i> and <i>Zingiber officinalis</i> 2.2 Leaves and Bark: <i>Aloe vera</i> and <i>Cinnamomun zeylanicum</i> 2.3 Flowers and Fruits: <i>Hibiscus rosa-sinensis</i> and <i>Piper longum</i> 2.4 Seeds and Whole Plant: <i>Trigonella foenum – graceum</i> and <i>Azadirachta indica</i> .	K1-K5	11	1-5
3	Ethnobotany 3.1 Ethnobotany: Definition and Scope 3.2 Methodologies of Ethnobotanical Research: Field Work, Literature, Herbaria and Musea 3.3 Ethnobotany as a lead to Modern Drug Discovery: Memory plus, Pankajakasturi Chooram 3.4 Bioprospecting and Role of AYUSH	K1-K5	11	1-5
4	Ethnobotany and Conservation of Medicinal plants 4.1 Role of Ethnobotany in Conservation of Biodiversity 4.2 Ex- situ Conservation & In- situ Conservation 4.3 Ethnobotanical Studies of Irula Tribes 4.4 Traditional knowledge (TK) in relation to Intellectual Property Rights and Biopiracy	K1-K5	11	1-5
5	Ayurveda and Beauty 5.1 Role of Dhātu in Physical Beauty and Daily Routine to Enhance Beauty 5.2 Essential Oils & Aroma Therapy 5.3 Preparation of the following (Practical) Ayurveda / Siddha Medicines for Common Ailments: Infusion and Decoction, Mouth wash and Herbal Tooth Powder, Tailam, Churnam, Leghyam, Preparation of Herbal Tea and Soups 5.4 Facial and Hair Care using Herbal Products (Demonstration)	KI-K5	11	1-5

TAXONOMY OF ANGIOSPERMS AND ECONOMIC BOTANY – PRACTICAL

CODE: 23BT/MC/P332

CREDITS: 2

L T P: 0 0 3

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

To enable the students to

- describe the vegetative and reproductive morphology of angiosperm plants
- summarize different systems of classification and nomenclature rules for plants
- develop the understanding in herbarium and key preparations techniques
- enable students to understand and identify the importance and morphological features of plants
- explore economic importance of plants in terms of food, medicine and commerce

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	observe salient features of plants belonging to different families using key identifying characters	K1
CO2	compare the taxonomic characters of Angiosperms and illustrate the vegetative and reproductive structures	K2
CO3	examine the vegetative and reproductive parts of plants, for identification of plants to their respective families.	K3
CO4	demonstrate the practical skills in dissection of floral parts for given angiospermic plants	K4
CO5	develop practical skills in identification of plants for key preparation and acquire the skill of herbarium preparation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	A detailed study of vegetative and reproductive characters of the plants belongs to the following families: Polypetalae - Annonaceae, Rutaceae, Fabaceae (including the subfamilies) and Cucurbitaceae	K1-K5	13	1-5
2	A detailed study of vegetative and reproductive characters of the plants belongs to the following families: Gamopetalae - Rubiaceae, sapotaceae, Apocynaceae , Asclepiadaceae, Solanaceae and Lamiaceae Monochlamydeae – Amaranthaceae and Euphorbiaceae Monocotyledones - Orchidaceae and Poaceae	K1-K5	13	1-5
3	Economic Botany Economically important products of plants included in the syllabus- binomial, family and morphology of the useful parts and uses	K1-K5	7	1-5
4	1. Key Preparation Preparation of dichotomous key for the given specimens 2. Herbarium preparation Collection of specimen and submission of herbaria belonging to 10 different families for the end semester examination 3. Field Trip Field trip to observe the plants, in their natural habitat in local or outstation for 3 to 5 days and submission of herbarium sheets	K1-K5	6	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50 Duration: 3 hours

Section	Questions	Marks Allotted	Cognitive Level
A	Spotter	12	K1
B	Submission of Record work	10	K2
C	Key Preparation	8	K3
D	Derivation of family	10	K4
E	Description, illustration & Dissection	10	K5
Total		50

FUNDAMENTALS OF BIOCHEMISTRY I

CODE: 23CH/AC/FB33

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To facilitate understanding of fundamental biochemical principles involving biological mechanisms
- To explain the significance of clinical haematological tests and enzymes in biochemical processes
- To enable understanding of carbohydrate metabolism
- To introduce the principles and methodologies involved in the digestion and absorption of carbohydrates

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the fundamentals of biochemistry, biomolecules and bioenergetics	K1
CO2	Relate blood buffers with the pH of blood, digestion and absorption of carbohydrates with carbohydrate metabolism	K2
CO3	Analyse the metabolism of glucose, hormone action and mechanism of enzyme action	K3
CO4	Evaluate free energy, enthalpy and entropy in a biochemical process, spontaneity of a biochemical reaction, glucose levels in blood through haematological tests and pH of blood	K4
CO5	Summarise the steps involved in different stages of carbohydrate metabolism, mechanism of enzyme action and coagulation of blood	K5

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Biochemistry 1.1 Molecular Logic of Living Organisms 1.2 Water – Physical Properties and Hydrogen Bonding of Water-Solvent Properties of Water, Hydrophobic Interactions, the Ionic Product of Water, the pH Scale. Acid Base Indicators- Phenolphthalein and Methyl Orange 1.3 Maintenance of pH of Blood, Bicarbonate Buffers, Acidosis and Alkalosis, Buffers and electrolytes in the body	K1- K5	10	1-5
2.	Blood 2.1 Blood - Composition of Blood, Blood Coagulation – Mechanism. Haemophilia and Sickle Cell Anaemia	K1- K5	5	1-5

UNIT	CONTENT	CL	Hrs	CO
	2.2 Clinical significance of RBC, WBC and Platelet Count in blood			
3.	Bioenergetics 3.1 Enthalpy, Entropy, Free Energy, Standard Free Energy, spontaneous and non-spontaneous. Exergonic and Endergonic Reactions 3.2 High Energy Compounds ATP and ADP, Structural Basis for the Role of ATP as the currency of the cell	K1- K5	4	1-5
4.	Carbohydrates 4.1 Classification of Carbohydrates 4.2 Haworth's Structure and Reactions of Glucose, Fructose and Sucrose. Polysaccharides – Homopolysaccharides -Cellulose, Starch - Amylose and Amylopectin (Structural Elucidation not required) 4.3 Digestion of di and polysaccharides in the body, maintenance of glucose level in Blood-significance of HbA1c 4.4 Carbohydrate Metabolism - Metabolism of Glucose - Glycolysis, TCA Cycle (structures not required), Glycogenesis, Glycogenolysis, Gluconeogenesis. Oxidative phosphorylation and electron transport chain	K1- K5	15	1-5
5.	Enzymes 5.1 Definition of Enzymes, Coenzymes and Apoenzymes 5.2 Nomenclature and Classification of Enzymes 5.3 Enzyme Specificity - Factors affecting Enzyme Action 5.4 Mechanism of Enzyme Action - Michaelis- Menten Theory (No Derivation) – Fischer's lock and key model and Koshland's induced fit model	K1- K4	5	1-4

BIOCHEMISTRY PRACTICAL I

CODE: 23CH/AC/P132

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To enable understanding of the principles of biochemistry through laboratory techniques
- To impart the skills required to perform various chemical reactions in a laboratory
- To instill understanding of the classification of biomolecules based on their structure and property
- To introduce the principles behind the techniques involved

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the procedure for the analysis of carbohydrates, amino acids and proteins.	K1, K2
CO2	identify various carbohydrates, amino acids and proteins based on their structure and property	K3
CO3	distinguish various carbohydrates, amino acids and proteins based on the structural characteristics	K4
CO4	perform chemical reactions in a laboratory according to standard procedure and safety precautions	K5
CO5	analyse a given organic compound qualitatively and identify carbohydrates, amino acids and proteins	K6

UNIT	CONTENT	CL	Hrs	CO
1.	Qualitative Analysis of Carbohydrates 1.1 Reactions of Carbohydrates Glucose, Fructose, Maltose, Sucrose and Starch 1.2 Identification of Unknown Organic Compound	K1-K6	13	1-5
2.	Qualitative Analysis of Amino acids 2.1 Reactions of Amino Acids - Reactions of Tryptophan, Tyrosine, Arginine and Cysteine 2.2 Identification of Unknown Organic Compound	K1-K6	13	1-5
3.	Qualitative Analysis of Proteins 3.1 Reactions of Proteins - Reactions of Casein and Egg Albumin 3.2 Identification of Unknown Organic Compound	K1-K6	13	1-5

ANATOMY AND EMBRYOLOGY OF ANGIOSPERMS

CODE: 23BT/MC/AE44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- recognize and understand the types of tissue and reproductive organs in plants.
- identify and compare the anatomy of stem, root, leaves and their secondary growth
- understand and distinguish between the normal and anomalous growth in plants
- gain basic knowledge on male and female reproductive structures of angiosperm
- summarize the process of reproduction and development of embryo in angiosperms

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the types tissues and recall the reproductive structures of angiosperms	K1
CO2	illustrate the anatomy of stem, root, leaf and reproductive parts	K2
CO3	identify and distinguish normal and anomalous growth in plants	K3
CO4	compare the primary and secondary anatomical structures of vegetative and reproductive parts of plants	K4
CO5	discuss the organisation of plant tissue and the process of reproduction in angiosperms	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Meristems and Simple Tissues 1.1 Meristem: Classification, Organization of Shoot Apex (Apical cell theory, Histogen theory) and Root Apex (Apical cell theory, Histogen theory, Korper- Kappe theory, Concept of quiescent centre) 1.2 Lateral meristem: Vascular Cambium - Structure and Formation 1.3 Cork Cambium: Periderm: Phellem, Phellogen and Phelloderm, Development, Location, Morphology of Bark, Commercial Bark and Lenticels 1.4 Simple tissues – Parenchyma, Collenchyma and Sclerenchyma (structure, types and functions)	K1-K5	13	1-5
2	Complex Tissues and Secretory Tissues 2.1 Complex Tissue- Xylem and Phloem 2.2 Secondary Xylem - Vessels, Tracheids, Wood Parenchyma and Rays, Sap Wood, Heartwood, Reaction wood, Tyloses, Annual Rings, Dendrochronology. 2.3 Secondary phloem - Sieve Tubes, Companion Cells, Phloem Parenchyma and Fibres 2.4 Secretory tissues –Glandular trichome, Hydathodes, Nectaries, Resin ducts and Laticifers	K1-K5	13	1-5
3	Primary and Secondary Structures 3.1 Leaf - Dorsiventral (mango), Isobilateral (Grass) 3.2 Epidermis – Hairs, Stomatal – Types 3.3 Primary structure of, Monocot – stem (<i>Chloris</i>) and root (<i>Canna</i>) and Dicot- stem and root (<i>Cicer</i>) 3.4 Secondary structure of dicot stem and root (<i>Tridax</i>) 3.5 Anomalous Growth: <i>Nyctanthes</i> , <i>Boerhaavia</i> , <i>Bougainvillea</i> and Anomalous Secondary Thickening in Monocot Stem - <i>Dracaena</i>	K1-K5	13	1-5
4	Embryology 4.1 Microsporangium: Structure of anther, Microsporogenesis - Male Gametophyte 4.2 Megasporangium: Structure and types of ovules, Megasporogenesis - Female Gametophyte (Embryosac) – Monosporic (<i>Polygonum</i>), Bisporic (<i>Allium</i>) and Tetrasporic (<i>Peperomia</i>) 4.3 Endosperm - Types and Functions; Nuclear, Cellular, Helobial and Ruminant Endosperm	K1-K5	13	1-5
5	Embryology 5.1 Double Fertilization 5.2 Embryo - Development of Dicot Embryo – <i>Capsella bursa pastoris</i> . 5.3 Development of monocot embryo (<i>Zea mays</i>). 5.4 Apomixis , Polyembryony , Parthenogenesis , Parthenocarpy.	K1-K5	13	1-5

PATTERN OF ASSESSMENT

No Unit should be left out

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the binomial)	K1	1 – 10	10(10 x 1 = 10)
B (4 out of 5 to be answered)) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	11 – 15	8 (4 x 2 = 8)
C (Internal choice) Paragraph	K3 / K3	16 or 17	6 (1 x 6= 6)
	K4 / K4	18 or 19	6 (1 x 6= 6)
D (Internal choice) Essay	K5 / K5	20 or 21	20(1 x 20 = 20)
Total			50

Other Components:

Total Marks: 50

Quiz/ Assignment/ Seminar/ Scrapbook/ Poster presentation/ Model making

End- Semester Examination:**Total Marks: 100****Duration: 3 hours**

Section	Cognitive Level	Question number	Mark distribution
A Objective (Choose the correct answer, Fill in the blanks, True or False, Match the following,)	K1	1 - 20	20 (20 x 1 = 20)
B (8 out of 10 to be answered) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	21 - 30	16 (8 x 2 = 16)
C (Internal choice) (Two questions at each level with Internal choice) Paragraph	K3 / K3	31 or 32, 33 or 34	12 (2 x 6 = 12)
	K4 / K4	35 or 36, 37 or 38	12 (2 x 6 = 12)
D (Two questions at each level with Internal choice) (Internal choice) Essay	K5 / K5	39 or 40, 41 or 42	40 (2 x 20 = 40)
Total			100

B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023–2024)

ANATOMY AND EMBRYOLOGY OF ANGIOSPERMS- PRACTICAL

CODE: 23BT/MC/P442

CREDITS: 2

L T P: 0 0 3

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

To enable the students to

- recognize and understand the types of cells, tissue and reproductive organs in plants.
- identify and compare the anatomy of stem, root, leaves and their secondary growth
- understand and distinguish between the normal and anomalous growth in plants
- gain basic knowledge on male and female reproductive structures of angiosperm
- summarize the process of reproduction and development of embryo in angiosperms

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	observe types of cells, tissues, tissue types, and identify reproductive organs of angiosperms	K1
CO2	examine the primary and secondary anatomical structures of vegetative and reproductive structure in plants	K2
CO3	analyse and distinguish normal and anomalous growth in plants	K3
CO4	demonstrate the practical skill in dissection of embryo to observe the stages in embryo development	K4
CO5	develop practical skills in sectioning and mounting of sample for identification of tissues and tissue organization	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Anatomy A study of anatomy of the following (any 2 specimens in each category for stem and root) 1. Primary structure: Dicot stem and Dicot root Monocot stem and Monocot root 2.Secondary structure: Dicot Stem and Dicot Root	K1-K5	13	1-5
2	3.Leaf: Dorsiventral – Mango, Isobilateral – Grass 4.Stomatal types in Dicots and Monocots	K1-K5	7	1-5
3	5. Anomalous Structure: <i>Nyctanthes</i> <i>Boerhaavia</i> <i>Bougainvillea</i> <i>Dracaena</i> 6. Ergastic Substances: Druses, Raphides and Cystoliths	K1-K5	13	1-5
4	EMBRYOLOGY OF ANGIOSPERMS A study of the following: 1. T.S of young anther and mature anther 2. Pollen morphology 3. Binucleate and tetranucleate embryo sacs 4. Stages of Dicot embryo development 5. L.S. of mature monocot embryo 6. Endosperm - nuclear, cellular and ruminate 7. Embryo and anther isolation and dissection – <i>Tridax</i> and <i>Zea mays</i>	K1-K5	6	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50 Duration: 3 hours

Section	Questions	Marks Allotted	Cognitive Levels
A	Spotter (Anatomy and Embryology)	15	K1
B	Submission of Record work	10	K2
C	Embryo Dissection	5	K3
D	Sectioning, Drawing, Identification with reasons- Anomalous	8	K4
E	Sectioning, Drawing, Identification with reasons	12	K5
Total		50	

End- Semester Examination: Total Marks: 50 Duration: 3 hours

Section	Questions	Marks Allotted	Cognitive Levels
A	Spotter (2 Anatomy and 2 Embryology)	20	K1- K2
B	Embryo Dissection	6	K3
D	Sectioning, Drawing, Identification with reasons- Anomalous	8	K4
E	Sectioning, Drawing, Identification with reasons	16	K5
Total		50

B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23BT/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

(Effective from the academic year 2023-2024)

FUNDAMENTALS OF BIOCHEMISTRY II

CODE: 23CH/AC/FB43

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To provide an understanding of the biochemical importance of lipids, proteins, hormones and micronutrients
- To enable understanding of lipid and protein metabolisms
- To introduce the principles and methodologies involved in digestion and absorption of lipids and proteins

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the classification, structure and metabolism of lipids, proteins hormones and vitamins	K1
CO2	explain the use of biochemical techniques in the study of proteins, lipids, hormones, vitamins and micronutrients	K2
CO3	analyze the metabolisms involving lipids, proteins, hormones, vitamins and minerals	K3
CO4	evaluate mechanism of metabolism of protein, lipid and hormones using biochemical tools	K4
CO5	integrate the cause of a disease in human body and the metabolism	K5

UNIT	CONTENT	CL	Hrs	CO
1.	Lipids 1.1 Classification of Lipids and Fats 1.2 Definitions and Significance of Iodine Value, Acid Value, Saponification Value, RM Value and Acetyl Value 1.3 Lipid Metabolism- Oxidation of β fatty acids, Biosynthesis of Fatty Acids, Ketone bodies and Ketosis. Digestion and Absorption of Lipids 1.4 Risk factor of HDL, LDL and total cholesterol in the body	K1- K5	12	1-5
2.	Proteins 2.1 Amino Acids – Classification based on R Groups 2.2 Chemical Reactions of amino acids - with ninhydrin, mineral acid, formaldehyde, FDNB and CO ₂ 2.3 Structure of Proteins - Peptide Bond, Primary, Secondary and Tertiary structures. 2.4 Classification of proteins based on shape, composition and solubility. Properties of proteins - denaturation, amphoteric nature, ion binding capacity and solubility	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	2.5 Protein Metabolism - transamination, oxidative deamination and Urea Cycle. Digestion and absorption of proteins			
3.	Hormones 3.1 Definition, Classification of Hormones (Steroid and Non-Steroid Only) 3.2 Mechanism of Hormone Action 3.3 Functions of Insulin and Thyroxin. Clinical significance of TSH, T3 and T4	K1- K5	5	1-5
4.	Biochemistry and Nutrition 4.1 Vitamins (fat & water soluble)- sources, metabolic functions, deficiency diseases, daily requirements- vitamin A and vitamin C (Structure) 4.2 Principal elements- Calcium, Phosphorus, Magnesium, Sodium, Potassium, Chlorine, Sulfur- sources, function, recommended dietary allowance, deficiency - Calcium, Phosphorus- absorption and retention, product of Ca and P in serum. 4.3 Trace elements: Chromium, Selenium, Cobalt- sources, function, deficiencies	K1- K5	5	1-5
5.	Analytical techniques in Biochemistry 5.1 Centrifugation – Principle and applications of sedimentation and ultracentrifugation 5.2 Electrophoresis – Principle and applications of SDS-PAGE 5.3 Ultrafiltration – Principle and applications of Dialysis 5.4 Chromatography – Principle and applications of Thin layer (TLC) and High-Performance Liquid Chromatography (HPLC)	K1- K5	5	1-5

BIOCHEMISTRY PRACTICAL II

CODE: 23CH/AC/P242

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To understand the principles of biochemistry chemistry through laboratory techniques
- To impart the skills required to perform various chemical reactions in a laboratory
- To instill understanding of the classification of organic compounds based on their structure and property
- To understanding of the principles behind the various techniques involved

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
1	recollect the concepts of normality, equivalent weight, R_f value and Beer Lambert's Law	K1
2	differentiate between titrations, colorimetric and chromatographic techniques	K2
3	calculate the normality, equivalent weights and R_f value	K3
4	compare the reagents used in volumetric titration, colorimetric and chromatographic techniques	K4
5	estimate the amount of a given substance using volumetric analysis	K5, K6

UNIT	CONTENT	CL	Hrs	CO
1.	Volumetric Estimations 1.1 Principle and theory of Volumetric Analysis 1.2 Principle and theory of Chromatography and Beer-Lambert's law	K1-K3	3	1-3
2.	Estimations 2.1 Estimation of Oxalic Acid / Fe^{2+} (Permanganimetry) 2.2 Estimation of Glucose 2.3 Estimation of Glycine by Sorensen's Titration 2.4 Estimation of Ascorbic Acid 2.5 Estimation of Acid Value / Saponification Value / Iodine Value of Edible Oil 2.6 Estimation of Enzyme Catalase in Chow chow / Radish	K1-K6	30	1-5

UNIT	CONTENT	CL	Hrs	CO

SYLLABUS

(Effective from the academic year 2023-2024)

CELL AND MOLECULAR BIOLOGY

CODE: 23BT/MC/CM54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

To enable the students to

- understand the fundamental concepts of cell and molecular biology
- analyse the structure, chemical composition and function of cell organelles and nucleic acids
- elucidate the process of cell cycle and cell divisions
- discuss the biosynthetic process of nucleic acids
- explore the key concept of gene and gene regulation at molecular level

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the structure of cell and cell organelles, identify the stages in cell cycle and enumerate the concepts of prokaryotic gene regulation and expression at molecular level	K1
CO2	describe the structure of cell, cell organelles, nucleic acids and chromosome, classify different stages in cell cycle and explain the biosynthesis of nucleic acids	K2
CO3	illustrate the structure of cell organelles and molecular organization of chromosome, interpret the process of replication in DNA, and relate gene regulation and expression in prokaryote	K3
CO4	analyse the process of DNA replication, various stages of cell division, compare and contrast the gene regulation and expression in prokaryotes.	K4
CO5	evaluate the role of regulatory factors in the synthesis of nucleic acids and expression of genes at molecular level.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Cell and Cell organelles 1.1 Structure of Prokaryotic and Eukaryotic cell 1.2 Cell Membrane: Chemical Composition, Molecular Organization, Models of plasma membrane - Bilayer model, Sandwich model, Unit membrane model, Fluid Mosaic model. 1.3 Cell Organelles - Structure, Chemical Composition, Function of the following: Endoplasmic Reticulum, Golgi Apparatus, Mitochondria, Chloroplast, Ribosomes, Microbodies - Peroxisomes, Glyoxysomes, lysosomes and cell inclusions. 1.4 Organization of nucleus: nuclear envelope, nucleoplasm and nucleolus	K1 – K5	13	1-5
2	Organization of DNA and Chromosome 2.1 Gene: Definition, Cistron, Recon and Mutan 2.2 Organization of a gene in prokaryotes and eukaryotes 2.3. Structure of Nucleic acid: DNA and RNA - types and classification 2.4 Chromosomal nomenclature - chromatids, centromere, telomere, satellite, secondary constriction. Organization of chromosomes. 2.5 Giant Chromosomes - Lamp brush chromosomes and polytene chromosomes - Karyotype and Idiogram.	K1 – K5	13	1-5
3	Cell Division 3.1 Cell Cycle G0, G1, S and G2 phases– 3.2 Amitosis - Mitosis – significance of Mitosis 3.3 Meiosis – Genetic significance of Meiosis 3.4 Mitotic abnormalities 3.5 Apoptosis	K1 – K5	13	1-5
4	DNA Replication in prokaryotes and DNA repair 4.1 Semiconservative method of replication: The Meselson –Stahl experiment 4.2 Polymerases and other enzymes and proteins involved in replication - Replication apparatus. 4.3 Steps involved in DNA replication – unwinding – Initiation - Replication forks - leading strand and lagging strand synthesis – Proof reading and error correction during replication. 4.4 DNA repair: Thymine dimer formation - light dependent repair: photo reactivation - light independent repair: excision repair, post replication recombination repair and SOS repair.	K1 – K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Gene expression and Gene regulation in Prokaryotes 5.1 Characteristics of genetic code - Deciphering of genetic code 5.2 Transcription in Prokaryotes: Initiation, Elongation and Termination 5.3 Translation in prokaryotes 5.4 Gene regulation in prokaryotes - structure and function of <i>lac</i> operon and <i>trp</i> operon	K1 – K5	13	1-5

**B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT
BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023-2024)

MICROBIOLOGY

CODE: 23BT/MC/MB54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- understand the characteristics of microbes and its effects on man and environment
- classify major groups of bacteria and compare the methods of genetic recombination
- apprehend the characteristics of viruses, their replication and their role in causing diseases
- understand the disease cycle of microbes and their impact on human beings
- elucidate the role and application of microbes in soil, air and water

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the microbial diversity; describe their classification, growth and replication	K1
CO2	classify the structural and functional characteristics of microbes and demonstrate their isolation and cultivation techniques	K2
CO3	illustrate the nutritional types of microbes, their disease cycle and assess the distribution of microbes in soil, water and air	K3
CO4	connect the morphology, replication of bacteria and virus; categorise the application of microbes in soil, water and air	K4
CO5	summerise the bacterial and viral morphology, their classification and interpret the disease cycle, control measures and application of microbes	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Microbiology 1.1 History of Microbiology 1.2 Germ Theory of Disease, Koch's Postulates, Whittaker's Five Kingdom Classification and Three Domain Concept of Carl Woese 1.3 Sterilisation Techniques – Pure culture techniques 1.4 Microbial staining techniques – Simple, Acid fast and Gram's staining 1.5 Nutritional Types and Types of Media	K1- K5	12	1-5
2	Bacteria 2.1 Classification (Bergey's Manual), Outlines of major groups only 2.2 Bacterial Morphology: Cell Wall, Capsule, Flagella, Fimbriae, Nucleus, Plasmids Endospore and Storage Granules 2.3 Bacterial Growth: Kinetics, Growth Curve, Factors Affecting Growth 2.4 Control of Microorganisms: Physical Agents - Temperature (high and low), Dessication, Filtration and Radiation, Chemical – Halogens, Alcohols, Preservatives – Natural (Salt & Sugar) Chemical (Sorbates, Benzoate, Sulfur dioxide) 2.5 Genetic Recombination: Conjugation, Transformation and Transduction	K1- K5	15	1-5
3	Viruses 3.1 General Properties of Viruses, Classification (Baltimore) Cultivation, Purification and Assay (Plaque Formation) 3.2 Vaccination – Vaccina, BCG, MMR, DPT 3.3 Structure: Virion Size, Helical Capsid, Icosahedral Capsid and Viral Envelope 3.4 Replication: Bacteriophages (Lytic and Lysogenic Cycles), Plant Virus (Tobacco Mosaic Virus, Potato Virus Y) and Animal Virus (Herpes Simplex Virus and Retro Virus) 3.5 Prions, Viroids and Virusoids	K1- K5	15	1-5
4	Microbiology of Soil and Food 4.1 Role of Bacteria, Fungi and Actinomycetes in Composting 4.2 Biogeochemical Cycle: Nitrogen, Phosphorous and Carbon 4.3 Applications of VAM in Forestry and Agriculture 4.4 Etiology, Incubation period, Symptoms, Control and Prevention of <i>Clostridium botulinum</i> , <i>Staphylococcus aureus</i> , <i>Salmonella</i> and <i>Bacillus cereus</i>	K1- K5	11	1-4

UNIT	CONTENT	CL	Hrs	CO
5	Microbiology of Water and Air 5.1 Microbiology of domestic water and sewage 5.2 Purification of drinking water, sewage treatment and disposal 5.3 Distribution and Sources of Air Borne Organisms 5.4 Enumeration of Microorganisms in Air - Sampling Techniques	K1- K5	12	1-5

ECOLOGY AND ENVIRONMENTAL BIOTECHNOLOGY

CODE: 23BT/MC/EE54

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to

- provide a comprehensive knowledge on Plant Communities
- understand and appreciate the interaction between biotic and abiotic components
- discuss the health hazards of toxic chemicals released in the environment
- apprehend the use of biological organisms as agents of environmental monitoring
- give an insight into the risk of pollutants and their impacts on the ecosystem

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand and recall the knowledge on community ecology; define ecosystems; recognize the risk of pollutants and their impacts on the ecosystem	K1
CO2	describe and interpret floristic communities; the need for sampling analysis; associate the ecological interactions and adaptations, and risk of pollutants	K2
CO3	integrate the techniques for gathering data from the field and analyze the various components of plant diversity and relate the impact of environmental toxicology	K3
CO4	distinguish the plant populations; categorise their ecological adaptations; prioritise the hazards of the toxic chemicals released in the environment, bioremediation and connect the need for Environmental assessment	K4
CO5	compile the technologies, tools and techniques in the field of ecology and evaluate the implications of legislations and policies for environmental protection	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Ecology and Ecosystem 1.1 Ecology – basic concepts of ecology 1.2 Ecosystem: structure and function - Biotic and Abiotic Components 1.3 Energy flow-Food chain, food web, and ecological pyramids 1.4 Aquatic (Pond) and Terrestrial (Grass land) Ecosystems 1.5 Ecological Adaptations- Hydrophytes, Xerophytes and Halophytes	K1-K5	10	1-5
2	Plant Communities and Biodiversity conservation 2.1 Characteristics of community- Raunkiaer's Life forms. 2.2 Study of plant community structure: Qualitative and Quantitative structure of plant communities 2.3 Quantitative analysis of plant communities: Quadrat, Transect, Loop and point method 2.4 Biodiversity and its conservation: introduction - Types and value of biodiversity- Hotspots - Threats to biodiversity- conservation of biodiversity.	K1- K5	10	1-5
3	Environmental Pollution and monitoring 3.1 Definition, causes, effects and control measures of air, water and soil pollution 3.2 Global warming and climate change 3.3 Environmental Impact Assessment (EIA) 3.4 Environmental Quality Monitoring of Air and Water 3.5 Environmental Risk Assessment 3 6 Eco restoration and GIS	K1- K5	10	1-5
4	Bioremediation 4.1 Definition and principles of bioremediation. 4.2 Bioremediation mechanisms 4.3 Technology of bioremediation: in situ and ex situ Bioremediation 4.4 Phytoremediation 4.5 Structure and development of Biofilm and its role in bioremediation	K1- K5	11	1-5
5	Bioremediation: A Promising Environmental Technology for pollution Cleanup 5.1 Biodegradation of petroleum hydrocarbon 5.2 Biodegradation of Xenobiotic compounds: DDT and TCE 5.3 Solid waste management: Composting & vermicomposting 5.4 Biological Removal of heavy metals using Bio-sorption. 5.5 Purification of polluted air using bio-filters 5.6 Biomining and Bioleaching	K1- K5	11	1-5

CELL AND MOLECULAR BIOLOGY, MICROBIOLOGY, ECOLOGY AND ENVIRONMENTAL BIOTECHNOLOGY - PRACTICAL

CODE: 23BT/MC/P553

CREDITS: 3

L T P: 0 0 6

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

To enable the students to

- identify and recall the knowledge acquired in Cell and Molecular Biology, Microbiology and Ecology and Environmental Biotechnology
- differentiate the cultures using Gram's staining technique
- elucidate the process of cell division through squash and smear technique
- acquire the skill of quantifying a population using various sampling methods
- gain expertise on various techniques of microbial inoculation and isolation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the knowledge acquired in Cell and Molecular Biology; understand the techniques in Microbiology and classify the sampling methods in Ecology	K1
CO2	illustrate Gram's staining technique using the given culture and differentiate the types of bacteria	K2
CO3	apply and analyse the skill of quantifying a population and to compute the various sampling methods	K3
CO4	analyse and infer the various stages of cell division through squash and smear techniques	K4
CO5	evaluate the various methods of inoculation and elucidate the microbes using isolation techniques	K5

BIOANALYTICAL TECHNIQUES

CODE:23ID/IC/BA55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

To enable the students to

- understand the essence of microscopy, centrifugation, separation methods and spectroscopic techniques
- gain comprehensive understanding of extraction & separation methods and spectroscopic characterisation of the sample
- gain in-depth knowledge on the various steps involved in processing of plant tissues using microtechniques
- to analyse and solve problems relating to texture, separation, extraction, composition of a sample by introducing learned concepts
- develop the skills and practice of different bioanalytical techniques.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals of microscopy, centrifugation & electrophoresis, separation methods and spectroscopic techniques	K1
CO2	illustrate the knowledge of microscopy, centrifugation & electrophoresis, separation methods and spectroscopic techniques	K2
CO3	analyze the microscopic images, plant specimen preparation, the separation method from yield of precipitate and spectroscopic data	K3
CO4	evaluate the texture of the substance, amount of substance in the sample by gravimetry and spectroscopic techniques	K4
CO5	integrate the results from microscopy, separation methods and spectroscopic data of the sample material	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Microscopy: Principle, Construction and Application 1.1 Light microscopes – Compound, Phase Contrast, Differential Interference Contrast and Confocal Microscopes. 1.2 Preparation of Specimen for Light Microscopy – Paraffin Techniques – Fixatives: FAA, Carnoy's, Dehydration and Infiltration, Embedding and Sectioning (Paraffin Blocks), Staining and Mounting. 1.3 Electron Microscopes – TEM, specimen preparation for TEM. 1.4 Maceration and leaf clearing	K1-K5	16	1-5
2	Centrifugation and Electrophoresis 2.1 Principle, types and applications of Centrifuge. 2.2 Density gradient and Differential Centrifugation. 2.3 Electrophoresis: Principle, Techniques and applications of Agarose gel electrophoresis, Polyacrylamide gel electrophoresis 2.4 Immunoelectrophoresis.	K1-K5	15	1-5
3	Separation Techniques 3.1 Separation by solvent extraction: Nernst distribution law, Principle of Extraction by chemically active solvents, Soxhlet extraction, Factors Influencing the Extraction Efficiency. 3.2 Gravimetric analysis: Separation by Precipitation-Nucleation, Crystal Growth, Solubility Product, Principle, Factors affecting Solubility, Purity of Precipitates, Co-precipitation and Post Precipitation methods of Filtering, Drying- Ignition & Incineration of Precipitate. 3.3 Chromatography - GC and HPLC-Principle, instrumentation and application-quality control, air pollution, food analysis comparison of GC & HPLC	K1-K5	16	1-5
4.	Spectroscopic Techniques and Spectrochemical Methods 4.1 Introduction to Spectroscopy, Beer-Lambert's law statement and deviation; UV- Visible-instrumentation and applications-estimation of Mn	K1-K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	4.2 Nephelometry and Turbidimetry- Principle, Instrumentation and Applications- determination of TDS of water sample 4.3 Principle, Instrumentation and Applications - Atomic absorption Spectroscopy (estimation of Ca), Flame photometry (estimation of K/Na) and Fluorimetry (estimation of Fluorescein)			
5.	Practical Demonstration experiments Botany <ul style="list-style-type: none"> • Techniques of maceration and leaf clearing • Preparation of permanent slide using plant specimen • Isolation of chloroplast by differential centrifugation • Separation of DNA using Agarose gel electrophoresis Chemistry <ul style="list-style-type: none"> • Verification of Beer Lamberts law (KMnO_4) • Separation of organic compounds - benzoic acid and benzaldehyde in ether • Estimation of Ca -AAS • Estimation of fluorescein- Fluorimetry • Gravimetric estimation of Ba as BaCrO_4 	K1-K5	16	1-5

PATTERN OF ASSESSMENT

No Unit should be left out

Continuous Assessment: Total Marks: 50

Duration: 90 minutes

Botany-25 Marks and Chemistry -25 Marks each

Section	Cognitive Level	Marks	Pattern
A	K1	4	$4 \times 1 = 4$ (4 MCQs)
B	K2	3	$3 \times 1 = 3$ (Answer in a line or two or Fill in the blanks or Match the following)
C	K3/K3	6	$2 \times 3 = 6$ marks <ul style="list-style-type: none">• Three questions to be set• Two questions to be answered out of four.• Questions can be set with or without subdivisions
D	K4/K4	6	$2 \times 3 = 6$ marks <ul style="list-style-type: none">• Three questions to be set• Two questions to be answered out of three• Questions can be set with or without subdivisions
E (Internal Choice)	K5/K5	6	$1 \times 6 = 6$ marks <ul style="list-style-type: none">• One question to be set with either/or pattern• Questions can be set with or without subdivisions

Other Component: Total Marks: 50

Botany-25 Marks and Chemistry -25 Marks each

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

End-Semester Examination: Total Marks: 100

Duration: 3 hours

Botany- 50 Marks and Chemistry -50 Marks each – (to be written in separate answer scripts)

Section	Cognitive Level	Marks	Pattern
A	K1	8	$8 \times 1 = 8$ (8 MCQs)
B	K2	7	$7 \times 1 = 7$ (Answer in a line or two or Fill in the blanks or Match the following)
C	K3/K3	15	$3 \times 5 = 15$ marks <ul style="list-style-type: none">• Four questions to be set• Three questions to be answered out of four.• Questions can be set with or without subdivisions
D	K4/K4	10	$2 \times 5 = 10$ marks <ul style="list-style-type: none">• Three questions to be set• Two questions to be answered out of three• Questions can be set with or without subdivisions

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023-2024)

PLANT PHYSIOLOGY

CODE: 23BT/MC/PP64

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to

- recall water relations in plants with respect to various physiological processes
- understand the mineral nutrition and deficiency symptoms in plants and the physiology of nitrogen fixation
- explain the functional mechanism of plants and significance of photosynthesis
- understand the mechanism of respiration in plants
- assess photoperiodism, dormancy and germination in plants

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the water relations in plants, its importance in mineral nutrition and define the mechanism of photosynthesis, respiration, photoperiodism and seed dormancy	K1
CO2	interpret the process of transpiration, nitrogen metabolism, photosynthesis and respiration and summarise the role of phytohormones and vernalization	K2
CO3	illustrate the water potential, Physiology of Nitrogen fixation, photosynthesis and respiration in plants and interpret the role and deficiency of nutrients in plant growth and applications of phytohormones	K3
CO4	analyse the significance of water potential, transpiration, photophosphorylation and cellular respiration and assess plant growth regulators and physiology of flowering	K4
CO5	summerise the various physiological process, the mechanism of photophosphorylation reactions and respiration and compile the role of Phytohormones and Physiology of flowering	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Water Relations in Plants 1.1 Water Potential: Imbibition, Diffusion, Osmosis, Plasmolysis, Diffusion Pressure Deficit (DPD), Osmotic Pressure and Turgor Pressure 1.2 Ascent of Sap 1.3 Transpiration: Definition, Significance and Mechanism of Stomatal Transpiration, Starch - Sugar Interconversion, Synthesis of Organic Acid in Guard Cells, ATP driven H ⁺ and K ⁺ Exchange Pump, Role of ABA in Stomatal opening and closure, Factors affecting Transpiration (internal and external) 1.4 Water Movement across the Root and Xylem - Active and Passive Absorption	K1-K5	10	1-5
2	Mineral Nutrition 2.1 Macronutrients and Micronutrients – Role and its deficiency in plants 2.2 Absorption and Transportation Theories; Carrier Concept and Cytochrome Pump Theory, Transport of Organic Solutes: Phloem Loading and unloading 2.3 Sources of Nitrogen; Physiology of Nitrogen fixation, Nitrate and Nitrite Reduction, Assimilation of Nitrite and Ammonium, GOGAT Pathway	K1- K5	10	1-5
3	Photosynthesis 3.1 Light Reaction: Action and Absorption spectrum, Red Drop, Emerson Enhancement Effect, Pigment System I and II, Phosphorescence and Fluorescence 3.2 Photophosphorylation, CO ₂ assimilation pathway: C ₃ , C ₄ cycle, CAM and Photorespiration 3.3 Factors influencing Photosynthesis	K1- K5	10	1-5
4	Respiration 4.1 Glycolysis, Substrate level Phosphorylation, Entner - Doudroff Pathway, Glyoxylate Cycle 4.2 Krebs Cycle, Electron Transport Pathway, Oxidative Phosphorylation and Cyanide Resistant Pathway 4.3 Respiratory Quotient	K1- K5	11	1-5
5	Phytohormones and Physiology of Flowering 5.1 Phytohormones – Chemical Nature, Bioassay (one only), Physiological Effect and Practical Applications of the following Plant Growth Regulators: Auxin, ABA, Cytokinin, Gibberellic Acid and Ethylene 5.2 Photoperiodism 5.3 Vernalization 5.4 Seed dormancy: Causes and breaking of seed dormancy	K1- K5	11	1-5

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to

- study the fundamental principles of tissue culture
- understand the applied aspects of Plant Biotechnology and Genetic Engineering
- gain knowledge on molecular techniques used in crop improvement and compile its applications in biotechnology
- understand the molecular techniques used in genetic engineering

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the techniques of plant tissue culture, recall the basics of genetic engineering and gene transfer in plants and list the applications in biotechnology	K1
CO2	demonstrate plant tissue culture techniques, interpret gene transfer methods in plants and distinguish various methods in rDNA technology	K2
CO3	illustrate plant genome organization, demonstrate various methods of gene transfer in plants and relate its application in biotechnology.	K3
CO4	categorize different types of plant tissue culture, Compare and contrast gene expression in plants, infer the highlights of rDNA technology	K4
CO5	summarise the concept of plant tissue culture, evaluate various molecular techniques used in crop improvement and compile its applications in biotechnology	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Tissue Culture 1.1 Totipotency, Differentiation, Dedifferentiation, Redifferentiation, Culture techniques: sterilization, inoculation, incubation, acclimatization, organogenesis, embryogenesis and regeneration 1.2 Organ culture: Shoot Culture, Anther and Embryo Culture 1.3 Cell culture: Single cell culture, Suspension culture and synthesis of synthetic seeds 1.4 Somatic Hybridization: Protoplast Culture: Isolation, Culture and Fusion: Spontaneous and Induced Fusion, Identification and Selection of Hybrid Cells 1.5 Somaclonal Variation	K1- K5	12	1-5
2	Plant molecular biology 2.1 Plant Genome Organization 2.2 Gene expression – Post transcriptional and Post translational modification 2.3 Chloroplast genome	K1- K5	12	1-5
3	rDNA technology 3.1 Introduction to Genetic Engineering 3.2 Techniques: Restriction Endonucleases, Ligation, Electrophoresis, Blotting 3.3 Hybridization, Autoradiography, PCR, DNA sequencing – Sanger's method	K1- K5	10	1-5
4	Gene transfer in Plants 4.1 Cloning Vectors: pUC 18, YAC and BAC 4.2 Ti Plasmid 4.3 Gene Transfer Technique using Agrobacterium 4.4 Physical Delivery Methods: PEG stimulated, Ballistics (Particle gun), Electroporation, Microinjection	K1- K5	10	1-5
5	Applications in Biotechnology 5.1 Transgenic Plants for Crop Improvement: Insect Resistance 5.2 Transgenic Plants - Edible Vaccines 5.3 Molecular markers (RFLP, RAPD) in crop improvement program 5.4 Bioethics and Biosafety	K1- K5	8	1-5

B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023-2024)

GENETICS, PLANT BREEDING AND EVOLUTION

CODE: 23BT/MC/GP64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- understand the Mendelian laws of genetics and gene interaction
- discuss the concept of linkage and crossing over and to discuss the sex determination
- describe the types and significance of mutation and polyploidy
- explain the principles of plant breeding, selection methods and hybridization
- understand the various aspects of evolution including organic and syntetic evolution theories

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts of Genetics and Evolution; describe the significance of mutation ad polyploidy and understand the role of plant breeding in crop improvement	K1
CO2	distinguish the pattern of inheritance and the theories of evolution and interpret the significance of plant breeding	K2
CO3	illustrate the genetic interactions with examples and various aspects of evolution; the demonstrate the need of mutation, polyploidy and plant breeding	K3
CO4	categorise the role of genes in inheritance; approaches involved in theories of evolution and to relate the mutation and polyploidy in plant breeding	K4
CO5	summerise the basic concepts of genetics and evolution; evaluate the role of mutation and polyploidy and devise suitable techniques for crop improvement	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Basic Concepts of Genetics-I 1.1 Mendelian Genetics: Law of Segregation, Law of Independent Assortment, Monohybrid cross and Dihybrid cross 1.2 Gene interactions: Allelic - Incomplete dominance. Co-dominance and Lethal genes. Non-Allelic: complementary, supplementary, Epistatic and Duplicate genes. 1.3 Multiple Gene Inheritance – Kernel colour in Maize 1.4 Multiple alleles: Petal colour in Asiatic cotton and self-sterility in Tobacco.	K1-K5	13	1-5
2	Basic Concepts of Genetics-II 2.1 Linkage and crossing over: types, theories and significance 2.2 Chromosome mapping (three point test cross) 2.3 Sex linked inheritance – Colour Blindness and Hemophilia 2.4 Sex determination in Plants 2.5 Extra chromosomal inheritance: Plastid inheritance in <i>Mirabilis jalapa</i> and cytoplasmic male sterility in plants.	K1- K5	13	1-5
3	Mutation and Population Genetics 3.1 Types of mutations: Point mutation and Chromosomal mutation 3.2 Mutagens and Mutagenesis: physical, chemical and biological mutagens 3.3 Detection of Mutation: Muller's CIB Technique 3.4 Chromosomal aberrations: deficiency, duplication, Inversion and translocation. 3.5 Population Genetics: Introduction, Hardy-Weinberg Law, its significance and applications. Hardy- Weinberg equilibrium - Role in evolution.	K1- K5	13	1-5
4	Plant Breeding 4.1 Introduction – objectives, activities and achievements in Plant breeding 4.2 Domestication and Plant introduction 4.3 Selection Methods – Mass, Pure line and Clonal selection 4.3 Basic Hybridization Techniques 4.4 Hybrid vigour 4.5 Polyploidy: introduction, types, induction and role of Polyploidy in crop improvement	K1- K5	13	1-5
5	Evolution 5.1 Origin of Life – Spontaneous and Chemosynthetic 5.2 Theory of Inheritance of Acquired characters (Lamarckism) 5.3 Theory of Natural Selection (Darwinism) 5.4 Mutation theory of De Vries 5.5 Synthetic theory of evolution and Speciation	K1- K5	13	1-5

PLANTBREEDING AND EVOLUTION - PRACTICAL**

CODE: 23BT/MC/P663

CREDITS: 3

L T P: 0 0 6

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

To enable the students to

- recall the functional mechanism in plants and their significance
- understand the concept and techniques of plant tissue culture
- relate the various physiological processes with respect to light, temperature and growth regulators
- understand the interaction of genes and relate it with gene mapping
- gain knowledge on the techniques of plant breeding for crop Improvement

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify and enumerate the techniques in plant biotechnology and plant breeding	K1
CO2	interpret and explain the physiological set up	K2
CO3	apply the knowledge to solve the problem based on interaction of genes and sequence the location of genes on chromosomes	K3
CO4	analyse the tissue culture technique and demonstrate the same using an explant	K4
CO5	asses the principle involved in plant physiology experiment and interpret their results	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religious in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Canticle of creatures Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

FRUIT PRESERVATION AND NUTRITION

CODE: 23BT/ME/FN45

CREDITS: 5

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- explain the methods of preservation in fruits and vegetables
- understand the nutritive value of fruits and vegetables
- elucidate the process of canning
- describe the steps involved in preparation of fermented beverages
- acquire practical skills in the preparation of various fruit products

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	list the different methods of preservation of fruits and vegetables; enumerate its nutritive value and recall the process of canning and fermented beverages.	K1
CO2	classify the methods of preservation; interpret the nutritive value of fruits, understand the scientific basis of canning, fermented products and preparation of fruit products.	K2
CO3	demonstrate steps involved in canning and fermented beverages; explain the methods of preservation and discuss the principle involved in preparation of fruit products	K3
CO4	analyse the steps involved in canning and fermented beverages and compare and contrast preparation of various fruit products	K4
CO5	estimate and evaluate fruit product preparations, assess the methods of preservation and nutritive value of fruits and vegetables, criticize process of canning	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

OBJECTIVES OF THE COURSE

To enable the students to

- provide knowledge on the fundamental concepts in horticulture
- understand the styles and components in gardening and develop the skill in propagation of plants
- understand the cultural practices in growing some fruits, vegetables and flowers
- illustrate the significance of organic horticulture and various types of gardens
- inculcate the entrepreneurial skills in horticulture

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic principles of Horticultural practices	K1
CO2	identify the various styles in gardening and their components; demonstrate the practices involved in gardening and the application of Horticulture in day – to- day life	K2
CO3	illustrate the fundamental concepts in Horticulture, relate it with cultural practices and develop entrepreneur skills in Horticultural sectors	K3
CO4	analyse the Horticultural techniques and explain the methods of propagation, distinguish the types of garden and promote the entrepreneur skills	K4
CO5	summarize the fundamental concepts and compile the significance of various Horticultural tools and techniques	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction and Techniques 1.1 Introduction, divisions of Horticulture and famous gardens of India (Rashtrapathi Bhavan Garden, New Delhi, Brindavan Garden, Mysore, Indian Botanical Garden, Kolkata and Botanical Garden, Ooty) 1.2 Garden Implements and Garden operations	K1-K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
	1.3 Growing Plants in Pot: Types of Pots, Potting and Repotting 1.4 Pot Culture (growing annuals)- Practical			
2	Garden Components and Propagation 2.1 Garden and its Components: Fencing Hedge, Borders, Flower Beds, Edging, Lawn, Drives and Paths, Water Garden and Garden Adornments 2.2 Vegetative Propagation: Cutting, Layering, Grafting and Budding (Theory and Practical) 2.3 Sexual propagation by means of seeds 2.4 Hydroponics	K1- K5	13	1-5
3	Cultural Practices Propagation, Planting and Harvesting of the following Plants: 3.1 Fruits: Mango and Guava 3.2 Vegetable Crops: Onion and Potato 3.3 Economic Flowers : Rose and Jasmine 3.4 Vegetable Forcing	K1- K5	13	1-5
4	Organic Horticulture and Types of Gardens 4.1 Organic Horticulture – organic gardening system, soil & nutrient management, pest & weed control approach 4.2 Kitchen Garden – Layout: Theory and Practical 4.3 Market Garden and Truck Garden 4.4 Rock Garden and Terrace Garden	K1- K5	13	1-5
5	General Topics 5.1 Landscaping and Lawn maintenance 5.2 Cut Flowers, Flower Arrangement: Fresh and Dry (Theory and Practical) 5.3 Bonsai 5.4 Terrarium: Theory and Practical	K1- K5	13	1-5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable the students to

- gain knowledge in the basic concepts of bioinformatics and its significance in biological data analysis.
- distinguish between different types of biological databases.
- understand the pattern of sequence similarity using BLAST.
- explain Multiple sequence alignment and phylogenetic analysis.
- describe the importance of Bioinformatics and its application

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the various biological databases and identify the sequence alignments tools.	K1
CO2	compare the concept of database, search for sequence similarity, multiple sequence alignment and phylogenetic analysis.	K2
CO3	apply the tools in sequence alignments methods and phylogenetic tree construction	K3
CO4	connect the similarity searches which pays the way for evolution.	K4
CO5	summarize various databases used for the study and list the Bioinformatics application.	K5

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

PATTERN OF ASSESSMENT

No Unit should be left out

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the binomial)	K1	1 – 10	10 (10 x 1 = 10)
B (4 out of 5 to be answered)) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	11 – 15	8 (4 x 2 = 8)
C (Internal choice) Paragraph	K3 / K3	16 or 17	6 (1 x 6 = 6)
	K4 / K4	18 or 19	6 (1 x 6 = 6)
D (Internal choice) Essay	K5 / K5	20 or 21	20 (1 x 20 = 20)
Total			50

Other Components:

Total Marks: 50

Quiz/ Assignment/ Seminar/ Scrapbook/ Poster presentation/ Model making

End- Semester Examination:**Total Marks: 100****Duration: 3 hours**

Section	Cognitive Level	Question number	Mark distribution
A Objective (Choose the correct answer, Fill in the blanks, True or False, Match the following,)	K1	1 - 20	20 (20 x 1 = 20)
B (8 out of 10 to be answered) (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	21 - 30	16 (8 x 2 = 16)
C (Internal choice) (Two questions at each level with Internal choice) Paragraph	K3 / K3	31 or 32, 33 or 34	12 (2 x 6 = 12)
	K4 / K4	35 or 36, 37 or 38	12 (2 x 6 = 12)
D (Two questions at each level with Internal choice) (Internal choice) Essay	K5 / K5	39 or 40, 41 or 42	40 (2 x 20 = 40)
Total			100

(Effective from the academic year 2023-2024)

BIOSTATISTICS

CODE: 23BT/ME/BS45

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce basic concepts and notions of statistics
- To acquire knowledge of discrete and continuous distributions and their properties
- To extend and formalize knowledge of the theory of probability and use of Baye's theorem
- To inculcate the concepts of random variables, relationship between them, sampling and test of significance

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the scope, functions, applications and limitations of Statistics.	K1
CO2	understand the concepts and statistical tools used in Biostatistics	K2
CO3	effectively apply these tools on solving the biological problems occurring in real life	K3
CO4	analyze the given Bio-statistical data as per the objectives of the problem	K4
CO5	argue and conclude suitable sampling technique for a real life survey	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Collection & Presentation of data 1.1 Collection of a data 1.2 Classification of a data 1.3 Tabulation of a data 1.4 Raw data 1.5 Formation of Frequency distribution 1.6 Types of Diagram 1.7 Simple Bar diagram 1.8 Line diagram 1.9 Subdivided bar diagram 1.10 Multiple bar diagram 1.11 Pie diagram 1.12 Histogram 1.13 Frequency Polygon	K1-K5	12	1-5
2	Measures of Central Tendency & Dispersion 2.1 Arithmetic Mean 2.2 Weighted arithmetic mean 2.3 Correcting incorrect values 2.4 Median of discrete and continuous distributions 2.5 Mode of discrete and continuous distributions 2.6 Measures of dispersion - Range 2.7 Quartile Deviation 2.8 Standard deviation 2.9 Coefficient of Variation	K1-K5	14	1-5
3	Correlation & Regression 3.1 Karl Pearson's Coefficient of Correlation 3.2 Scatter Diagram Method 3.3 Spearman's correlation coefficient 3.4 Applications of correlation Analysis 3.5 Regression definition & regression lines 3.6 Relationship between Correlation and regression coefficients	K1-K5	12	1-5
4	Probability & Theoretical Distributions 4.1 Definition 4.2 Addition & Multiplication theorems of probability 4.3 Conditional Probability 4.4 Baye's Theorem 4.5 Theoretical Distributions 4.6 Binomial Distribution 4.7 Poisson distribution 4.8 Normal distribution	K1-K5	14	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Sampling Methods & Test of Significance 5.1 Methods of sampling 5.2 Sampling and Test of significance 5.3 Types of errors - Critical region - One-tailed test - two-tailed test - Making a decision or conclusion 5.4 Test of significance for small sample test 5.5 Test of significance for large sample test 5.6 Chi-Square test 5.7 F-test	K1-K5	13	1-5

HERBAL THERAPY

CODE:23BT/GE/HT22

CREDITS: 2

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable the students to

- recognize and understand the Indian Systems of Medicine, its principle and drug preparation
- identify the local herbal plants and their parts as medicine and compare its medicinal importance for some common ailments
- gain basic knowledge in herbal drug preparation in Ayurveda and Siddha for skin and hair care and common ailments

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic principles of Indian Systems of Medicine and relate the therapeutic uses of medicinally important plants for skin, hair and common ailments	K1
CO2	understand the importance of herbs as medicinal plants and explain the importance of indigenous medicinal system	K2
CO3	apply the techniques of herbal drug preparation for skin, hair and lifestyle ailments and identify their role in present drug research	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	Indian Systems of Medicine 1.1 Introduction: Ayurveda, Siddha and Unani 1.2 Basic Principles of Ayurveda: Panchamahabhutas, Tridhoshha Concept and Malas 1.3 Preparation of Ayurvedic and Siddha Medicine Ayurveda: Svarasa (Juice); Churna (Powder);Kalka (Paste); Kashaya (Decoction and Infusion) and Bhasma Siddha: Lavanam, Pashanam, Loham, Rasam and Gandhakam	K1-K3	9	1-3

UNIT	CONTENT	CL	Hrs	CO
2	Herbs and Therapeutics 2.1 Herbal remedies for some common ailments: Diarrhoea, Ulcer, Cold, Asthma, Fever, Hypertension, Jaundice, Chickenpox, Diabetes, Menstrual Disorders 2.2 General Health Tonics and Salads 2.3 Preparations of Ayurvedic Medicines: Churnam, Decoction, Leghyam, Tailam and Skin Cream (Practical)	K1-K3	8	1-3
3	Skin and Hair care 3.1 Role of Dhatu in physical beauty 3.2 Herbal Care for Facial Skin - Herbal Face Pack for Dry, Oily and Normal Skin: Herbal Remedy for Pimples, Acnes, Black Heads, Corns, Warts and Boils 3.3 Herbal Remedy for Dandruff, Premature Greying and Loss of Hair: Hair Washes and Herbal Hair Tonics 3.4 Demonstration of Facial and Hair Care	K1-K3	9	1-3

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment Test: Total Marks: 25 Duration: 1 Hour

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the binomial)	K1	1 – 10	10 (10 x 1 =10)
B 1 out of 2 to be answered (Paragraph)	K2	11 – 12	1 (1 x 5= 5)
B 1 out of 2 to be answered (Essay)	K3	13-14	1 (1 x 10= 10)
Total			25

Other Components: Total Marks: 25

Quiz/ Assignment/ Seminar/ Scrapbook/ Poster presentation/ Model making

No End Semester Examination

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023–2024)

AGRICULTURE

CODE:23BT/UI/AR23

CREDITS:3

OBJECTIVES OF THE COURSE

Students will be able to

- learn the agricultural practices in India
- To understand the economic importance of farm crops
- To familiarize students with the modern methods of farming

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- gain knowledge on fertilizers, weeds and water resources
- identify different types of soils
- acquire a deeper understanding of farm crops
- learn a variety of methods for pest control
- understand the local cropping patterns
- become familiar with the water resources of Tamil Nadu

Unit 1

Modern Trends in Agriculture

- 1.1 Precision Agriculture
- 1.2 Vertical Farming Techniques-Hydroponics and Aeroponics
- 1.3 Hybrid Seed Technology

Unit 2

Fertilizers and its Uses

- 2.1 Organic Fertilizers - Farm Yard Manure and Biofertilizers
- 2.2 Inorganic Fertilizers – Nitrogenous, Phosphatic, Potassic
- 2.3 Residual Effects of Fertilizers

Unit 3

Weed and Pest Control

- 3.1 Weed Control: Mechanical, Biological and Chemical
- 3.2 Integrated Pest Management
- 3.3 Transgenic Plants for Crop Improvement: Herbicide Resistance, Insect Resistance, Resistance against Viral, Bacterial and Fungal Pathogens

Unit 4

Water Resources and Cropping Patterns

- 4.1 Water resources of Tamil Nadu (Rivers, Dams and Monsoons)
- 4.2 Cropping patterns of Tamil Nadu: Multiple cropping, Relay cropping, Intercropping, Mixed cropping and Multi-Tier cropping
- 4.3 Classification of Soils in India

Unit 5

Farm Crops: Economic Importance

- 5.1 Cereals: Rice and Wheat
- 5.2 Pulses: Blackgram and Pigeon Pea
- 5.3 Oil Seeds: Groundnut and Sunflower Seed
- 5.4 Sugar crops: Sugar Cane
- 5.5 Vegetables: Potato and Onion
- 5.6 Spices: Pepper
- 5.7 Fibres: Cotton and Jute
- 5.8 Fruits: Mango and Citrus Fruits

BOOK FOR STUDY

Subbiah Mudaliar, V.T. - *Principles of Agronomy*. Bangalore: 1979.

Wrigley Gordon, *Tropical Agriculture – The Development and Production*. ELBS,1998.

PATTERN OF ASSESSMENT

No Unit should be left out

End Semester Examination:

Total Marks: 100

Duration: 3 hours

Section A –10 X 3 = 30 marks (10 out of 13 questions to be answered in 50 words each)

Section B – 5x 6 = 30 marks (5 out of 8 questions to be answered in 200 words each)

Section C – 2 x 20 = 40 marks (2 out of 4 questions to be answered in 1000 words each)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**B.Sc. DEGREE: BRANCH V. A. PLANT BIOLOGY AND PLANT
BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023–2024)

FORESTRY

CODE:23BT/UI/FR23

CREDITS:3

OBJECTIVES OF THE COURSE

Students will be able to

- understand the value of wealth of forests of India
- develop an understanding of biodiversity, conservation and agroforestry
- realize the role of people in conserving forests

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- gain knowledge on the different types of forests and their distribution
- understand the concepts of protection, commercial and social forestry
- become familiar with national sanctuaries, parks and biospheres
- discover the variety of non-wood forest products
- determine the causes and consequences of deforestation
- appreciate peoples power in conservation of forests

Unit 1

Forest Types

- 1.1 Major Forest types in India with special reference to Tamil Nadu
- 1.2 Forest Ecosystem
- 1.3 Forests as Centers of Biodiversity
- 1.4 Biodiversity Hotspots

Unit 2

Protection Forestry

- 2.1 Conservation- *in-situ* and *ex-situ*
- 2.2 National Forest Policy, Forest Conservation Act
- 2.3 National Sanctuaries, National Parks and Biosphere Reserves
- 2.4 Role of People: Chipko Movement, Saalumarada Thimmakka and Hugo Wood

Unit 3

Commercial Forestry

- 3.1 Forests as Sources of Timber
- 3.2 Non wood Forest Products: fodder, food, oil, fiber, paper and medicine

Unit 4**Social Forestry**

4.1 Agroforestry- Afforestation and Reforestation Programmes

4.2 Ecological Benefits

4.3 Deforestation: Causes and Consequences

4.4 Plantation Forestry

Unit 5**Silviculture**

e

5.1 Artificial and Natural Regeneration of some important Forest Plants: Teak and Casuarina

5.2 Forest Education and Management

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600086

DEPARTMENT OF ZOOLOGY

PROGRAMME DESCRIPTION

The U.G programme, Advanced Zoology and Biotechnology scientifically deals with the study of animals. The subjects included are conventional papers like Invertebrata, Chordata, Developmental Biology, Animal Physiology, Evolution, Genetics, Ecology, Animal Behaviour as well as technology-oriented papers like Immunology, Cell and Molecular Biology, Microbiology and Fundamentals of Biotechnology.

Zoology is a complete study of animals, of processes from molecular to organismal levels that determine the structure, functions, development, behaviour and evolution of the animals and of interactions between animals and their environment. Students also study the various mechanisms of inheritance. Each theory paper is supplemented with a suitable practical component thereby providing hands-on experience. Another unique feature of this programme is computer simulation of dissection that provides computer-oriented skills to the students alongside the subject matter through a humane approach.

Students are taken on educational visits to reputed organisations and state of the art laboratories with sophisticated lab instruments which provides them an opportunity to enhance their understanding of scientific concepts and working of instruments. Students who possess an analytical bent of mind, data-handling capability and good written communication skills can opt for Project work as one of their course papers. Another significant aspect of the programme is the opportunity given to develop the ability to work both independently as well as in a team through mini projects. Those candidates who opt for postgraduate programme for teaching purpose at institutes and universities also benefit from the specifically designed curriculum. The Advanced Zoology and Biotechnology degree programme serves as a foundation for higher studies (M.Sc., M.Phil., Ph.D.) in Life Sciences, Biotechnology, Bio-Informatics, Genetics, Microbiology, Wild life Biology, Neurosciences and Anatomy, as well as for a promising career in related fields.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600086

DEPARTMENT OF ZOOLOGY

VISION OF THE DEPARTMENT

To equip students with a sound foundation in Zoology, inculcating in them a humane approach and sensitivity towards the environment and sustainability; empowering them with skills that create and enhance research aptitude and employability and instilling in them inclusive, moral and societal values for holistic growth.

MISSION OF THE DEPARTMENT

- To impart value-based and quality education in the fields of Zoology and Biotechnology
- To inculcate in students the spirit of scientific inquiry and promote discovery and learning
- To develop in students an appreciation for biodiversity and promote its conservation
- To sensitise students to environmental and bioethical issues
- To utilise biological knowledge for community development
- To prepare students for research, teaching, entrepreneurship and other careers

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600086

PROGRAMME SPECIFIC OUTCOMES (PSO)

On successful completion of the B.Sc. Advanced Zoology and Biotechnology Programme, the students will be able to

PSO1	Acquire a strong foundation in Zoology, comprehensive knowledge in current trends in Biology, especially in Biotechnology
PSO2	Demonstrate proficiency in experimental techniques and methods of analysis appropriate to their area of special interest in Zoology and Biotechnology and develop scientific temper and skills, leading to employability
PSO3	Engage in critical thinking and integrate knowledge of biological systems, concepts, theories and techniques into their personal and professional lives within an inclusive learning environment
PSO4	Apply concepts and recent techniques in Zoology and use relevant skills in Biology for entrepreneurial ventures and professions
PSO5	Exercise their knowledge ethically to ensure human and animal welfare for environmental sustainability and biodiversity conservation

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH VI A - ADVANCED ZOOLOGY AND BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023 - 2024)

INVERTEBRATA

CODE:23ZL/MC/IV14

CREDITS : 4

L T P : 4 1 0

TOTAL TEACHING HOURS : 65

OBJECTIVES OF THE COURSE

To enable the students to

- Comprehend the outline classification of the Animal Kingdom and the special features of Phylum Protozoa
- Relate the characteristic features, structural and functional organization of Poriferans and Coelenterates and understand strategies for their conservation
- Integrate the salient features and structural organization of Platyhelminthes and Annelids and understand their biological and medicinal significance
- Examine the unique features and structural organization of Arthropods and analyze the social life of insects
- Comprehend the characteristic features of Phylum Mollusca and Echinodermata and describe the economically important forms

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the unique characters of different phyla, common and technical names of some animals	K1
CO2	describe the structural organization and functions of various invertebrates	K2
CO3	apply the knowledge to identify the organisms based on their characteristic features, life cycles and habits and relate it with human welfare	K3
CO4	analyse the special adaptations of invertebrates and the need for their conservation	K4
CO5	evaluate the economic importance and biological significance of invertebrates	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction and Outline Classification of Animal Kingdom 1.2 Phylum Protozoa: Characteristic Features - Type: <i>Paramecium caudatum</i> 1.3 Locomotion in Protozoa 1.4 Parasitic Protozoans: <i>Entamoeba histolytica</i> and <i>Plasmodium sp.</i>	K1 – K4 K1 – K4 K1 – K4 K1 – K5	11	CO1 - 5
2	2.1 Phylum Porifera: Characteristic Features - Type : <i>Sycon</i> 2.2 Canal System in Sponges – Economic Importance of Porifera 2.3 Phylum Coelenterata: Characteristic Features - Type - <i>Obelia geniculata</i> 2.4 Polymorphism in Coelenterates - Corals and Coral Reefs – Environmental Impact – Conservation- Affinities of Ctenophora	K1 – K5 K1 – K5 K1 – K4 K1 – K5	12	CO1 - 5

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the zoological name)	K1	1 - 5	10 (5 x 2= 10)
B (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	6 - 10	10(5 x 2 = 10)
C (Internal choice) Essay	K3 / K3	11 or 12	10(1 x 10=10)
	K4 / K4	13 or 14	10(1 x 10=10)
D (Internal choice) Paragraph	K5 / K5	15 or 16, 17 or 18	10 (2 x 5= 10)
Total			50

Other Components:**Total Marks: 50**

Quiz/ Assignment/ Illustration Assignment/ Scrapbook/ Poster presentation/ Model making

End- Semester Examination: Total Marks: 100**Duration: 3 hours**

Section	Cognitive Level	Question number	Mark distribution
A Objective (Fill in the blanks, True or False, Match the following, State, Define, List, Recall the zoological name)	K1	1 - 10	20 (10 x 2=20)
B (Distinguish, Differentiate, Illustrate, Short answers, Relate)	K2	11 - 20	20 (10 x 2=20)
C (Internal choice)Essay (Two questions at each level with Internal choice)	K3 / K3	21 or 22, 23 or 24	20 (2 x 10=20)
	K4 / K4	25 or 26, 27 or 28	20 (2 x 10=20)
D (Internal choice) Paragraph (Four questions with Internal choice)	K5 / K5	29 or 30, 31 or 32,33 or 34, 35 or 36	20 (4 x 5 =20)
Total			100

BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023 - 2024)

INVERTEBRATA PRACTICAL

CODE: 23ZL/MC/P112

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

To enable students to

- understand and examine the morphology and anatomy of invertebrate specimen through dissection and audio - visual demonstrations
- mount the mouthparts of insects and body setae of earthworm
- identify and classify invertebrate specimens based upon their distinctive characteristics
- comprehend and identify various insect vectors and extraction methodology of soil fauna
- gain hands-on experience in vermiculture and familiarize students with the habits and habitat of invertebrate fauna of the campus and create awareness on biodiversity conservation.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the distinctive features and biological significance of various Invertebrates and identify them	K1, K2
CO2	associate and illustrate the location and organization of organs and organ systems in invertebrates	K3
CO3	compare the structure, functions and adaptations of various invertebrates	K4
CO4	analyze and relate the structural and functional organization of invertebrates	K5
CO5	apply the skills learnt for display and labelling of dissections, construction of model vermipit and documentation of campus fauna	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	DISSECTIONS: <i>Periplaneta americana</i> / <i>Fenneropenaeus indicus</i> Digestive System and Nervous System COMPUTER SIMULATED DISSECTIONS Digital Earthworm	K3 - K6	8	CO2 – CO5
2	MOUNTS Body setae of Earthworm Appendages of prawn Mouth parts of mosquito, house fly and honeybee	K4 - K6	8	CO3 – CO5
3	SPOTTERS Identification and description of specimens of all groups of invertebrates studied under the syllabus- five under each phylum	K1 – K3	8	CO1 – CO2
4	SPOTTERS Identification of Insect vectors – <i>Aedes sp</i> , <i>Culex sp</i> , <i>Pediculus sp</i> , <i>Xenopsylla sp</i> and <i>Sarcoptes scabiei</i> Extraction of Soil microarthropods using Berlese funnel	K1 – K3	7	CO1 – CO2
5	WORKSHOP/OBSERVATION AND DOCUMENTATION Study of life history stages of <i>Lampito mauritii</i> and <i>Perionyx excavatus</i> Workshop on Vermitechnology Study of any ten Invertebrate fauna in the Stella Maris College Campus (Observation of habit, habitat and adaptive features) Record of Microhabitat and correlation of host plant interaction (wherever possible) Visit to Zoological Survey of India/Farm	K5, K6	8	CO4 - CO5

RECORD WORK

Maintenance of a record of practical work done is essential for continuous assessment and is an integral part of the syllabus.

PATTERN OF ASSESSMENT**Continuous Assessment Test:****Total Marks: 50****Duration: 3 hours**

Section	Question	Cognition Levels	Marks Allotted
A	Major Dissection	K3, K4, K5, K6	20
B	Minor Dissection/Mount	K4, K5, K6	15
C	Spotter	K1, K2, K3	15
Total			50

Other Components:**Total Marks: 50**

Component	Cognition Levels	Marks allotted
Setting up of a model Vermipit/ Documentation of fauna	K5, K6	20
Observation Book and Record	K1, K2, K3, K4	30
Total		50

End-Semester Examination:**Total Marks: 50****Duration: 3 hours**

Section	Question	Cognition Levels	Marks Allotted
A	Major Dissection	K3, K4, K5, K6	20

OBJECTIVES OF THE COURSE

To enable students to

- comprehend the characteristic features, structural organisation, economic importance and conservation of Protozoans, Coelenterates, Platyhelminthes and Aschelminthes
- comprehend the characteristic features, structural organisation, and economic importance of Annelids, Arthropods, Molluscs and Echinoderms
- comprehend the salient features, structural organisation and behaviour of Prochordates, Agnathans and Fishes
- comprehend the characteristic features, structural organisation and conservation of Amphibians, Reptiles and Birds
- comprehend the characteristic features, structural organisation and adaptations of Mammals

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the characteristic features and outline classification of Invertebrates and Chordates	K1
CO 2	describe the structural and functional organisation of Invertebrates and Chordates	K2
CO 3	apply the acquired knowledge to identify specific adaptations and the causes, mode of transmission, symptoms and preventive measures of various diseases	K3
CO 4	analyse the specific adaptations, behaviours and various threats to some animals and strategies for their conservation	K4
CO 5	evaluate the economic importance and biological significance of animals	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction: Outline Classification of Animal Kingdom 1.2 Protozoa: Characteristic Features - Type: <i>Paramecium caudatum</i> 1.3 Coelenterata: Characteristic Features - Corals and Coral Reefs – Conservation and Economic Importance 1.4 Platyhelminthes & Aschelminthes: Characteristic Features - Helminth Parasites in relation to Human Welfare: Causative Organism, Life Cycle, Mode of Transmission, Symptoms & Prophylaxis of the following: <i>Taenia solium</i> , <i>Ascaris lumbricoides</i> and <i>Enterobius vermicularis</i>	K1 K1 – K5 K1 – K5 K1 – K5	10	CO 1 - 5
2	2.1 Annelida: Characteristic Features - Vermitechnology: Vermiculture, Vermicomposting, Vermiwash and Setting up of Vermiculture. 2.2 Arthropoda: Characteristic Features - Mode of Infection and Diseases caused by the following Vectors: <i>Aedes sp.</i> , <i>Pediculus sp.</i> , <i>Musca domestica</i> - Social Life in Insects 2.3 Mollusca: Characteristic Features – Economic Importance 2.4 Echinodermata: Characteristic Features - Type: <i>Asterias sp.</i>	K1 – K5 K1 – K5 K1–K5 K1 – K5	11	CO 1 - 5

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23ZL/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 (13 Hours)
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 (13 Hours)

3.1 Energy conservation

- 3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant
- 3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

- 3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing
- 3.2.2 **Configuring Email**
Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails
- 3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Two to three Task based components

Task based classroom activities

Case studies

Group discussions

Group presentation

Role play

No End Semester Examination

No CA test

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI-600086

**Soft Skills Course Offered by the Department of English for
B.A. / B.Sc. / B.Com. / B.B.A./ B.S.W. / B.V.A. /B.C.A. Degree Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

LIFE SKILLS: PERSONALITY DEVELOPMENT

CODE: 23EL/SS/PD13

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To make students aware of their strengths and weaknesses
- To help them hone their communication skills
- To equip them with skills required to raise self-esteem and confidence levels
- To help them acquire competencies to achieve personal and academic excellence
- To enable students to become effective team players

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify strengths and weaknesses in themselves and others.	K1
CO2	relate with others through effective communication and body language.	K2
CO3	make use of interpersonal skills in team work, and organise their activities.	K3
CO4	survey the opportunities for learning and growth.	K4
CO5	evaluate their strengths, weaknesses, opportunities and threats, and develop their personality.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Self Awareness</u> 1.1 Self esteem 1.2 Strengths and weaknesses 1.3 Accepting oneself 1.4 Giving/receiving compliments 1.5 Giving/receiving constructive criticism	K1-K4	13	1-4
2	<u>Personal Effectiveness</u> 2.1 Interpersonal skills – Communication and listening skills 2.2 Creative thinking 2.3 Dealing with stress 2.4 Adapting to change 2.5 Team work and group dynamics 2.6 Leadership skills	K1-K6	13	1-5
3	<u>Charting the Future</u> 3.1 Time management 3.2 Goal setting 3.3 Choice of career/vocation 3.4 Career mapping	K1-K6	13	1-5

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to

- Describe the morphological and anatomical features Algae and Fungi
- Elucidate the life cycle patterns of lower plants
- Recollect and summarize the principles of plant systematics
- Identify and classify the various types of plant diseases
- Familiarize and appreciate the importance of sustainable agriculture

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and explain the general characteristics of Algae and Fungi, identify the plant diseases of crop plants; to explore suitable control measures, derive the family and describe them in technical terms and list the agricultural practices	K1
CO2	illustrate the structural details of lower forms, identify the causal organisms of plant diseases, assign the plants to the respective families, summarize the cultural practices in agriculture.	K2
CO3	analyse the vegetative and reproductive structure of Algae and Fungi; categorize the common plant diseases and their control measures	K3
CO4	construct and compare the life cycle patterns of Algae, Fungi and flowering plants; Evaluate the characteristics of flowering plants, summarize the practices involved in sustainable agriculture.	K4
CO5	compile the characteristic features of Algae, Fungi and Angiosperms; Explore and appreciate the economic value of Angiosperm	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Algology 1.1 Salient features of Algae 1.2 A detailed study of the Life Cycle of the following Algae (no development) a. <i>Nostoc</i> b. <i>Chara</i> c. <i>Sargassum</i>	K1- K6 K1 -K3 K1- K5	10	1-5
2	Mycology 2.1 Salient features of Fungi 2.2 A detailed study of the Life Cycle of the following Fungi (no development) a. <i>Rhizopus</i> b. <i>Aspergillus</i> c. <i>Agaricus</i>	K1- K5 K1 -K3 K1 -K3	10	1-5
3	Plant Pathology 3.1 A study of the causal organism, symptoms and control measures of the following plant diseases: a. Citrus Canker b. Leaf curl of Papaya c. Red Rot of Sugarcane	K1- K4 K1- K4	10	1-5
4	Taxonomy 4.1 A general outline of Bentham and Hooker's Classification 4.2 A study of the salient features of the following families and their economic Importance: a. Annonaceae b. Cucurbitaceae c. Apocynaceae d. Lamiaceae e. Euphorbiaceae f. Musaceae	K1- K5 K1-K4 K1- K5	11	1-5
5	Agricultural practices 5.1 Preparation of Soil 5.2 Organic Farming 5.3 Biofertilizer 5.4 Biopesticides – Bacterial and Plant based 5.5 Mushroom Cultivation- Oyster	K1- K5 K1- K2 K3-K4 K1 –K5 K3 K4- K5	11	1-5

GENERAL BOTANY - I – PRACTICAL

CODE: 23BT/AC/P111

CREDITS: 1

L T P: 0 0 2

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable the students to

- Identify and describe the morphological, anatomical and reproductive structures of lower plants
- Observe and differentiate the morphological and anatomical features of Algae, Fungi through permanent slides
- Identify the plant pathogen through visualization of infected parts of the plants
- Assign and classify the plants to respective families based on the characters
- Dissect and describe the plants in technical terms and familiarise and appreciate the importance of sustainable agricultural practices

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect and summarize the general characteristics of Algae and Fungi; Identify plant disease; observe salient features of plants belonging to different families	K1
CO2	examine the Taxonomic characters of Angiosperms; Illustrate the vegetative and reproductive structures of Algae and fungi; Distinguish the plant disease based on symptoms.	K2
CO3	dissect the floral parts of the given Angiospermic plants; compare and analyse the structure of Algae and Fungi.	K3
CO4	summarize the characters of Algae and Fungi; compare the salient features of Angiospermic families	K4
CO5	develop the skill of observation by visualising morphological, anatomical structures of Algae and Fungi; Construct floral diagram and floral formula for the families; apply the concept of sustainability in agriculture	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	ALGAE Identification, Observation and Sketching of the following Algal forms - 1. <i>Nostoc</i> 2. <i>Chara</i> 3. <i>Sargassum</i>	K1- K5	6	1-5
2	FUNGI Identification, Observation and Sketching of the following Fungal forms - 1. <i>Rhizopus</i> 2. <i>Aspergillus</i> 3. <i>Agaricus</i> PLANT PATHOLOGY Identification, observation and sketching of the following- 1. Citrus Canker 2. Leaf curl of papaya 3. Red Rot of Sugarcane	K1- K5	8	1-5
3	TAXONOMY 3.1 Derivation (Assign the plants to their respective families) 3.2 Description in Technical Terms of Plants belonging to the Families mentioned in the syllabus 3.3 Dissection of flowers, observation and sketching of floral Parts, construction of floral diagram and floral formula	K1- K5	10	1-5
4	AGRICULTURAL PRACTICES Demonstration of microbial quality of the Biofertilizers available in the market (<i>Rhizobium</i> and <i>Azospirillum</i> , <i>Azotobater</i>)	K1- K5	2	1-5

SYLLABUS

(Effective from the academic year 2023 - 2024)

DEVELOPMENTAL BIOLOGY

CODE: 23ZL/MC/DB23

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable students to

- understand the basic concepts and theories in Developmental Biology along with various phases of animal development such as gametogenesis and fertilization
- comprehend the basic concepts and theories along with various stages of animal development and developmental processes
- understand the different stages of development along with the cellular and molecular changes that occur during each stage and the process of organogenesis
- comprehend the concept of potencies, mechanisms of metamorphosis and regeneration and the types and applications of stem cells and related ethical issues
- understand the causes of infertility and acquire knowledge on the recent advances in the field of developmental biology and the related bioethical issues, the deficiency of folic acid and effect of teratogens on embryonic development

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
1	recall the important concepts and theories in Developmental Biology, Gametogenesis, stages in animal development, process of organogenesis, types and causes of infertility, Assisted Reproductive Technology, Totipotency, significance of folic acid deficiency, Teratogenesis and the mechanisms of metamorphosis and regeneration and the types and applications of stem cells and related ethical issues	K1
2	describe the processes, concepts and theories relating to gametogenesis, fertilization, stages in animal development, process of organogenesis, types and causes of infertility, Assisted Reproductive Technology, Totipotency, significance of folic acid deficiency, Teratogenesis and the mechanisms of metamorphosis and regeneration and the types and applications of stem cells and related ethical issues	K2
3	apply the knowledge obtained to explain concepts and theories relating to Developmental Biology, processes of gametogenesis, fertilization, stages in animal development, process of organogenesis, types and causes of infertility, Assisted Reproductive Technology, Totipotency, significance of folic acid deficiency, Teratogenesis and the mechanisms of metamorphosis and regeneration and the types and applications of stem cells and related ethical issues	K3

COs	DESCRIPTION	CL
4	Analyse the concepts and theories relating to Developmental Biology, processes of gametogenesis, fertilization, stages in animal development, process of organogenesis, types and causes of infertility, Assisted Reproductive Technology, Totipotency, significance of folic acid deficiency, Teratogenesis and the mechanisms of metamorphosis and regeneration and the types and applications of stem cells and related ethical issues	K4
5	Evaluate the concepts and theories relating to developmental biology, processes of gametogenesis, fertilization, stages in animal development, process of organogenesis, types and causes of infertility, Assisted Reproductive Technology, Totipotency, significance of folic acid deficiency, Teratogenesis and the mechanisms of metamorphosis and regeneration and the types and applications of stem cells and related ethical issues	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction - Brief History - Theories of Preformation, Epigenesis, Pangenesis, Recapitulation, Germplasm - Mosaic and Regulative Development - Gradient and Organisers 1.2 Gametogenesis: Spermatogenesis - Morphology and Types of sperms – Oogenesis - Eggs – Morphology, Types 1.3 Fertilization: Physicochemical Aspects, Theories - Parthenogenesis	K1 - K5	11	1 - 5
2	2.1 Cleavage: Different patterns with examples – Factors influencing cleavage - Comparative study of Blastulation in Frog and Chick 2.2 Gastrulation: General Morphogenetic Movements in Chordate Embryos – Experiments by Spemann and Mangold - Comparative Study of Gastrulation in Frog and Chick - Cell lineage - Fate Maps and their significance 2.3 Embryonic Adaptations: Extra - Embryonic and Foetal Membranes - Types and Functions of Placenta	K1 - K5	11	1 - 5
3	3.1 Cell differentiation and differential activity Organogenesis in Frog: Ectodermal Derivatives – Brain and Eye 3.2 Mesodermal Derivatives: Heart and Blood 3.3 Endodermal Derivatives: Digestive Tract and its associated glands	K1 - K5	10	1 - 5
4	4.1 Metamorphosis in Insects and Amphibians 4.2 Regeneration: Mechanism and Types, Medical Applications 4.3 Concept of potencies: totipotency and pluripotency – nuclear transfer experiments – embryonic and haemopoietic stem cells – ethical issues	K1 - K5	10	1 - 5

UNIT	CONTENT	CL	HRS	CO
5	5.1 Infertility in humans - Types and causes 5.2 Assisted Reproductive Technology: Induced Ovulation and its Applications – Superovulation - <i>In vitro</i> Fertilisation - Cryopreservation - Surrogate Motherhood – ethical issues 5.3 Folic acid deficiency and embryonic development - Teratogenic agents and their impact on embryonic development	K1 - K5	10	1 - 5

BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023 - 2024)

CHORDATA AND DEVELOPMENTAL BIOLOGY PRACTICAL

CODE:23ZL/MC/P222

CREDITS:2

L T P:0 0 3

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

To enable students to

- Understand and examine the morphology and anatomy of chordate specimens through dissection, simulation and audio - visual demonstrations.
- Mount the otolith and different types of scales of fishes.
- Identify and classify chordate specimens based on their distinctive characteristics.
- Identify various stages in the development of chordates based on their distinctive features and/or life cycle
- Write a report on the chordate fauna observed on campus, upload the observations to global biodiversity portals for the purpose of conservation and maintain an observation notebook and a record notebook

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	Submit a record of practical work carried out in the laboratory and/or a report on a field/laboratory visit and/or report of campus faunal survey	K1
CO 2	Illustrate and describe chordate spotters	K2
CO 3	Demonstrate skills to mount the otolith of fish and scales of different fishes, and computer simulated dissection (not for evaluation)	K3
CO 4	Examine the habit and habitat of campus fauna and identify the stages of chordate development and different types of placenta of chordates	K4
CO 5	Dissect and display the viscera and digestive system of fish	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO

SYLLABUS

(Effective from the academic year 2023-2024)

GENERAL ZOOLOGY II

CODE: 23ZL/AC/GZ24

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable students to

- understand the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging
- comprehend the various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals
- understand the basic concepts in Genetics, different patterns of inheritance, types of mutations, types and applications of stem cells and related ethical issues
- comprehend the mechanisms involved in different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccination
- understand certain evolutionary strategies and human evolutionary stages

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K1

COs	DESCRIPTION	CL
CO 2	outline the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K2
CO 3	apply the knowledge to describe the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K3
CO 4	analyse the mechanisms involved in physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells and related ethical issues, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K4
CO 5	evaluate the mechanisms involved and elaborate on the physiological adaptations related to colour change, bioluminescence, diving, high altitude and changes in various systems during exercise and aging, various intraspecific and interspecific behaviours, learning behaviour and abnormal behaviours in animals, different patterns of inheritance, types of mutations, types and applications of stem cells and related ethical issues, different types of immunity, types of antigen and antibodies and their biological activity, hypersensitivity reactions, autoimmune disorders and vaccines, evolutionary strategies and human evolutionary stages.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Animal Physiology 1.1 Introduction - Chromophores: mechanism of colour change in cold blooded vertebrates - Bioluminescence: mechanism, examples and significance 1.2 Adaptations to diving and high altitudes 1.3 Exercise Physiology: respiration in exercise and cardiovascular system in exercise 1.4 Physiology of ageing: causes - changes in major systems	K1 - K5	10	1 - 5
2	Animal Behaviour 2.1 Introduction- Animal Associations: Commensalism, Mutualism, Parasitism and Predation 2.2 Play: General Attributes of Play and Examples - Courtship Behaviour: Steps and function - Courtship in birds (Sandgrouse, Bower bird, Baya weaver bird, Asian Koel & Indian Peafowl) 2.3 Learning Behaviour: Forms of Learning 2.4 Abnormal Behaviour in Domestic and Zoo Animals	K1 - K5	10	1 - 5
3	Genetics 3.1 Introduction – Human Chromosomes – Lethal Genes: types and examples 3.2 Patterns of Inheritance: Autosomal Dominant (Hypercholesterolaemia), Autosomal Recessive (Albinism), X- linked Dominant (Hypophosphatemia), X- linked Recessive (Duchenne Muscular Dystrophy), Y-linked (Hypertrichosis) and Mitochondrial inheritance (Kearns Sayre Syndrome) 3.3 Mutation: Classification - Chromosomal aberrations (Types and Examples) 3.4 Stem Cells: Sources and Types, Applications and Ethical issues	K1 - K5	11	1 - 5
4	Immunology 4.1 Immune System: Introduction - Innate Immunity and Acquired Immunity (Humoral and Cell Mediated Immunity) 4.2 Types of Antigens - Antibody Classes and their Biological Activity 4.3 Hypersensitivity reactions: types - Autoimmune disorders: Causes and Significance (eg. Rheumatoid Arthritis) 4.4 Vaccines: Types - National Immunisation Schedule (NIS) for infants, children and pregnant women	K1 - K5	10	1 - 5

UNIT	CONTENT	CL	HRS	CO
5	Evolution 5.1 Introduction to Evolution - Coevolution 5.2 Mimicry and Colouration: Types and significance 5.3 Distribution of Animals - Types, barriers and methods of dispersal of animals 5.4 Stages in Human Evolution - Cultural history	K1 - K5	11	1 - 5

GENERAL ZOOLOGY II PRACTICAL

CODE: 23ZL/AC/P221

CREDITS: 1

L T P: 0 0 2

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable students to

- Understand the basic principle involved in the estimation of oxygen consumption by an aquatic animal and calculate the rate of oxygen consumption
- Comprehend the principle and procedure to observe the Barr body in squamous epithelial cells, to determine the blood groups and to detect the presence of HCG in the urine sample of pregnant women
- Develop the necessary skills for analysing the behaviour, pedigree of some human inherited traits/diseases/disorders, Mendelian traits and Karyotypes
- Identify and describe specific examples for bioluminescent organisms, animal associations, immune cells, coevolution, mimicry and colouration and stages of evolution in man
- Write a report on the inheritance pattern of Mendelian traits, genetic diseases/disorders and maintain an observation and record book

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	Submit a record of practical work carried out in the laboratory and/or report on pedigree analysis and Mendelian traits	K1
CO 2	Illustrate and describe the bioluminescent organisms, immune cells, animal associations and evolutionary adaptations	K2
CO 3	Demonstrate the skills to identify the Barr body in squamous epithelial cells, to determine the blood groups and to detect the presence of HCG in the urine sample	K3
CO 4	Analyse the behaviour of animals, pedigree of some human inherited traits/diseases/disorder, Mendelian traits and normal and abnormal Karyotypes	K4
CO 5	Estimate the oxygen consumption in an aquatic animal with reference to body weight	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	i. Oxygen consumption in an aquatic animal with reference to body weight.	K5	8	CO 5
2	i. Time Budgeting of Courtship and Play Behaviour ii. Pedigree Analysis of some human inherited traits/disorders/diseases iii. Study of any five Mendelian Traits iv. Observation and identification of Karyotypes: Normal male and female, Turner's, Klinefelter's and Down's syndrome karyotypes	K4	6	CO 4
3	i. Squamous epithelium squash preparation – Barr body ii. ABO - Blood Grouping and Rh – Typing iii. Pregnancy test: ELISA- Qualitative Test for Pregnancy	K3	6	CO 3
4	Observations and Identification of the following spotters: i. Bioluminescent animals - Comb Jelly, Firefly and Angler fish ii. Animal Associations: Parasitism - <i>Wuchereria bancrofti</i> and <i>Sacculina</i> on Crab Mutualism - Sea Anemone on Hermit Crab Commensalism - <i>Echeneis</i> Predation – Octopus iii. Immune cells - Basophil, Neutrophil, Eosinophil, Phagocyte and Dendritic cell iv. Coevolution: a) Plant and Pollinator - <i>Centropogon</i> flower and Hummingbird b) Predator and Prey - Rough-skinned Newt and Garter Snake v. Mimicry and Colouration: a) Batesian mimicry - Crimson Rose/Common rose and Common Mormon b) Mullerian mimicry - Bees and Wasps b) Protective Colouration - Sand Grasshopper c) Aggressive Colouration - Poison Dart Frog vi. Stages in the evolution of man	K2	3	CO 2
5	i. Reports on Pedigree analysis of some human inherited traits/disorders/diseases and Mendelian traits ii. Maintenance of an observation and record book of practical work is an integral part of the syllabus.	K1	3	CO 1

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23ZL/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

PATTERN OF ASSESSMENT

Continuous Assessment Test: **Total Marks: 25** **Duration: 60 minutes**

Section A-10 x 1 = 10 Marks (All questions to be answered) Multiple Choice Questions

Section B - 3 x 5 = 15 Marks (3 out of 6 to be answered in 150 words each)

Other Component: **Total Marks: 25**

Any **one** of the following for 25 marks

Quiz/Scrap Book/Assignment / Poster Making/Case Study/Project/Survey/Model-Making

No End Semester Examination

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**B.Sc. DEGREE: BRANCH V - A PLANT BIOLOGY AND
PLANT BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023–2024)

GENERAL BOTANY - II

CODE: 23BT/AC/GB24

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable the students to

- describe the morphological, anatomical and reproductive feature of lower plants
- identify the life cycle patterns of Bryophytes, Pteridophytes and Gymnosperms
- study the internal structure of higher and lower plants
- explain the functional mechanism of higher plants
- explore the basic techniques in horticulture

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify the salient features recall the anatomy of lower plants and Angiosperms; Physiology and list the various Horticulture techniques.	K1
CO2	explain the stages life cycle of lower forms; distinguish the anatomical characters; describe physiological concepts and demonstrate the techniques in Horticulture.	K2
CO3	relate the distinguishing characters of lower and higher forms of plants; illustrate the functional mechanism of higher plants and apply the knowledge on Horticultural practices	K3
CO4	categorise the lifecycle patterns of lower forms; differentiate and explain the internal features of angiosperms; elucidate the role of physiological process and Horticultural techniques	K4
CO5	assess the life cycle patterns in lower forms; compare the anatomical features; summarise the functional mechanism in the plants and evaluate the horticultural techniques	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Bryophyta, Pteridophyta and Gymnosperms 1.1 Salient features of Bryophytes, Pteridophytes and Gymnosperms 1.2 A detailed Study of the Life Cycle (no developmental study) of <i>Funaria</i> 1.3 A detailed Study of the Life-Cycle (no developmental study) of <i>Lycopodium</i> 1.4 A detailed Study of the Life-Cycle (no developmental study) of <i>Cycas</i>	K1-K6 K1 -K3 K1-K6 K1-K6 K1-K6	14	1-5
2	Anatomy 2.1 Classification of Meristem, Simple and Complex tissue and types of Vascular bundles 2.2 Primary Structure of Dicot Stem and Root 2.3 Primary Structure of Monocot Stem and Root 2.4 Leaf: Isobilateral and Dorsiventral 2.5 Structure and types of Stomata	K1-K6 K2-K6 K2-K6 K2-K6 K1-K4	10	1-5
3	Physiology – I 3.1 Mineral Nutrition in plants 3.2 Active and Passive transport, Osmosis, Diffusion, Imbibition 3.3 Photosynthesis - Light Reaction and Dark Reaction.	K1-K6 K4-K6 K1-K4	8	1-5
4	Physiology – II 4.1 Plant Growth Regulators - Auxins, Cytokinins, Gibberellins, ABA and Ethylene- Practical Applications 4.2 Photoperiodism 4.3 Vernalisation	K1-K6 K1-K6 K1-K4 K1-K4	8	1-5
5	Horticulture 5.1 Introduction, Branches of Horticulture and Garden Implements 5.2 Vegetative propagation methods: Cutting, Layering and Grafting 5.3 Cut Flowers, Importance and Methods to Prolong Vase Life 5.4 Flower Arrangement - Fresh and Dry 5.5 Bonsai Technique	K1-K6 K1-K4 K1-K4 K4-K6 K1-K6	10	1-5

GENERAL BOTANY – II - PRACTICAL

CODE: 23BT/AC/P221

CREDITS: 1

L T P: 0 0 2

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

To enable the students to

- identify the morphological, anatomical and reproductive structures of lower plants
- acquire the skill of sectioning of lower and higher forms of plants
- observe and differentiate the anatomical features in Bryophytes, Pteridophytes, Gymnosperms and Angiosperms
- examine and explain physiological experiments
- demonstrate the horticultural techniques

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify and recall the salient features of the forms included in the syllabus	K1
CO2	explain by giving reasons and differentiate the character found between lower forms and higher forms	K2
CO3	demonstrate the principle behind the physiological set up in angiospermic plants	K3
CO4	analyze the anatomical features of lower plants and angiospermic plants by taking sectioning	K4
CO5	elucidate with reasons the anatomy of the members of Bryophytes, Pteridophytes, Gymnosperms and Angiosperms	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Bryophyta, Pteridophyta and Gymnosperms 1. Bryophytes – <i>Funaria</i> 2. Pteridophyta – <i>Lycopodium</i> 3. Gymnosperm - <i>Cycas</i>	K1-K5	10	1-5
2	Anatomy 1. Primary structure of Dicot Stem and Root 2. Primary structure of Monocot Stem and Root 3. Leaf – Isobilateral and Dorsiventral 4. Stomatal Types	K1-K5	8	1-5

ANIMAL PHYSIOLOGY

CODE:23ZL/MC/AP34

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

To enable students to

- comprehend the different types and mechanisms for feeding, nutrition and respiration in animals, adaptations to high altitudes and diving, physiological impact of smoking and carbon monoxide poisoning with preventive measures and treatment
- understand the different types of circulatory systems in animals and regulatory mechanisms with reference to heart beat, blood pressure and temperature and related adaptations, role of drugs on heart rate, angiography, echocardiography, and physiological conditions relating to carbon monoxide poisoning and smoking
- comprehend the concepts and mechanisms relating to excretion, osmoregulation and nervous transmission and nervous control in animals
- understand concepts and mechanisms relating to sensory receptors, non-vertebrate endocrinology, endocrine disruptors in humans, chromophores and bioluminescence
- comprehend the concepts relating to hormones in pregnancy and complications in pregnancy, lactation, the physiology of sports and ageing and the pathophysiology of a few human diseases and disorders

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts, adaptations, structural, functional and pathophysiological aspects of organs and organ systems, diagnosis and treatment of diseases and disorders, physiology of ageing & sports	K1
CO2	describe the adaptations, structural, functional and pathophysiological aspects of organs and organ systems, diagnosis and treatment of diseases and disorders, physiology of ageing & sports	K2
CO3	apply the knowledge obtained to discuss the adaptations, structural, functional and pathophysiological aspects of organs and organ systems, diagnosis and treatment of diseases and disorders, physiology of ageing & sports	K3

COs	DESCRIPTION	CL
CO4	analyse the physiological concepts, adaptations, structural, functional and pathophysiological aspects of organs and organ systems, diagnosis and treatment of diseases and disorders, physiology of ageing & sports	K4
CO5	evaluate the basic concepts, adaptations, structural, functional and pathophysiological aspects of organs and organ systems, diagnosis and treatment of diseases and disorders and physiology of ageing & sports	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction – Types of Nutrition – Feeding Mechanisms – Types of Digestion 1.2 Respiratory organs and mechanism of respiration (trachea, gills, skin and lungs) – respiratory pigments 1.3 Adaptations to diving and high altitudes 1.4 Physiological effect of smoking and carbon monoxide in humans – Oxygen Therapy: indications, instruments used and precautions - Artificial Respiration: indications and types (manual and instrumental)	K1 - K5	12	1 - 5
2	2.1 Types of Circulatory Systems (open and closed) 2.2 Regulation of heart beat and blood pressure in humans 2.3 Role of drugs / chemicals (Atropine, Pilocarpine and Digitaline) on heart rate in humans – Angiogram, Angioplasty and Echo 2.4 Thermoregulatory mechanisms in insects and vertebrates	K1 - K5	12	1 - 5
3	3.1 Osmoregulatory mechanisms in invertebrates and vertebrates 3.2 Nitrogenous substances excreted by animals – adaptations based on habitat - classification of animals based on nitrogenous products excreted - Ornithine Cycle 3.3 Types of synapses (electric and chemical) – neuromuscular synapses – neurotransmitters – Neurotransmission and external agents (Drugs, toxins and pollutants), 3.4 Neural control of skeletal muscles: mechanism, Pathophysiology of hemiplegia, paraplegia and muscular dystrophy - Vertebrate Autonomic nervous system	K1 - K5	14	1 - 5

	4.1 Types of sensory receptors - nociception, electroreception and magnetoreception 4.2 Non vertebrate endocrinology (molluscs, annelids and arthropods) – Effect of endocrine disruptor chemicals in humans 4.3 Chromophores: mechanism of colour change in cold blooded vertebrates 4.4 Bioluminescence: chemistry, mechanism and significance	K1 - K5	12	1 - 5
5	5.1 Hormones in pregnancy and complications in pregnancy (ectopic pregnancy, breach, placenta previa) - hormones in lactation, composition and significance of breast milk and factors influencing lactation 5.2 Pathophysiology of human disorders/diseases: Anorexia nervosa, Chronic Obstructive Pulmonary Disorder, Alzheimer's, PolyCystic Ovarian Disorder and Osteoporosis 5.3 Sports Physiology: muscles in exercise, respiration in exercise, cardiovascular system in exercise and body fluids & salts in exercise – drugs and athletes 5.4 Physiology of ageing: changes in major systems, causes and theories	K1 - K5	15	1 - 5

EVOLUTION

CODE:23ZL/MC/EV33

CREDITS :3

L T P:3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable students to

- understand the evolutionary process which includes a general account of the origin of life, theories and evidence
- comprehend the principles of stratigraphy, the Geological Time Scale, fossil formation and extinction
- understand the genetic basis of evolution, types of selection, speciation and isolation
- comprehend evolutionary patterns, strategies and animal distribution
- understand equine and human evolutionary stages, molecular evolution, phylogenetic trees and modern evolutionary concepts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic and modern concepts, components, theories, evidence, mechanisms, processes, patterns, strategies and molecular aspects of evolution	K1
CO2	explain evolutionary concepts, theories, evidence, the history of life on earth, evolutionary processes, patterns, strategies and molecular aspects of evolution	K2
CO3	apply the acquired knowledge of evolutionary concepts, theories and evidence to discuss evolutionary components, mechanisms, processes, patterns, strategies and recent trends in evolution	K3
CO4	analyse evolutionary principles, theories, evidence, mechanisms, processes, patterns, strategies, phylogenetic trees and recent trends in evolution	K4
CO5	Evaluate evolutionary theories, evidence, processes, mechanisms, patterns, strategies, phylogenetic trees and recent trends in evolution	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction - Origin of Life - Theories: Special Creation, Catastrophism, Panspermia, Abiogenesis, Biogenesis, Modern Hypothesis 1.2 Evidence in support of evolution from the fields of comparative morphology and anatomy, physiology, biochemistry and embryology 1.3 Theories of evolution: Lamarckism, Neo-Lamarckism, Darwinism, Neo-Darwinism or Modern Synthetic Theory of Evolution, Mutation theory of de Vries	K1 - K5	11	1 - 5
2	2.1 Geological Time Scale 2.2. Palaeontology: Fossilisation, dating of fossils, Indian fossils - living fossils 2.3 Extinction: six major extinction events and role of extinction in evolution	K1 - K5	10	1 - 5
3	3.1 The genetic basis of evolution: Variation, Mutation, Genetic Drift, Founder Effect and Migration 3.2 Types of Natural selection: stabilising selection, directional selection and disruptive selection (examples and case studies) 3.3 Species concept: Speciation (Allopatric and Sympatric)- Subspecies - Sibling Species - Isolation in Speciation	K1 - K5	10	1 - 5
4	4.1 Convergent and divergent evolution - Adaptive radiation in birds and mammals 4.2 Mimicry and Colouration (types, examples and significance) – Coevolution (types, examples and significance) 4.3 Micro, macro and megaevolution (causes, examples and significance) 4.4 Distribution of Animals: Types, Zoogeography, Barriers and Methods of Dispersal of Animals in the marine, freshwater and terrestrial environments	K1 - K5	10	1 - 5
5	5.1 Evolution of Horse: stages and significance 5.2 Human Evolution: Stages (<i>Ardipithecus</i> group, <i>Australopithecus</i> group, <i>Paranthropus</i> group and <i>Homo</i> group), Biological and Cultural History 5.3 Molecular Evolution: Molecular Clocks – Phylogenetic trees - Systematics: Phenetics and Cladistics 5.4 Modern Evolutionary Concepts: Evolutionary Medicine - Evolution and Conservation	K1 - K5	11	1 - 5

B.Sc. DEGREE: BRANCH VI A - ADVANCED ZOOLOGY AND BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023 - 2024)

ANIMAL PHYSIOLOGY AND EVOLUTION PRACTICAL

CODE:23ZL/MC/P332

CREDITS:2

LTP:0 0 3

TOTAL HOURS:39

OBJECTIVES OF THE COURSE

To enable students to

- comprehend the basic principle and procedure, and develop the necessary skills to determine oxygen consumption of fish and nitrogenous waste products of fishes, birds and mammals
- understand cardiovascular physiology of frog and physiology of protein, carbohydrate and fat digestion using simulation software (PhysioEx.10.0), determination of blood pressure and pulse, and interpretation of phylogenetic trees
- comprehend the basic principle and procedure of salt loss and salt gain in fish, amylase activity in relation to temperature (with the calculation of Q_{10}) and pH
- observe and identify the modes of fossilisation, living fossils, evolutionary strategies, stages in human evolution and comprehend the working and application of the flame photometer
- write a report on the evolutionary strategies observed on campus and maintain an observation notebook and a record notebook

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	submit a record of the practical work carried out in the laboratory and a report on the different types of evolutionary strategies observed on campus	K1
CO2	describe modes of fossilisation, living fossils, examples on coevolution, mimicry and other evolutionary strategies, stages in human evolution, working and significance of the flame photometer, various organ systems in humans (not for evaluation)	K2
CO3	apply the knowledge gained to calculate salt loss and salt gain by a fish, amylase activity in relation to temperature, Q_{10} and amylase activity in relation to pH	K3
CO4	measure blood pressure and pulse and interpret the results, answer questions relating to physiological experiments on digestive and cardiovascular systems (simulatory software PhysioEx 10.0) and interpret the given phylogenetic tree	K4
CO5	evaluate oxygen consumed by the given aquatic animal with reference to body weight and the type of nitrogenous waste in different samples	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	i) Oxygen consumption in an aquatic animal with reference to body weight. 2. ii) Detection of nitrogenous waste products, qualitative estimation of Ammonia, (fish) Uric acid (bird excreta) and Urea (mammalian kidney)	K5	12	CO 5
2	i) Study of frog cardiovascular physiology using Physio Ex 10.0. ii) Assessing digestion of proteins, carbohydrates and fats using Physio Ex 10.0 iii) Measurement of BP and Pulse and interpretation iv) Analyse and interpret the given phylogenetic tree	K4	6	CO 4
3	i) Determination and analysis of salt loss and salt gain in fish ii) Determination of amylase activity in relation to temperature and calculation of Q_{10} (temperature coefficient) iii) Determination of amylase activity in relation to pH	K3	9	CO 3
4	Observation and identification of the following: i) Different modes of fossilisation ii) Living fossils iii) Coevolution (Plant-pollinator and Predator-prey) iv) Mimicry (Batesian and Mullerian) and Colouration (Protective and Aggressive) v) Evolutionary strategies (Mimicry, Colouration and Coevolution) on SMC campus vi) Stages in human evolution (<i>Sahelanthropus tchadensis</i> , <i>Australopithecus afarensis</i> , <i>Homo erectus</i> , <i>Homo neanderthalensis</i> and <i>Homo sapiens</i>) vii) Study of various organ systems in a fibreglass human model (not for evaluation) Demonstration: Estimation of Na and K content in food samples by Flame Photometry	K2	9	CO 2
5	i) Maintenance of observation notebook and record ii) Observation and documentation of evolutionary strategies (mimicry, colouration and coevolution) on SMC campus and compilation of report	K1	3	CO 1

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50 Duration: 3 hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A (Unit 1)	K5 (20 marks)	1 X 20=20	1 question	1 question

FUNDAMENTALS OF BIOCHEMISTRY I

CODE: 23CH/AC/FB33

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To facilitate understanding of fundamental biochemical principles involving biological mechanisms
- To explain the significance of clinical haematological tests and enzymes in biochemical processes
- To enable understanding of carbohydrate metabolism
- To introduce the principles and methodologies involved in the digestion and absorption of carbohydrates

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the fundamentals of biochemistry, biomolecules and bioenergetics	K1
CO2	Relate blood buffers with the pH of blood, digestion and absorption of carbohydrates with carbohydrate metabolism	K2
CO3	Analyse the metabolism of glucose, hormone action and mechanism of enzyme action	K3
CO4	Evaluate free energy, enthalpy and entropy in a biochemical process, spontaneity of a biochemical reaction, glucose levels in blood through haematological tests and pH of blood	K4
CO5	Summarise the steps involved in different stages of carbohydrate metabolism, mechanism of enzyme action and coagulation of blood	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Biochemistry 1.1 Molecular Logic of Living Organisms 1.2 Water – Physical Properties and Hydrogen Bonding of Water-Solvent Properties of Water, Hydrophobic Interactions, the Ionic Product of Water, the pH Scale. Acid Base Indicators- Phenolphthalein and Methyl Orange 1.3 Maintenance of pH of Blood, Bicarbonate Buffers, Acidosis and Alkalosis, Buffers and electrolytes in the body	K1- K5	10	1-5
2.	Blood 2.1 Blood - Composition of Blood, Blood Coagulation – Mechanism. Haemophilia and Sickle Cell Anaemia 2.2 Clinical significance of RBC, WBC and Platelet Count in blood	K1- K5	5	1-5
3.	Bioenergetics 3.1 Enthalpy, Entropy, Free Energy, Standard Free Energy, spontaneous and non-spontaneous. Exergonic and Endergonic Reactions 3.2 High Energy Compounds ATP and ADP, Structural Basis for the Role of ATP as the currency of the cell	K1- K5	4	1-5
4.	Carbohydrates 4.1 Classification of Carbohydrates 4.2 Haworth's Structure and Reactions of Glucose, Fructose and Sucrose. Polysaccharides – Homopolysaccharides -Cellulose, Starch - Amylose and Amylopectin (Structural Elucidation not required) 4.3 Digestion of di and polysaccharides in the body, maintenance of glucose level in Blood-significance of HbA1c 4.4 Carbohydrate Metabolism - Metabolism of Glucose - Glycolysis, TCA Cycle (structures not required), Glycogenesis, Glycogenolysis, Gluconeogenesis. Oxidative phosphorylation and electron transport chain	K1- K5	15	1-5

5.	Enzymes 5.1 Definition of Enzymes, Coenzymes and Apoenzymes 5.2 Nomenclature and Classification of Enzymes 5.3 Enzyme Specificity - Factors affecting Enzyme Action 5.4 Mechanism of Enzyme Action - Michaelis- Menten Theory (No Derivation) – Fischer’s lock and key model and Koshland’s induced fit model	K1- K4	5	1-4

BIOCHEMISTRY PRACTICAL I

CODE: 23CH/AC/P132

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To enable understanding of the principles of biochemistry through laboratory techniques
- To impart the skills required to perform various chemical reactions in a laboratory
- To instill understanding of the classification of biomolecules based on their structure and property
- To introduce the principles behind the techniques involved

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the procedure for the analysis of carbohydrates, amino acids and proteins.	K1, K2
CO2	identify various carbohydrates, amino acids and proteins based on their structure and property	K3
CO3	distinguish various carbohydrates, amino acids and proteins based on the structural characteristics	K4
CO4	perform chemical reactions in a laboratory according to standard procedure and safety precautions	K5
CO5	analyse a given organic compound qualitatively and identify carbohydrates, amino acids and proteins	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Qualitative Analysis of Carbohydrates 1.1 Reactions of Carbohydrates Glucose, Fructose, Maltose, Sucrose and Starch 1.2 Identification of Unknown Organic Compound	K1-K6	13	1-5
2.	Qualitative Analysis of Amino acids 2.1 Reactions of Amino Acids - Reactions of Tryptophan, Tyrosine, Arginine and Cysteine 2.2 Identification of Unknown Organic Compound	K1-K6	13	1-5
3.	Qualitative Analysis of Proteins 3.1 Reactions of Proteins - Reactions of Casein and Egg Albumin 3.2 Identification of Unknown Organic Compound	K1-K6	13	1-5

(Effective from the academic year 2023-2024)

MICROBIOLOGY

CODE: 23ZL/MC/MB44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable students to

- have an overview of microbial classification and microbiological techniques
- comprehend the morphology, growth and reproduction of bacteria and viruses.
- understand the conditions required for growth, recombination in bacteria and microbial control.
- acquire knowledge on normal microbiota, microbial diseases and their control
- understand the role of microbes in dairy products, material damage and soil ecosystem

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall characteristics, classification, microbiological techniques, organisation and multiplication of bacteria and viruses, conditions and nutrients required for microbial growth, methods of microbial control and recombination, normal microbiota, microbial diseases and their control, and the role of microbes in dairy products, material damage and soil ecosystem.	K1
CO 2	describe characteristics, classification, microbiological techniques, organisation and multiplication of bacteria and viruses, conditions and nutrients required for microbial growth, methods of microbial control and recombination, normal microbiota, microbial diseases and their control, and the role of microbes in dairy products, material damage and soil ecosystem.	K2
CO 3	explain characteristics, classification, microbiological techniques, organisation and multiplication of bacteria and viruses, conditions and nutrients required for microbial growth, methods of microbial control and recombination, normal microbiota, microbial diseases and their control, and the role of microbes in dairy products, material damage and soil ecosystem.	K3

COs	DESCRIPTION	CL
CO 4	analyse the characteristics, classification, microbiological techniques, organisation and multiplication of bacteria and viruses, conditions and nutrients required for microbial growth, methods of microbial control and recombination, normal microbiota, microbial diseases and their control, and the role of microbes in dairy products, material damage and soil ecosystem.	K4
CO 5	evaluate characteristics, classification, microbiological techniques, organisation and multiplication of bacteria and viruses, conditions and nutrients required for microbial growth, methods of microbial control and recombination, normal microbiota, microbial diseases and their control, and the role of microbes in dairy products, material damage and soil ecosystem.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction - History and Scope of Microbiology 1.2 Outline Classification of Microorganisms with Special Reference to Bacteria and Viruses - Characteristic Features of Prokaryotes, Eukaryotes and Archaea 1.3 Microbiological Techniques: Microscopy, Specimen Preparation and Staining Techniques - Media Preparation and Types of Culture Media – Preservation of Culture – Pure Culture Techniques	K1 - K5	12	1 - 5
2	2.1 Viruses: General Properties – Isolation and Cultivation of Viruses - Structure and Reproduction of T4 Phage (Lytic and Lysogenic cycles) 2.2 Structure and Multiplication of an Animal Virus – COVID-19: Pathogenesis, mode of transmission and control measures - Subviral Particles (Viroids and Prions) 2.3 Bacteria: Gross Morphology of Bacterial Cells - Size, Shape and Arrangement- Structure of a Bacterium: Cell Wall, flagellum – flagellar arrangement - Chemical Composition and Characteristics of Gram Positive and Gram Negative Bacteria – Molecular Structure of Nucleoid –Types and Functions of Plasmids - Cytoplasmic inclusions. 2.4 Bacterial Growth: Reproduction and Growth of Bacterial Population - Growth Curve – Measurement of Microbial Growth	K1 - K5	15	1 - 5

UNIT	CONTENT	CL	HRS	CO
3	3.1 Physical Conditions Required for Growth of Bacteria: Temperature, Oxygen and pH - Nutritional Requirements and General Nutritional Classification of Bacteria 3.2 Recombination in Bacteria: Transformation, Conjugation and Transduction 3.3 Microbial Control: Importance and Control of Microorganisms by Physical and Chemical Agents – Antibiotics and Their Mechanisms of Action	K1 - K5	13	1 - 5
4	4.1 The Normal Microbiota of the Human Body: Skin, Mouth and Oropharynx, Stomach, Small Intestine, Large Intestine, Vagina and Urethra (Brief Study) - Significance 4.2 Disease Cycle of a Communicable Disease – Disease Progression 4.3 Causative agents, epidemiology, symptoms, pathogenicity and control measures of the following Infectious Diseases: Airborne (Influenza and Pneumonia)- Food and Water Borne (Hepatitis A and Typhoid) — Infection Through Body Fluids (Hepatitis B and Ebola) - Sexually Transmitted Diseases (Genital Herpes and Gonorrhoea) - Zoonotic (Dengue Fever and Leptospirosis) - Nosocomial and Fomite Borne infections	K1 - K5	13	1 - 5
5	5.1 Microbiology of Food: Sources and Types of Microorganisms In Milk - Pasteurization of Milk (Types, Significance and Test) - Dairy Products: Types, process and uses of Cheese - Probiotics (Sources and Significance) - Indicator Organisms - Food Poisoning - Food Preservation 5.2 Microbial Damage of Materials: Natural Fabrics, Paper and Cosmetics 5.3 Microbial Ecology: Definition and Significance - Role of Microorganisms in Soil Fertility, Nitrogen Cycle and Sulphur Cycle	K1 - K5	12	1 - 5

BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023–2024)

MICROBIOLOGY PRACTICAL

CODE: 23ZL/MC/P442

CREDITS: 2

L T P: 0 0 3

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

To enable students to

- comprehend the principle and procedure underlying Gram Staining and identify bacteria based on the morphology and gram reaction
- comprehend the role of microbes in spoilage of food, the procedure and significance of Kirby Bauer Diffusion method and Winogradsky column
- develop the skill to determine the quality of milk, identify bacteria using dichotomous key and describe the principle and procedure underlying Membrane filter technique and interpret the result
- prepare the media, identify and comment on various microbes and instruments and equipment used for isolation and culture of microorganisms
- collect and classify antibiotics based on their biological origin and mode of action and maintain an observation and record book

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	submit a record of practical work carried out in the laboratory and a collection of antibiotics, classified according to their biological origin and mode of action	K1
CO2	illustrate and describe the various microbes and instruments, equipments and culture media used for isolation and culture of microorganisms	K2
CO3	demonstrate the skill to determine the quality of milk, identify bacteria using dichotomous key and describe the principle and procedure underlying Membrane filter technique and interpret the results	K3
CO4	analyse the type of spoilage in food, the efficiency of various antibiotics based on Kirby Bauer Diffusion method and bacterial diversity in Winogradsky column	K4
CO5	prepare a bacterial smear, perform gram staining and identify bacteria based on their morphology and gram reaction	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Gram Staining and Examination of Bacteria	K5	6	CO 5
2	i. Spoilage of Food Items viz., Milk - Bread - Fruits and Vegetables ii. Antibiotic Sensitivity Test - Kirby Bauer Diffusion Method iii. Winogradsky Column – Observation of Bacterial Diversity	K4	9	CO 4
3	i. Coliform Count in Drinking Water Samples by Membrane Filter Technique ii. Examination of Milk - Methylene Blue Reduction Test iii. Identification of Bacteria based on morphology, physical requirements and staining reaction using a dichotomous key	K3	10	CO 3
4	i. Preparation of Nutrient Agar, MacConkey Agar – Agar Slant ii. Isolation of Bacteria by Pure Culture - Streak Plate iii. Examination of Soil Bacteria using Pour Plate Method iv. Identification of Microbes – Prepared Specimens v. Instruments Used in Microbiology Laboratory – Incubator, Hot Air Oven, Autoclave, Laminar Air Flow, Colony Counter vi. Observation of Bacterial Motility – Hanging Drop Preparation (Demonstration)	K3 K2	6	CO 3 CO2
5	i. Collection and Classification of Antibiotics Based on their Biological Origin, Mode of Action and their Applications - Report ii. Maintenance of an observation and record book of practical work is an integral part of the syllabus.	K1	8	CO 1

PATTERN OF ASSESSMENT**Continuous Assessment Test:****Total Marks: 50****Duration: 3 hours**

FUNDAMENTALS OF BIOCHEMISTRY II

CODE: 23CH/AC/FB43

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To provide an understanding of the biochemical importance of lipids, proteins, hormones and micronutrients
- To enable understanding of lipid and protein metabolisms
- To introduce the principles and methodologies involved in digestion and absorption of lipids and proteins

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the classification, structure and metabolism of lipids, proteins hormones and vitamins	K1
CO2	explain the use of biochemical techniques in the study of proteins, lipids, hormones, vitamins and micronutrients	K2
CO3	analyze the metabolisms involving lipids, proteins, hormones, vitamins and minerals	K3
CO4	evaluate mechanism of metabolism of protein, lipid and hormones using biochemical tools	K4
CO5	integrate the cause of a disease in human body and the metabolism	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Lipids 1.1 Classification of Lipids and Fats 1.2 Definitions and Significance of Iodine Value, Acid Value, Saponification Value, RM Value and Acetyl Value 1.3 Lipid Metabolism- Oxidation of β fatty acids, Biosynthesis of Fatty Acids, Ketone bodies and Ketosis. Digestion and Absorption of Lipids 1.4 Risk factor of HDL, LDL and total cholesterol in the body	K1- K5	12	1-5

2.	Proteins 2.1 Amino Acids – Classification based on R Groups 2.2 Chemical Reactions of amino acids - with ninhydrin, mineral acid, formaldehyde, FDNB and CO ₂ 2.3 Structure of Proteins - Peptide Bond, Primary, Secondary and Tertiary structures. 2.4 Classification of proteins based on shape, composition and solubility. Properties of proteins - denaturation, amphoteric nature, ion binding capacity and solubility 2.5 Protein Metabolism - transamination, oxidative deamination and Urea Cycle. Digestion and absorption of proteins	K1- K5	12	1-5
3.	Hormones 3.1 Definition, Classification of Hormones (Steroid and Non-Steroid Only) 3.2 Mechanism of Hormone Action 3.3 Functions of Insulin and Thyroxin. Clinical significance of TSH, T3 and T4	K1- K5	5	1-5
4.	Biochemistry and Nutrition 4.1 Vitamins (fat & water soluble)- sources, metabolic functions, deficiency diseases, daily requirements- vitamin A and vitamin C (Structure) 4.2 Principal elements- Calcium, Phosphorus, Magnesium, Sodium, Potassium, Chlorine, Sulfur- sources, function, recommended dietary allowance, deficiency - Calcium, Phosphorus- absorption and retention, product of Ca and P in serum. 4.3 Trace elements: Chromium, Selenium, Cobalt- sources, function, deficiencies	K1- K5	5	1-5
5.	Analytical techniques in Biochemistry 5.1 Centrifugation – Principle and applications of sedimentation and ultracentrifugation 5.2 Electrophoresis – Principle and applications of SDS-PAGE 5.3 Ultrafiltration – Principle and applications of Dialysis 5.4 Chromatography – Principle and applications of Thin layer (TLC) and High-Performance Liquid Chromatography (HPLC)	K1- K5	5	1-5

BIOCHEMISTRY PRACTICAL II

CODE: 23CH/AC/P242

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To understand the principles of biochemistry chemistry through laboratory techniques
- To impart the skills required to perform various chemical reactions in a laboratory
- To instill understanding of the classification of organic compounds based on their structure and property
- To understanding of the principles behind the various techniques involved

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the concepts of normality, equivalent weight, R_f value and Beer Lambert's Law	K1
CO2	differentiate between titrations, colorimetric and chromatographic techniques	K2
CO3	calculate the normality, equivalent weights and R_f value	K3
CO4	compare the reagents used in volumetric titration, colorimetric and chromatographic techniques	K4
CO5	estimate the amount of a given substance using volumetric analysis	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Volumetric Estimations 1.1 Principle and theory of Volumetric Analysis 1.2 Principle and theory of Chromatography and Beer-Lambert's law	K1-K3	3	1-3
2.	Estimations 2.1 Estimation of Oxalic Acid / Fe^{2+} (Permanganimetry) 2.2 Estimation of Glucose 2.3 Estimation of Glycine by Sorensen's Titration 2.4 Estimation of Ascorbic Acid 2.5 Estimation of Acid Value / Saponification Value / Iodine Value of Edible Oil 2.6 Estimation of Enzyme Catalase in Chow chow / Radish	K1-K6	30	1-5

UNIT	CONTENT	CL	Hrs	CO
3.	Group Experiments 3.1 Estimation of Phosphorus by Colorimetry 3.2 Estimation of DNA/RNA by Colorimetry 3.3 Separation of Amino Acids by Paper Chromatography	K1-K4	6	1-4

SYLLABUS
(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23ZL/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023 - 2024)

CELL AND MOLECULAR BIOLOGY

CODE:23ZL/MC/CM54

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

To enable students to

- understand the structural organisation and function of cells, cell membrane, cytoskeleton, mitochondria and peroxisome
- comprehend the structure, organisation and function of the cytoplasmic vacuolar system, nucleus, chromosomes and mechanism of vesicular transport
- understand the basics of cell signalling, cell cycle and its regulation, apoptosis and cancer biology
- acquire in-depth knowledge of nucleic acids, DNA replication and repair mechanisms in prokaryotes and eukaryotes
- comprehend gene organisation, expression and in prokaryotes and eukaryotes and gene regulation in eukaryotes

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the basic concepts related to structure of prokaryotic and eukaryotic cells, the structure and functions of various organelles, diseases related to defective mitochondria and lysosome, cell signalling, cell cycle and its regulation, apoptosis and cancer biology, the structure and types of nucleic acids, DNA replication and repair and the organisation, regulation and expression of genes	K1
CO 2	describe the structure of prokaryotic and eukaryotic cells, the structure and functions of various organelles, diseases related to defective mitochondria and lysosome, cell signalling, cell cycle and its regulation, apoptosis, characteristics of cancer cell and genetic basis of cancer, the structure and types of nucleic acids, DNA replication and repair and the organisation, regulation and expression of genes	K2
CO 3	apply the knowledge gained to compare the structure of prokaryotic and eukaryotic cells, describe the structure and functions of various organelles, diseases related to defective mitochondria and lysosome, cell signalling, cell cycle and its regulation, apoptosis, characteristics of cancer cell and genetic basis of cancer, the structure and types of nucleic acids, DNA replication and repair and the organisation, regulation and expression of genes	K3

COs	DESCRIPTION	CL
CO 4	analyse the structure of prokaryotic and eukaryotic cells, the structure and functions of various organelles, diseases related to defective mitochondria and lysosome, cell signalling, cell cycle and its regulation, apoptosis, characteristics of cancer cell and genetic basis of cancer, the structure and types of nucleic acids, DNA replication and repair and the organisation, regulation and expression of genes	K4
CO 5	evaluate the structure of prokaryotic and eukaryotic cells, the structure and functions of various organelles, diseases related to defective mitochondria and lysosome, cell signalling, cell cycle and its regulation, apoptosis, characteristics of cancer cell and genetic basis of cancer, the structure and types of nucleic acids, DNA replication and repair and the organisation, regulation and expression of genes	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction – Prokaryotic and Eukaryotic Cells 1.2 Cell Membrane: Structural Organization, Asymmetry and Fluidity, Specializations in Structure - Transport Across Membranes 1.3 Cytoskeleton: Microtubules, Actin Filaments and Intermediate Filaments 1.4 Mitochondria: Structure, functions (overview), biogenesis (endosymbiont theory) and Mitochondrial diseases (Leigh syndrome and Progressive external ophthalmoplegia) - Peroxisomes	K1 - K5	13	1 - 5
2	2.1 Cytoplasmic Vacuolar System: Endoplasmic Reticulum, Golgi Apparatus, Lysosomes: Structure, Polymorphism, Functions and Diseases 2.2 Vesicular Transport and Protein trafficking 2.3 Nuclear Organization 2.4 Chromosomes: Structure, Types and Functions	K1 - K5	13	1 - 5
3	3.1 Cell Cycle and its Regulation 3.2 Cell Signaling: Basic principles of intercellular and intracellular signaling and Signal Transduction through G-protein coupled receptor and Enzyme coupled receptor (Receptor Tyrosine Kinase) 3.3 Apoptosis - Role of neurotrophins and mitochondria in Apoptosis 3.4 Cancer Biology: Characteristics of a Cancer Cell – Altered Cell Cycle in Cancer Cell - Genetic Basis (A brief study): Role of Proto-oncogenes, Oncogenes and Tumour Suppressor Genes	K1 - K5	13	1 - 5

UNIT	CONTENT	CL	HRS	CO
4	4.1 Nucleic Acids : Types, Molecular Structure and Functions 4.2 DNA Replication: Theta model in prokaryotes (in detail), Rolling Circle Model - Replication in Eukaryotes 4.3 DNA Repair mechanisms – Mismatch Repair, Photoreactivation, Nucleotide Excision Repair, Base Excision Repair, SOS Repair, Non-Homologous End Joining (NHEJ)	K1 - K5	14	1 - 5
5	5.1 Organization of Prokaryotic genes and Eukaryotic genes 5.2 Gene regulation in Eukaryotes: Overview, Transcriptional activation (Glucocorticoid receptor) and Transcriptional repression (DNA methylation & long noncoding RNAs) 5.3 Transcription: Biosynthesis of RNA – Transcription Factors – Post Transcriptional Modifications 5.4 Ribosome: Structure & Function - Mechanism of Translation: Genetic Code - Post Translational Modifications in Collagen – RNA interference: Types (siRNA, miRNA & piRNA) and Significance	K1 - K5	12	1 - 5

(Effective from the academic year 2023 - 2024)

FUNDAMENTALS OF BIOTECHNOLOGY

CODE: 23ZL/MC/FB54

CREDITS: 4

LTP: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable students to

- acquire an overview and understand the basic concepts and tools in biotechnology
- comprehend the underlying mechanisms and methods of cloning, DNA transfer and site-directed mutagenesis
- comprehend the applications of various techniques in human welfare, genetically modified organisms and related ethical issues
- comprehend the Animal Cell and Tissue Culture techniques, Stem Cell therapy and significance of IPR
- understand the methods of DNA sequencing, basic concepts of Bioinformatics, significance of Human Genome Project and Enzyme technology and its applications.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts and tools in biotechnology, mechanisms and methods of cloning, DNA transfer and site-directed mutagenesis, applications of various techniques in human welfare, genetically modified organisms and related ethical issues, animal cell and tissue culture techniques, Stem Cell therapy and significance of IPR, methods of DNA sequencing, basic concepts of Bioinformatics, significance of Human Genome Project and Enzyme technology and its applications	K1
CO2	describe the tools in biotechnology, mechanisms and methods of cloning, DNA transfer and site-directed mutagenesis, applications of various techniques in human welfare, genetically modified organisms, animal cell and tissue culture techniques, Stem Cell therapy and significance of IPR, methods of DNA sequencing, basic concepts of Bioinformatics, significance of Human Genome Project and Enzyme technology and its applications	K2
CO3	apply the acquired knowledge to explain the tools in biotechnology, mechanisms and methods of cloning, DNA transfer and site-directed mutagenesis, applications of various techniques in human welfare, genetically modified organisms, animal cell and tissue culture techniques, Stem Cell therapy and significance of IPR, methods of DNA sequencing, basic concepts of Bioinformatics, significance of Human Genome Project and Enzyme technology and its applications	K3

COs	DESCRIPTION	CL
CO4	analyse the role of various tools in biotechnology, methods of cloning, significance of DNA transfer and site-directed mutagenesis, applications of various techniques in human welfare, genetically modified organisms, animal cell and tissue culture techniques and Stem Cell therapy, significance of IPR, methods of DNA sequencing, applications of Bioinformatics, significance of Human Genome Project and applications of Enzyme technology	K4
CO5	evaluate the role of various tools in biotechnology, methods of cloning, significance of DNA transfer and site-directed mutagenesis, applications of various techniques in human welfare, genetically modified organisms, animal cell and tissue culture techniques and Stem Cell therapy, significance of IPR, methods of DNA sequencing, applications of Bioinformatics, significance of Human Genome Project and applications of Enzyme technology	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Definition and areas of Biotechnology 1.2 Tools of Genetic Engineering: Enzymes, Recombinant DNA Technology, Passenger DNA, Cloning Vectors - cDNA Library - Gene Bank 1.3 Electrophoresis, Northern, Southern and Western Blots - PCR Technique	K1 - K5	12	1 - 5
2	2.1 Cloning in Prokaryotes and Eukaryotes 2.2 Methods of Transfer of Foreign DNA into Cells: Electroporation, Particle Bombardment Gun, Ultrasonication, Liposome Mediated Transfer and Microinjection 2.3 Site - Directed Mutagenesis	K1 - K5	14	1 - 5
3	3.1 Gene Cloning in Medicine: Insulin and Somatotropin 3.2 Diagnosis and Treatment: DNA Probe, ELISA Technique, Hybridoma Technology, Vaccines, DNA Fingerprinting and Gene Therapy 3.3 Genetically Modified Organisms (Microorganisms, Plants and Animals) - Benefits and Hazards of Genetic Engineering - ELSI related to Genetic Engineering	K1 - K5	12	1 - 5
4	4.1 Animal Cell and Tissue Culture Techniques – Culture Media – Natural and Artificial – Primary and Secondary Cell Lines – Culture Methods – Merits and Demerits 4.2 Stem Cell: Classification, Applications and Ethical Issues 4.3 Biotechnology & Intellectual property: Intellectual property rights (IPR) & Intellectual Property protection (IPP)- patenting of biological materials	K1 - K5	13	1 - 5

UNIT	CONTENT	CL	HRS	CO
5	5.1 DNA sequencing- Sanger method & applications 5.2 Human Genome Project & its significance - Organisation of Human Genome 5.3 Basic Concept of Bioinformatics: Proteomics and Genomics 5.4 Enzyme Technology: Production, Immobilisation and Application	K1 - K5	14	1 - 5

GENETICS

CODE:23ZL/MC/GN54

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable students to

- understand the basic concepts of Mendelian inheritance, genetic interactions and extra-chromosomal inheritance
- have a comprehensive and detailed understanding of multiple genic inheritance, multiple allelic inheritance, inheritance of linked genes, and linkage mapping
- understand the different types of sex- determining mechanisms, significance of Barr body, sex linked inheritance, and sex influenced and sex limited genes in humans
- comprehend the types and causes of mutations and inborn errors of metabolism and the importance of genetic counselling
- understand the basic concepts and mechanisms involved in Population Genetics, Developmental Genetics, Epigenetics and Conservation Genetics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the basic concepts of Mendelian Genetics and extensions of Mendelian Genetics, linkage, crossing over and linkage mapping, sex determination mechanisms and sex linkage, mutations, genetic disorders, pedigree analysis, genetic counselling, population genetics, developmental genetics, epigenetics and conservation genetics	K1
CO 2	describe the Mendelian inheritance, other patterns of inheritance, mechanisms of sex-determination, linkage and crossing over, mutations, genetic disorders, genetic counselling and the concepts in population genetics, developmental genetics, epigenetics, and conservation genetics	K2
CO 3	apply the acquired knowledge to solve problems, construct pedigree charts, differentiate the patterns of inheritance, discuss the mechanisms of sex-determination, linkage and crossing over, the types and causes of mutations, genetic disorders and significance of genetic counselling, and to explain the concepts in population genetics, developmental genetics, epigenetics and conservation genetics	K3
CO 4	analyse the different patterns of inheritance, mechanisms of sex-determination, linkage and crossing over, types and causes of mutations, genetic disorders and significance of genetic counselling, and concepts in population genetics, developmental genetics, epigenetics, and conservation genetics	K4

CO 5	evaluate the patterns and mechanisms in genetic inheritance, pedigree charts, sex-determining mechanisms, types and causes of mutations, genetic disorders, significance of genetic counselling and the concepts in population genetics, developmental genetics, epigenetics and conservation genetics			K5
UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction: Mendel and his Experiments - Laws - Back Cross / Test Cross - Application of Mendel’s principles to predict the outcomes of crosses (The Punnett-Square Method, The Forked-Line Method and The Probability Method) 1.2 Interaction of Genes : Incomplete Dominance – Codominance - Lethal Genes - Epistasis and other modified ratios: Inheritance of flower colour in Sweet Pea, seed capsule shape in Shepherd’s Purse, Fruit Colour in Summer Squash, Coat colour in mice - Phenocopy - Penetrance and Expressivity 1.3 Extra Chromosomal Inheritance : Criteria for Extra Chromosomal Inheritance - Cytoplasmic Inheritance (Plastid Inheritance in <i>Mirabilis jalapa</i>) - Maternal Influence (Shell Coiling in <i>Limnaea</i>) – Mitochondrial Inheritance (Kearns - Sayre Syndrome)	K1 - K5	11	1 - 5
2	2.1 Polygenic Inheritance: Characteristics – Eg. Skin Colour in Humans - Transgressive Variation (Weight in Chicken) - Calculating the number of polygenes 2.2 Multiple Allelic inheritance: Characteristics – Eg.Coat Colour in Rabbits 2.3 Linkage and Crossing Over: Complete and Incomplete Linkage in <i>Drosophila</i> - Cytological Proof of Crossing Over, Eg. <i>Drosophila</i> – Linkage Mapping	K1 - K5	10	1 - 5
3	3.1 Sex Determination: Chromosomal Mechanisms of Sex Determination, Male Haploidy - Environmental Factors Affecting Sex Determination 3.2 Sex Determination in <i>Drosophila</i> - Sex Determination in Humans - Dosage Compensation: Barr Body and Lyon’s Hypothesis 3.3 Sex Linkage: X-linked recessive inheritance (<i>Drosophila</i> , Eye Colour – Humans, Duchenne Muscular Dystrophy) - Y- Linked Inheritance - Sex Influenced and Sex Limited Genes in Humans	K1 - K5	9	1 - 5
4	4.1 Mutations: Classification - Point Mutations: Frameshift and Substitution mutations, Mutagens - Ames Test 4.2 Chromosomal Aberrations: Types, Examples and Causes - Numerical Variations: Non-disjunction and autosomal and allosomal aneuploid condition in humans, Polyploidy: origin, types, examples and significance 4.3 Inborn Errors of Metabolism: Phenylalanine metabolic pathway, Galactosemia and Lactose Intolerance- Genetic Counselling	K1- K5	11	1 - 5

UNIT	CONTENT	CL	HRS	CO
5	5.1 Population Genetics: Gene Pool and Gene Frequency, Hardy - Weinberg Law and Factors Influencing Allele Frequency 5.2 Genetic Regulation of Development in <i>Drosophila</i> : Developmental Stages – Three Major Classes of Developmental Genes (Maternal Effect Genes, Segmentation Genes and Homeotic Genes) 5.3 Epigenetics: Definition, Mechanisms – Epigenetics and cancer, imprinting, nutrition and ageing. 5.4 Conservation Genetics:- <i>Ex Situ</i> Conservation : pros and cons, examples of Captive Breeding and Gene Banks- <i>In Situ</i> Conservation: pros and cons, examples of Population Augmentation - Case study Analysis	K1 - K5	11	1 - 5

OBJECTIVES OF THE COURSE

To enable students to

- understand the basic principle, procedure and to determine the size of microscopic specimen, the total number of RBCs and WBCs and interpret the results
- develop the necessary skills for analysing the inheritance patterns, pedigree of some human inherited traits/diseases/disorders, Mendelian traits, normal and abnormal Karyotypes and calculate the gene frequency and genotypic frequency
- develop the necessary skills for squash/smear preparation and to determine the ABO blood groups and Rh type
- identify and comment on mutant forms, equipment used in various experiments and *Drosophila* culture
- write a report on the inheritance of Mendelian traits in humans and/or laboratory visit, and maintain an observation and record book

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	submit a record of practical work carried out in the laboratory and/or a report on a laboratory visit and/or report on inheritance of Mendelian traits	K1
CO2	illustrate and describe the <i>Drosophila</i> mutant forms, equipment used in <i>Drosophila</i> culture and various biotechnology experiments	K2
CO3	demonstrate the necessary skills for squash/smear preparation and to determine the ABO blood groups and Rh type	K3
CO4	analyse the inheritance patterns, pedigree of some human inherited traits/diseases/disorders, Mendelian traits, normal and abnormal Karyotypes and calculate the gene frequency and genotypic frequency	K4
CO5	calibrate the ocular micrometer to standardise the microscope and determine the size of microscopic specimen, count the total number of RBCs and WBCs and interpret the results	K5

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate

UNIT	CONTENT	CL	Hrs	CO
1	i. Micrometry ii. RBC Count iii. WBC Count	K5	16	CO 5
2	i. Pedigree Analysis of some human inherited traits/disorders/diseases ii. Study of any five Mendelian Traits iii. Observation and interpretation of the following karyotypes: normal male and female, Turner's, Klinefelter's and Down's syndrome iv. Hardy -Weinberg Equilibrium: Calculating Gene Frequency and Genotypic Frequency using bead experiments - Calculating Gene Frequency and Genotypic Frequency based on the data provided	K4	14	CO 4

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

Interdisciplinary Core Course Offered by the Departments of Sociology and Zoology to

B.A. Sociology and B.Sc. Advanced Zoology and Biotechnology Degree Programmes

SYLLABUS

(Effective from the academic year 2023-2024)

SOCIOETHNOZOOLOGY

CODE: 23/ID/IC/SZ55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

To enable students to

- understand the meaning of Ethnobiology, Ethnozooology, Ethnology, Sociology, Sociobiology and comprehend the role of animals in human culture and human – animal relationships
- understand the sociology of human-animal relationships
- comprehend the significance of animal domestication, historical, sociological and economic importance of animals and zooindicators of weather and climate
- understand social evolution, social groups, social organisation in invertebrates and vertebrates and the theory of parental investment
- comprehend the fundamental principles and modes of communication in humans and animals

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall basic definitions related to Ethnology, Sociology and their derivatives, concepts regarding human - animal relationships and the role of animals in culture, historical, sociological and economic importance of animals including their use as food, medicine and zooindicators of weather and climate, social evolution and organisation, and communication in humans and animals	K1
CO2	describe the wide ranging relationships between humans and animals, communication in humans and animals, social evolution, social organisation, ethnological and sociological concepts	K2
CO3	apply the knowledge gained to identify the historical, sociological and economic use of animals including their use as food, medicine and zooindicators of weather and climate; discuss the meaning of Ethnology, Sociology and related disciplines, human-animal relationships, social evolution, social organisation and communication in humans and animals	K3

COs	DESCRIPTION	CL
CO4	examine the process of social evolution, social organisation, modes of communication and their functions in humans and animals, human-animal relationships, historical, sociological and economic use of animals including their use as food, medicine and zooindicators of weather and climate	K4
CO5	explain concepts related to Ethnology, Sociology and Sociobiology; human -animal relationships, significance of animals in culture, historical, sociological and economic use of animals including their use as food, medicine and zooindicators of weather and climate; social evolution, social organisation in invertebrates and vertebrates; and communication in humans and animals	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Meaning of Ethnobiology and Ethnozoology- Basic definitions- Qualities of Sociality 1.2 Role of animals in human culture: Biological predisposition and individual differences in human attitudes towards animals - Animal Mythology in the Indian context 1.3 Meaning of Ethnology; Sociology; Sociobiology 1.4 Interdisciplinary Approach in understanding Human-Animal Relationship – Sociozoologic scale	K1 - K5	15	1- 5
2	Sociology of Human and Animal Relationship 2.1 Significance of Sociology of Human-Animal Relationship 2.2 Scope of Sociology of Human-Animal Relationship 2.3 Sociological Perspective on Human Animal Relationship: Symbolic Interactionism Theory and Conflict Theory 2.4 Social Relationships and Social Organizations.	K1 - K5	15	1-5
3	Ethnozoology 3.1 Historical and Sociological significance of animals and their domestication 3.2 Animals as food: Arthropods – Molluscs – Echinoderms - Vertebrates 3.3 Animals in medicine : Traditional and Contemporary 3.4 Economic importance of animals and their products - Animals as zooindicators of weather and climate	K1 - K5	16	1-5
4	Social Evolution 4.1 Meaning of Organic Evolution, Natural Selection and Social Evolution - Cooperation, coordination and division of labour 4.2 Social Groups: Altruism, kin selection, dominance and hierarchy	K1 - K5	16	1-5

UNIT	CONTENT	CL	HRS	CO
	4.3 Coloniality: Adaptive basis of coloniality – Adaptive significance of roles – Optimization of Caste Systems - Social insects: Ants, Bees and Termites – evolution of social organisation - Other Social species: invertebrates (Coelenterates), Fish, Frogs, Reptiles, Birds and Mammals (Social traits and Social Behaviour in Chimpanzee) 4.4 The Theory of Parental Investment - Ecology of Parental Care – Parent-Offspring conflict – Alloparental care			
5	Verbal and Nonverbal Communication 5.1 Origin of human language – Forms of communication 5.2 Verbal and non-verbal communication and its functions 5.3 Non-verbal communication in animals : Discrete versus graded signals - Signal specificity-Signal economy 5.4 Functions, advantages and disadvantages of animal communication - a comparative study	K1 - K5	16	1-5

**B.Sc. DEGREE: BRANCH VI A - ADVANCED ZOOLOGY AND
BIOTECHNOLOGY**

SYLLABUS

(Effective from the academic year 2023 - 2024)

ANIMAL BEHAVIOUR

CODE:23ZL/MC/AB64

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

To enable students to

- understand the basic concepts of Animal Behaviour and the scientific methods of observing Animal Behaviour and apply ethological concepts in observing and recording patterns of behaviour
- understand basic and maintenance behaviour, habitat selection and Chronobiology
- comprehend learning behaviour, interspecific behaviour, play behaviour and reproductive behaviour in animals
- understand the science, ethics and law related to Animal Welfare and apply these concepts to assess animal welfare, distinguish between normal and abnormal animal behaviour and provide behavioural enrichment
- comprehend the basic principles of Biopsychology, and the Biopsychology of emotion, stress, health and psychiatric disorders

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts of Animal Behaviour, scientific methods of observing Animal Behaviour and apply ethological concepts in observing and recording patterns of behaviour, basic and maintenance behaviour, habitat selection, Chronobiology, learning behaviour, interspecific behaviour, play behaviour and reproductive behaviour in animals; Science, ethics and law related to Animal Welfare, animal welfare assessment, normal and abnormal animal behaviour, behaviour enrichment, Biopsychology and Biopsychology of emotion, stress, health and psychiatric disorders	K1
CO2	describe the basic concepts of Animal Behaviour, scientific methods of observing Animal Behaviour and apply ethological concepts in observing and recording patterns of behaviour, basic and maintenance behaviour, habitat selection, Chronobiology, learning behaviour, interspecific behaviour, play behaviour and reproductive behaviour in animals; Science, ethics and law related to Animal Welfare, different aspects of animal welfare assessment, normal and abnormal animal behaviour, behaviour enrichment, basics of Biopsychology and Biopsychology of emotion, stress, health and psychiatric disorders	K2

COs	DESCRIPTION	CL
CO3	explain the basic concepts of Animal Behaviour, scientific methods of observing Animal Behaviour and apply ethological concepts in observing and recording patterns of behaviour, basic and maintenance behaviour, habitat selection, Chronobiology, learning behaviour, interspecific behaviour, play behaviour and reproductive behaviour in animals; Science, ethics and law related to Animal Welfare, different aspects of animal welfare assessment, normal and abnormal animal behaviour, behaviour enrichment, basics of Biopsychology and Biopsychology of emotion, stress, health and psychiatric disorders	K3
CO4	analyse the basic concepts of Animal Behaviour, scientific methods of observing Animal Behaviour and apply ethological concepts in observing and recording patterns of behaviour, basic and maintenance behaviour, habitat selection, Chronobiology, learning behaviour, interspecific behaviour, play behaviour and reproductive behaviour in animals; Science, ethics and law related to Animal Welfare, different aspects of animal welfare assessment, normal and abnormal animal behaviour, behaviour enrichment, basics of Biopsychology and Biopsychology of emotion, stress, health and psychiatric disorders	K4
CO5	evaluate the basic concepts of Animal Behaviour, scientific methods of observing Animal Behaviour and apply ethological concepts in observing and recording patterns of behaviour, basic and maintenance behaviour, habitat selection, Chronobiology, learning behaviour, interspecific behaviour, play behaviour and reproductive behaviour in animals; Science, ethics and law related to Animal Welfare, different aspects of animal welfare assessment, normal and abnormal animal behaviour, behaviour enrichment, basics of Biopsychology and the Biopsychology of emotion, stress, health and psychiatric disorders	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction: Behaviour - Causes and Significance - Ethology – History 1.2 Concepts and Terminology: Motivation - Fixed Action Pattern (FAP) - Sign Stimulus - Innate Releasing Mechanism (IRM) - Action Specific Energy (ASE) - Concept of Behavioural Genetics - Evolution of Behaviour 1.3 Methods of Studying Behaviour: Studies in Laboratories and in the Wild: Identification and Location of Individuals, Observation, Description, Recording and Cataloguing, Constructing Ethogram, Interpreting and Presenting Data	K1 - K5	13	1 - 5

UNIT	CONTENT	CL	HRS	CO
2	2.1 Basic and Maintenance Behaviour: Maintenance and Related Behaviour - Foraging and Caching - Shelter Seeking, Nests and other constructions 2.2 Finding a Place to Live: Habitat Selection – Homing 2.3 Chronobiology: Types of Rhythms and Applications of Chronobiology - Sleep cycle, Role of melatonin and Sleep disorders (Insomnia and Sleep Apnea)	K1 - K5	14	1 - 5
3	3.1 Animal Learning - Different forms of Animal Learning 3.2 Behaviour and Reproduction: Breeding Patterns, Courtship 3.3 Interspecific Behaviour: Aggregations, Commensalism, Mutualism, Parasitism and Predation - Play: General Attributes of Play, Examples / Descriptions of Play Behaviour, Theories	K1 - K5	13	1 - 5
4	4.1 Science, Ethics and Law in Animal Welfare 4.2 Welfare Assessment in Animals – Five Freedoms – Concept of Needs 4.3 Recognition of Normal Behaviour in Animals – Abnormal Behaviour in Pet, Domestic and Zoo Animals – Possible causes for Abnormal Behaviour – Prevention of abnormal behaviour – Behavioural Enrichment – Animal Protection Laws	K1 - K5	13	1 - 5
5	5.1 Introduction to Biopsychology: Definition and Divisions - Overview of Research methods of Biopsychology (Human and Nonhuman subjects) 5.2 Biopsychology of Emotion, Stress and Health: Theories on Emotion - Fear, defense and aggression - Stress response and Psychoneuroimmunology 5.3 Biopsychology of psychiatric disorders: Schizophrenia, Affective disorders (Depression and Mania) and Anxiety disorders	K1 - K5	12	1 - 5

ECOLOGY

CODE:23ZL/MC/EC64

CREDITS:4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable students to

- comprehend the biotic, abiotic factors, biogeochemical cycles that govern the ecosystem
- acquire knowledge on the interrelationship of different habitats, their adaptations, productivity of the ecosystem and the importance of extra-terrestrial life.
- understand the various physico-chemical characteristics of aquatic ecology and comprehend the significance of biotic communities
- understand the attributes of population along with classification, functions and processes of ecosystem, biodiversity and its conservation
- comprehend the basic principles of Biostatistics and scientifically present ecological data

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the structure and function of different ecosystems, abiotic and limiting factors, habitat ecology and biotic communities of different habitats and ecosystems including adaptations, ecosystem productivity and significance, space ecology, importance of physico-chemical characteristics of different habitats, attributes of population, policies and laws pertaining to conservation ecology, significance of biodiversity and its conservation and statistical procedures	K1
CO 2	describe the structure and function of different ecosystems, abiotic and limiting factors, habitat ecology and biotic communities of different habitats and ecosystems including adaptations, ecosystem productivity and significance, space ecology, importance of physico - chemical characteristics of different habitats, attributes of population, policies and laws pertaining to conservation ecology, significance of biodiversity and its conservation and statistical procedures	K2
CO 3	apply the knowledge gained to explain the structure and function of different ecosystems, abiotic and limiting factors, habitat ecology and biotic communities of different habitats and ecosystems including adaptations, ecosystem productivity and significance, space ecology, importance of physico - chemical characteristics of different habitats, attributes of population, policies and laws pertaining to conservation ecology, significance of biodiversity and its conservation and statistical procedures	K3

COs	DESCRIPTION	CL
CO 4	analyze the structure and function of different ecosystems, abiotic and limiting factors, habitat ecology and biotic communities of different habitats and ecosystems including adaptations, ecosystem productivity and significance, space ecology, importance of physico-chemical characteristics of different habitats, attributes of population, policies and laws pertaining to conservation ecology, significance of biodiversity and its conservation and statistical procedures	K4
CO 5	evaluate the structure and function of different ecosystems, abiotic and limiting factors, habitat ecology and biotic communities of different habitats and ecosystems including adaptations, ecosystem productivity and significance, space ecology, importance of physico - chemical characteristics of different habitats, attributes of population, policies and laws pertaining to conservation ecology, significance of biodiversity and its conservation and statistical procedures	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction to Ecology- Soil formation: texture, profile, classification and properties. 1.2 Abiotic factors: Temperature - Thermal stratification, Range of temperature tolerance. Light- composition, light on land and water. Biological effects of light on aquatic and terrestrial organisms and role of pH. 1.3 Limiting factors: Liebig's law of minimum – Shelford's law of tolerance - Biogeochemical cycles: Water, Oxygen, Carbon and Phosphorus	K1 – K5	12	CO1 - 5
2	2.1 Habitat ecology: Terrestrial habitat: Biomes, tundra, grassland, forest (coniferous, tropical, temperate and deciduous) – Ecotones (Shola forest) - Deserts: Fauna, adaptations of animals inhabiting deserts and caves 2.2 Ecosystem: Productivity – Carbon sequestration – Biomass 2.3 Exobiology : Space ecology – Microbiota – Extraterrestrial life – Cosmic life	K1 – K5	14	CO 1 - 5
3	3.1 Freshwater ecology: Physico-chemical nature of freshwater-biotic communities – Lotic habitats (rivers), Lentic habitats (Lakes- Pulicat Lake and Ponds) 3.2 Marine Ecology : Physico-chemical characteristics - biotic communities of pelagic and benthic zone - adaptations of deep sea animals 3.3 Estuarine systems: Physico-chemical characteristics – biotic communities	K1 - K5	13	CO 1 - 5

UNIT	CONTENT	CL	HRS	CO
4	4.1 Attributes of population: Density, Natality, Mortality and Age distribution 4.2 Ecosystems – Definition – Classification – Functions - Processes 4.3 Biodiversity: Definition - Magnitude – Laws related to biodiversity - Biodiversity of India - Distribution – Conservation: Biosphere Reserves – National Parks – Wildlife Sanctuaries	K1 - K5	14	CO 1 - 5
5	5.1 Analysis of ecological data using Biostatistics – Collection of Data – Census and sampling methods. Variable : Discrete and continuous 5.2 Presentation of data : Classification and tabulation – Diagrams and graphs : Bar, Pie, Histogram, Line graph – Concept of statistical population and sample characteristics of frequency distribution. 5.3 Measures of Central tendency: Mean, Median, Mode and Weighted Arithmetic Mean. Measures of Dispersion: Range, Quartile deviation, Mean deviation and Standard deviation, Correlation and Regression	K1 - K5	12	CO 1 - 5

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

To enable students to

- understand the basic concepts, organization of the immune system and types of immunity
- comprehend the types and properties of antigens, structure, classification and functions of antibodies and applications of Antigen-Antibody reactions
- acquire knowledge on various immune responses and reactions
- understand the properties, classification, uses of cytokines and signal transduction through cytokine receptors and the immune reactions in infections
- comprehend the causes and the significance of autoimmune disorders, types of vaccines and their role in preventing infectious diseases

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts and knowledge of cells, tissues and organs of the immune system, types of immunity, classification and functions of antigens and antibodies, applications of antigen - antibody reactions, immune responses and reactions, properties and roles of cytokines, immune reactions in infections, causes and impact of autoimmune disorders, immunodeficiency diseases and significance of vaccines	K1
CO2	describe the cells, tissues and organs of the immune system, types of immunity, classification and functions of antigens and antibodies, applications of antigen - antibody reactions, immune responses and reactions, properties and roles of cytokines, immune reactions in infections, causes and impact of autoimmune disorders, immunodeficiency diseases and significance of vaccines	K2
CO3	apply the acquired knowledge to discuss the cells, tissues and organs of the immune system, types of immunity, classification and functions of antigens and antibodies, applications of antigen - antibody reactions, immune responses and reactions, properties and roles of cytokines, immune reactions in infections, causes and impact of autoimmune disorders, immunodeficiency diseases and significance of vaccines	K3

COs	DESCRIPTION	CL
CO4	analyse the basic concepts, different types of cells, tissues and organs of the immune system, mechanisms of different types of immunity, classification and functions of antigens and antibodies, applications of antigen - antibody reactions, immune responses and reactions, properties and roles of cytokines, immune reactions in infections, causes and impact of autoimmune disorders, immunodeficiency diseases and significance of vaccines	K4
CO5	evaluate the roles and functions of cells, tissues and organs of the immune system, mechanisms of different types of immunity, biological properties and functions of antigens and antibodies, applications of antigen - antibody reactions, mechanisms of immune responses and reactions, properties and roles of cytokines, immune reactions in infections, causes and impact of autoimmune disorders, immunodeficiency diseases and significance of vaccines	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction - History and Basics of Immunology 1.2 Cells and Molecules of the Immune System: Types, Source and Salient Functions - Primary and Secondary Lymphoid Tissues / Organs - Factors that can depress immune system in humans 1.3 Types of Immunity: Natural and Acquired Immunity - Active and Passive Immunity with Examples - Cellular and Humoral Immunity	K1 – K5	12	1 - 5
2	2.1 Antigens: Definition, Classification, Properties of Immunogens 2.2 Antibody: Primary Structure, Classification and Biological activities 2.3 Antigen - Antibody Reaction: Types and Applications - Principle and Applications of Immunotechniques: ELISA, RIA, Flow Cytometry, FISH and GISH	K1 – K5	10	1 - 5
3	3.1 Complement System: Three major pathways – functions 3.2 Hypersensitivity Reactions: Types and Immune Reactivity 3.3 Transplantation: Types of Transplant/Graft, Causes for Graft Rejection - Immunosuppression	K1 – K5	10	1 - 5
4	4.1 Cytokines: Definition, Properties, Classification and functions 4.2 Cytokine receptors - Signal Transduction through Cytokine receptors – therapeutic uses of Cytokines 4.3 Immune Reactions in Viral, Bacterial and Parasitic Infections	K1 – K5	11	1 - 5

UNIT	CONTENT	CL	HRS	CO
5	5.1 Autoimmune Disorders: Types - Causes and symptoms of Systemic Lupus Erythematosus and Rheumatoid Arthritis 5.2 Congenital and Acquired immunodeficiencies: Types - Causes and symptoms of X-linked agammaglobulinemia, Congenital B - cell immunodeficiencies, IgA deficiency and Chronic granulomatous disease 5.3 Common Infectious Diseases and Vaccines – National Immunisation Schedule (NIS) for infants, children and pregnant women in India	K1 – K5	9	1 - 5

B.Sc. DEGREE: BRANCH VI A - ADVANCED ZOOLOGY AND BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023 - 2024)

ANIMAL BEHAVIOUR, ECOLOGY AND IMMUNOLOGY PRACTICAL

CODE:23ZL/MC/P663

CREDITS:3

L T P:0 0 6

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

To enable students to

- understand the basic principle, procedure and develop the necessary skills to estimate the dissolved oxygen, calcium, carbonates and bi - carbonate alkalinity in different water samples
- develop the skills to identify and analyze the type of animal association, create, analyze and interpret ethogram and data sheets
- understand the basic principle, procedure and develop the necessary skills to estimate the pH and salinity in different water samples, soil nitrates and carbonates, detect the presence of hCG in urine sample, test for syphilis and identification of freshwater/marine planktons
- identify, illustrate and describe the nests of birds, rocky and sandy shore fauna and immune cells
- write a report on circadian patterns in humans and maintain an observation and record book

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	submit a record of the practical work carried out in the laboratory and a report on a study of circadian rhythms in humans	K1
CO 2	describe different types of bird nests, rocky shore and sandy shore fauna, types of immune cells, Radial Immunodiffusion Test, Ouchterlony Double Immunodiffusion Test and Anatomical Location of Various Immune Tissues and Organs in Fish	K2
CO 3	apply the knowledge gained to estimate pH and salinity in different water samples, test the Soil Nitrates and Carbonates, perform the test for Syphilis, detect the presence of hCG in human urine and identify freshwater/marine plankton	K3
CO 4	demonstrate the skills to analyse the type of animal associations and create, analyse and interpret ethogram and data sheets	K4
CO 5	demonstrate the skills to estimate dissolved oxygen, calcium, carbonates and bi - carbonate alkalinity in different water samples	K5

UNIT	CONTENT	CL	HRS	CO
1	i. Estimation of dissolved oxygen in different water samples ii. Estimation of Calcium in different water samples iii. Estimation of Total alkalinity - Free Carbondioxide, Carbonates and Bicarbonates in different water samples	K5	16	CO5
2	i. Identification and analysis of animal associations based on their adaptations and characteristic features : Mutualism, Commensalism, Parasitism, Predation (Two examples for each type) ii. Methods of Studying Animal Behaviour – Workshop iii. Observation of animal behaviour - making ethogram and data sheets	K4	16	CO4
3	i. Estimation of pH in different water samples ii. Estimation of salinity in different water samples iii. Qualitative Field tests for Soil Nitrates and Carbonates iv. VDRL Slide Flocculation Test for Syphilis v. ELISA – Qualitative Test for Pregnancy vi. Observation and Identification of Freshwater/Marine Plankton	K3	16	CO3
4	Observation and Identification of the following spotters i. Bird Nests ii. Rocky Shore and Sandy Shore Fauna iii. Immune Cells iv. Radial Immunodiffusion Test (Demonstration) v. Ouchterlony Double Immunodiffusion Test (Demonstration) vi. Anatomical Location of Various Immune Tissues and Organs in Fish (Demonstration)	K2	16	CO2
5	i. Report on the study of circadian patterns in humans ii. Maintenance of an observation and record book of practical work is an integral part of the syllabus	K1	14	CO 1

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50 Duration: 3 hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A (Unit 1)	K5 (15 marks)	$1 \times 15 = 15$	1 question	1 question
B (Unit 2)	K4 (12 marks)	$2 \times 6 = 12$	2 questions	2 questions
C (Unit 3)	K3 (9 marks)	$1 \times 9 = 9$	1 question	1 question
D (Unit 4)	K2 (9 marks)	$3 \times 3 = 9$	3 questions	3 questions
E (Unit 5)	K1 (5 marks)	5	Report & Observation notebook	Report & Observation notebook
Total		50	7	7

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

SYLLABUS

(Effective from the academic year 2023 - 2024)

APPLIED ZOOLOGY

CODE:23ZL/ME/AZ45

CREDITS: 5

L T P:5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable students to

- understand the different types of aquaculture, their applications and the techniques used in fish/prawn preservation and processing, and aquarium maintenance
- comprehend aspects about the sericulture industry and research institutes in India, the economic importance of insect pests and different pest management strategies
- understand the economic importance of soil organisms and various sampling methods used in the extraction and identification of soil microarthropods
- understand the techniques used in aquarium setting, poultry, rabbitry, piggery and dairy science and the economic importance of mammals
- recognise the role of women in small scale industries, explore the functions of various research organisations and develop entrepreneurial skills

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the basic concepts of Applied Zoology, aquaculture, poultry rearing techniques, animal husbandry (rabbitry, piggery and dairy) economically important organisms and aspects of small scale industries and research organisations	K1
CO2	Describe the types and techniques of Aquaculture, significance of pests and their management, importance of soil organisms in the ecosystem, poultry rearing techniques, animal husbandry (rabbitry, piggery and dairy) and aspects of small scale industries, research organisations and entrepreneurial skills	K2
CO3	Apply the acquired knowledge to discuss types and techniques of aquaculture, aquarium setting, role of small scale industries and research organisations; implement integrated pest management techniques, poultry farming and animal husbandry (rabbitry, piggery and dairy) and related entrepreneurial skills.	K3
CO4	Categorise the types and techniques employed in culturing/rearing, maintenance and management of economically important organisms and examine the significance of research organisations, entrepreneurship and the role of women in small scale industries	K4
CO5	Assess types and techniques of Aquaculture, Poultry and Animal Husbandry; economically important organisms, pest management strategies, functions of small scale industries, research organisations and the entrepreneurial process	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Types of Aquaculture: Mono, Poly, Extensive, Semi-Intensive, Intensive, Super Intensive, Monosex, Sewage-fed culture and Integrated Fish Farming (Paddy cum fish culture) 1.2 Culture of Prawn, Lobster, Edible Oyster and Live Feed Animals (<i>Artemia sp.</i> , <i>Daphnia sp.</i> , and Rotifers) 1.3 Preservation and Processing of Fish and Prawn: Chilling, Freezing, Freeze Drying, Smoking, Salting and Canning – By products of Fishing Industry	K1 -K5	14	1- 5
2	2.1 Insect Pests: Salient Features, Nature of Destruction and Control Measures of the following pests: Pests of Paddy, Cotton, Sugar Cane and Stored Food Grains (Any Three Major Pests of each Crop/Stored Food Grains) 2.2 Identification, damage and control of any three Common Pests of Fruits and Vegetables 2.3 Integrated Pest Management	K1 - K5	13	1- 5
3	3.1 Economically Important Soil Animals: Soil Microarthropods, Millipedes, Centipedes, Snails and Slugs – Their Importance in Soil Ecosystem 3.2 Termites: Characteristics of Mound Soils – Decomposition of Organic Matter – Termitophiles – Termite Damage to Crops and Buildings – Control Measures 3.3 Soil Microarthropods: Sampling Methods and Identification of any five soil Microarthropods extracted using Berlese Funnel	K1-K5	13	1- 5
4	4.1 Aquarium setting and maintenance: ornamental fishes, safety measures and devices- prospects of Ornamental fisheries - export potential 4.2 Poultry Science: Quail Farming - Different Breeds - Selective Breeding, Housing and Rearing - Role of Nutrition in Egg Laying -Common Diseases - Economic Importance 4.3 Economic Importance of Mammals: Indirect and Direct Value of Mammals - Rabbit farming, Piggery and Dairy.	K1-K5	14	1- 5
5	5.1 Sericulture Industry in India - Central Silk Board - Silk Research Institutes in India - Role of women in small scale industries 5.2 Government and Research organisations: CIBA, ZSI, CMFRI, IARI, ICAR, CRRI, FAO, MSSRF, IIBAT and FSI 5.3 Entrepreneurial Skills: Marketing and Financial Support - Branding - Promotion	K1-K5	11	1- 5

(Effective from the academic year 2023 - 2024)

PROJECT

CODE:23ZL/ME/PR45

CREDITS:5

OBJECTIVES OF THE COURSE

To enable students to

- carry out an independent study on a topic of their choice
- acquire a spirit of scientific inquiry
- learn research methodology, scientific writing and data interpretation

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

COs	DESCRIPTION	CL
CO 1	Identify a scientific problem to carry out project work	K1
CO 2	Review relevant scientific literature	K2
CO 3	Design experiments	K3
CO 4	Collate, analyze and interpret data	K4
CO 5	Compile and present research findings and publish them	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Criteria for Selection of Candidates

- The student should have research aptitude
- The student should possess good analytical skills, computer skills, good writing skills and the ability to interpret and discuss scientific data
- An eligibility test will be conducted

Guidelines

- Each student will present a list of topics in the area of her interest
- One of the topics will be approved by the Supervisor
- Weekly interaction with the supervisor is mandatory
- The project work will require
 - Practical work
 - Submission of project report
 - Viva-voce
- Project report should be submitted at the end of the semester on the stipulated date.

Evaluation

Continuous Assessment

50 marks

Rubrics for Evaluation	Marks	Cognitive Level
Research Statement and Review of Literature	20	K1 – K2
Methodology/Documentation/Discussion of Results	20	K3 – K4
Evaluation of Workflow	10	K5

End Semester

50 marks

Rubrics for Evaluation	Marks	Cognitive Level
Submission of Dissertation	20	K1 – K2
Textual and Data Analysis	20	K3 – K4
Viva Voce	10	K5

SYLLABUS

(Effective from the academic year 2023 - 2024)

MEDICAL LABORATORY TECHNOLOGY

(Skill development course)

CODE:23ZL/ME/LT45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

To enable students to

- understand the types and need for Good Lab Practices, sterilization techniques used in the lab, preparation of important lab reagents and Biomedical Waste Management
- comprehend knowledge on the cellular components of blood, their formation, estimation through tests, normal range of cellular parameters, deviations from normal, pathological conditions
- understand aspects of immunohaematology
- comprehend details relating to macroscopic, microscopic and chemical analysis of body fluids (urine, seminal fluid, cerebrospinal fluid), blood smear examination for microfilariae and malarial parasite, stool examination for protozoan and helminthic intestinal parasites and causation, pathogenesis, and symptoms of AIDS, TB and Hepatitis
- understand the importance, ranges and tests for Glucose, Urea and Cholesterol in health and disease and interpretation of deviant values, the physiology, biochemistry, range and significance of enzymes ALT and AST, Laboratory Pregnancy Tests, and significance of PAP Smear

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall knowledge relating to Good Lab Practices, including sterilization and biomedical waste management, preparation of lab reagents, blood collection techniques, haematology, immunohaematology, parameters relating to body fluids (urine, cerebrospinal fluid and seminal fluid), smear analysis blood parasites (Plasmodium, Microfilariae), motion analysis, pathology and symptoms relating to Acquired Immunodeficiency Syndrome, Hepatitis and Tuberculosis, Tests for Glucose, Urea and Cholesterol and the interpretation of results, physiology and biochemistry of AST and ALT, Laboratory Pregnancy Tests and PAP smear	K1
CO2	describe Good Lab Practices, including sterilization procedures and biomedical waste management, preparation of lab reagents, blood collection techniques, aspects of haematology and immunohaematology, parameters relating to body fluids (urine, cerebrospinal fluid and seminal fluid), smear analysis of blood parasites (Plasmodium, Microfilariae), motion analysis, pathology and symptoms relating to Acquired Immunodeficiency Syndrome, Hepatitis and Tuberculosis, Tests for Glucose, Urea and Cholesterol and the interpretation of results, physiology and biochemistry of AST and ALT, Laboratory Tests for Pregnancy and PAP smear	K2

COs	DESCRIPTION	CL
CO3	Apply the knowledge obtained to implement Good Lab Practices including sterilization procedures and biomedical waste management, preparation of lab reagents, explain various blood collection techniques, aspects of haematology and immunohaematology, parameters relating to body fluids (urine, cerebrospinal fluid and seminal fluid), smear analysis of blood parasites (Plasmodium, Microfilariae), motion analysis, pathology and symptoms relating to Acquired Immunodeficiency Syndrome, Hepatitis and Tuberculosis, Tests for Glucose, Urea and Cholesterol and the interpretation of results, physiology and biochemistry of AST and ALT, Laboratory Tests for Pregnancy and PAP smear	K3
CO4	Analyse the various Good Lab Practices, Blood collection techniques, aspects of haematology and immunohaematology, parameters relating to body fluids (urine, cerebrospinal fluid and seminal fluid), smear analysis of blood parasites (Plasmodium, Microfilariae), motion analysis, pathology and symptoms relating to Acquired Immunodeficiency Syndrome, Hepatitis and Tuberculosis, Tests for Glucose, Urea and Cholesterol and the interpretation of results, physiology and biochemistry of AST and ALT, Laboratory Tests for Pregnancy and PAP smear	K4
CO5	Evaluate the various Good Lab Practices, Blood collection techniques, aspects of haematology and immunohaematology, parameters relating to body fluids (urine, cerebrospinal fluid and seminal fluid), smear analysis of blood parasites (Plasmodium, Microfilariae), motion analysis, pathology and symptoms relating to Acquired Immunodeficiency Syndrome, Hepatitis and Tuberculosis, Tests for Glucose, Urea and Cholesterol and the interpretation of results, physiology and biochemistry of AST and ALT, Laboratory Tests for Pregnancy and PAP smear	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Good Lab Practices (GLP) 1.2 Sterilisation of Laboratory Items - Preparation of Reagents – Preparation of R.B.C & W.B.C. Fluids, Normal Saline, Romanowsky stains (Wright's, Giemsa, Leishman's) 1.3 Venous and Capillary Blood Collection Techniques – Anticoagulants: Modes of Action and Uses 1.4 Biomedical Wastes: Classification, Characteristics, Potential Health Hazards, Management	K1 - K5	11	1 - 5
2	2.1 Red Blood Corpuscle: Structure (Normal & Abnormal), Erythropoiesis, Total Count, Packed Cell Volume - Wintrobe's and Microhaematocrit Techniques, Total Reticulocyte Count - Erythrocyte Sedimentation Rate: Westergren's Method 2.2 Haemoglobin Estimation: Sahli's, Drabkin's Methods (Practicals) - Types of Anaemia – Polycythemia	K1 - K5	14	1 - 5

	2.3 White Blood Corpuscle: Types, Leucopoiesis, Total W.B.C Count - Preparation of Blood Smear For Differential Count - Leucocytosis –Leukemia - Leucopenia 2.4 Blood Platelets – Thrombopoiesis - Platelet Count			
3	3.1 Immunohaematological Studies: importance - Blood Groups and Rh-Types, methodology of blood grouping and Rh typing 3.2 Transfusion of Blood: Criteria for blood donation, Tests For Compatibility and Complications due to transfusion 3.3 Transfusion of blood components: Plasma and Blood cells - Artificial Blood substitutes 3.4 Blood Coagulation: Factors, Process (Enzyme Cascade) – Bleeding Time - Clotting Time - Prothrombin Time (Practicals)	K1 - K5	13	1 - 5
4	4.1 Urine: Macroscopic, Microscopic and Chemical Analysis 4.2 Examination of Blood Smear for Malarial Parasites and Microfilariae – Motion Analysis for Common Protozoan and Helminthic Intestinal Parasites 4.3 Analysis of Cerebrospinal Fluid and Seminal Fluid: Macroscopic, Microscopic and Chemical 4.4 Mode of Infection, Pathological Changes, Symptoms and testing for Acquired Immuno Deficiency Syndrome (AIDS), Hepatitis and Tuberculosis (TB)	K1 - K5	14	1 - 5
5	5.1 Test for Glucose, Urea and Cholesterol: Ranges in Health and Disease and Interpretation (Practical) 5.2 Physiology and Biochemistry of the Serum Enzymes Aspartate Transaminase (AST) and Alanine Transaminase (ALT) 5.3 Laboratory Pregnancy Tests –history, immunological tests - PAP Smear and its significance 5.4 Visit to laboratory	K1 - K5	13	1 - 5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A (Answer all Questions) Objective (Fill in the blanks, True or False, Mention the function of, Define, List, Give an example, etc.)	K1 (10 marks)	5 x 2 = 10	5 K1 questions	5 K1 questions
B (Answer all Questions) (Distinguish, Differentiate, Illustrate, Short answers, Relate, Identify, Comment, Give the range for, Give the diagnostic significance for etc.)	K2 (10 marks)	5 x 2 = 10	5 K2 questions	5 K2 questions
C (Answer any one) Essay	K3 (10 marks)	1 x 10 = 10	1 K3 question	2 K3 questions
D (Answer any one) Essay	K4 (15 marks)	1 x 15 = 15	1 K4 question	2 K4 questions
E (Answer any one) Paragraph	K5 (5 marks)	1 x 5 = 5	1 K5 question	2 K5 questions
Total		50	13	16

Other Components:

Seminar/Quiz/Case studies/Poster presentation

Two to three components will be prescribed.**Total Marks: 50****End- Semester Examination: Total Marks: 100****Duration: 3 hours**

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A (Answer all Questions) Objective (Fill in the blanks, True or False, Mention the function of, Mention the contribution of, Define, List, Give an example, etc.)	K1 (20 marks)	$10 \times 2 = 20$	10 K1 questions	10 K1 questions
B (Answer all Questions) (Distinguish, Differentiate, Illustrate, Short answers, Relate, Identify, Comment, Give the range for, Give the diagnostic significance for etc.)	K2 (20 marks)	$10 \times 2 = 20$	10 K2 questions	10 K2 questions
C (Answer any two) Essay	K3 (20 marks)	$2 \times 10 = 20$	2 K3 question	3 K3 questions
D (Answer any two) Essay	K4 (30 marks)	$2 \times 15 = 30$	2 K4 question	3 K4 questions
E (Answer any two) Paragraph	K5 (10 marks)	$2 \times 5 = 10$	2 K5 question	3 K5 questions
Total		100	26	29

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

To enable students to

- comprehend the need for environmental monitoring and processes for environmental sampling and analysis, monitoring pollution and toxicity testing using biological material such as bioindicators, biomarkers and biosensors
- understand the types of pollutant synthetic compounds and inorganic wastes in the environment, and bioaugmentation and bioremediation strategies with case studies
- comprehend the methods for treatment of sewage, agricultural wastes and industrial effluents
- understand the types, significance and mode of action of biofertilizers and biopesticides and types, significance and production of biofuels
- comprehend the need for recovery of resources including the methodology for oil recovery and metal bioleaching through biohydrometallurgy

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall the significance of environmental monitoring, processes for environmental sampling and analysis, pollution monitoring, toxicity testing, types of pollutant synthetic compounds and inorganic wastes in the environment, bioaugmentation and bioremediation strategies, methodology for treatment of sewage, agricultural wastes and industrial effluents, types, significance and mode of action of biofertilizers, biopesticides and types, significance and production of biofuels and recovery of resources such as oil and metal through sustainable methods	K1
CO 2	discuss the significance of environmental monitoring, processes for environmental sampling and analysis, pollution monitoring, toxicity testing, types of pollutant synthetic compounds and inorganic wastes in the environment, bioaugmentation and bioremediation strategies, methodology for treatment of sewage, agricultural wastes and industrial effluents, types, significance and mode of action of biofertilizers, biopesticides and types, significance and production of biofuels and recovery of resources such as oil and metal through sustainable methods	K2
CO 3	apply the knowledge gained to explain the need for environmental monitoring, processes for environmental sampling and analysis, pollution monitoring, toxicity testing, types of pollutant synthetic compounds and inorganic wastes in the environment, bioaugmentation and bioremediation strategies, methodology for treatment of sewage, agricultural wastes and industrial effluents, types, significance and mode of action of biofertilizers, biopesticides and types, significance and production of biofuels and recovery of resources such as oil and metal through sustainable methods	K3

COs	DESCRIPTION	CL
CO 4	analyse the need for environmental monitoring, processes for environmental sampling and analysis, pollution monitoring, toxicity testing, types of pollutant synthetic compounds and inorganic wastes in the environment, bioaugmentation and bioremediation strategies, methodology for treatment of sewage, agricultural wastes and industrial effluents, types, significance and mode of action of biofertilizers, biopesticides and types, significance and production of biofuels and recovery of resources such as oil and metal through sustainable methods	K4
CO 5	evaluate the need for environmental monitoring, processes for environmental sampling and analysis, pollution monitoring, toxicity testing, types of pollutant synthetic compounds and inorganic wastes in the environment, bioaugmentation and bioremediation strategies, methodology for treatment of sewage, agricultural wastes and industrial effluents, types, significance and mode of action of biofertilizers, biopesticides and types, significance and production of biofuels and recovery of resources such as oil and metal through sustainable methods	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction – Need for Monitoring 1.2 Sampling and Analysis – Air, Soil and Water 1.3 Determination of Biodegradable Organic Material - Monitoring Pollution 1.4 Toxicity Testing Using Biological Material - Bio indicators, Biomarkers and Biosensors	K1 - K5	13	1-5
2	2.1 Introduction: Synthetic Compounds – Petrochemical Compounds and Inorganic Wastes in The Environment (A Brief Outline), Emerging Pollutants: Microplastics 2.2 Bioaugmentation using Genetically Modified Organisms - Bioremediation Strategies: Phytoremediation and Bioaugmentation, Metal and gaseous Bioremediation 2.3 Bioremediation Techniques 2.4 Case Studies : Taj Mahal(Agra) and Charminar(Hyderabad), Exxon Valdez Oil Spill	K1 - K5	14	1-5
3	3.1 Sewage Treatment Methods: STP - Sludge Treatment and Disposal; Anaerobic Digestion 3.2 Treatment of Agricultural Wastes - Removal of Nitrogen and Phosphorus 3.3 Treatment of Industrial Effluents: ETP - Distillery, Dairy, Tannery, Textile and Sugar Industries	K1 - K5	15	1-5
4	4.1 Biofertilizers in an Agro Ecosystem 4.2 Biopesticides: Types and Mode of Action of <i>Bacillus thuringiensis</i> 4.3 Bioenergy: Definition, Need and Biofuels (Biogas, Biodiesel, Ethanol and Hydrogen)	K1 - K5	12	1-5

UNIT	CONTENT	CL	HRS	CO
5	5.1 Introduction – Need for Recovery of Resources 5.2 Oil Recovery: Enhanced Oil Recovery and Microbially Enhanced Oil Recovery 5.3 Biohydrometallurgy: Definition, Importance and Bioleaching (Extraction of Copper, Uranium and Gold)	K1 - K5	11	1-5

INTRODUCTION TO MARINE BIOLOGY

CODE:23ZL/ME/IB45

CREDITS: 5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

To enable students to

- understand the geologic history of oceans, formation of beaches and coastlines, different types of oceanic currents, marine instrumentation, oceanic resources and exploration
- comprehend aspects of marine biogeography, and marine and coastal biodiversity
- understand the threats faced by marine biodiversity
- comprehend the importance and types of mariculture, marine ornamental organisms and marine fossils and marine protected areas
- understand the types and significance of marine microbes and products of various marine organisms such as probiotics, drugs, biofilms and toxins and their applications

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic aspects of oceanography including the history of oceans and seas, provinces of the ocean floor, oceanic currents, types of waves and tides, instrumentation, expeditions, oceanic resources, oceanic biogeography, marine and coastal biodiversity and adaptations, threats faced by marine biodiversity, mariculture, marine fossils, and marine microbes, probiotics, drugs, biofilms and toxins and their applications	K1
CO2	describe the history of seas and oceans, provinces of the ocean floor, formation of beaches and coastlines, types of waves and tides, instruments used, expeditions, oceanic resources and biogeography, marine and coastal biodiversity and their adaptations and threats faced, marine fossils, aspects of mariculture, types and significance of marine microbes, importance of biofilms and probiotic bacteria, and drugs and toxins produced by marine animals	K2
CO3	Apply the knowledge gained to discuss aspects of oceanography, instruments used, formation of beaches and coastlines, oceanic resources and biogeography, oceanic expeditions, marine and coastal biodiversity and adaptations and threats faced, marine fossils, aspects of mariculture and types and significance of marine microbes, importance of biofilms and probiotic bacteria, and drugs and toxins produced by marine animals	K3

COs	DESCRIPTION	CL
CO4	Analyse aspects of oceanography, its timeline, instruments used, formation of beaches and coastlines, resources from the ocean, biogeography, results of ocean expeditions, the adaptations seen among marine and coastal fauna and the threats they face, fossilization and types of marine fossils, aspects of mariculture, types and significance of marine microbes, importance of biofilms and probiotic bacteria, and drugs and toxins produced by marine animals	K4
CO5	Evaluate aspects of oceanography, its timeline, instruments used, formation of beaches and coastlines, resources from the ocean, biogeography, ocean expeditions, the adaptations seen among marine and coastal fauna and the threats they face, fossilization and types of marine fossils, types and significance of marine microbes, importance of biofilms and probiotic bacteria, and drugs and toxins produced by marine animals	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Oceanography - Geologic history of oceans – seas – continental shelf: formation of beaches and coastlines - continental slope 1.2 Oceanic currents – oceanic water masses and circulation – waves and tsunamis – tides: origin – hydrothermal vents 1.3 Marine instrumentation: echo sounder, side scanning sonar, marine navigator, underwater camera 1.4 Ocean resources and exploration – expeditions: the Challenger expeditions	K1 - K5	13	1 - 5
2	2.1 Marine biogeography - latitudinal gradient, oceanic differences in species diversity, geographical barriers, human-created barriers - Coastal zones: intertidal, littoral, sublittoral 2.2 Marine biodiversity: definition, importance, examples from invertebrates and chordates - Pelagic organisms: characteristic features, types and significance of plankton, characteristic features, types and significance of nekton - benthic fauna: definition, characteristic features and examples, factors affecting marine faunal populations 2.3 Coastal biodiversity: seagrass and other halophytes: Mangroves, coral reefs and kelp forests: types, characteristic features, significance, threats and associated fauna associated 2.4 Adaptations and Unique Behaviour: Marine Reptiles, Sea Birds and Marine mammals	K1 - K5	15	1 - 5

UNIT	CONTENT	CL	HRS	CO
3	3.1 Threats to marine biodiversity: physical alteration and habitat loss, overexploitation, Pollution, alien species climate change, acidification 3.2 Ocean pollution: kinds and quantities of pollutants entering oceans – sewage and nutrients from rivers and estuaries – trace metals – heavy metals - nuclear waste – fate of pollutants – toxic effects 3.3 Plastic pollution in the marine environment: nature of plastics, impact – oil spills, impact 3.4 Biofouling: definition, biofouling organisms, problems due to biofouling – pollution due to antifouling paints – biofouling control – Case study	K1 - K5	15	1 - 5
4	4.1 Mariculture: definition, importance, present status in India, types of culture (general)-commercial marine fishery sources of India and Tamil Nadu 4.2 Marine ornamental aquatic organisms: crustaceans, molluscs, fishes – their suitability for aquaria 4.3 Marine fossils: Coelenterates , Trilobites, Gastropods, Cephalopods, Pelecypods, Brachiopods, Echinoderms and Ichthyosaurs 4.4 Marine Protected Areas: importance, example - Gulf of Mannar National Park	K1 - K5	11	1 - 5
5	5.1 Marine microbes: bacteria, fungi and protozoans 5.2 Microbial biofilms – carbohydrate products and derivatives – nitrogenous compounds – Production and applications of marine microbial products – pigments: Astaxanthin, β carotene – bioadhesives and thermostable enzyme – Probiotic bacteria and their importance in aquaculture. 5.3 Marine Pharmaceuticals: Sources, Importance, Antibiotic compounds, Steroids, Carotenoids and Sterols from marine animals 5.4 Toxins from marine animals: Types and Functional properties – Venom in marine animals: sea snakes and fishes	K1 - K5	11	1 - 5

B.A. / B.Sc. / B.Com. /B.V.A. Degree Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

PET CARE

CODE:23ZL/GE/PC22

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

To enable students to

- understand aspects of animal welfare, welfare assessment, normal and abnormal behaviour in animals, laws and licenses, and animal charities and societies
- comprehend aspects of caring for fishes and birds including selection, maintenance, feed and, symptoms and treatment of common diseases
- understand aspects of caring for cats and dogs including selection, maintenance, feed and, symptoms and treatment of common diseases of cats and dogs, and the causes and prevention of zoonotic diseases

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall aspects of animal welfare, welfare assessment, normal and abnormal behaviour in animals, laws and licenses, animal charities and societies; caring for fishes, birds, cats and dogs including selection, maintenance, feed and, symptoms and treatment of common diseases and the causes and prevention of zoonotic diseases	K1
CO2	describe aspects of animal welfare, welfare assessment, normal and abnormal behaviour in animals, laws and licenses, animal charities and societies; caring for fishes, birds, cats and dogs including selection, maintenance, feed and, symptoms and treatment of common diseases and the causes and prevention of zoonotic diseases	K2
CO3	explain aspects of animal welfare, welfare assessment, normal and abnormal behaviour in animals, laws and licenses, animal charities and societies; caring for fishes, birds, cats and dogs including selection, maintenance, feed and, symptoms and treatment of common diseases and the causes and prevention of zoonotic diseases	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1.	1.1 Science, Ethics, Law and Welfare Assessment of Animals – Mental, Physical and Natural Assessment of Welfare 1.2 Five Freedoms – Normal and Abnormal Behaviour in Pet Animals 1.3 Laws and Licenses – Animal Charities and Societies: RSPCA, WSPA, Blue Cross – Pet Trade – Trafficking in pets 1.4 Zoonotic diseases: causes and prevention	K1- K3	8	1 -3
2.	2.1 Care of fish – Fish Selection – Types of Fish (Tropical, Marine, Cold Water) - Maintaining aquaria: Tanks, Size, Cost, Pumps, Lighting, Water Quality Management, Feed 2.2 Symptoms and treatment of Common diseases in Pet Fish (fungal, bacterial, parasites, environmental) 2.3 Breeds of Birds (e.g., Parrots, Pigeons, Love Birds) – Bird Selection - Containment (Aviaries: selection, design, size, management) – Feed – Watering – Grooming – Hygiene – Catching and Restraining 2.4 Symptoms and treatment of Common diseases in Pet Birds	K1- K3	9	1 -3
3.	3.1 Breeds of Cats– Selection of Cats - Cat care: Containment, Nutrition, Grooming and Breeding 3.2 Common infections in Cats and their treatment 3.3 Breeds of Dogs (Pure and Mixed) - Selection of Dogs – Dog Care: Containment, Nutrition and Grooming – Breeding 3.4 Common infections in Dogs and their treatment	K1- K3	9	1 -3

NUTRITION AND THERAPEUTIC DIET

CODE:23ZL/GE/ND22

CREDITS:2

LTP:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

To enable students to

- Understand the sources and functions of nutrients, importance of balanced diet and malnutrition, causes and management of eating disorders
- Comprehend the concept of therapeutic diet and diet management of Diabetes, Cardiovascular diseases, Anorexia nervosa, Bulimia nervosa and addictive behaviours
- Plan and prepare a meal menu and calculate calories

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	Recall the sources and functions of nutrients, importance of balanced diet and malnutrition, causes and management of eating disorders, concept and types of therapeutic diets and diet management of Diabetes, Cardiovascular diseases, Anorexia nervosa, Bulimia nervosa and addictive behaviours, meal menu for various categories and method of calorie calculation	K1
CO2	Describe the sources and functions of nutrients, importance of balanced diet and malnutrition, causes and management of eating disorders, concept and types of therapeutic diets and diet management of Diabetes, Cardiovascular diseases, Anorexia nervosa, Bulimia nervosa and addictive behaviours, meal menu for various categories and method of calorie calculation	K2
CO3	Apply the knowledge gained to discuss the sources and functions of nutrients, importance of balanced diet and malnutrition, causes and management of eating disorders, concept and types of therapeutic diets and diet management of Diabetes, Cardiovascular diseases, Anorexia nervosa, Bulimia nervosa and addictive behaviours, method of calorie calculation and to prepare meal menu for various categories	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1.	1.1 Sources and Functions of Macro nutrients and Micro nutrients, Antioxidants and Fiber 1.2 Balanced Diet-Food Groups and Food Guide - Nutrigenomics 1.3 Malnutrition: Protein Energy Malnutrition (PEM), Iodine Deficiency, Vitamin A Deficiency and Iron Deficiency - Eating disorders	K1- K3	10	1-3
2.	2.1 Diet Therapy: Purpose and Principles - Food Acceptance in Illness - Therapeutic Diets –Tube Feeding – Parenteral Feeding 2.2 Diet Management: Diabetes Mellitus, Cardiovascular Diseases, Anorexia nervosa and Bulimia nervosa 2.3 Diet Therapy for Addictive Behaviors: Alcoholism	K1- K3	9	1-3
3.	3.1 Meal Planning – Nutritious Food (Breakfast, Lunch and Dinner) – Calculation of Calories 3.2 Preparation of Low Cost Nutritious Food - Practicals 3.3 Nutritious Food for Anaemic Individuals, Adolescents, Pregnant Women and Elderly Persons	K1- K3	7	1-3

GENES, DISEASES AND SOCIETY

CODE:23ZL/GE/GD22

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

To enable students to

- understand the role of gametes in heredity, structure of DNA, Mendelian inheritance, pedigree analysis, lethal genes, multiple allelic and polygenic inheritance
- comprehend the different patterns of genetic inheritance, disorders with genetic predisposition, metabolic disorders, impact of consanguineous marriage and significance of genetic counselling
- acquire knowledge on the recent advances in the field of Genetics and their ethical and social implications

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
1	recall the role of gametes, structure of DNA, Mendelian inheritance, pedigree analysis, multiple allelic and polygenic inheritance, lethal genes, patterns of genetic inheritance, disorders with genetic predisposition, metabolic disorders, impact of consanguineous marriage, significance of genetic counselling, recent advances in the field of Genetics and their ethical and social implications	K1
2	explain the role of gametes, structure of DNA, Mendelian inheritance, multiple allelic and polygenic inheritance, types and significance of lethal genes, patterns of genetic inheritance, disorders with genetic predisposition, metabolic disorders, impact of consanguineous marriage, significance of genetic counselling, recent advances in the field of Genetics and their ethical and social implications	K2
3	apply the knowledge gained to discuss the role of gametes, structure of DNA, concepts of Mendelian genetics, multiple allelic and polygenic inheritance, types and significance of lethal genes, patterns of genetic inheritance, disorders with genetic predisposition, metabolic disorders, impact of consanguineous marriage, significance of genetic counselling, recent advances in the field of Genetics and their ethical and social implications	K3

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction - Human Gametes and their Role in Heredity – DNA the Genetic Material - Mendelian Inheritance: Monohybrid and Dihybrid Cross Experiments - Identification of Mendelian Traits in Humans - Pedigree Analysis and its Applications 1.2 Lethal Genes: Definition, Types and Inheritance 1.3 Multiple Allelic Inheritance: ABO and Rh Blood Types in Humans – ABO Blood Grouping and Rh Typing, Practical – Case Study/Problem Solving - Polygenic Inheritance (Skin Colour in Humans)	K1 -K3	9	1 - 3
2	2.1 Autosomal Recessive Inheritance (Albinism) - Autosomal Dominant Inheritance (Familial Hypercholesterolemia)- X-Linked Dominant Inheritance (Hypophosphatemia) – X-Linked Recessive Inheritance (Haemophilia) – Y- Linked Inheritance (Hypertrichosis) – Mitochondrial Inheritance (Kearns Sayre Syndrome) 2.2 Disorders with Genetic Predisposition: Diabetes, Breast Cancer, and Alzheimer’s Disease - Chromosomal Disorders: Down’s Syndrome, Turner’s Syndrome, Klinefelter’s Syndrome - Metabolic Disorders: Phenylketonuria, Huntington Disease and Lactose Intolerance 2.3 Consanguineous Marriage and its Impact in the Society- Genetic Counselling	K1 -K3	10	1 - 3
3	3.1 Applications of Genetic Engineering: Genetically Modified Organisms, Gene Therapy and Gene Cloning 3.2 Predictive Genetic Testing: DNA Fingerprinting (Case Study) 3.3 Ethical, Legal and Societal Issues (ELSI) related to techniques in Genetics	K1 -K3	7	1 - 3

BIOLOGY OF HUMAN REPRODUCTION

CODE:23ZL/GE/HR22

CREDITS :2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

To enable students to

- understand the anatomy and functioning of the human reproductive system, its hormonal control, and phases during reproductive life of human
- comprehend the biological aspects of sexuality, procreation, Fertilization, Implantation, Placentation, Pregnancy, Embryonic and Fetal Development, parturition and lactation, birth defects and fetal loss and the technology relating to prenatal diagnosis, and to understand the aspects relating to consanguinity
- comprehend the causes for male and female Infertility, Sexually Transmitted Diseases, methods for control of fertility and techniques for Assisted Reproductive Technology, Surrogacy and Adoption with associated ethical issues

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the structure and function of the human reproductive system, stages in reproductive life, hormonal control of reproduction, causes for male and female infertility, control of fertility, mechanism of sex determination, embryonic and fetal development, fetal death, parturition, lactation, birth defects, consanguinity, sexually transmitted diseases, Assisted Reproductive Technology, surrogacy and adoption and related ethical issues	K1
CO2	describe the structure and function of the human reproductive system, stages in reproductive life, hormonal control of reproduction, causes for male and female infertility, control of fertility, mechanism of sex determination, embryonic and fetal development, fetal death, parturition, lactation, birth defects, impact of consanguinity, Sexually Transmitted Diseases, methods in Assisted Reproductive Technology, Surrogacy, Adoption and related ethical issues	K2
CO3	apply the knowledge gained to differentiate the structure and functioning of male and female reproductive systems, stages in reproductive life, discuss the causes for male and female infertility and explain the mechanism of sex determination, role of hormones in reproduction, processes of embryonic and fetal development, parturition, lactation, birth defects, impacts of consanguinity, Sexually Transmitted Diseases, methods in Assisted Reproductive Technology, Surrogacy, Adoption and related ethical issues	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Reproductive System: Testis, Testicular Functions, Ovary – Uterine and Ovarian cycle 1.2 Hormonal Control of Reproduction: H-P-G Axis 1.3 Puberty - PMS - Menopause – Andropause 1.4 Male and Female Infertility: Physiological Causes – other causes: smoking, obesity, PCOS, stress, alcoholism, psychoactive drugs	K1-K3	8	1 - 3
	2.1 Procreation – Fertilization – Implantation – Placentation- Embryonic and Fetal Development- Sex Determination 2.2 Prenatal Diagnosis: Invasive and non-invasive methods 2.3 Pregnancy – Parturition - Lactation- Nutritional requirements during pregnancy 2.4 Consanguinity – Fetal Loss - Birth Defects	K1 - K3	9	3
3	3.1 Control of Fertility: Abstinence, Contraception - Medical Termination of Pregnancy 3.2 Sexually Transmitted Diseases: Gonorrhea, Syphilis, Genital Herpes 3.3 Assisted Reproductive Technology: Artificial Insemination, Induced Ovulation, IVF and ET, Cryopreservation, Stem Cell Banking - associated ethical issues 3.4 Surrogate Motherhood - Adoption, and related ethical issues	K1 - K3	9	1 - 3

THE FASCINATING WORLD OF INSECTS

CODE:23ZL/GE/FI22

CREDITS :2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

To enable students to

- understand the the scope of entomology and the taxonomic position, evolution, general structure, habits, habitats, morphology, feeding in insects and insects found in the Stella Maris College campus
- comprehend reproduction and development, adaptations and behaviour exhibited by insects in different habitats
- understand the life of social insects, importance of insects in health and disease, their impact and importance in agriculture and on the environment and in biomimicry

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the scope of entomology and the evolution, taxonomic position, habitats, morphology, physiology, behaviour, adaptations, social life and economic importance of insects, their importance in biomimicry and as indicator organisms	K1
CO2	discuss the scope of entomology and aspects of evolution, taxonomic position, habitats, morphology, behaviour, physiology, behaviour, adaptations, social life and economic importance of insects and their importance in biomimicry and as indicator organisms	K2
CO3	apply the knowledge gained to elaborate on the scope of entomology and explain aspects of evolution, taxonomic position, habitats, morphology, behaviour, physiology, behaviour, adaptations, social life, economic importance of insects and their importance in biomimicry and as indicator organisms and identify insects on the Stella Maris College campus	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction: Taxonomic position of insects in the animal world - Evolution of insects – Scope of Entomology 1.2 Diverse habitats and general structure of an insect - Winged and Wingless insects- Insects on the Stella Maris College Campus 1.3 Types of Feeding	K1 - K3	8	1 - 3
2	2.1 Reproduction and development in insects – Metamorphosis: complete and incomplete- Life cycle of butterfly and mosquito 2.2 Special adaptations in land-dwelling and aquatic insects – Nocturnal and Diurnal Insects – Defense Mechanisms: Camouflage, Mimicry, Toxin Production, Thanatosis – Bioluminescence 2.3 Insect Behaviours: Nest making, Courtship, mating - Intra- specific and inter-specific relationships - Other interesting behaviour: leaf mining, mud puddling, mushroom farming, dung rolling, processionary caterpillars, sound production, alarm signals, diapause, insect-plant interactions	K1 - K3	9	1 - 3
3	3.1 Social insects - Social life in honey bees and ants Useful insects: insect pollinators - insect products – Harmful insects: insect pests, insects as vectors of diseases and venomous insects 3.2 What we can learn from Insects: Biomimicry - Insects as indicator organisms, Insects in Literature	K1 - K3	9	1 - 3

SYLLABUS

(Effective from the academic year 2023 - 2024)

INTRODUCTION TO WILDLIFE BIOLOGY

CODE:23ZL/UI/WB23

CREDITS:3

OBJECTIVES OF THE COURSE

To enable students to

- understand concepts related to ecological habitats and niches, resource partitioning and natural resource management and ecology of landscapes, high altitude and wetland
- comprehend concepts in population dynamics and wildlife population estimation methods
- understand the importance and aspects of Biogeography, wildlife and wildlife Habitats, biodiversity hotspots in India, endemism, salient features of animal groups, man-wildlife interactions and ecological impacts and principles and human dimensions of wildlife management
- comprehend aspects of Wildlife Tourism, Wildlife Crimes and Forensics, Wildlife Trade and associated legislations, role of NGOs, institutions and organizations, planning and execution of field surveys, capture and handling of wild animals, principles of Wildlife Health and wildlife diseases
- understand the need and strategies of conservation, planning and implementing of conservation programmes and wildlife projects, conservation genetics and management, nutrition of captive and free ranging wild fauna, zoo designing and management and husbandry of zoo animals

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

- Identify factors affecting population dynamics, ecological niches and habitats
- Describe various population estimation methods
- Explain important biological characteristics of different faunal groups, proximate and ultimate threats to biodiversity, impact of man-wildlife interactions
- Discuss *in situ* and *ex situ* conservation strategies, pros and cons of wildlife tourism, wildlife trade, wildlife forensics and crime
- Evaluate the laws and regulations pertaining to protection of natural resources and their management and aspects of zoo designing and management

Unit 1

- 1.1 Introduction to Ecology - Habitats and Niches – Resource Partitioning
- 1.2 Landscape Ecology– High Altitude Ecology - Wetland Ecology
- 1.3 Natural Resource Management

Unit 2

- 2.1 Population Dynamics: Concepts, Animal Dispersion and Animal Populations
- 2.2 Population Growth and Its Regulation: Growth without Regulation, Regulation of Population Densities, Demographic Data and its importance
- 2.3 Factors Affecting Population Density: Determinate and Stochastic Factors: Space, Food and Water, Territories, Herbivores and Predators, Weather and Climate, Parasites and Diseases, Natural Disasters, Self -Regulation, Stress.
- 2.4 Wildlife Population Estimation Methods: Direct, Indirect – Making Observations – Field Notes and Photographic Records; Use of Field Equipment: Binoculars, Telescope, Camera, Tally Counter, GPS, Radio Telemetry, Drones

Unit 3

- 3.1 Biogeography and Wildlife Habitat: Species Distribution, Patterns, Continental Drift, Factors Affecting Animal Distribution, Biodiversity Hotspots in India - Endemism
- 3.2 Wildlife: Definition, Values - Biology of Indian Wildlife - Salient Features of Important Wild Animals: Insects and Other Arthropods, Fishes, Amphibians, Reptiles, Birds and Mammals
- 3.3 Man – Wildlife Interactions and Conflicts– Ecological Impacts – Concepts, Principles and Human Dimensions in Wildlife Management

Unit 4

- 4.1 Wildlife Tourism: Viewing Animals in the Wild–Wildlife Damage Management - Wildlife Crimes and Forensics
- 4.2 Wildlife Trade - Wildlife Protection -Legislations and Acts: Wildlife Protection Act (1972) and its Amendments, Biodiversity Act (2000) - Role of NGOs – Role of Institutions and Organizations
- 4.3 Planning and Execution of Field Surveys: Sampling Methods - Capture and Handling of Wild Animals
- 4.4 Principles of Wildlife Health – Wildlife Diseases: Anthrax, Rabies, Ringworm, Taeniasis

Unit 5

- 5.1 Need for Conservation – Strategies: *In Situ*, *Ex Situ*
- 5.2 Planning and implementing conservation programmes - wildlife projects - Conservation Genetics and Conservation Management — Nutrition of Captive and Free Ranging Wild Fauna
- 5.3 Zoo Designing - Management and Husbandry of Zoo Animals

PATTERN OF ASSESSMENT

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section A – 10 x 3 = 30 Marks (All questions to be answered)

Section B – 5 x 6 = 30 Marks (5 out of 7 to be answered)

Section C – 2 x 20 = 40 Marks (2 out of 4 to be answered)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH VI A - ADVANCED ZOOLOGY AND BIOTECHNOLOGY

SYLLABUS

(Effective from the academic year 2023 - 2024)

FUNDAMENTALS OF FOOD SCIENCE

CODE:23ZL/UI/FS23

CREDITS:3

OBJECTIVES OF THE COURSE

To enable the students to,

- comprehend the basic concepts of nutrition, right type of food choice, importance of malnutrition, fortification and diet therapy for diabetes mellitus and cardio – vascular diseases.
- Understand the significance of growth curve of bacteria, food contamination and spoilage of vegetables and fruits, fish and sea food and importance of personal hygiene of food handler and methods of sterilization.
- Comprehend the processes and techniques of post – harvest technology of oil seeds, fruits, vegetables, meat, fish and poultry, fermentation technology, fortification, packaging functions and types of packaging materials.
- Understand the detection tests involved in adulteration of food grains, dal, oil, spice, ghee and the significance of naturally occurring food toxicants, pesticides and food labelling.
- Comprehend the factors affecting food acceptance at sensory, psychological level, objective methods of sensory evaluation and importance of quality control and food laws.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Recognize the right type of food choice which will provide the right nutrition and adequate number of calories
- Relate the type of food spoilage and practice personal hygiene to avoid food borne diseases
- Discuss the varied types of food packaging materials and their barrier properties
- Differentiate common food adulterants
- Explain the importance of food laws

Unit 1

Food Chemistry and Nutrition

- 1.1 Introduction to Food Chemistry
- 1.2 Food Guide and Usage - Basic Five Food Groups - Malnutrition - Fortification
- 1.3 Diet Therapy: Purpose and Principles - Diet in Diabetes mellitus and Cardiovascular Diseases
- 1.4 Dietary Management

Unit 2

Food Microbiology and Sanitation and Hygiene

- 2.1 Microbial Growth-Growth Curve of Bacteria
- 2.2 Food Contamination and Spoilage –Vegetables and Fruits
- 2.3 Fish and Other Sea Food
- 2.4 Importance of Personal Hygiene of Food Handler - Safety in Food Storage - Handling and Preparation
- 2.5 Methods of Sterilization - Use of Detergents - Heat and Chemicals

Unit 3

Post Harvest Technology and Food packaging

- 3.1 Cereals and Legumes - Oil Seeds - Fruits and Vegetables - Meat Fish and Poultry
- 3.2 Fermentation Technology
- 3.3 Fortification Technology - High Protein Technology - Extruded Foods
- 3.4 Packaging Functions and Packaging Materials
- 3.5 Types of Packaging - Shrink-Strip – CFB – Glass – Tetrapak - Rigid Containers – Plastic- Shelf-Life- Plastic numbers-Bio PolymerQuality Testing of Packaging

Unit 4

Food Adulteration and Food Toxicology

- 4.1 Detection of Food Adulteration in Food Grains, Dhal, Oil, Spices and Ghee
- 4.2 Estimation of Benzoic Acid and BOAA Test
- 4.3 Food Toxicology - Naturally Occurring Food Toxicants
- 4.4 Hazards of Pesticides and Heavy Metals in Food
- 4.5 Food Labeling

Unit 5

Sensory Evaluation & Quality Control

- 5.1 Factors affecting Food Acceptance - Sensory, Psychological
- 5.2 Objective Methods of Sensory Evaluation
- 5.3 Quality Control and its Importance - Food Laws

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

FUNDAMENTALS OF CONSUMER BEHAVIOUR

CODE: 23PY/AC/FC35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE:

- To introduce the concepts and models associated with consumer behavior
- To interpret key psychological processes underlying consumer behavior
- To acquaint students with the implications of sociocultural contexts on consumer's behaviors
- To discuss the impact of media and reference groups on consumer psychology
- To explain the factors underlying the consumer decision making process

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	identify the internal and external influences that drive individuals to consumerism	K1
CO2	describe the models and theories associated with consumer psychology	K2
CO3	apply their knowledge of psychological processes in consumer behavior	K3
CO4	distinguish the motives behind diverse consumer behaviors based on the underlying factors	K4
CO5	evaluate the effectiveness of strategies used to influence consumer psychology	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Consumer Behaviour 1.1 Definition and meaning of Consumer Behaviour 1.2 Nature and Importance of Consumer Behaviour 1.3 Overview of Consumer Behaviour Models – psychological model, general model of consumer behaviour, economic model.	K1- K5	12	1-5
2	Consumer Motivation 2.1 Meaning of Motivation, Types of Motives, Dynamic Nature of Motives-Needs and Goals of Consumers Consumer Personality 2.2 Meaning of Personality, Facets of Personality, Personality Traits and Consumer Behaviour	K1- K5	15	1-5
3	Consumer in the Social and Cultural Settings 3.1 Family and Consumer Related Roles 3.2 Social Standing and Consumer Behaviour 3.3 Culture's Influence on Consumer Behaviour 3.4 Cross cultural consumer behaviour- global marketing opportunities	K1- K5	12	1-5

UNIT	CONTENT	CL	HRS	CO
4	Consumer Communication Process 4.1 Definition of Communication 4.2 Communication Process-Traditional Media and New Media 4.3 Opinion Leadership- Characteristics, measuring opinion leadership 4.4 Reference Groups	K1- K5	14	1-5
5	Consumer Decision-Making Process 5.1 Stages of Decision Making 5.2 Types of Decision Making 5.3 Consumer Decision Making Model- EKB Model 5.4 Consumer Insights	K1- K5	12	1-5

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600 086

FOUNDATION COURSE: ENGLISH

VISION OF THE DEPARTMENT

To encourage students to evolve into sensitive, independent individuals and agents of social change through the study of literatures from across different regions.

MISSION OF THE DEPARTMENT

- To impart language and communication skills through participatory learning in order to aid employability
- To encourage problem solving and critical thinking in students
- To explore newer areas of research across regions in English Studies
- To equip students with knowledge and critical thinking skills which will aid them in questioning dominant narratives in English Studies so that they become agents of social change and help
- To continually update our programme to be contemporaneous and inclusive
- To respond sensitively to marginalised discourses in literature and culture

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the Foundation Course in English, students will be able to

PSO1	employ their skills in listening, speaking, reading, writing and knowledge of English grammar for effective communication.
PSO 2	utilise their skills of the English language for employability/entrepreneurship.
PSO 3	use the knowledge and skills of the English language for excellence in their chosen domain of study/employment.
PSO 4	respond sensitively and empathetically to plurality and diversity using their knowledge and skills in the English language.
PSO 5	fulfil their social and civic responsibilities using the listening, speaking, reading and writing skills acquired.

ENGLISH FOR COMMUNICATION – II

CODE: 23EL/FC/EC23

CREDITS: 3

LTP: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To enable students to communicate ideas/opinions effectively and produce appropriate responses
- To train students to listen to announcements and infer meaning
- To help students use the simple and continuous forms of the past tense, future tenses and identify and use zero and first conditionals
- To train students to identify relevant information to make notes and use them to summarise a passage
- To help students identify relevant information, understand ideas/opinions/attitudes from newspapers, magazine features and to train them to read and interpret visual texts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall appropriate grammatical structures while inviting and responding to invitations, giving directions, and requesting, offering or declining help; demonstrate the ability to listen to announcements for specific information; recall and use zero and first conditionals, simple past, past continuous and future tenses	K1
CO2	extend language elements to perform specific speaking functions; interpret aural inputs in announcements; demonstrate note making skills	K2
CO3	apply appropriate language elements while inviting and responding to invitations, giving directions, and requesting, offering or declining help; identify and employ syntactic structures and sequence ideas to construct a summary	K3
CO4	correlate appropriate language elements to inviting and responding to invitations, giving directions, and requesting, offering or declining help; infer meaning from newspapers, magazine features	K4
CO5	choose appropriate language elements while inviting and responding to invitations, giving directions, and requesting, offering or declining help; evaluate information and determine meaning in visual texts	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Speaking</u> 1.1 Inviting, accepting and declining invitations 1.2 Asking for and giving directions 1.3 Asking for, offering and accepting/rejecting help	K1-K5	10	1-5
2	<u>Listening</u> 2.1 Announcements	K1, K2	7	1, 2
3	<u>Grammar</u> 3.1 Past simple and continuous, future tense 3.2 Zero and first conditionals	K1	15	1
4	<u>Writing</u> 4.1 Note making 4.2 Summarising	K2, K3	10	2, 3
5	<u>Reading</u> 5.1 Newspaper/magazine features 5.2 Charts, maps, graphs 5.3 Comic strips	K4, K5	10	4, 5

PATTERN OF ASSESSMENT

Unit 1 and 2 not to be tested.

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	10	10x1=10 marks (Grammar)
B	K2	10	1x10 =10 marks (Note making)

LANGUAGE THROUGH LITERATURE – II

CODE: 23EL/FC/LL23

CREDITS: 3

LTP: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To recollect the rules of subject-verb agreement and demonstrate an understanding in reporting spoken information
- To interpret information by listening to news articles and announcements
- To select and use appropriate structures and ideas for note making and summary writing
- To infer meaning from short stories, speeches and poems and exhibit an understanding of them
- To determine appropriate language elements for role play

COURSE LEARNING OUTCOMES

On the successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	choose appropriate language for role play; identify specific information listening to news/announcements; recall the rules of subject-verb agreement, understand and report spoken information appropriately.	K1
CO2	extend language elements for role play; interpret aural inputs in news articles and announcements; demonstrate effective note making skills.	K2
CO3	apply appropriate language elements for role play; identify and employ syntactic structures and sequence ideas for summary writing.	K3
CO4	correlate appropriate language elements for role play; infer meaning from literary texts.	K4
CO5	choose appropriate language elements for role play; evaluate and appraise literary texts.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

ENGLISH FOR COMMUNICATION – III

CODE: 23EL/FC/EC33

CREDITS: 3

LTP: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To enable students to use appropriate modals to express preferences, give instructions and make and respond to complaints
- To train students to listen to and comprehend short narratives and news reports
- To facilitate the use of second conditionals and help students use perfect and perfect continuous forms of the present and past tenses
- To impart the skills required to compose coherent narrative essays and letters of permission and application
- To train students to identify, comprehend and interpret facts, ideas, opinions and attitudes while reading an opinion piece/advertisement

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall appropriate language elements while expressing preferences, giving instructions and making and responding to complaints; demonstrate the ability to listen for specific information in short narratives and news reports; and recall and use second conditionals, perfect tenses (past, present, future) and perfect continuous tenses (present and past) appropriately.	K1
CO2	extend language elements to perform specific speaking functions; interpret aural inputs in short narratives and news reports and demonstrate letter writing skills.	K2
CO3	apply appropriate language elements while expressing preferences, giving instructions and making and responding to complaints; identify and employ syntactic structures and sequence ideas to construct short narratives.	K3
CO4	correlate appropriate language elements to express preferences, give instructions and make and respond to complaints; and infer meaning from advertisements and opinion pieces.	K4
CO5	choose appropriate language elements while expressing preferences, giving instructions and making and responding to complaints; and evaluate information and determine meaning in advertisements and opinion pieces.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Speaking</u> 1.1 Expressing preferences 1.2 Giving instructions 1.3 Making and responding to complaints	K1-K5	16	1-5
2	<u>Listening</u> 2.1 Short narratives 2.2 News reports	K1, K2	5	1, 2
3	<u>Grammar</u> 3.1 Perfect tenses (past, present, future) 3.2 Perfect continuous tenses (present and past) 3.3 Second conditional	K1	11	1

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To train students in skills related to interviews
- To equip students to understand and infer meaning poems, plays and prose pieces
- To train students to use conditional clauses accurately
- To help students acquire effective communication skills with appropriate use of idioms
- To train students to identify and make use of the mechanics of narrative writing and drafting emails

COURSE LEARNING OUTCOMES

On the successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall appropriate language for job interviews; identify specific information from listening to interviews; recognise conditional clauses and idioms for appropriate usage	K1
CO2	identify appropriate language and its different structures for job interviews; comprehend information from listening to interviews; demonstrate effective email writing skills	K2
CO3	apply appropriate language and its different structures to face job interviews; construct a well-organised and coherent narrative essay	K3
CO4	organise appropriate language elements to effectively face job interviews; infer meaning from literary texts	K4
CO5	assess appropriate language elements to face job interviews with confidence and professionalism; evaluate and appreciate literary texts	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600 086

FOUNDATION COURSE: ENGLISH

VISION OF THE DEPARTMENT

To encourage students to evolve into sensitive, independent individuals and agents of social change through the study of literatures from across different regions.

MISSION OF THE DEPARTMENT

- To impart language and communication skills through participatory learning in order to aid employability
- To encourage problem solving and critical thinking in students
- To explore newer areas of research across regions in English Studies
- To equip students with knowledge and critical thinking skills which will aid them in questioning dominant narratives in English Studies so that they become agents of social change and help
- To continually update our programme to be contemporaneous and inclusive
- To respond sensitively to marginalised discourses in literature and culture

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the Foundation Course in English, students will be able to

PSO1	employ their skills in listening, speaking, reading, writing and knowledge of English grammar for effective communication.
PSO 2	utilise their skills of the English language for employability/entrepreneurship.
PSO 3	use the knowledge and skills of the English language for excellence in their chosen domain of study/employment.
PSO 4	respond sensitively and empathetically to plurality and diversity using their knowledge and skills in the English language.
PSO 5	fulfil their social and civic responsibilities using the listening, speaking, reading and writing skills acquired.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600 086

DEPARTMENT OF FRENCH

PROGRAMME DESCRIPTION

The Department of French was started in 1947 in order to give students the opportunity to learn a foreign language. The focus of the department is on the development of the basic language skills such as oral and written comprehension and communication. Emphasis is laid on spoken French through the study of the French language and civilisation, and the assessment of spoken French is an essential component of the testing pattern.

Authentic documents used for study help students to improve their knowledge of contemporary French civilisation and culture. Students are also exposed to French literature through the study of simple literary texts.

The French culture and civilisation give an insight of the status of European women. This enables the students to broaden their perspective of the role of women in a society. The emphasis of procuring a green environment is dealt with in the syllabus designed. The questions included in the exercises induce the students to become environment friendly in future.

French films are used to assess the ability of the students to understand the native speakers. These French films are considered as one of the other component evaluation methods. Learning is also enabled through short French dialogue videos, French songs and podcasts.

Stella Maris College's association with the French language dates back to the inception of the institution. The arrival of the Franciscan Sisters in India not only heralded a new era in women's education but also pioneered the study of French as a foreign language. Among the pioneers of the Department of French, Mother M. Chapdalene (Moissonier), fmm, a French national, is remembered with gratitude by her students of the fifties and sixties for her commitment and dedication to the teaching of French.

The birth of the French Club, "Cercle des Francophiles" in 2003 provided a platform for the students to display their talents. The cultural activities served to sustain the interest of the students in the language.

When the College became autonomous in 1987, French was introduced as a Foundation Course. The focus of study which, until then, was grammar and literature, shifted to the French language, culture and civilisation. Since the late nineties, in addition to the regular courses, the department offered Business French and Commercial Correspondence to students of Commerce to help them meet the requirements of the job market.

In 2011, French for Beginners was introduced as a 4-credit General Elective course for undergraduates and postgraduates with no prior knowledge of French. In 2015, along with the other General Elective Courses, the department offered Spoken French for the beginners. In 2019, French for Tourism was added into the syllabus.

VISION AND MISSION OF THE DEPARTMENT

DEPARTMENT OF LANGUAGES

VISION

Expansion of the department to include inter-disciplinary and research programmes thereby honing leadership, organisational skills of students which eventually enhance their employability.

MISSION

To impart language proficiency and to facilitate the students of diverse socio, economic and cultural background to acquire linguistic and communicative skills.

To kindle participatory learning methods through student-centered activities.

To serve the student community with integrity and commitment through innovative and quality teaching.

PROGRAMME SPECIFIC OUTCOMES (PSO)

PSO1	To develop the knowledge of grammatical system of French language.
PSO2	To apply the knowledge of grammar in the writing.
PSO3	To identify French and Francophone writers of various origins and classify French and Francophone writings of several themes.
PSO4	To acquire the modalities of the language like listening, reading and writing.
PSO5	To use their proficiency in the French language and its culture to make pertinent comparisons with their own language and culture and thus demonstrate a critical understanding of the nature and function of both.

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600 086

DEPARTMENT OF FRENCH

PROGRAMME DESCRIPTION

The Department of French was started in 1947 in order to give students the opportunity to learn a foreign language. The focus of the department is on the development of the basic language skills such as oral and written comprehension and communication. Emphasis is laid on spoken French through the study of the French language and civilisation, and the assessment of spoken French is an essential component of the testing pattern.

Authentic documents used for study help students to improve their knowledge of contemporary French civilisation and culture. Students are also exposed to French literature through the study of simple literary texts.

The French culture and civilisation give an insight of the status of European women. This enables the students to broaden their perspective of the role of women in a society. The emphasis of procuring a green environment is dealt with in the syllabus designed. The questions included in the exercises induce the students to become environment friendly in future.

French films are used to assess the ability of the students to understand the native speakers. These French films are considered as one of the other component evaluation methods. Learning is also enabled through short French dialogue videos, French songs and podcasts.

Stella Maris College's association with the French language dates back to the inception of the institution. The arrival of the Franciscan Sisters in India not only heralded a new era in women's education but also pioneered the study of French as a foreign language. Among the pioneers of the Department of French, Mother M. Chapdalene (Moissonier), fmm, a French national, is remembered with gratitude by her students of the fifties and sixties for her commitment and dedication to the teaching of French.

The birth of the French Club, "Cercle des Francophiles" in 2003 provided a platform for the students to display their talents. The cultural activities served to sustain the interest of the students in the language.

When the College became autonomous in 1987, French was introduced as a Foundation Course. The focus of study which, until then, was grammar and literature, shifted to the French language, culture and civilisation. Since the late nineties, in addition to the regular courses, the department offered Business French and Commercial Correspondence to students of Commerce to help them meet the requirements of the job market.

In 2011, French for Beginners was introduced as a 4-credit General Elective course for undergraduates and postgraduates with no prior knowledge of French. In 2015, along with the other General Elective Courses, the department offered Spoken French for the beginners. In 2019, French for Tourism was added into the syllabus.

VISION AND MISSION OF THE DEPARTMENT

DEPARTMENT OF LANGUAGES

VISION

Expansion of the department to include inter-disciplinary and research programmes thereby honing leadership, organisational skills of students which eventually enhance their employability.

MISSION

To impart language proficiency and to facilitate the students of diverse socio, economic and cultural background to acquire linguistic and communicative skills.

To kindle participatory learning methods through student-centered activities.

To serve the student community with integrity and commitment through innovative and quality teaching.

PROGRAMME SPECIFIC OUTCOMES (PSO)

PSO1	To develop the knowledge of grammatical system of French language.
PSO2	To apply the knowledge of grammar in the writing.
PSO3	To identify French and Francophone writers of various origins and classify French and Francophone writings of several themes.
PSO4	To acquire the modalities of the language like listening, reading and writing.
PSO5	To use their proficiency in the French language and its culture to make pertinent comparisons with their own language and culture and thus demonstrate a critical understanding of the nature and function of both.

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF HINDI

PROGRAMME DESCRIPTION

The Department of Hindi encourages critical thinking and creative writing talent amongst students and hence brings out its annual departmental magazine Khilti Kaliyan. The Department caters not only to the foundation course Hindi students but also to the non-Hindi speaking students of other languages. Hence provides two general elective courses -Spoken Hindi and Hindi for Beginners. The department encourages creative latent talent amongst students in the form of III component presentations. Street plays, on stage poetry presentations, short one act plays are included in their third component.

The Department offers job oriented courses in the form of journalism, translation and functional Hindi. The Department along with the students has till date conducted ten National and four international conferences. With LOCF in place, we hope to further enhance the teaching learning process in languages in our institution.

VISION OF THE DEPARTMENT

Expansion of the department to include inter-disciplinary and research programmes thereby honing leadership, organisational skills of students which eventually enhance their employability.

MISSION OF THE DEPARTMENT

- To impart language proficiency and to facilitate the students of diverse socio, economic and cultural background to acquire linguistic and communicative skills.
- To kindle participatory learning methods through student-centred activities.
- To serve the student community with integrity and commitment through innovative and quality teaching.

PROGRAMME SPECIFIC OUTCOMES (PSO)

PSO1	To develop the basic skills of reading, writing and analysing in Hindi.
PSO2	To introduce prose, Poetry and one act plays, essays so as to emphasize the importance of values in life and also to sensitize them about important social issues.
PSO3	To introduce print and electronic media journalism to the students
PSO4	To introduce the basic principles of translation to the students with an eye on job opportunities in the translation cells of Government of India.
PSO5	To introduce students to technical terminologies used in functional Hindi

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

PREFACE

For centuries, Sanskrit has been the repository of Indian wisdom. In the ancient period of her history itself, India had made significant strides in several areas of knowledge production. India has a rich tradition of philosophy and religion along with major achievements in logic, mathematics, law, medicine, literature, dramatics, agricultural sciences, marine technology and many crafts and trades.

In the twenty first century, the Euro –centric approach is being challenged and it is being increasingly recognized that Asian and especially Indian knowledge systems need to be revived and used for the betterment of humankind. As the principal medium of all intellectual advancements in India, Sanskrit needs to be given a pride of place in the scheme of studies

The Department of Sanskrit started in the year 1950 to encourage students to learn and appreciate Sanskrit the Indian classical language. The Department offers 12 credit foundation courses for first and second year UG students under Part I Language program. The program caters to the students of heterogeneous group. The syllabus for each semester is designed with selections from Sanskrit Language & Literature, which are approved by subject experts. The syllabus includes induction program for first time learners of this classical language.

The course provides students a wide exposure to various genres of Sanskrit literature such as Poetry, Prose, Drama, Didactic, Minor & Major Epic Poetry etc. which have inspired and continue to inspire great literary works in almost all Indian languages. Sanskrit department also offers periodic guest lectures inviting subject experts to delve deep into various topics of Sanskrit Language and literature and its relevance to modern day. Sanskrit theatre groups are invited to interact and share their experiences with students.

The Sanskrit syllabus has a two-pronged objective – to introduce students to a variety of traditional disciplines in Sanskrit studies and to strengthen their knowledge of the language.

The four-semester foundation course in Sanskrit will thus make students better equipped to pursue their postgraduate studies and undertake further research in Sanskrit language.

DEPARTMENT OF SANSKRIT

The Vision and Mission of the Department

Vision:

The Department helps students to have an understanding of their self while learning the ethical and moral values culled out from Sanskrit literature. The importance of being humane and adhering to values in life is instilled in this learning exercise thereby the student community will emerge as responsible citizens shaping the future of the nation.

Mission:

To motivate students to learn the classical language Sanskrit and to know various knowledge systems of our country that are available in Sanskrit Language and Literature and inculcate a desire for lifelong learning.

PROGRAMME EDUCATIONAL OBJECTIVES – FOUNDATION COURSES

S.NO	Institutional objectives	PEOs The Foundation Courses in English and the languages aim to
1	To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation.	train students in effective communication and skills in the respective languages
2	To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities.	equip students with skills in language and/or literatures for employability and/or entrepreneurship

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

DEPARTMENT OF TAMIL

VISION AND MISSION

Nehf;F - VISION

Expansion of the department to include inter-disciplinary and research programmes thereby honing leadership, organisational skills of students which eventually enhance their employability.

Nghf;F - MISSION

- To impart language proficiency and to facilitate the students of diverse socio, economic and cultural background to acquire linguistic and communicative skills.
- To kindle participatory learning methods through student-centred activities.
- To serve the student community with integrity and commitment through innovative and quality teaching.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO 1	Introduce the history of Tamil literature and Tamil literary forms.
PSO 2	Demonstrate the culture and tradition of Tamil society through Tamil literature.
PSO 3	Acquire knowledge pertaining to Tamil literary tradition and inculcate the values.
PSO 4	Develop the methods of communication, to improve their LSRW skills, to enable them to practice these skills in their daily life by identifying instances of communication in the circumstances of their own.
PSO 5	Exploring, analysing and enriching self-knowledge to nurture analytical qualities or skills, thinking power, creativity through assignments and project works.

**OUTCOME BASED EDUCATION (OBE)
LEARNING OUTCOME BASED
CURRICULUM FRAMEWORK (LOCF)**

SYLLABUS
(Effective from the academic year 2023 - 2024)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

DEPARTMENT OF TAMIL

VISION AND MISSION

Nehf;F - VISION

Expansion of the department to include inter-disciplinary and research programmes thereby honing leadership, organisational skills of students which eventually enhance their employability.

Nghf;F - MISSION

- To impart language proficiency and to facilitate the students of diverse socio, economic and cultural background to acquire linguistic and communicative skills.
- To kindle participatory learning methods through student-centred activities.
- To serve the student community with integrity and commitment through innovative and quality teaching.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO 1	Introduce the history of Tamil literature and Tamil literary forms.
PSO 2	Demonstrate the culture and tradition of Tamil society through Tamil literature.
PSO 3	Acquire knowledge pertaining to Tamil literary tradition and inculcate the values.
PSO 4	Develop the methods of communication, to improve their LSRW skills, to enable them to practice these skills in their daily life by identifying instances of communication in the circumstances of their own.
PSO 5	Exploring, analysing and enriching self-knowledge to nurture analytical qualities or skills, thinking power, creativity through assignments and project works.

Undergraduate Programmes

SOCIAL AWARENESS

(Effective from the academic year 2023 – 2024)

Guidelines for the conduct of the course

COURSE DESCRIPTION

The Social Awareness course (SA) of the College enables students to understand and react appropriately to both the problems and needs of society and the interpersonal struggles of the members of the communities around them. It trains and sensitises them to become aware of their environment, the different social contexts in which they interact, as well as interpret the emotions of people with whom they communicate. Students will improve their skills in connecting with others verbally and non-verbally, acquire higher levels of emotional intelligence, the ability to empathise with others and understand the roles they play in society.

OBJECTIVES OF THE COURSE

- To enable students to respect and appreciate cultural diversity
- To foster and nurture the ability to empathise with others and individual selves
- To facilitate the acquisition of the attitudes, skills, and knowledge to function in different environments and among different communities
- To enable them to communicate effectively and appropriately in different social contexts

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Understand diverse culture and social norms
- Respond in appropriate ways to the problems and interpersonal struggles of members of different communities
- Empathise with issues and problems faced by people and groups from diverse backgrounds and cultures
- Identify resources to meet with the challenges of diversity and difference
- Understand social justice issues
- Evaluate impact of their interactions and work with communities

Service orientation Guidelines:

- Students are expected to earn 2 credits for SAP
- Departments may choose any one of the given course topics
- Classroom sessions to be activity-based wherever possible
- Visits to communities is a course requirement
- Students are expected to engage and interact with the community, reflect on their experiences and make notes in their journals
- Class room sessions and Field Visits to relevant communities form the major components of the course. The faculty facilitator is expected to arrange for the visits to the community with the help of the SAP Coordinator. They may choose to go either in the morning or afternoon. If in the morning (Aided Sections) they may choose a day on which there are no common class hours (Language, English, GE) and exchange hours with the major subjects teachers. The same protocol holds for Shift II. They may choose a day on which there are no common class hours in the afternoon (Language, English, GE) and exchange hours from the major subject teachers.
- Faculty facilitators are expected to prepare the students for field visit to the community with specific background information.
- Activities to be completed three weeks before the end of the semester.
- Faculty to submit a report on the entire programme to the SAP coordinator and a copy to be retained with the department. (Please include photographs (geotagged), letters, videos, the impact assessment report {community and student} self –reflection journals (two/three samples) and any other additional material that would support the report)

They may request the SA Coordinator for resource persons for inputs on specific areas.

CARE OF SENIOR CITIZENS

CODE: 23__ /SA/SZ52

CREDITS: 2

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To understand who caregivers are and the role they play in caring for the Senior Citizens
- To understand the process of ageing and its associated problems
- To understand the social and emotional problems of the Senior Citizens

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Understand the role of caregivers
- Understand the various problems of Senior Citizens
- Identify the needs of the Senior Citizens
- Demonstrate an understanding of various rehabilitation measures for Senior Citizens
- Describe the policies and legal provisions for Senior Citizens

Unit 1 Introduction (10 hours)

- 1.1 Definition, meaning and role of care-givers
- 1.2 Characteristics of old age
- 1.3 Process of ageing: Cognitive, physical, psychological and social
- 1.4 Needs during old age- physical needs, healthcare needs, and psychological, social and economic needs
- 1.5 Problems of the aged- violence, neglect, abuse, crimes, empty nest syndrome, physiological and psychological problems of Senior Citizens

Unit 2 Policies and Legal Provisions for the Senior Citizens (4 hours)

- 2.1 National policies and programmes for Senior Citizen
- 2.2 Constitutional and legal provisions for the Senior Citizens

Unit 3 Field Work (12 hours)

Field Visit to Government and Non-Government Institutions for Senior Citizens

Undergraduate Programmes

SERVICE LEARNING

(Effective from the academic year 2023 – 2024)

Guidelines for the Conduct of the Course

COURSE DESCRIPTION

Service Learning (SL) is a course-based experiential learning that engages students in service to the community as an integrated aspect of a course. Students participate in an organised service activity that meets identified community needs and integrates the service activity to gain further understanding of course content, a broader appreciation of the discipline and an enhanced sense of personal values and civic responsibility. This method is seen as an effective way to enable students to achieve required learning outcomes through service to the community. Service Learning seeks to advance the goals of the curriculum.

The course promotes mutual learning experiences for both students and members of the community. The focus is on students reflecting on their experience of doing and learning i.e. active learning.

OBJECTIVES OF THE COURSE

- To enhance academic learning by challenging students to apply their subject knowledge and critical thinking to real-world situations
- To increase understanding of theoretical issues being addressed in the classroom
- To direct the students into practical settings where the objective is to serve the community
- To encourage reflection as a self-guided method for change and learning
- To develop skills necessary to establish and maintain relationship with communities
- To enable students to help communities learn and benefit through their active service inputs and facilitation

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Make strong connections between curricular and experiential learning
- Reflect on how thoughts and actions impact the development of supportive and inclusive communities
- Reflect and document connections between knowledge and skills resulting from classroom learning and service-learning experiences
- Demonstrate skills in establishing and maintaining relationships with communities
- Evaluate impact/benefit of SL activities and interactions in communities

Stages for Service Component

- Preparation for meeting community needs with the curriculum of selected course for the SL pedagogy
- Community interaction
- Reflection and learning on the service component

Students will get two credits on completion.

Guidelines for conduct of course

SL should be utilised as pedagogy, not just a learning tool. It should be integrated into the course/module content and the class activities, with clearly identified learning outcomes and assessment methods.

A community partner/s should be identified, their needs assessed, and the appropriate partner selected. Faculty members should attend Partnership Events hosted by the SL Coordinator in order to cultivate and reinforce community partnerships.

Learning should include preparing the students to network, establish contact and interact with partner communities through service activities.

Faculty should prepare students for active engagement in the community and encourage them to **reflect critically** on their experience. Faculty should use rubrics to evaluate students' progress before, during and after the service learning programme.

Students should leave the service learning experience with a deeper and even changed understanding of themselves, the communities they work with, and their potential to participate in the civic life of communities, country, and world.

Service Learning as pedagogy creates the opportunity for students to try and live out the core principles and values of the institution.

HERITAGE AWARENESS

Awareness of Chennai's architectural heritage

CODE:23HS/SL/HA52

CREDITS: 2
TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable students gain knowledge about the architectural heritage of Chennai and ways of preserving it.
- To provide them with practical experience of heritage conservation campaigns
- To help them acquire knowledge about institutions and organizations involved in the conservation of Chennai's architectural heritage.
- To create awareness of this heritage among the school students of Chennai through interaction with selected schools
- To develop teamwork, organisation, and communication skills necessary to work with communities and implement conservation strategies.
- To equip students with skills to envisage, plan and work out sustainable strategies for heritage conservation

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Understand the value of heritage and the challenges involved in practical conservation
- Make strong connections between the architectural heritage students study about as part of their curriculum and their experiences.
- Explain ideas and concepts to school children to introduce them to Chennai's architectural heritage and what is needed for its conservation
- Adapt classroom learning to create a community-based programme of awareness and conservation of architectural heritage.
- Collaborate with and support organisations/institutions operating in the field of heritage conservation.

Unit 1

Introduction to Service Learning (2hours)

- 1.1 Service Learning Principles- engagement, reflection, reciprocity, public dissemination
- 1.2 Meaning of community and understanding of community dynamics
- 1.3 Project planning stages and ethical concerns

Unit 2

Activity-based preparation

(6 hours)

2.1 Importance of Heritage and Conservation

2.2 Heritage of Chennai City

2.3 Heritage Conservation Organisations in Chennai (INTACH, Madras Inherited, Archaeological Survey of India etc.)

Unit 3

Field Work

Heritage Conservation activities (schools, communities, heritage sites, etc.) **(13 hours)**

Impact analysis; Documentation; Reflection, Recommendation and Follow-up **(5 hours)**

POLLUTANTS AND ADULTERANTS

CODE: 23CH/SL/PA52

**CREDITS: 2
TOTAL HOURS: 26**

OBJECTIVES OF THE COURSE

- To enable students to acquire knowledge about adulterants and spread the awareness to communities
- To help them, develop skills and present basic inputs on pollutants and their harmful effects
- To enable them envisage, plan and work out strategies in functioning with communities sustainably.

COURSE LEARNING OUTCOMES

On successful completion of this course, the students will be able to

- Enhance their classroom learning in the subject
- Employ critical thinking skills on importance of air, soil and water quality and management
- Understand the common adulterants and pollutants and apply this knowledge in daily life
- Apply their learning in real life situations and help communities learn
- Demonstrate skills in establishing and maintaining relationship with communities
- Apply the knowledge acquired about the services available for the communities they work with

Unit 1

Introduction to Service Learning (2 hours)

- 1.1 Service Learning Principles - engagement, reflection, reciprocity, public dissemination
- 1.2 Meaning of community and understanding of community dynamics.
- 1.3 Project planning stages and ethical concerns

Unit 2

Activity-based preparation

(6 hours)

- 2.1 Salient features of PFA Act, Common adulterants in ghee, turmeric powder, chilli powder, sugar, pepper, tea and coffee powder, flour; tests to detect adulteration (Basic principles)
- 2.2 Types of Food contaminants (Pesticide residues, bacterial toxins mycotoxins, seafood toxins, metallic contaminants, residues from packaging material)
- 2.3 Types of pollution – water, air and soil; types of pollutants-sources and their effects
Gaseous pollutants - Oxides of carbon, sulphur, nitrogen, particulate matter
Water pollutants-Biological agents, physical agents and chemical agent
Eutrophication - biomagnification and bioaccumulation
Soil Pollutants- Pesticides, biomedical waste and e-waste

Unit 3

Field Work

(13 hours)

Includes visits to the field/community

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI – 600 086

DEPARTMENT OF COMMERCE – SHIFT II

BACHELOR OF COMMERCE (ACCOUNTING & FINANCE)

PROGRAMME DESCRIPTION

B.Com. Accounting & Finance is a three-year degree programme designed to develop skills and competencies of the students in the field of Accountancy and Finance. This programme provides in-house training in Financial Analytics which will enable the students to pursue different career paths. The curriculum is rigorous and progressive and prepares its graduates for professional roles in the areas of finance and accounting. The programme enhances practical knowledge and employability through real-time simulation-based projects and internships. It focuses on building competencies in accounting and finance and provides the students with a wide range of managerial skills.

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of ‘Truth and Charity’ thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately moulding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Com. in Accounting and Finance Programme, graduates will be able to

PSO 1	exhibit critical thinking, analytical reasoning and problem solving skills
PSO 2	identify basic ethical issues relating to various aspects of business
PSO 3	apply appropriate analytical methods to find solutions to business problems
PSO 4	show responsibility and understanding of local and global financial issues
PSO 5	apply appropriate accounting and management techniques in evaluating and improving sustainability in business environment

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Com. DEGREE: ACCOUNTING AND FINANCE

SYLLABUS

(Effective from the academic year 2023-2024)

FINANCIAL REPORTING AND ANALYSIS

CODE: 23AF/MC/FR14

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To provide a basic understanding of various accounting standards
- To familiarise students with the disclosure of information in financial statements
- To educate on the need for financial analysis and interpretation
- To enable students to appreciate the significance of cash and funds flow statements
- To facilitate understanding of the choices made by enterprises in reporting the results of business activities

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define the concepts relating to financial reporting and analysis	K1
CO2	compare the income and financial position of different organisations	K2
CO3	compile the financial information for financial reporting	K3
CO4	analyse the financial performance of a business concern	K4
CO5	evaluate the relevance of inter and intrafirm comparison	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Framework for Preparation and Presentation of Financial Statement 1.1 Conceptual Framework of Accounting - Accounting as an Information System, Users and their Information Needs, Advantages of Computerized Accounting, and Information System (AIS)	K1-K2	2	1-2

UNIT	CONTENT	CL	HRS	CO
	1.2 Introduction to IFRS and Ind-AS 1.2.1 IFRS – An overview. 1.2.2 Ind-AS – Objectives, Process, Accounting Standards Board, Application in the preparation of financial statements – 1,2,3,4,5,9,10,26 and 29	K1-K2	3	1-2
2	Preparation of Financial Statements of Sole Proprietor 2.1 Preparation of Final Accounts of Sole Proprietor and Manufacturing concern	K1-K5	7	1-5
	2.2 Closing Entries and Adjustment Entries – Loss of Stock by Accident or Fire, Manager's Commission on Net Profit Before and After Commission, Works Manager and General Manager Commission, Writing off of Deferred Revenue Expenditure, Goods sent on Sale or Return Basis, Asset Disposal and Exchange, Distribution of Samples, Advance Income Tax	K1-K5	8	1-5
3	Final Accounts of a Company 3.1 Final Accounts of a Company- Preparation of Final Accounts- Forms and Contents as per Schedule- VI of Companies Act 2013	K1-K5	8	1-5
	3.2 Managerial Remuneration	K3-K5	7	3-5
4	Cash Flow and Fund Flow Analysis 4.1 Meaning and Importance of Cash Flow and Fund Flow	K1-K2	1	1-2
	4.2 Significance and Limitations of Cash Flow and Fund Flow Statement	K1-K2	1	1-2
	4.3 Preparation of Cash Flow and Fund Flow Statement as per AS 3	K1-K5	13	1-5
5	Financial Statement Analysis 5.1 Meaning of Financial Statements, Functions, Objectives and Process of Financial Statement Analysis and Interpretation	K1-K2	3	1-2
	5.2 Ratio Analysis - Significance and Limitations of Ratio Analysis, Computation and Interpretation of Ratios - Liquidity, Profitability Solvency and Leverage Ratios – Intra-firm and Inter-firm	K1-K5	12	1-5

MANAGEMENT PRINCIPLES AND APPLICATIONS

CODE: 23AF/MC/MP13

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To provide an understanding of the principles of Management
- To familiarize students with the schools of Management thought
- To acquaint students with the need for planning to aid in proper decision making
- To provide an understanding of the various functions of Management
- To expose students to the recent trends in Management

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	explain the fundamental concepts in Management	K1, K2
CO2	relate the functions of management with different types of organisations	K3
CO3	examine the skills required for effective management	K4
CO4	evaluate the organograms of business entities	K5
CO5	formulate solutions to overcome challenges by adopting suitable techniques	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Overview of Management			
	1.1. Meaning — Science or Art. Process, Managerial Functions and Roles	K1-K2	3	1
	1.2. Approaches to Management — Classical. Quantitative, Behavioral, Contemporary	K1-K2	2	1
	1.3. Management Thought — FW Taylor, Henry Fayol. Elton Mayo, Peter Drucker, Michael Porter, CK Prahalad	K1-K5	5	1-4
	1.4. Trends and Challenges of Management in Global Scenario	K1-K6	2	1-5

UNIT	CONTENT	CL	HRS	CO
2	Planning 2.1. Planning — Meaning Types and Process	K1-K6	2	1-5
	2.2. Business Environment Analysis - Meaning. Types; Techniques (SWOT, PESTLE, BCG Matrix)	K1-K6	4	1-5
	2.3. Decision Making — Meaning, Types and Techniques - Quantitative and Qualitative	K1-K6	4	1-5
3	Organising 3.1. Meaning and Types of Organisation	K1-K2	2	1
	3.2. Process of Organising	K1-K5	3	1-4
	3.3. Organisation Structure and Chart	K1-K5	2	1-4
	3.4. Span of Control, Departmentation, Delegation and Decentralization	K1-K5	3	1-4
4	Staffing and Directing 4.1. Staffing — Recruitment, Selection, Induction, Training and Development	K1-K4	3	1-3
	4.2. Motivation — Meaning and Theories (Maslow — Need Theory, Herzberg — Two Factor Theory)	K1-K6	3	1-5
	4.3. Leadership — Meaning, Styles and Theories (Trait, Likert Behavioral, Managerial Grid, Fiedler Situational)	K1-K6	3	1-5
	4.4. Communication - Meaning, Types. Process and Barriers	K1-K6	3	1-5
5	Control 5.1. Meaning and Importance of Control	K1-K2	2	1
	5.2. Process of Control Mechanism - MIS	K1-K6	2	1-5
	5.3. Control Techniques — PERT, CPM, ROI, Budgetary Control	K1-K6	4	1-5

STATISTICS FOR BUSINESS DECISIONS

CODE: 23AF/AC/SB15

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide practical exposure to the various statistical methods
- To enable students to understand the relationship between variables used in research
- To assist in arriving at rational decisions through systematic analysis and interpretation
- To educate students on the effective and efficient application of various statistical tools
- To acquaint students with formulation of hypotheses relating to research problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify appropriate statistical techniques for business data analysis.	K1
CO2	relate statistical approaches to solve real time business problems	K2
CO3	classify and compare business data for decision making	K3
CO4	analyze and interpret the relationship between variables	K4
CO5	evaluate the effectiveness of statistical tools in solving business problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Descriptive Statistics			
	1.1 Data Types – Univariate Summaries	K1-K2	2	1-2
	1.2 Multivariate Summaries - Karl Pearson's Co efficient of Correlation	K1-K3	4	1-3
	1.3 Partial Correlation of First Order and Second Order Co-efficient, Co-efficient of Multiple Correlations	K1-K3	6	1-3

UNIT	CONTENT	CL	HRS	CO
2	Test of Hypothesis			
	2.1 Procedure for Testing Hypothesis	K1-K2	2	1-2
	2.2 Test of Significance	K3-K4	2	3-4
	2.3 Parametric and Non-Parametric Approaches	K1-K2	2	1-2
	2.4 Test on Single Parametric Value – z Test, t Test	K3-K5	2	3-5
	2.5 Test for Difference of Two Parametric Values	K3-K5	2	3-5
	2.6 Variance Ratio Test			
	2.6.1 One-way Classification Model – One-way ANOVA	K1-K5	2	1-5
	2.6.2 Two-way Classification Model – Two-way ANOVA	K1-K5	2	1-5
3	Categorical data and Chi-square test			
	3.1 Introduction to Categorical Data	K1-K2	2	1-2
	3.2 Meaning and Conditions for Applying Chi-Square test	K1-K2	3	1-2
	3.3 Application of Chi Square Test - Test of Goodness of Fit and Test of Independence – Yates Correction	K1-K5	4	1-5
	3.4 Mc Nemar Test	K1-K5	3	1-5
4	Regression Models			
	4.1 Simple Linear Regression			
	4.1.1 Least square Estimation Formula	K1-K5	2	1-5
	4.1.2 Hypotheses Testing and confidence Interval	K1-K5	2	1-5
	4.2 Multiple Linear Regression			
	4.2.1 Least square Estimation Formula	K1-K3	3	1-3
	4.2.2 Hypotheses Testing and confidence Interval	K1-K5	3	1-5
	4.3 Residual Analysis (Formula based)	K1-K5	2	1-5
	4.4 Handling Indicator Predictors	K1-K5	3	1-5

UNIT	CONTENT	CL	HRS	CO
5	Analysis of Time Series			
	5.1 Utility and components of time series	K1-K3	3	1-3
	5.2 Methods of measuring trend – Simple Averages, Semi-Averages, Moving Averages and Least Square	K1-K5	5	1-5
	5.3 Measurement of seasonal variations	K1-K5	4	1-5

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23AF/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water)and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

B.A. / B.Sc. / B.Com. / B.B.A/ B.C.A/B.S.W. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23AF/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

COST CONCEPTS AND METHODS

CODE: 23AF/MC/CC23

CREDITS:3

L T P:3 1 0

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To provide an understanding of the basic concepts of Cost Accounting
- To impart knowledge in cost ascertainment, control and decision making
- To provide knowledge on different methods of costing used in different industries
- To expose the students to the practical applicability of Cost Accounting
- To equip students with knowledge and skills required to prepare cost sheets of manufacturing entities

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define the basic concepts of Cost Accounting	K1
CO2	understand the format for presenting information using various methods relevant to cost accounting.	K2
CO3	apply appropriate principles and concepts relevant to cost accounting	K3
CO4	analyse and evaluate the total costs relating to products and processes	K4
CO5	prepare cost statements and quotations relating to cost for different industries	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction to Cost Accounting	K1-K3	1	1-5
	1.1.1 Scope and Objectives of Cost Accounting			
	1.1.2 Cost Centre and Cost Units, Methods of Costing	K1-K3	1	1-5
	1.1.3 Elements of Cost and Classification of Cost	K1-K3	1	1-5
	1.2 Unit and Output Costing			
	1.2.1 Meaning and Components of Cost Sheet	K1-K3	1	1-5
	1.2.2 Computation of Total Cost and Profit	K1-K5	3	1-5
	1.2.3 Preparation of Quotations	K1-K5	3	1-5
2	2.1 Material Cost and Material Control			
	2.1.1 Material Control – Meaning, Objectives, Computation of Material Cost and Accounting Treatment for Normal Loss, Abnormal Loss and Scrap	K1– K5	1	1-5
	2.1.2 Purchase Control – Purchase Procedure	K1- K5	1	1-5
	2.1.3 Stores Control -Techniques of Inventory Control, Economic Order Quantity, Level Setting	K1 -K5	1	1-5
	2.1.4 Issue Control - Stores and Material Records, Methods of Material Issue – First in First Out, Last in First Out, Average Cost-Simple and Weighted Average	K1-K5	3	1-5
	2.2 Labour Cost			
	2.2.1 Computation of Labour Cost, Treatment of Overtime and Idle time	K1-K5	2	1-5
	2.2.2 Labor Turnover - Causes and Effects, Methods of Computation	K1-K5	1	1-5
	2.2.3 Methods of Remuneration- Time Rate System, Piece Rate System-Taylor’ Merrick’s Differential Piece Rate System, Incentive Schemes – Halsey and Rowan Premium Plans	K1-K5	3	1-5
3	Overheads			
	3.1 Classification of Overhead Costs	K1-K3	1	1-5
	3.2 Apportionment and Allocation of Overheads	K1 - K5	1	1-5
	3.2.1 Primary Distribution of Overheads	K1 - K5	2	1-5
	3.2.2 Secondary Distribution of Overheads- Direct Distribution, Reciprocal and Non Reciprocal Methods	K1 - K5	3	1-5
	3.3 Methods of Absorption of Overheads			
	3.3.1 Direct Labour Hour Rate	K1- K5	1	1-5
	3.3.2 Machine Hour Rate	K1 - K5	2	1-5

UNIT	CONTENT	CL	HRS	CO
4	Process Costing			
	4.1 Meaning and Features of Process Costing	K1-K3	1	1-5
	4.2 Process Losses and Gains – Accounting Treatment of Normal and Abnormal Wastage and Abnormal Gain	K1-K5	3	1-5
	4.3 Inter-Process Profit	K1-K5	3	1-5
	4.4 Joint and By Product Costing	K1-K5	3	1-5
5	5.1 Operating Costing			
	5.1.1 Introduction to Operating Costing, Cost Unit in Operating Costing	K1-K3	1	1-5
	5.1.2 Transport Costing	K1-K5	3	1-5
	5.2 Contract Costing			
	5.2.1 Features of Contract Costing	K1-K3	1	1-5
	5.2.2 Accounting for Contracts (Simple Contracts only)	K1 - K5	3	1-5
	5.3 Activity Based Costing			
	5.3.1 Features of Activity Based Costing	K1 - K3	1	1-5
	5.3.2 Importance of Activity Based Cost Sheet	K1 - K3	1	1-5

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23AF/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To understand the importance of financial management.
- To expose the students to the techniques and theories of capital structure
- To expose students to financial decisions in acquiring and distributing funds to keep the business financially stable
- To provide an understanding of the role of financial manager in the current competitive business environment
- To educate on the importance of working capital management

COURSE LEARNING OUTCOMES

On the successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamental concepts of financial management	K1
CO2	understand techniques to identify the funding source considering time, risk, cost, market price and return.	K2
CO3	apply principles and select the best option from the alternatives	K3
CO4	analyse the financial needs of the business concern	K4
CO5	critically review the sources of finance	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.1 Nature, Importance and Objectives of Financial Management	K1	2	1
	1.2 Scope of Financial Management – Profit Maximization and Wealth Maximization Traditional and Modern Approach	K1	2	1
	1.3 Functions of finance – Finance Decision, Investment Decision, Dividend Decision Organization of finance function. Functions of finance – Finance Decision, Investment Decision, Dividend Decision Organization of finance function	K1	4	1
	1.4 Time value of money: Meaning – Rationale of Time Preference for Money – Future Value – Present Value	K2-K5	7	1-4

UNIT	CONTENT	CL	HRS	CO
2	Financing Decisions			
	2.1 Cost of Capital – Meaning, Significance and Classification of Costs	K1	2	1
	2.2 Computation of Specific Cost of Capital, Cost of Debt, Cost of Preference Share Capital, Cost of Equity Share Capital and Cost of Retained Earnings, Computation of weighted Average and Marginal Cost of Capital	K2-K5	5	2-5
	2.3 Leverages - Meaning, Types - EBIT-EPS Analysis, Degree of Operating Leverage, Degree of Financial Leverage, Degree of Combined Leverage, Indifference Point	K1-K5	5	2-5
	2.4 Capital Structure - Meaning, Determinants, Theories - Net Income Approach, Net Operating Income Approach, Traditional Approach, MM Approach	K1-K5	3	1-5
3	Investment Decisions			
	3.1 Meaning, Importance and Process	K1	1	1
	3.2 Techniques of Capital Budgeting – Traditional Techniques: Payback Period – Accounting / Average Rate of Return, Discounted Techniques, Discounted Payback Period, Net Present Value, Internal Rate of Return, Profitability Index – NPV Vs. IRR – Capital Rationing	K2-K5	5	2-5
	3.3 Risk Analysis in Capital Budgeting Decisions - Sources and Perspectives of Risk, Risk Adjusted Discount Rate, Certainty Equivalent, standard deviation and Decision Tree Analysis	K2-K5	4	2-5
4	4.1 Working Capital Management			
	4.1.1 Meaning, Definition, Concept, Types, Factors determining Working Capital	K1	2	1
	4.1.2 Computation of Working Capital Requirement	K2-K5	4	2-5
	4.1.3 Operating Cycle – Meaning and Computation	K2-K5	3	2-5
	4.2 Dividend Decision			
	4.2.1 Meaning, Types of Dividend Policies, Factors Influencing Dividend Policy	K1	2	1
	4.2.2 Forms of Dividend (Theory), Dividend Theories - Relevance Theories – Walter’s Model, Gordon’s Model, Irrelevance Theory, MM Hypothesis	K1-K5	4	1-5
5	Sources of Finance			
	5.1 Different Sources of Finance, Characteristics of Different Types of Long Term Debt and Equity Finance, Method of Raising Long Term Finance	K1	2	1
	5.2 Different Sources of short- term Finance	K1	1	1
	5.3 Internal fund as a source of finance	K1	2	1
	5.4 International sources of finance	K1	1	1

UNIT	CONTENT	CL	HRS	CO
	5.5 Other sources of finance- Sale and lease back, Convertible debt, Venture capital, Grants etc.	K1	2	1
	5.6 Lease Financing - Concept and Classification, Significance and Limitations, Financial Evaluation of Leasing Decision	K1	2	1

TOOLS FOR MANAGERIAL DECISION MAKING

CODE:23AF/MC/TD34

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To provide comprehensive knowledge of Management accounting concepts and principles
- To acquaint students with the techniques for decision making
- To help students understand the application of marginal costing techniques in decision making
- To expose students to the management control techniques for effective planning and forecasting
- To provide an overview of human resource accounting and responsibility accounting

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	outline fundamental concepts of Management Accounting as a decision-making tool in business	K1
CO2	interpret the financial information for management planning and coordination	K2
CO3	measure the actuals and compare with management standards for decision making	K3
CO4	analyze and compare financial data for rational decision-making and control	K4
CO5	evaluate the effectiveness of managerial control techniques	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Management Accounting – A Decision Making Tool 1.1 Meaning and Emergence of Management Accounting	K1-K2	2	1-5
	1.2 Definition, Need, Importance and Objectives of Management accounting	K1-K2	1	1-5
	1.3 Difference between Management Accounting and Financial accounting	K1-K2	1	1-5
	1.4 Functions of Management Accountant	K1-K2	1	1-5
2	Budgets and Budgetary Control 2.1 Meaning of Budget, Objectives of Budgetary Control, Essentials of Successful Budgetary Control	K1-K2	6	1-5
	2.2 Classification of Budgets - Sales Budget, Production Budget, Materials Budget, Cash Budget, Flexible Budget	K1-K5	7	1-5
	2.3 Introduction to Zero Based Budgeting (ZBB)	K1-K5	2	1-5
3	Marginal Costing and its Applications 3.1 Definition, Meaning and Features of Marginal Costing	K1-K2	1	1-5
	3.2 Cost Volume Profit Analysis – Fixed Cost, Variable Cost, Contribution, Profit-Volume Ratio, Margin of Safety, Break-Even Point	K1-K5	8	1-5
	3.3 Applications of Marginal Costing – Key Factor, Make or Buy, Plant Merger Decision, Product Mix or Sales Mix Decision, Export Decision, Selling below Cost Decision, Plant Purchase Decision, Product Elimination Decision	K1-K5	9	1-5
4	Standard Costing and Variance Analysis 4.1 Meaning - Standard Cost and Standard Costing, Importance of Standard Costing as a Management Tool	K1-K2	2	1-5
	4.2 Variance Analysis - Material, Labour, Overhead and Sales Variances	K1-K5	10	1-5
5	5.1 Network Analysis 5.1.1. Use of PERT and CPM in Decision Making	K1-K5	3	1-5
	5.1.2 Calculation of Floats, Crashing – Time and Cost Overrun	K1-K5	5	1-5
	5.2 Responsibility Accounting 5.2.1 Concept of Responsibility Accounting	K1-K2	1	1-5
	5.2.2 Responsibility Centers – Cost Centre, Revenue Centre, Profit Centre, Investment Centre, Responsibility Performance Reporting.	K1-K3	2	1-5
	5.3 Recent Developments in Reporting 5.3.1 Value Added Statement, Economic Value Added, Market Value Added, Shareholders' Value Added	K1-K5	3	1-5
	5.3.2 Human Resource Accounting	K1-K5	1	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A – Not exceeding 50 words	K1 (6)	$3 \times 2 = 6$	3 K1 questions	3 K1 questions
B – Not exceeding 150 words	K2 (10)	$2 \times 5 = 10$	2 K2 questions	3 K2 questions
C – Not exceeding 500 words	K3,K4 (20)	$2 \times 10 = 20$	1 K3 question 1 K4 question	1 K3 question, internal choice 1 K4 question, internal choice
D - Not exceeding 1000 words	K5, K6 (14)	$1 \times 14 = 14$	1 question with subdivisions for K5, K6	2 questions with subdivisions for K5, K6
	Total	50	8	10

Other Components: Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion, Video Making

Two to three components will be prescribed

End Semester Examination:**Total Marks: 100****Duration: 3 Hours**

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A - Not exceeding 50 words	K1 (10)	5 x 2 = 10	5 K1 questions	5 K1 questions
B - Not exceeding 150 words	K2 (20)	4 x 5 = 20	4 K2 questions	6 K2 questions
C - Not exceeding 500 words	K3, K4 (40)	4 x 10 = 40	2 K3 questions 2 K4 questions	2 K3 questions, internal choice 2 K4 questions, internal choice
D - Not exceeding 1000 words	K5, K6 (30)	2 x 15 = 30	1 K5 question 1 K6 question	2 K5 questions 2 K6 questions
	Total	100	15	19

SYLLABUS

(Effective from the academic year 2023-2024)

BUSINESS ETHICS AND CORPORATE GOVERNANCE

CODE:23AF/MC/BE33

CREDITS:3

L T P:3 1 0

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To familiarize students with the understanding and practices of business ethics.
- To provide the students an understanding of ethical issues related to business and governance necessary for long term survival of business.
- To acquaint students with the socially responsible activities undertaken by the corporate companies.
- To give the students a comprehensive framework of corporate governance.
- To enable the students to possess knowledge on business policies.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the morals and values of business ethics	K1, K2
CO2	identify the concepts and practices of business ethics and corporate governance.	K3
CO3	apply the code of ethics in the business domain.	K4
CO4	analyze the impact of ethics on competitive strategy	K5
CO5	evaluate the role and responsibilities of corporate governance.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	An Overview of Business Ethics 1.1 Definition and Concept of Ethics, Morals and Values; Ethics and Indian Ethos; Indian Ethos and Games	K1 - K4	2	1-4
	1.2 Business Ethics; Characteristics of Business Ethics; Need and Importance of Business Ethics; Sources of Business Ethics; Causes of Unethical Behavior and Ethical Abuses.	K1 – K5	3	1-5
	1.3 Guidelines for developing Code of Ethics; Ethics Committee; Work ethics; Public Good	K1 - K4	2	1-4
	1.4 Ethical Dilemmas in Business, Right versus Right and Right versus Wrong Ethical Dilemma, Concepts like – Conflict of Interest, Self - Serving Bias, Moral Equilibrium	K1 – K5	3	1-5
2	Ethics in Management and Corporate Frauds 2.1 Impact of Ethics on Competitive Business Strategy	K1 - K5	2	1-5
	2.2 Role of International Trade and Business Organizations in developing Business Ethics	K1 - K5	4	1-5
	2.3 Ethical Issues in the Indian Context and Case Studies with special emphasis on corporate frauds: Accounting Frauds Bank Frauds Employee Frauds	K1 - K5	4	1-5
	2.4 Preventive Measures adopted to Curb Frauds	K1 - K5	3	1-5
3	Conceptual Framework of Corporate Governance 3.1.1 Meaning and features of Corporate Governance	K1 - K5	3	1-5
	3.1.2 Evolution of Corporate governance; Principles of Corporate Governance	K1 - K5	2	1-5
	3.1.3 Importance of Corporate Governance and Elements of Good Corporate Governance	K1 - K5	2	1-5
	3.2 Levels of Governance Structure 3.2.1 Corporate governance and role, responsibilities and powers - Board of Directors, Corporate	K1 - K5	3	1-5
	3.2.2 Management Committee and Divisional Management Committee.	K1 - K5	2	1-5

UNIT	CONTENT	CL	HRS	CO
4	Corporate Governance 4.1 Meaning, Principles and Four Pillars of Corporate Governance	K1- K5	2	1-5
	4.2 Evolution of the Concept of Corporate Governance– Committees Report	K1- K5	2	1-5
	4.3 Board Committees and their Functions– Role of Independent Directors and Women Directors	K1- K5	2	1-5
	4.4 Mandatory Reporting Requirements under the Companies Act 2013, read with Capital Market Regulations	K1- K5	2	1-5
5	Corporate Social Responsibility 5.1 Meaning and Nature	K1 - K5	2	1-5
	5.2 Importance and Legal Requirements – Reporting Requirement	K1 - K5	2	1-5
	5.3 Responsibilities towards Stakeholders - Shareholders, Employees, Consumers	K1 - K5	3	1-5
	5.4 Case Studies in CSR	K1 - K5	2	1-5

**Allied Core Course offered by the Department of Mathematics for
B.Com. (A&F) Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICS FOR COMMERCE

CODE: 23MT/AC/MT35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the fundamental mathematical concepts pertaining to the discipline of commerce
- To employ different techniques to solve problems pertaining to matrices, equations and LPP
- To appreciate the concept of numerical differentiation and integration as an alternate tool to solve problems on differentiation and integration
- To promote problem solving skills and quantitative analysis
- To model and solve real time problem using linear programming method

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall and define the basic mathematical concepts on matrices, equations, differentiation, integration and linear programming problem	K1
CO2	understand and compare the concepts relating to matrices, polynomials, numerical methods and linear programming problem	K2
CO3	utilize suitable mathematical concepts and skills to solve problems including those in real life contexts	K3
CO4	analyse and examine the problem relating to the applications of matrices, differentiation, integration and optimization	K4
CO5	evaluate solutions to the problems related to matrices, equations, differentiation, integration and linear programming problem	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyze K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Matrices 1.1 Types of Matrices 1.2 Characteristic Equation of a Matrix 1.3 Cayley - Hamilton Theorem (without proof) 1.4 Eigen Values and Eigen Vectors 1.5 Diagonalization of 3×3 Matrices with Distinct Eigen Values	K1- K5	13	CO1-5
2	Theory of Equations 2.1 Formation and Solution of Equation with Imaginary and Irrational Roots 2.2 Relation between Roots and Coefficients 2.3 Solution of Equations under given Conditions 2.4 Symmetric Functions of the Roots of an Equation in terms of its Coefficients 2.5 Reciprocal Equations	K1-K5	14	CO1-5
3	Numerical Methods Algebraic and Transcendental Equations 3.1 The Bisection Method 3.2 Newton - Raphson Method Simultaneous Equations 3.3 Gaussian Elimination Method 3.4 Gauss Jordan Elimination Method 3.5 Gauss Jacobi Iteration Method 3.6 Gauss Seidal Iteration Method	K1-K5	13	CO1-5
4	Numerical Differentiation and Numerical Integration 4.1 Derivatives using Newton's forward difference Formula 4.2 Derivatives using Newton's backward difference Formula 4.3 Trapezoidal Rule 4.4 Simpson's One Third Rule 4.5 Simpson's Three Right Rule	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
5	Linear Programming Problem 5.1 General L.P.P. 5.2 Canonical and Standard Forms of L.P.P. 5.3 The Simplex Algorithm 5.4 The Big-M method	K1-K5	13	CO1-5

CORPORATE ACCOUNTING AND RESTRUCTURING

CODE: 23AF/MC/CR44

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To expose students to the accounting practices in the corporate sector
- To understand the methods of valuation of shares and goodwill
- To acquaint students with the accounting procedures for mergers and acquisitions
- To equip students with the ability to prepare consolidated financial statements
- To provide an understanding of the provisions relating to liquidation of a company

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	recall statutory provisions relating to corporate accounting	K1
CO2	understand concepts and principles of Corporate Accounting	K2
CO3	examine financial consequences of various corporate reconstruction strategies	K3
CO4	analyze financial statements to assess a company's liquidity, solvency and profitability.	K4
CO5	evaluate the financial position of the company	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Valuation of Shares and Goodwill			
	1.1 Meaning, Need and Factors to be considered for valuing Goodwill and Shares	K1-K2	1	1-2
	1.2 Methods of Valuation of Shares - Intrinsic Value, Yield Value, Earning Capacity and Fair Value	K1-K5	4	1-2
	1.3 Methods of Valuation of Goodwill – Average Profits, Super Profit, Capitalization of super profit and Annuity Method.	K1-K5	5	1-2

UNIT	CONTENT	CL	HRS	CO
2	Holding Company Accounts 2.1 Preparation of Consolidated Balance Sheet – Calculation of Minority Interest, Capital Profit and Goodwill or Cost of Control	K1 – K5	6	1-5
	2.2 Intercompany Owings with One Subsidiary Company	K1 – K5	6	1-5
	2.3 Dividend Received and Bonus Shares	K1 – K5	3	1-5
3	External Reconstruction 3.1 Meaning and Difference	K1-K2	1	1-5
	3.2 Calculation of Purchase Consideration for Amalgamation in the Nature of Merger and Purchase	K1 - K5	2	1-5
	3.3 Accounting Entries and Preparation of Balance Sheet	K1 – K5	12	1-5
4	Internal Reconstruction 4.1 Alteration of Share Capital – Types – Accounting Procedure.	K1-K2	2	1-5
	4.2 Alteration, Reduction of Share Capital, Surrender and Forfeiture	K1 – K5	6	1-5
	4.3 Accounting Entries and Preparation of Balance Sheet after Internal Reconstruction	K1– K5	7	1-5
5	Liquidation 5.1 Meaning	K1-K2	1	1-5
	5.2 Preparation of Statement of Affairs	K1-K5	3	1-5
	5.3 Liquidator's Final Statement of Account	K1-K5	6	1-5

BANKING AND INSURANCE

CODE: 23AF/MC/BI43

CREDITS:3

L T P:3 1 0

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To expose students to the concepts and practices adopted in the banking industry.
- To educate students about the practical relevance and importance of banking.
- To expose students to various concepts of both life and general insurance.
- To provide a basic understanding of the insurance mechanism.
- To understand the preparation of bank and insurance accounts.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the concepts and practices of banking and insurance.	K1, K2
CO2	identify the recent developments in financial services.	K3
CO3	analyse the final accounts of bank and insurance companies.	K4
CO4	acquire skills and competencies required to be employed in banking and insurance companies.	K5
CO5	demonstrate practical knowledge in the fields of banking and insurance.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNITS	CONTENT	CL	HRS	CO
1.	Introduction to Banking 1.1 Meaning, Definition and Developments of Commercial Banking	K1-K3	2	1-2
	1.2 Banking Functions and Services – Fund Based and Fee based.	K1-K6	3	1-5
	1.3 Banking Practices – Opening and Closing of Bank Accounts, Documents relating to Banking Transactions	K1-K6	3	1-5
	1.4 Negotiable Instruments - Cheque, Promissory Note and Bills of Exchange.	K1-K6	2	1-5
2.	Developments in banking 2.1 E-Banking – Meaning, Importance, Merits and Demerits	K1-K6	2	1-5
	2.2 Internet Banking, Mobile Banking, Tele-Banking, Rural Banking and Retail Banking	K1-K6	3	1-5
	2.3 Debit card, Credit card, ATM Card, Digital Wallet and Smart card	K1-K6	2	1-5
	2.4 Electronic Payment System - Electronic Clearing Service and Electronic Fund Transfer.	K1-K6	3	1-5
3.	Banking Company Accounts 3.1 Treatment of Rebate on Bills Discounted	K1-K6	5	1-5
	3.2 Computation of Provision to be made for Advances, Computation of Profit and Loss Account with Schedules, Preparation of Balance sheet with Schedules.	K1-K6	5	1-5
4.	Introduction to Insurance 4.1 Insurance: Definition, Need, Functions & Principles	K1-K6	3	1-5
	4.2 Types of Insurance Products - Life & General insurance	K1-K6	3	1-5
	4.3 Intermediaries in Insurance Contracts and Procedure for Settlement of Claims	K1-K6	3	1-5
	4.4 Overview of Insurance Regulatory and Development Authority Act 1999	K1-K6	3	1-5
5.	Insurance Company Accounts 5.1 Accounts of General Insurance	K1-K6	5	1-5
	5.2 Accounts of Life insurance Companies	K1-K6	5	1-5

CORPORATE LAW

CODE:23AF/MC/CL43

CREDITS:3

L T P:3 1 0

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To familiarize the students with the formation and features of the company
- To expose the students to regulatory compliance and proceedings of the company
- To provide the students with an overview of the management and administration of a company
- To educate the students on the scope of corporate reorganization.
- To acquaint the students with the challenges that arise in the practice of corporate law

COURSE LEARNING OUTCOME

On successful completion of the course, the students will be able to:

COs	DESCRIPTION	CL
CO1	recall the basic concepts and legal principles of corporate law in formation of company	K1, K2
CO2	apply the provisions in the legal proceedings of company practices	K3
CO3	examine the legal issues and disputes in the corporate context using appropriate legal framework and precedents	K4
CO4	appraise the impact of corporate law on different stakeholders, including shareholders, directors, and creditors	K5
CO5	discuss corporate reorganization measures and valuation	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.1 Definition, Characteristics and Types	K1-K3	2	1-2
	1.2 Lifting of the Corporate Veil	K3-K6	2	2-5
	1.3 Incorporation of a Company	K1-K6	2	1-5
	1.4 Memorandum of Association and Articles of Association	K1-K6	2	1-5
	1.5 An overview of Ministry of Corporate Affairs -21	K1-K6	2	1-5
	1.5.1 SPICe+ Forms	K1-K6	2	1-5
	1.5.2 Digital Signature	K1-K3	1	1-5

UNIT	CONTENT	CL	HRS	CO
2	Raising of Capital			
	2.1 Prospectus – Definition, Contents, Mis-statements in Prospectus and Consequences	K1-K6	3	1-5
	2.2 Shares - Meaning, Nature and Types of Shares, Application and Allotment, Transfer and Transmission of Shares	K1-K5	3	1-4
	2.3 Debentures-Nature and Classes of Debentures	K1-K3	2	1-2
3	Management and Administration			
	3.1 Board of Directors – Appointment, Removal, Powers, Duties and Liabilities	K1-K5	3	1-4
	3.2 Director Identification Number, Number of Directorship, Women Directors and Independent Directors	K1-K3	3	1-3
	3.3 Appointment of Key Managerial Personnel; Managing and Whole-Time Directors, Manager, Chief Executive Officer, Chief Financial Officer and Company Secretary	K1-K6	3	1-5
	3.4 Meetings – Board and Committee Meeting, Requisites for a valid meeting	K1-K6	3	1-5
	3.5 Resolution - Types	K1-K6	3	1-5
4	Corporate Reorganization			
	4.1 Introduction of Corporate Reorganization and Characteristics, Types of corporate restructuring strategies.	K1-K6	2	1-5
	4.2 Corporate de-merger and divisions- Difference between de-merger and reconstruction	K1-3	2	1-2
	4.3 Financial defensive measures, coercive offensive defense, Anti-takeover amendments	K4	2	2
	4.4 Post merger re-organization: Accomplishment of objectives, Post-merger valuation, measuring post-merger efficiency	K3-K6	2	1-5
5	Winding Up			
	5.1 Definition and purpose of winding up	K1-K2	2	1
	5.2 Types - Voluntary winding up	K1-K6	2	1-5
	5.2.1 Winding up subject to the supervision of the court	K3-K6	2	1-5
	5.2.2 Overview of Insolvency and Bankruptcy code	K1-K4	2	1-3

FINANCIAL TECHNOLOGY

CODE:23AF/MC/FT43

CREDITS:3

L T P:3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To provide students with an overview of financial technology
- To educate students on the need for central digital currency
- To expose students to the current practices in digital payments, cryptocurrency and blockchain technology
- To provide an insight into the risks and opportunities of financial technology
- To provide a working knowledge of Fin-Tech regulation.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	recall the concepts and need for financial technology	K1,K2
CO2	identify the need for regulations in financial technology	K3
CO3	apply the principles and practices of financial technology	K4
CO4	analyze trends in cryptocurrencies and block chain	K5
CO5	elaborate the framework of financial technology and its utility in different fields	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Financial technology: 1.1 Meaning, characteristics and evolution of fintech	K1-K6	2	1-5
	1.2 Fintech Transformation, Emerging sectors in Fintech, opportunities and challenges.	K1-K6	3	1-5
	1.3 Fintech and its various applications.	K1-K6	3	1-5
2	Payments, Cryptocurrencies and Block Chain 2.1 Introduction to Digital financial services.	K1-K6	3	1-5
	2.2 Mobile Money-Regulations of Mobile money-SFM-RTGC-NEFT-NDS system	K1-K6	4	1-5

UNIT	CONTENT	CL	HRS	CO
	2.3 Cryptocurrencies-Legal and Regulatory implications of Cryptocurrencies, Bitcoin mining and security	K1-K6	3	1-5
	2.4 Blockchain-paper block, chain of blocks nodes and networks	K1-K6	3	1-5
3	FinTech Regulation and RegTech 3.1 Introduction - FinTech Regulations Evolution of RegTech, RegTech Ecosystem: Financial Institutions	K1-K6	3	1-5
	3.2 RegTech Ecosystem- Ensuring Compliance from the Start, Suitability and Funds, RegTech Startups	K1-K6	3	1-5
	3.3 RegTech Ecosystem: Regulators Industry, AI in Smart Regulation and Fraud Detection	K1-K6	3	1-5
	3.4 Regulatory Sandboxes – Smart Regulation	K1-K6	2	1-5
4	Digital Finance and Alternative Finance 4.1 Introduction – Brief History of Financial Innovation	K1-K6	2	1-5
	4.2 Emerging technologies - AI and IoT, open banking and APIs	K1-K6	2	1-5
	4.3 P2P lending, digital wallet, authenticated tracing, payment challenges and lending fraud.	K1-K6	4	1-5
	4.4 Crowdfunding models- equity, rewards and donation	K1-K6	2	1-5
5	Data & Technology 5.1 Introduction - History of Data Regulation – Data in Financial Services	K1-K6	3	1-5
	5.2 Data Analytics in Finance	K1-K6	3	1-5
	5.3 Methods of Data Protection: GDPR Compliance and Personal Privacy	K1-K6	4	1-5

(Effective from the academic year 2023– 2024)

INTRODUCTION TO FINANCIAL ANALYTICS AND ITS APPLICATIONS

CODE: 23AF/AC/FI45

CREDITS:5

LTP: 2 0 3

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To comprehend and analyze a business opportunity and convert it into a viable analytics proposition
- To expose students to analytics solutions to assess their effectiveness
- To provide a strong foundation in financial analytics in order to handle complex financial data
- To provide an understanding of advanced analytical models and comprehensive reports.
- To provide the knowledge and practical skills necessary to develop a strong foundation on machine learning

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	list the finance, qualitative and quantitative techniques and methodologies, based on machine learning concepts	K1
CO2	classify and assess the performance of financial models through the use of analytical methods and risk modeling techniques	K2
CO3	apply different financial analytics methods and use the appropriate techniques for specific data analysis tasks.	K3
CO4	analyze the accuracy and validity of financial analytics models, and assess the impact of data quality.	K4
CO5	design and implement financial analytics projects using financial analytics tools.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Business Analytics and Machine Learning			
	1.1 Concept of analytics, Types of Analytics, Application fields - Marketing Analytics, Finance Analytics, HR Analytics, Operation Analytics	K1-K5	4	1-5
	1.2 Definition and Objectives of Machine Learning - Features and Components of Machine Learning - Types of Machine Learning – Supervised – Unsupervised – Reinforcement. Learning - Techniques and Predictive Models – Deployment of Solution – Strategic Solution	K1-K5	4	1-5

UNIT	CONTENT	CL	HRS	CO
2	Financial Analytics			
	2.1 Introduction – Importance & Types of Financial Analytics	K1-K5	3	1-5
	2.2 Fundamental Analysis – Technical Analysis	K1-K5	3	1-5
	2.3 Features and Component of Financial Analytics	K1-K5	2	1-5
	2.4 Financial Analytics and Data Analysis - Sales and Revenue Analytics – Profitability Analytics, Cash Flow Analytics, Risk Analytics – Credit Risk and Market Risk Analytics	K1-K5	2	1-5
	2.5 Credit Ratings – Customer Attrition Analysis – GARCH Models	K1-K5	2	1-5
3	Analytics Methodology			
	3.1 Introduction to Analytics Methodology, preparing objectives & identifying data requirements, Data Collection Understanding data, organization and source of data	K1-K5	5	1-5
	3.2 Types of Data Sources- Structured Vs Semi Structured Vs Unstructured data, Data Warehouse Vs Databases, Relational Database Vs Non-Relational Database, RDBMS Data structures, Columnar Data structures. Data Mining meaning, Association Rules and clustering, Decision trees, Random forests	K1-K5	5	1-5
	3.3 Data preparation – Data Cleansing, Normalisation, Data preparation, Data Blending, Data Modelling, Evaluation & feedback	K1-K5	3	1-5
	3.4 Importance of data quality, dealing with missing or incomplete data, Role of Data Scientist in Business & Society	K1-K5	2	1-5
4	Programming Languages for Data Analytics			
	4.1 Programming Languages - Types of Programming language	K1-K5	5	1-5
	4.2 Programming Languages used for Data Analytics - Excel, SQL, Python and R	K1-K5	4	1-5
	4.3 Basics of SQL - Installation, Working in Command line with Create, Insert, Select Commands.	K1-K5	6	1-5
5	Future Trends in Analytics			
	5.1 Role of Artificial Intelligence in Business, Machine Intelligence, Competitive Intelligence, Text Mining	K1-K5	3	1-5
	5.2 Web Analytics (Web content mining, Web usage mining, Web structure mining),	K1-K5	3	1-5
	5.3 Role of Intelligent Agents in Business	K1-K5	4	1-5
	5.4 Introduction to Web Scraping, Need and usage of web scraping. Web Scraping and Web Crawling.	K1-K5	3	1-5
	5.5 Ethical and Legal considerations in Financial Analytics.	K1-K5	2	1-5

B.Com. DEGREE: ACCOUNTING AND FINANCE

SYLLABUS

(Effective from the academic year 2023-2024)

COMPUTER AIDED FINANCIAL ANALYSIS

CODE: 23AF/MC/CF54

CREDITS: 4

L T P: 0 1 4

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To give practical exposure to tools adopted for financial analysis
- To educate on the effective and efficient application of various statistical tools associated with research in business fields
- To generate Accounting reports in Tally
- To expose to business data, monitor financial performance, and make informed decisions.
- To enable students to generate financial statements such as income statements, balance sheets, and cash flow statements using accounting software.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	list the different modules and features available in Tally and Excel.	K1
CO2	understand the different modules and features available in Tally and Excel and how they can be used to manage financial transactions.	K2
CO3	apply Tally software and Excel techniques to record and manage financial transactions for business.	K3
CO4	analyze financial data in Tally and Excel to identify trends and patterns.	K4
CO5	develop analytical thinking and problem-solving skills.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Financial Statement Analysis and Business Forecasting using Excel	K1	1	1
	1.1 Introduction to Excel			
	1.2 Formatting Worksheets	K2-K3	2	2-3
	1.3 Mathematical and Statistical Operations, Text, Logical, Lookup and References using Excel Functions	K1-K5	5	1-5
	1.4 Presentation of Data in MS Excel using Graph, Tables and PIVOT table	K1-K5	5	1-5
	1.5 Named Ranges in MS Excel	K1-K5	2	1-5

UNIT	CONTENT	CL	HRS	CO
2	2.1 Techniques of Financial Statement Analysis			
	2.1.1 Comparative Statements	K1-K5	2	1-5
	2.1.2 Common Size Statements	K1-K5	2	1-5
	2.1.3 Trend Percentages	K1-K5	2	1-5
	2.2 Preparation of Master Budgets	K1-K5	2	1-5
	2.3 Cash Flow Analysis	K1-K5	2	1-5
3	Business evaluation Techniques using Excel			
	3.1 Time value of money	K1	1	1
	3.2 Future and present value of money	K1-K5	3	1-5
	3.3 Future and present value of annuity	K1-K5	3	1-5
	3.4 evaluation techniques – Pay back period ,NPV and IRR techniques	K1-K5	3	1-5
5	Application of MS Excel in Statistics			
	4.1 Univariate analysis	K1-K3	2	1-3
	4.2 Correlation Analysis – Correlation Coefficient	K1-K5	3	1-5
	4.3 Regression Analysis – Regression Equations	K2-K5	2	2-5
	4.4 Testing of Hypothesis for Small Sample	K1-K5	3	1-5
	4.5 Application of Chi-Square Test – Test of goodness fit and Test of Independence	K1-K5	3	1-5
	4.6 Analysis of Variance	K1-K5	2	1-5
5	Accounting Package - Tally			
	5.1 Introduction to Tally	K1	1	1
	5.2 Creation, Alteration and Deletion of a Company	K1-K2	2	1-2
	5.3 Creation, Alteration and Deletion of Groups and Ledgers	K1-K2	2	1-2
	5.4 Accounting Vouchers – Types, Voucher Entry	K1-K4	5	1-4
	5.5 Preparation of Financial Statements – Day Book, Trial Balance, Profit and Loss Account and Balance Sheet - Moving Data to Excel from Tally	K1-K5	5	1-5

SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

CODE: 23AF/MC/SP54

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To provide students with a theoretical and practical background about investments
- To acquaint students with the fundamental principles and techniques of security analysis
- To provide a conceptual foundation for the purpose of undertaking investment analysis for securities as well as portfolios.
- To expose students to the guidelines for the creation and revision of an investment portfolio
- To equip students with the necessary computing skills for dealing with investments

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the principles and techniques of security analysis	K1
CO2	comprehend the various calculations required for portfolio analysis	K2
CO3	determine risk-return of individual securities and portfolio	K3
CO4	analyse and evaluate various investment avenues and make an investment choice	K4
CO5	build a well-diversified portfolio and formulate an investment strategy	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction			
	1.1 Definition and Meaning of Portfolio Management	K1-K2	2	1-2
	1.2 Steps involved in Portfolio Management, Principles of Portfolio Management	K1-K5	3	1-5
	1.3 Return - Meaning and Components of Return	K1-K5	2	1-5
	1.4 Risk – Meaning and Causes, Types of Risk – Systematic and Unsystematic	K1-K5	3	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Theories of Portfolio Management 2.1 Measurement of Return and Risk – Single Security and Portfolio	K1 – K5	7	1-5
	2.2. Portfolio Theory - Harry Markowitz, Single Index Model, Capital Assets Pricing Model	K1 – K5	8	1-5
3	Valuation of Securities 3.1 Equity Valuation based on Accounting Information, Dividends and Earnings.	K1-K5	8	1-5
	3.2 Bond Valuation - Bond pricing, Yield to Maturity, Yield to Call	K1 - K5	7	1-5
4	Security Analysis 4.1 Fundamental Analysis – Intrinsic value of shares – EIC (Economy-Industry Company) Framework	K1-K5	8	1-5
	4.2 Technical Analysis (only theory) –Basic Tenets of Technical Analysis, Price and Volume Charts, Dow Theory, Pattern Analysis	K1 – K5	7	1-5
5	Techniques of Portfolio Management 5.1 Efficient Market Hypothesis	K1-K5	3	1-5
	5.2 Asset Allocation Framework – Strategic and Tactical	K1-K5	2	1-5
	5.3 Passive and Active Management Strategies	K1-K5	2	1-5
	5.4 Portfolio Evaluation – Treynor Measure, Sharpe Measure, Jensen Measure	K1-K5	3	1-5

B.Com. DEGREE: ACCOUNTING AND FINANCE

SYLLABUS

(Effective from the academic year 2023–2024)

TOOLS FOR FINANCIAL ANALYTICS

CODE: 23AF/MC/TF64

CREDITS:4

LTP: 0 1 4

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To provide students with a strategic understanding of the field of Financial Analytics.
- To enable students to identify inter-relationships in business and make holistic judgments.
- To nurture critical thinking skills required to solve business problems.
- To familiarize students with analytic tool aids in the monitoring and optimization of cash
- To help students detect fraudulent financial activities by identifying anomalies in financial data

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts and terminologies related to financial analytics such as data, metrics, and key performance indicators	K1, K2
CO2	apply Data Visualisation, Tableau, R programme and Power BI to create and communicate meaningful insights from data.	K3
CO3	analyze and interpret data to identify trends, patterns, and relationships.	K4
CO4	evaluate the effectiveness of different financial analytics approaches in solving real-world business problems.	K5
CO5	assess the reliability and accuracy of financial data used in analytics.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Basic Concepts - Dashboards, Reports, Data Visualization, Business Intelligence, Decision Support Systems. Data Visualization, Storytelling and its importance in BI, Visual Perception, Pre-attentive Attributes of Perception, Colour Attributes, High Precision Judging	K1-K2	4	1
	1.2 Overview of the Tools and Programmes for Analytics – Python, R, Power Bi and Data Visualisation through TABLEAU	K2-K6	4	3-5
2	Tools and Programmes for Analytics - Power BI 2.1 Introduction to power BI	K1-K2	4	1
	2.2 Data Transformation & M Query Design	K1-K6	4	1-5
	2.3 Direct Query Data Models	K1-K5	4	1-4
	2.4 Creating and Formatting Reports	K1-K6	3	1-5
	2.5 Custom Visuals and Dashboards	K1-K6	3	1-5
3	Tools and Programmes for Analytics -R 3.1 Introduction to Computing with R	K1-K6	2	1-5
	3.2 Environment Setup: Installing R, First R Program	K3-K5	4	2-4
	3.3 Data Types, Variables, Operators, Decision Making, Loop Control Statements.	K1-K6	4	1-5
	3.4 Packages in R	K2-K3	4	1-2
4	Tools and Programmes for Analytics - Python 4.1 Basics of Python	K3-K5	5	2-4
	4.2 Installation of Python, Data Types, Variables, Operators and Operator Precedence, Decision Making, Loop Control Statements.	K3-K5	4	2-4
	4.3 Introduction to Python Packages – Numpy, Pandas, Matplotlib	K3-K5	4	2-4
5	Tools and Programmes for Analytics - Data Visualisation (Tableau) 5.1 Introduction to Data Visualisation	K1-K6	4	1-5
	5.2 Data summarization methods; Tables, Graphs, Charts, Histograms, Frequency distributions, Relative Frequency Measures of Central Tendency and Dispersion;	K1-K6	4	1-5
	5.3 Box Plot; Basic probability concepts, conditional probability, Probability distributions, Continuous and discrete distributions, sequential decision making	K1-K4	4	1-3

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A – Not exceeding 50 words	K1 (6)	$3 \times 2 = 6$	3 K1 questions	3 K1 questions
B – Not exceeding 150 words	K2 (10)	$2 \times 5 = 10$	2 K2 questions	3 K2 questions
C – Not exceeding 500 words	K3,K4 (20)	$2 \times 10 = 20$	1 K3 question 1 K4 question	1 K3 question, internal choice 1 K4 question, internal choice
D - Not exceeding 1000 words	K5, K6 (14)	$1 \times 14 = 14$	1 question with subdivisions for K5, K6	2 questions with subdivisions for K5, K6
	Total	50	8	10

Other Components: Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion ,Video Making

Two to three components will be prescribed

End Semester Examination:

Total Marks: 100

Duration: 3 Hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A - Not exceeding 50 words	K1 (10)	5 x 2 = 10	5 K1 questions	5 K1 questions
B - Not exceeding 150 words	K2 (20)	4 x 5 = 20	4 K2 questions	6 K2 questions
C - Not exceeding 500 words	K3, K4 (40)	4 x 10 = 40	2 K3 questions 2 K4 questions	2 K3 questions, internal choice 2 K4 questions, internal choice
D - Not exceeding 1000 words	K5, K6 (30)	2 x 15 = 30	1 K5 question 1 K6 question	2 K5 questions 2 K6 questions
	Total	100	15	19

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600086

BACHELOR OF BUSINESS ADMINISTRATION (BBA)

PROGRAMME DESCRIPTION

The Bachelor of Business Administration or BBA is a three year professional undergraduate programme in Business Management. The unique feature of this programme is that it is integrated with Business Analytics, offered in association with the Institute of Analytics. The BBA Programme provides students with the knowledge and skills in business and management. The programme is designed to train students effectively in management education and communication skills which will further hone entrepreneurship skills. The methodology involves training through practical experience in the form of case studies, projects, presentations, industrial visits and interaction with experts from the industry. This programme is a blend of theoretical inputs, practical exercises and internship training.

VISION OF THE DEPARTMENT

The vision of the department is to become the centre of excellence in management teaching and research, and train students to be ethical leaders, innovative entrepreneurs, and strategic decision-makers in the ever evolving business world.

MISSION OF THE DEPARTMENT

The mission of the department is to give students a holistic, transformational, and inclusive education that will enable them to thrive in the dynamic area of management. We are dedicated to developing moral leaders, encouraging critical thinking and problem-solving skills, and creating a global perspective in order to better prepare students to contribute positively to organisations and society.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the Business Administration Programme, the students will be able to

PSO 1	relate the knowledge of principles and framework of management and allied domains to solve complex business issues
PSO 2	acquire a set of competencies required for career in the Global Business Environment
PSO 3	apply critical thinking and problem-solving skills in strategic planning and decision making
PSO 4	use business knowledge in the larger interest of the community
PSO 5	adopt innovative practices to achieve sustainability in business environment

CO1	define key terms used in the principles and theories of management	K1
CO2	explain the characteristics, principles and elements of management	K2
CO3	relate the managerial functions to create sustainable business environment	K3
CO4	analyze and apply the techniques of management in real time situations	K4
CO5	evaluate the management philosophies to meet the current needs of the business	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1-K2	3	1-2
	1.1 Meaning, Nature and Scope of Management			
	1.2 Importance of Management	K1	2	1
	1.3 Contemporary Approach to Management -Fayol, Taylor, Elton Mayo, Drucker, Porter, Prahalad, Hammer and Tom Peter	K1-K3	4	1-3
	1.4 New Age Management – Review of Two Management Books and Articles	K5	1	1-5

UNIT	CONTENT	CL	HRS	CO
2	Planning	K1-K2	5	1-2
	2.1 Nature and objectives, Importance and Advantages of Planning			
	2.2 Planning process and Obstacles to effective planning			
	2.3 Methods and Types of plans	K1-K5	3	1-5
	2.4 Managing by Objective (MBO)	K1-K3	2	1-3
3	Organising	K1-K2	5	1-2
	3.1 Nature and purpose of organizing			
	3.2 Organization structure- Line and staff authority			
	3.3 Departmentation	K1-K3	3	1-3
	3.4 Decentralization	K1-K4	1	1-4
	3.5 Delegation of authority	K1-K5	1	1-5
4	Staffing	K1-K5	4	1-5
	4.1 Recruitment and Selection			
	4.2 Training – Need, Types of Employee Training			
	4.3 Motivation – Meaning and Maslow’s Theory of Motivation	K1-K2	2	1-2
	4.4 Leadership – Qualities, Types of Leaders, Span of Control	K1-K5	5	1-5
	4.5 Communication – Types and Barriers of Communication			
5	Controlling	K1-K2	3	1-2
	5.1 Meaning and Definition			
	5.2 Process of controlling	K1-K3	3	1-3
	5.3 Controlling techniques (Case study)	K1-K5	5	1-5

ECONOMIC APPLICATIONS FOR MANAGERS

CODE: 23BA/AC/EA15

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide the students an understanding of economic theory and practice
- To acquaint students with the economic applications integrated with business functions
- To expose students to various market types in relation to demand and supply of products and services
- To develop critical thinking and analytical abilities in resolving business problems
- To appreciate the different market structures for price and output determination

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the relevance of economics to business	K1
CO2	explain consumer perspective of economic applications	K2
CO3	relate pricing and profit management in different types of competitions	K3
CO4	analyze the tools and techniques in economics for managerial decision making	K4
CO5	evaluate the factors that influence decisions with respect to demand and supply, cost and prices	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Economics and its Link with Business			
	1.1 Meaning and Definition of Economics	K1-K2	5	1-2
	1.2 Issues and Problems in Economics			
	1.3 Scope and Role of Economics in Business	K1-K3	3	1-3
2	Consumer Perspective of Economic Application			
	2.1 Demand – Law of Demand, Exceptions to the law of demand	K1-K5	7	1-5
	2.2 Elasticity of Demand- Types, Measurement and Interpretation for Decision Making			
	2.3 Utility – Law of Diminishing Marginal Utility, Total Utility	K1-K4	10	1-4
	2.4 Indifference Curves and Maximization of Satisfaction			

UNIT	CONTENT	CL	HRS	CO
3	Production Decisions in Business			
	3.1 Supply – Law of Supply, Factors Affecting Supply	K1-K5	13	1-5
	3.2 Elasticity of Supply			
	3.3 Production Function			
	3.3.1 Single Variable Input – Law of Variable Proportions			
	3.3.2 Two Variable Inputs – Isoquants and Least Cost Combination			
4	Cost & Revenue Considerations in Business			
	4.1 Cost and Types of Cost	K1-K4	3	1-4
	4.2 Short Run and Long Run Cost Curves – TC, TVC, TFC, AC, AFC, AVC and MC and their Relationships	K1-K5	12	1-5
	4.3 Revenue Curves – TR, AR, MR			
	4.4 Break Even Analysis and Profit Maximization (Conditions)			
5	Market Structures and Determining Their Price and Output			
	5.1 Perfect Competition – Characteristics and Price – Output Equilibrium, Shut down Point	K1-K4	3	1-4
	5.2 Imperfect Competition – Characteristics and Price – Output Equilibrium of following types	K1-K5	9	1-5
	5.2.1 Monopoly – Price Discrimination			
	5.2.2 Monopolistic – Excess Capacity			
	5.2.3 Oligopoly – Price Rigidity, Product Differentiation and Kinky Demand Curve

ENVIRONMENTAL STUDIES

CODE:23BA/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23BA/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

COST ACCOUNTING**CODE: 23BA/MC/CA23****CREDITS: 3****L T P: 3 1 0****TOTAL TEACHING HOURS: 52****OBJECTIVES OF THE COURSE**

- To provide an understanding of the basic concepts of cost accounting
- To enable students to understand the methods of ascertaining the product cost
- To help the students learn the applications of cost accounting in business
- To familiarize students on the applications of cost control concepts and techniques for effective planning and forecasting
- To impart practical knowledge of costing with the help of problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	recall the facts, concepts and principles of cost accounting and its relevance	K1
CO2	understand the cost information reflected in financial statements	K2
CO3	develop the ability to present cost information clearly to non-financial stakeholders, aiding better decision-making across the organization	K3
CO4	analyze deviations and take corrective actions to control costs and improve performance	K4
CO5	assess the costs and benefits of different methods of costing systems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Nature of Cost Accounting			
	1.1 Meaning, Objectives, Scope and Limitations	K1 – K2	1	1 - 2
	1.1 Difference between Financial, Cost and Management Accounting	K1 – K2	2	1 - 2
	1.2 Basic Concepts and Elements of Cost – Cost, Cost Center and Cost Unit	K1 – K2	2	1 - 2
2	Material Cost and Material Control			
	2.1 Need and Importance of Material Control	K1 – K2	2	1 - 2
	2.2 Computation of Material Cost and Accounting Treatment for Normal, Abnormal Loss and Scrap	K1 – K5	3	1 - 5
	2.3 Purchase Control – Purchase Procedure	K1 – K2	1	1 - 2

UNIT	CONTENT	CL	HRS	CO
	2.4 Stores Control			
	2.4.1 Level Setting	K1 – K2	1	1 - 2
	2.4.2 Inventory Control – Methods and Techniques	K1 – K5	1	1 - 5
	2.5 Issue Control			
	2.5.1 Methods of Material Issue - First in First Out, Last in First Out, Average Cost - Simple and Weighted Average	K1 – K5	4	1 - 5
3	Labour Cost, Remuneration and Incentives			
	3.1 Computation of Labour Cost with Overtime and Idle Time	K1 – K5	3	1 – 5
	3.2 Methods of Remuneration- Time Rate System, Piece Rate System, Taylor’s Differential Piece Rate System	K1 – K5	3	1 - 5
	3.3 Incentive Plans -Halsey Premium Plan, Rowan Premium Plan	K1 – K5	2	1 - 5
	3.4 Labour Turnover – Methods of Computation	K1 – K5	2	1 - 5
4	Overheads			
	4.1 Importance and Classification of Overhead Costs	K1 – K2	2	1 - 2
	4.2 Apportionment and Allocation of Overheads			
	4.2.1 Primary Distribution of Overheads	K1 – K5	3	1 - 5
	4.2.2 Secondary Distribution of Overheads- Direct Distribution, Reciprocal and Non-Reciprocal Methods	K1 – K5	4	1 - 5
	4.3 Methods of Absorption of Overheads			
	4.3.1 Direct Labour Hour Rate	K1 – K5	2	1 - 5
	4.3.2 Machine Hour Rate	K1 – K5	2	1 - 5
5	Methods of Costing			
	5.1 Unit Costing- Computation of Product Cost and Profit, Preparation of Cost Sheet	K1 – K5	4	1 - 5
	5.2 Process Costing			
	5.2.1 Meaning and Features of Process Costing	K1 – K2	1	1 - 2
	5.2.2 Process Losses and Gains – Accounting Treatment of Normal and Abnormal Wastage and Abnormal Gain	K1 – K5	2	1 - 5
	5.3 Activity Based costing – Only Theory	K1 – K2	2	1 - 2

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide insights to the fundamentals of Information System
- To equip students about the functions of different Information Systems
- To familiarize the role of MIS in business decision making
- To apply security policies and privacy control in designing MIS
- To build and implement a successful ethical Management Information System

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	define the core concepts in Management Information System	K1
CO2	explain the scope, purpose and value of Information System in an organization	K2
CO3	apply the procedures and develop a secure Management Information Systems	K3
CO4	analyse the various divisions of the Information System and their interdependence	K4
CO5	evaluate the impact of recent technologies on Management Information System	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.1 Concepts of Data and Information	K1	2	1
	1.2 Quality of Information	K1-K2	2	1-2
	1.3 Levels of Management and Information Needs	K1-K2	2	1-2
	1.4 System- Meaning, Nature and Elements, System life cycle	K1-K2	2	1-2
2	Information System			
	2.1 Meaning, Objectives and Dimensions	K1-K2	3	1-2

UNIT	CONTENT	CL	HRS	CO
	2.2 Evolution and Types of Information System- Transaction Processing Systems, Management Information Systems, Decision Support Systems, Group Decision Support System, Executive Information Systems, Executive Support System	K1-K5	5	1-5
	2.3 Components of Information System	K1-K5	3	1-5
	2.4 Database Management System- Meaning, Scope and Functions	K1-K5	4	1-5
	2.5 Big Data Analytics – Meaning, Features and Importance			
3	Management Information System – Overview			
	3.1 Meaning, Purpose and Features of MIS	K1-K5	4	1-5
	3.2 MIS Planning Framework: Nolan Stage Model	K1-K5	3	1-5

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23BA/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 (13 Hours)
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 (13 Hours)

3.1 Energy conservation

- 3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant
- 3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

- 3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing
- 3.2.2 **Configuring Email**
Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails
- 3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

SYLLABUS

(Effective from the academic year 2023 –2024)

INTRODUCTION TO FINANCIAL MANAGEMENT

CODE: 23BA/MC/IF44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide the student with a sound conceptual frame work for financial decision- making
- To acquaint the students with the basic tools and principles of financial management
- To impart knowledge about financial structure
- To enable students to evaluate the Capital Budgeting proposals
- To demonstrate to the students the importance of working capital management

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the key concepts, principles and objectives of financial management and its role in successful business	K1
CO2	Understand the importance of investment, financing and dividend decisions	K2
CO3	Identify the basic tools and techniques of financial management for decision making	K3
CO4	Examine the knowledge and skills necessary to navigate complex financial scenario to support the success of the organization	K4
CO5	Evaluate the most profitable projects among the numerous investment proposals	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Nature of Financial Management			
	1.1 Modern Approach to Financial Management			
	1.1.1 Investment Decisions	K1 – K2	1	1-2
	1.1.2 Finance Decisions	K1 – K2	1	1-2
	1.1.3 Dividend Decisions	K1 – K2	1	1-2
	1.2 Objectives of the Firm			
	1.2.1 Profit Maximisation	K1 – K2	1	1-2
	1.2.2 Wealth Maximisation	K1 – K2	1	1-2
	1.3 Significance of Financial Management	K1 – K2	1	1-2

UNIT	CONTENT	CL	HRS	CO
	1.4 Meaning and Significance of Time Value of Money in Financial Decisions			
	1.4.1 Computation of Time Value of Money	K1 – K5	1	1-5
	1.4.2 Compounding Techniques	K1 – K5	1	1-5
	1.4.3 Present Value Techniques	K1 – K5	2	1-5
2	Measurement of Cost of Capital			
	2.1 Meaning and Significance	K1 – K2	2	1-2
	2.2 Cost of Debt and Preference - Redeemable and Irredeemable	K1 – K5	3	1-5
	2.3 Cost of Equity and Retained Earnings	K1 – K5	3	1-5
	2.4 Computation of Overall Cost of Capital - Book Value and Market Value	K1 – K5	4	1-5
3	Capital Structure			
	3.1 Meaning, Significance and Determinants of Capital Structure	K1 – K5	3	1-5
	3.2 Theories of Capital Structure – Net Income Approach, Net Operating Income Approach, Traditional Approach, Modigliani & Miller Approach (Theory)	K1 – K5	4	1-5
	3.3 Leverage – Operating, Financial and Combined Leverage	K1 – K5	6	1-5
4	Capital Budgeting			
	4.1 Nature of Capital Budgeting	K1 – K2	2	1-2
	4.2 Evaluating Techniques - Pay Back Period, Average Rate of Return, Net Present Value, Internal Rate of Return and Profitability Index	K1 – K5	13	1-5
5	Working Capital Management			
	5.1 Need for Working Capital Management	K1 – K2	2	1-2
	5.2 Determinants of Working Capital Management	K1 – K5	3	1-5
	5.3 Computation of Working Capital Requirements	K1 – K5	10	1-5

SERVICE MARKETING

CODE: 23BA/MC/SM44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint students with key concepts of service marketing
- To expose about the models and frameworks used in service marketing
- To instruct the students on scenarios pertaining to service marketing strategies
- To provide significance of customer experience and relationship management in service marketing
- To familiarize on the effective marketing strategies tailored to specific service industries

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Define key terms used in service marketing	K1
CO2	Explain the elements of marketing mix in service marketing	K2
CO3	Relate the unique marketing strategies in service marketing	K3
CO4	Analyze the impact of service quality and customer engagement in real situation	K4
CO5	Evaluate the strategies of marketing mix with specific service industries	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Service Marketing			
	1.1 Introduction - Growth of the service sector - The Concept of Service	K1-K2	2	1-2
	1.2 Characteristics of Service: Intangibility, Inseparability, Inconsistency, Inventory	K1-K4	3	1-4
	1.3 Classification of Service: Consumer vs Industrial	K1-K3	2	1-3
	1.4 Designing of the Service, Blueprinting, Using Technology, Developing Human Resources, Building Service Aspirations	K1-K5	3	1-5

UNIT	CONTENT	CL	HRS	CO
2	Marketing Mix in Service Marketing			
	2.1 Product Decision	K1-K3	2	1-3
	2.2 Service Pricing- Strategies and Tactics,	K1-K3	4	1-3
	2.3 Promotion of Service	K1-K3	4	1-3
	2.4 Placing of Distribution Methods for Services	K1-K3	2	1-3
	2.5 Additional Dimension in Services Marketing – People, Physical Evidence and Process	K1-K3	3	1-3
3	Effective Management of Service Marketing			
	3.1 Marketing Demand and Supply through Capacity Planning and Segmentation	K1-K3	6	1-3
	3.2 Internal Marketing of Services	K1-K3	4	1-3
	3.3 External versus Internal Orientation of Service Strategy	K1-K3	5	1-3
4	Service Quality and Customer Satisfaction			
	4.1 Monitoring and Measuring Customer Satisfaction	K1-K4	4	1-4
	4.2 Concepts and Importance of Quality in Services	K1-K4	5	1-4
	4.3 Service Quality Models: Parasram – Zethamal Biter Gaps Model, SERVQUAL, SERVPERF Gronos Model	K1-K5	6	1-5
5	Characteristics and Cases in Service Marketing to Specific Industries			
	5.1 Financial Services – Insurance and Banking	K1-K5	2	1-5
	5.2 Health Service – Hospitals	K1-K5	2	1-5
	5.3 Hospitality Services - travel, hotels and tourism	K1-K5	2	1-5
	5.4 Professional Service - Public Utility Services	K1-K5	2	1-5
	5.5 Educational Services – Government and Private Institutions	K1-K5	2	1-5

RESEARCH METHODOLOGY

CODE: 23BA/MC/RM43

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To acquire basic knowledge about the research and its types
- To enable the students know research process and techniques of conducting research
- To orient the students with the techniques of data collection, analysis of data and interpretation
- To familiarise the students about report writing and presentation
- To provide a comprehensive and transparent account of the research

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define basic concepts and terms used in Research Methodology	K1
CO2	understand the principles, process and techniques in Research	K2
CO3	solve research problems and give suitable recommendation	K3
CO4	examine the ability to choose appropriate methods to research objectives	K4
CO5	assess skills in qualitative and quantitative data analysis and presentation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.1 Research – Meaning – Definition – Characteristics – Objectives - Types	K1 – K2	2	1-2
	1.2 Research Methodology - Meaning – Definition – Importance – Structure	K1 – K5	2	1-5
	1.3 Ethics in research - Scope of Research in Business and Commerce – Ethical principles in Research	K1 – K5	3	1-5
	1.4 Types of Research Methods - Research Process – Research Problem – Identification of Research Problem	K1 – K5	3	1-5
2	Literature Review and Research Design			
	2.1 Literature Review			
	2.1.1 Meaning – Objectives – Purpose	K1 – K2	1	1-2

UNIT	CONTENT	CL	HRS	CO
	2.1.2 Different Types of Literature Review - Process of Literature Review	K1 – K5	2	1-5
	2.1.3 Identification of Research Gap	K1 – K5	1	1-5
	2.1.4 Formulation of Hypothesis	KI – K5	1	1-5
	2.2 Research Design			
	2.2.1 Meaning – Characteristics – Importance	KI – K2	1	1-2
	2.2.2 Classification of Research Design – Descriptive, Experimental and Exploratory	K1 – K5	2	1-5
	2.2.3 Types of Variables – Dependent, Independent, Discrete and Continuous	K1 – K5	2	1-5
3	Sampling and Data Collection			
	3.1 Sources of Data			
	3.1.1 Primary Data – Observation, Interview, Questionnaire, Schedule, Case Study	KI – K5	3	1-5
	3.1.2 Secondary Data – Sources, Collection, Organisation and Evaluation	K1 – K5	2	1-5
	3.2 Sampling			
	3.2.1 Meaning, Importance of Sample Size	K1 – K2	2	1-2
	3.2.2 Techniques -Probability and Non-Probability Sampling	K1 – K5	3	1-5
4	3.2.3 Sampling and non-sampling errors- Meaning and Types	K1 – K5	2	1-5
	Data Analysis and Interpretation			
	4.1 Meaning, Importance, Factors Influencing Data Analysis	K1 – K5	3	1-5
	4.2 Methods of Data Processing – Editing, Coding, Classification, Tabulation, Pictorial and Graphical Representation	K1 – K5	4	1-5
5	4.3 Interpretation of the Outputs	K1 – K5	3	1-5
	Report Writing			
	5.1 Research Reports – Meaning, Importance, Content	K1 – K5	3	1-5
	5.2 Layout of the Research Report	K1 – K5	4	1-5
	5.3 Types of Report Writing	K1 – K5	3	1-5

QUANTITATIVE TECHNIQUES FOR MANAGERS

CODE: 23BA/AC/QT45

CREDITS: 5

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To expose students to the concepts of operations research
- To acquaint students to arrive at optimal solutions to projects
- To equip the concepts of Linear Programming Problem and Graphical method
- To familiarise different methods in solving transportation and assignment problems
- To provide knowledge on the significance of Game theory and Network Analysis

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the concepts of operations research and its significance in business	K1
CO2	explain the practical applications of operations research	K2
CO3	relate the operations research techniques of testing optimal solutions	K3
CO4	analyze on the various operational research techniques in decision making	K4
CO5	evaluate appropriate quantitative techniques for execution of projects	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.3 Introduction to Operations Research – Definition – Nature – Scope –Significance	K1-K2	3	1-2
	1.4 Linear programming problem – Mathematical formulation of linear programming problem	K1-K5	6	1-5
	1.5 Linear programming problem by graphical method - Simplex method – Simple problems	K1-K5	6	1-5
2	Transportation Problem			
	2.1 Transportation problems – Formulation and Balance check of a Transportation Problem	K1-K5	5	1-5
	2.2 Attaining initial basic feasible solution using North / West Corner Rule, Least Cost Method and Vogel's Approximation Method	K1-K5	5	1-5

UNIT	CONTENT	CL	HRS	CO
	2.3 Feasible Optimal solution – Modi Method - Simple balanced problems and Unbalanced problems on the above method without degeneracy	K1-K5	5	1-5
3	Assignment Problem and Sequencing			
	3.1 Assignment Problem: Hungarian Method, Special cases: Multiple Solutions, Maximization case, Unbalanced case	K1-K5	7	1-5
	3.2 Sequencing problem – Johnson’s rule for n jobs – 2 machines, n job 3 machines problems	K1-K5	5	1-5
4	Game theory			
	4.1 Game theory – concept of pure and mixed strategies – value of games	K1-K5	3	1-5
	4.2 Solving 2 person zero sum games with saddle point	K1-K5	3	1-5
	4.3 Solving 2X2 games without saddle point -dominance principle	K1-K5	4	1-5
5	Network Analysis			
	5.1 Meaning, Objectives and Applications	K1-K2	3	1-2
	5.2 Network analysis: Concepts of CPM & PERT	K1-K5	3	1-5
	5.3 CPM – Network Diagram and Calculation of Floats	K1-K5	4	1-5
	5.4 PERT - Calculation of Expected Duration and Variance	K1-K5	3	1-5

BUSINESS ANALYTICS FOR DECISION MAKING

CODE: 23BA/MC/BA54

CREDITS: 4

L T P: 0 1 4

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide knowledge about R programme and its operations, representing data diagrammatically and graphically using Ms-Excel
- To educate students to compute absolute and relative measures of central tendency and dispersion, correlation and regression analysis using Ms-Excel and R Programme
- To expose and introduce PivotTables, Macros and Hyperlinks, logical, lookup, reference, and statistical functions
- To acquaint students to interpret results from multiple worksheets
- To compute functions and productivity tools using Ms-Excel and R Programme

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define Excel spreadsheets to perform a variety of data analysis tasks	K1
CO2	explain the numerical data by using statistical tools and functions used in Excel	K2
CO3	demonstrate skills and knowledge using data analysts used in R programme	K3
CO4	analyse the data using various data visualization techniques including, charts, plots etc	K4
CO5	evaluate statistical analysis and predictive models using R	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Understanding Ms-Excel			
	1.1 Introduction to Excel, The Excel Environment	K1-K2	4	1-2
	1.2 Creating Worksheets and Workbooks, Formatting Cells; Selecting Cells, Entering Text and Numeric Data into the Cells	K1-K5	4	1-5
	1.3 Applying Fonts and Background Colour, Aligning Data, Merging Cells, Text Wrapping, Number Formatting – Text, Percentage, Currency, Dates. Creating Series	K1-K5	3	1-5
	1.4 Resizing Columns Width and Rows Height. Excel Shortcuts	K1-K5	4	1-5

UNIT	CONTENT	CL	HRS	CO
2	Formulas and Functions			
	2.1 Sum if, Sum ifs, Count if, Count ifs functions, V look up, H look up, Logical Functions, Text Functions	K1-K5	4	1-5
	2.2 Index, Match functions and its applications	K1-K4	4	1-4
	2.3 MS-Excel-Entering data and Selecting Cells- Formatting Cells- Advanced Conditional Formatting-Advanced Data Validation-protecting and un-protecting workbook	K1-K5	5	1-5
	Data Visualization by Using Excel			
	3.1 Charts-Chart elements- Clustered Column-Stacked column- Stacked percentage charts-Line, Column, Win/Loss Sparkline Charts	K1-K5	5	1-5
3	3.2 Introduction to Pivot Tables- Creating Pivot Tables and Pivot Charts, manipulating a PivotTable, Changing Calculated Value Fields, Applying PivotTable Styles, creating a PivotChart, Setting PivotTable Options	K1-K5	5	1-5
	R Programming			
	4.1 Basics of R, Installation of R studio, Vectors, Matrices, Data types, importing files, writing files, Merging Files	K1-K5	4	1-5
4	4.2 Data Manipulation, Creation and Deletion of New Variables	K1-K5	4	1-5
	4.3 Sorting of Data, Sub-setting of Vector, Matrix, Data Frame	K1-K5	4	1-5
	Conditional Statement			
	5.1 Loop, Functions with R: Creation of function, Global Variable, Local Variables, Scatter Plot	K1-K5	5	1-5
5	5.2 Histogram, Bar Plot, Box Plot, Plot function and its arguments, Basic Data Manipulation Techniques	K1-K5	5	1-5
	5.3 Usage of various apply functions – apply, lapply, sapply and tapply	K1-K5	5	1-5

(Effective from the academic year 2023–2024)

BUSINESS TAXATION

CODE: 23BA/MC/BT54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide the students with the concepts in Direct and Indirect Taxation law
- To comprehend the provisions of Customs Act
- To apply the provisions of law and compute the taxable business income of an assessee
- To infer tax liability based on residential status
- To provide an insight on GST levy and collection

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the conceptual framework of the discipline of taxation in India	K1
CO2	identify the importance of the procedures of taxation	K2
CO3	apply the provisions to assess of incomes of business organisations	K3
CO4	analyse the deductions, concessions and exemptions in the process of tax levy and collection.	K4
CO5	evaluate the scope and challenges in compliance of tax	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Tax System In India			
	1.1 Taxation – Meaning, Objectives, Features and Canons	K1-K5	2	1-5
	1.2 Tax System in India- Union List, State List & Concurrent List	K1-K3	2	1-3
	1.3 Direct and Indirect Taxes – Meaning and Features	K1-K5	4	1-5
	1.4 CESS Types- Difference between Tax and CESS	K1-K3	2	1-3
2	Income Tax Law			
	2.1 Basic Concepts in Income Tax- Person, Assessee, Previous Year, Assessment Year, Income, Agricultural Income, Exempted Income, Residential Status of an Assessee, Fringe benefit Tax, Tax deducted at Source	K1-K3	2	1-3

UNIT	CONTENT	CL	HRS	CO
	2.2 Income under Five heads and Tax Rates	K1-K5	3	1-5
	2.3 Determination of Residential Status (Problems)	K1-K4	6	1-4
	2.4 Incidence of Tax (Problems)	K1-K4	4	1-4
3	Income under the Head `Profits and Gains from Business and Profession			
	3.1 Definitions, Deductions expressly allowed and Disallowed, Expenses deductible on actual payment basis	K1-K5	3	1-5
	3.2 Computation of Profits and Gains of Business and Professional Income (Problems)	K1-K4	7	1-4
	3.3 Depreciation u/s 32 (Simple Problems)	K1-K2	5	1-2
4	Goods and Service Tax			
	4.1 Meaning, Features and Scope of GST, Framework of GST in India – Concept of CGST, SGST, UTGST, IGST	K1-K5	4	1-5
	4.2 Rates of GST, Exemptions in GST and Registration	K1-K5	3	1-5
	4.3 Levy and Collection of GST, Concept of Supply – Mixed and Composite	K1-K5	3	1-5
	4.4 Computation of GST Liability - Place of Supply – Time and Value of Supply – Input Tax Credit (Problems)	K1-K4	5	1-5
5	Customs Law			
	5.1 Meaning, Features and Types of Custom Duty	K1-K5	3	1-5
	5.2 Customs Act, 1962, Applicability of Custom Duty on imported goods	K1-K5	3	1-5
	5.2 Infringement of the law – offences and penalties – Exemption from duty – customs duty drawback – duties free zones	K1-K5	4	1-5

SYLLABUS

(Effective from the academic year 2023 – 2024)

PROJECT

CODE: 23BA/MC/PR64

CREDITS: 4

GUIDELINES FOR PROJECT

Project should be the independent work of the student. Each student will choose a topic of their interest. The student will be assigned to a project guide.

The student can use Quantitative or Qualitative/Descriptive or both methods for their project work.

➤ **Page Limit:**

The project report should be submitted in the prescribed format ranging between 60 pages to 75 pages, typed in font Times New Roman - font size 14 for headings & 12 for contents, with 1.5 line spacing on A4 Size paper.

• The Project Report should include the following,

- Cover Page
- Certification
- Declaration
- Acknowledgement
- Index
- List of Contents
- List of Tables and Charts
- Abstract with keywords

➤ **Chapters in the Report:**

- Chapter 1 - Introduction - to include Background of the study, Company Profile, Objectives, Scope, Conceptual Framework, Limitations of the study
- Chapter 2 – Review of literature (15-20 reviews)
- Chapter 3 – Research Methodology
- Chapter 4 – Data analysis and Interpretation
- Chapter 5 – Findings, Suggestions and Conclusion

- Bibliography must be given in Alphabetical/chronological order and in APA format
- Annexure - Questionnaire

➤ **Submission:**

Each student has to submit two copies of the project.

➤ **Guidelines for Evaluation:**

There will be double valuation for the project report by the project guide (internal examiner) and an external examiner. The student will appear for viva -voce before a panel comprising External Examiner and Internal Examiner.

PATTERN OF ASSESSMENT

Internal Review Rubrics:

Internal Review	Rubrics for Evaluation	Cognitive Level	Marks
Review 1	Chapter 1 - Introduction - to include Background of the study, Company profile Objectives, Scope Conceptual Framework, Limitations of the study	K 1-5	10
Review 2	Chapter 2 – Review of literature (15-20 reviews)	K 1-5	10
Review 3	Chapter 3 – Methodology	K1-5	10
Review 4	Chapter 4 – Data analysis and Interpretation	K 1-5	10
Review 5	Complete Project with Chapter 5 – Findings, Suggestions and Conclusion	K 1-5	10

Continuous Assessment: Total Marks: 50

(Effective from the academic year 2023–2024)

CHANGE MANAGEMENT

CODE: 23BA/ME/CM45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint students with best practices for tactical change management
- To expose students to the personal and organisational approaches when dealing with change
- To enable the students develop skills for effectively communicating change
- To provide knowledge on planning and managing change
- To adopt resistance handling techniques to achieve desired change

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the core concept of change management	K1
CO2	identify the forces enabling and resisting change in an organization	K2
CO3	apply the various methods of communicating, managing and implementing change	K3
CO4	analyse the skill requirement for handling the change process	K4
CO5	evaluate the outcome with the desired change considering the suggestions and feedback	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.1 Change - Definition, Meaning and Nature of Organization Change	K1-K4	2	1-4
	1.2 Forces of Organizational Change – External and Internal Forces	K1-K5	3	1-5
	1.3 Theoretical Frameworks of Organization Change	K1-K5	5	1-5
2	Process and Communicating Change			
	2.1 Process of Change Management	K1-K3	2	1-3
	2.2 Need for Communicating Change, Factors Involved in Communicating Change	K1-K4	2	1-4
	2.3 Methods and Techniques for Communicating Change	K1-K5	3	1-5

UNIT	CONTENT	CL	HRS	CO
	2.4 Role of Top Management in Communicating Change	K1-K5	3	1-5
3	Resistance to Change			
	3.1 Nature of Resistance, Factors Contributing to Resistance	K1-K5	3	1-5
	3.2 The Behavioral Elements, Types of Resistance, Recognizing and Reducing Resistance to Change	K1-K5	4	1-5
	3.3 Suggestions for Managing Resistance to Change	K1-K5	4	1-5
	3.4 Methods of Handling Resistance and Techniques of Managing Resistance	K1-K5	4	1-5
4	Change Agent			
	4.1 Change Agent – Meaning, Types of Change Agent	K1-K4	2	1-4
	4.2 Role and responsibility of Change Agent	K1-K4	2	1-4
	4.3 Competencies of Change Agent			
	4.3.1 Personality Traits of a Change Agent	K1-K5	3	1-5
	4.3.2 Knowledge of a Change Agent	K1-K5	2	1-5
	4.3.3 Skills required for an role of a change Agent	K1-K5	2	1-5
	4.4 Characteristics of successful Change Agent	K1-K5	4	1-5
5	Implementing and Evaluating the Change			
	5.1 Strategies and Procedure to Implement Change	K1-K5	5	1-5
	5.2 Key Factors in Effective Change Management	K1-K5	5	1-5
	5.3 Concept of Monitoring and Evaluation, Methods of Evaluation and Feedback Process	K1-K5	5	1-5

SUPPLY CHAIN MANAGEMENT

CODE: 23BA/ME/SC45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To equip fundamental and key concepts of supply chain management
- To familiarize students with various supply chain strategies
- To expose concepts of logistics management, transportation, and distribution networks
- To promote an understanding of sustainability and role of technology in supply chain management
- To equip students with the knowledge and skills necessary for future careers in supply chain management, procurement, logistics, and related fields

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall key supply chain management terminology and concepts	K1
CO2	Explain the interdependencies and relationships between different components of the supply chain	K2
CO3	Apply supply chain strategies to specific business scenarios	K3
CO4	Analyze supply chain processes and strategies to evaluate their effectiveness	K4
CO5	Evaluate the impact of various supply chain decisions on business performance	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Supply Chain Management			
	1.1 Meaning, Definition, Importance, Types of Supply Chain	K1-K5	2	1-5
	1.2 Meaning, Definition, Historical Evolution, Activities, Features and Importance of Supply Chain Management (SCM)	K1-K5	4	1-5
	1.3 Process View - Supply Chain Management Linkages - Key drivers of a supply chain Management	K1-K5	4	1-5
2	Supply Chain Strategies			
	2.1 Strategic Supply Chain Management – Features - Supply Chain in Value Chain Perspectives	K1-K5	5	1-5

UNIT	CONTENT	CL	HRS	CO
	2.2 Strategic Role of Supply Chain Management - Strategic Supply Chain Management Architecture	K1-K5	5	1-5
	2.3 Strategic fit - Meaning, Achievement of strategic fit through different steps, Obstacles to achieving Strategic Fit	K1-K5	5	1-5
3	Supply Chain Planning, Sourcing and Procurement			
	3.1 Supply Chain Planning, Supply Chain Planning Matrix, Demand Planning, Purchase Planning	K1-K5	5	1-5
	3.2 Meaning, Sourcing Strategies in Supply Chain Management - In-housing or Outsourcing	K1-K5	5	1-5
	3.3 Role of Sourcing in Supply Chain; Benefits of Effective Sourcing Decisions	K1-K5	5	1-5
	3.4 Stages of the Procurement Process, Importance	K1-K5	3	1-5
4	Warehousing and Transportation			
	4.1 Warehousing – Meaning, Types, Functions, Strategy, Elements of Warehousing cost	K1-K5	4	1-5
	4.2 Transportation – Position of Transportation SCM, Elements of Transportation cost, Modes; Selection of Transportation Mode	K1-K5	4	1-5
5	Trend, Technology and Sustainability			
	5.1 Current trends in SCM; Agile and Reverse Supply Chain	K1-K4	4	1-4
	5.2 Role of Technology in Supply Chain Management	K1-K5	4	1-5
	5.3 Sustainability Practices, Green Supply Chain Management and their benefits	K1-K5	4	1-5
	5.4 Case Studies in SCM	K1-K5	2	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI, CHENNAI – 600 086

DEPARTMENT OF COMMERCE – SHIFT II

**BACHELOR OF COMMERCE – BANKING, FINANCE AND
ENTREPRENEURSHIP**

PROGRAMME DESCRIPTION

The B.Com. Degree programme on Banking, Finance & Entrepreneurship has been initiated by Stella Maris College in keeping with the need to have well trained personnel with requisite skills and competency to take up careers in the banking and financial services industry and to establish a business of their own. The programme aims towards building a foundation in banking and finance and creates an independent entrepreneurial thinking in students. The programme provides an overview of the business environment and the skills required to be a trained finance professional and an entrepreneur. This programme also complements students with the family business background assisting them in understanding the business operations and growth opportunities. This is a skill development programme with scope for being industry ready and for establishing a new venture.

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of 'Truth and Charity' thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately moulding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Com. in Banking, Finance and Entrepreneurship, the students will be able to

PSO 1	demonstrate an understanding of the concepts, methods and standards in business
PSO 2	comprehend the financial requirements of business ventures and underlying financial risks
PSO 3	assess and evaluate suitable skills in information technology, problem- solving and critical thinking to analyse and address issues relating to business
PSO 4	appreciate the significance of ethics in business and identify unethical practices
PSO 5	adopt appropriate business practices in evaluating and improving sustainability in business environment

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 Minutes

Section	Knowledge Level	Marks	Pattern
A	K1	10	3X2 = 6 (No Choice-50 words)
B	K2	10	2X5 =10 (out of 3 Questions-150 words)
C	K3, K4	20	2X10 =20 (internal choice for one K3 questions and one K4 question-500 words)
D	K5	10	1×14 = 14 (out of 2 questions-1000 words)

Other Components:

Total Marks: 50

Seminars / Quiz / Problem Solving / Assignment / Case Study / Mini Project

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Knowledge Level	Marks	Pattern
A	K1	10	5X 2 = 10 (No Choice-50 words)
B	K2	20	4 × 5 = 20 (out of 6 questions-150 words)
C	K3,K4	40	4 × 10 = 40 (internal choice between two K3 questions and two K4 questions-500 words)
D	K5	30	2 × 15 = 30 (out of 3 questions-1000 words)

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23BF/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water)and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23BF/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

COST MANAGEMENT

CODE: 23BF/MC/CM24

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide an understanding on the basic concepts of cost
- To equip students with the skills required to analyse and evaluate information for cost ascertainment and control
- To expose students to the lean resource management techniques
- To enable students to compare traditional allocation of overheads with the modern cost management techniques
- To acquaint students with various techniques of cost management in business environment

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Prepare income statements using variable costing and absorption costing	K1
CO2	Classify material and labor cost	K2
CO3	Apply different methods of determining overhead rates and estimate the Cost of Production	K3
CO4	Examine cost data to fix pricing and to take management decisions	K4
CO5	Choose the appropriate use of joint product and by-product costing	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Introduction to Cost Accounting			
	1.1.1 Scope and Objectives of Cost Accounting	K1-K2	2	1-2
	1.1.2 Classification of Costs - Cost Accounting Standards–1	K1-K3	2	1-3
	1.2 Absorption Costing			
	1.2.1 Meaning and Components of Cost Statement	K1-K4	2	1-4
	1.2.2 Computation of Total Cost and Profit	K1-K5	4	1-5
2	2.1 Material Cost – Cost Accounting Standards – 6			
	2.1.1 Computation of Material Cost	K1-K5	1	1-5

UNIT	CONTENT	CL	HRS	CO
	2.1.2 Stores Control -Techniques of Inventory Control, Economic Order Quantity, Level Setting		4	
	2.1.3 Issue Control - Stores and Material Records, Methods of Material Issue –First in First Out, Last in First Out, Average Cost- Simple and Weighted Average		4	
	2.1.4 Presentation and Disclosure in Cost Statements		2	
	2.2 Labour Cost – Cost Accounting Standards – 7 2.2.1 Computation of Labour Cost, Treatment of Overtime and Idle time		2	
	2.2.2 Presentation and Disclosure in Cost Statements		2	
3	Overheads – Cost Accounting Standards – 3 3.1 Classification of Overhead Costs	K1-K4	1	1-4
	3.2 Plant-wide vs. Departmental Overheads		2	
	3.3 Apportionment and Allocation of Overheads 3.3.1 Primary Distribution of Overheads	K1-K5	1	1-5
	3.3.2 Secondary Distribution of Overheads- Direct Distribution, Reciprocal and Non-Reciprocal Methods		2	
	3.4 Absorption of Overheads		2	
	3.5 Presentation and Disclosure in Cost Statements		2	
4	Costing Systems 4.1 Process Costing - Process Losses and Gains – Accounting Treatment of Normal and Abnormal Wastage and Abnormal Gain	K1-K5	4	1-5
	4.2 Joint and by Product Costing – Cost Accounting Standards – 19		3	
	4.3 Job Order Costing		3	
	4.4 Activity Based Cost Management - Features and Activity Analysis		3	
	4.5 Life-Cycle Costing		2	
5	Modern Cost Management Techniques 5.1 Lean Resources Management Techniques, Total Productive Maintenance, Throughput Accounting, Capacity Management and Analysis - Cost Accounting Standards – 2	K1-K5	7	1-5
	5.2 Business Process Improvement – Value Analysis, Value Engineering, Value Chain Analysis, Value-added Concepts, Process Analysis, Business Process Reengineering and Standardisation		8

SYLLABUS

(Effective from the Academic Year 2023 - 2024)

INTERNSHIP

CODE: 23BF/MC/IN22

CREDITS : 2

Internship is an integral part of the B.Com – Banking, Finance and Entrepreneurship Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

OBJECTIVES OF INTERNSHIP

- To integrate theory and practice
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

GUIDELINES:

- The student will undergo practical training in a reputed organization for 100 hours
- The student is expected to work in the Banking Sector
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- A final consolidated report to be submitted to faculty advisor

PREPARATION OF FINAL REPORT

The report should have a minimum of 50 pages detailing the work assigned and performed in the organization - Introduction of the Organisation / Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

PATTERN OF EVALUATION

Log book 20 marks

Project report & viva 80 marks

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / B.B.A./ B.C.A/B.S.W. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23BF/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

OBJECTIVES OF THE COURSE

- To provide an understanding of the concept of entrepreneurship.
- To deliver knowledge on the support mechanisms available for entrepreneurs.
- To familiarise students with various factors influencing entrepreneurship.
- To acquaint students on the strategies to overcome obstacles in business.
- To enable students develop a business plan for a new start-up.

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	explain the various components in an entrepreneurial ecosystem	K1
CO2	relate the interdependence of different elements of an entrepreneurial ecosystem which fosters innovation.	K2
CO3	plan the available sources of finance supporting entrepreneurs	K3
CO4	analyse the challenges and barriers that hinder the growth of an entrepreneurial ecosystem.	K4
CO5	interpret a comprehensive business plan for building a sustainable entrepreneurial ecosystem.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Entrepreneur - Meaning, Definition, Characteristics, Types and Functions of an Entrepreneur, Theories of Entrepreneurship, Role of Socioeconomic Environment.	K1-K3	3	1-3
	1.2 Role of Entrepreneurship in the Growth of Economic Development	K1- K4	2	1-4
	1.3 Entrepreneurship Development - Barriers (Internal and External)		3	
	1.4 Factors Influencing Entrepreneurship Development	K1-K5	2	1-5

UNIT	CONTENT	CL	HRS	CO
2	Creating Entrepreneurial Venture			
	2.1 Generating Business idea, Sources of Innovation, Generating Ideas, Creativity and Entrepreneurship	K1-K5	4	1-5
	2.2 Challenges in Managing Innovation, Entrepreneurial Strategy, Business Planning Process	K1-K4	2	1-4
	2.3 Drawing Business Plan, Business Plan Failures	K1-K5	2	1-5
	2.4 Promotion of a Venture, External Environmental Analysis- Economic, Social and Technological		2	
	2.5 Competitive Factors, Legal Requirements for Establishment of New Unit and Raising of Funds, Venture Capital Sources and Documentation Required		3	
3	Entrepreneurial Finance			
	3.1 Financial Planning – Meaning, Need and Process	K1-K4	2	1-4
	3.2 Sources Of Finance – Internal and External		2	
	3.3 Project Cost Analysis	K1-K5	3	1-5
	3.4 Venture Capital Financing, Angel Investors, Lease Financing, Crowd Funding		3	
4	Small Scale Enterprises			
	4.1 Small Scale Industries, Tiny Industries, Ancillary Industries, Cottage Industries	K1-K2	2	1-2
	4.2 Product Range, Capital Investment, Ownership Patterns	K1-K4	2	1-4
	4.3 Importance And Role Played By SSE In the Development Of The Indian Economy	K1-K3	3	1-3
	4.4 Problems Faced By SSEs – Steps Taken to Solve the Problems – Policies Governing SSEs	K1-K4	2	1-4
	4.5 Sickness In SSEs – Meaning and Definition of a Sick Industry, Causes Of Industrial Sickness, Preventive and Remedial Measures for Sick Industries	K1-K5	2	1-5
5	Government Initiatives in Promoting Entrepreneurship			
	5.1 Financial Assistance to Entrepreneur – Subsidies and Incentives	K1-K5	2	1-5
	5.2 MSME Policy in India	K1-K4	2	1-4
	5.3 State Development Promotion Agencies: District Industries Centers (Dic), Sipcot	K1-K5	2	1-5
	5.4 Small Industries Service Institute of India (SISI)		2

ACCOUNTING FOR DECISION MAKING

CODE: 23BF/MC/AD43

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To enable students to prepare and analyse financial statements
- To equip students with tools used for measuring financial performance
- To familiarise students on forex management
- To apply marginal costing techniques in decision making.
- To acquaint students with the importance of standard costing as a cost control technique

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	recall and define accounting concepts which influence business decisions.	K1
CO2	explain the relationship between cost, sales volume and profit	K2
CO3	apply the financial concepts to interpret financial statements and record effects of inflation in accounting	K3
CO4	analyse the financial statement for measuring financial performance.	K4
CO5	evaluate the standards and causes of variance in costing	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Financial Statement Analysis 1.1 Meaning and Process of Financial Statement Analysis	K1-K4	3	1-4
	1.2 Objectives, Types and Procedure for Analysis and Interpretation of Financial Statements	K1-K5	3	1-5
	1.3 Tools of Financial Statement Analysis – Comparative Statement Analysis, Common Size Statement Analysis and Trend Analysis		4	
2	Ratio Analysis 2.1 Liquidity, Activity, Profitability and Market Value Ratios	K1-K5	4	1-5
	2.2 Profitability Analysis using Ratios - Income Measurement Analysis, Revenue Analysis, Cost of Sales Analysis, Expense Analysis, Variation Analysis		6	

UNIT	CONTENT	CL	HRS	CO
3	Marginal Costing 3.1 Marginal Costing – Meaning and Definition	K1-K2	1	1-2
	3.2 Cost-Volume-Profit Analysis	K1-K5	3	1-5
	3.3 Application of Marginal Costing in Decision Making - Special Orders and Pricing, Make or Buy, Sell or Process Further, Add or Drop a Segment, Capacity Considerations, Profit Performance and Alternative Operating Levels		6	
4	Forex Management 4.1 Impact of Foreign Operations	K1-K2	1	1-2
	4.2 Effects of Changing Prices and Inflation	K1-K5	1	1-5

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE: 23BF/MC/IN42

CREDITS: 2

Internship is an integral part of the B.Com – Banking, Finance & Entrepreneurship Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

OBJECTIVES OF INTERNSHIP

- To integrate theory and practice
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

GUIDELINES:

- The student will undergo practical training in a reputed organization for 30 hours
- The student is expected to work in the Finance Sector.
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 50 pages detailing the work assigned and performed in the organization - Introduction of the Organisation/ Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

Pattern of Evaluation

Log book 20 marks

Project report & viva 80 marks

FINANCIAL ANALYSIS USING COMPUTERS PRACTICAL

CODE: 23BF/AC/FA45

CREDITS: 5

L T P: 1 0 4

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide a practical exposure to the tools adopted for financial analysis
- To expose students to the application of various statistical tools in business.
- To generate accounting reports in Tally.
- To acquaint students with the use of Excel in evaluating the financial performance
- To familiarise to draw logical conclusions using statistical tools.

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	identify the accounting software and packages available for financial analysis.	K1
CO2	explain the significance of using computer software and tools for financial analysis	K2
CO3	utilize spreadsheet software to perform quantitative analysis of financial data.	K3
CO4	analyse financial data using computer-based tools in business evaluation techniques.	K4
CO5	interpret the data using statistical tools	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO

TECHNOLOGY IN BANKING AND FINANCE

COPDE: 23BF/ME/TB45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint students about banking in a digital environment.
- To provide students an understanding on the innovative banking products.
- To familiarise students on IT structure of bank management.
- To equip students with the ability to assess potential cybersecurity threats and frauds.
- To enable students to comprehend the influence of automation in financial operations.

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	Describe the technology developments in the banking sector.	K1
CO2	Explain the role and need for digital banking.	K2
CO3	Apply technological strategies to address challenges related to cyber security in the financial sector.	K3
CO4	Analyse the role of ICT in banking	K4
CO5	Evaluate the effectiveness of specific technologies in enhancing customer experiences.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Information Technology in Banking			
	1.1 Recent development in Banking & Trends in Information Technology	K1-K3	4	1-3
	1.2 Usage and impact of IT in Banking	K1-K4	3	1-4
	1.3 Opportunities in Banking Industry- Development of Technology in Banks- Development of ICT based Banking.	K1- K5	4	1-5
	1.4 Emerging challenges in Banking industry - Scope of IT to Tackle the key challenges, Benefits of E-Banking		4	
2	Digital Banking			
	2.1 Meaning & Definition of Digital Banking	K1-K2	1	1-2

UNIT	CONTENT	CL	HRS	CO
	2.2 Need for Digitalization	K1-K4	2	1-4
	2.3 Dimensions of digital Banking- Internal, Customer, Regulatory, Technology, Data and Analytical Dimension; Digital Banking and Cash-less Payments	K1-K5	5	1-5
	2.4 CRM in a Digitalized Banking Environment, e-CRM Techniques and Benefits		4	
3	Banking Technology Management			
	3.1 Role of IDBRT (Institute of Development & Research in Banking) in Banking Technology Development	K1-K4	3	1-4
	3.2 Meaning of Banking Technology; Constituents of Banking Technology	K1-K3	3	1-3
	3.3 Role of ICT in banking	K1-K4	3	1-4
	3.4 Application of data mining and data warehousing in banking	K1-K5	4	1-5
4	IT Infrastructure for Management of Banks			
	4.1 Banking IT Infrastructure	K1-K4	3	1-4
	4.2 Elements and Models of Banking IT Infrastructure	K1-K5	3	1-5
	4.3 Integrated Circuit Card (ICC) – SWIFT, Origin of the Society working of SWIFT		4	
5	Cyber Security and Banking			
	5.1 Information security; Software Based Security System & Hardware Based Security	K1-K4	3	1-4
	5.2 Systems Hackers & the techniques used by the Hackers	K1-K5	3	1-5
	5.3 Site-authentication Methodologies and Security Measures		3	
	5.4 Encryption and security, Customer Confidentiality		3	
	5.5 Regulatory environment of Internet Banking	K1-K4	3	1-4

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI–600 086

DEPARTMENT OF COMMERCE

PROGRAMME DESCRIPTION

B.Com. (GENERAL)

The B.Com. (General) degree programme equip students with the knowledge and technical skills necessary to understand and participate in the modern business world. The programme allows the students' to critically evaluate and improve decision making skills.

It provides foundation for students who aspire to pursue professional courses such as CA, ICWA, CMA, ACCA, CFA and MBA. It enables the students to equip themselves for careers. It enables them to develop entrepreneurial skills and thus manage their own business effectively. To strengthen their skills and knowledge, workshops, seminars, guest lectures, business quizzes and mock interviews are conducted during the course of study. Apart from the academics, multiple cultural and social activities such as intra-departmental, intercollegiate cultural and social and environmental awareness programmes are conducted for holistic development and to create a sense of community.

VISION OF THE DEPARTMENT

The Department shares the vision of the College and aims at academic excellence integrating ethical, professional and personal skills that promote women to be well equipped to meet the global challenges in the business world.

MISSION OF THE DEPARTMENT

- ❖ To kindle in the students the curiosity to explore and acquire business knowledge pertaining to Commerce.
- ❖ To sensitize students about economic, social and ethical issues prevalent in the business environment.
- ❖ To work towards the integration of quality, creativity and emotional stability of the students.
- ❖ To contribute to the transformation of the less privileged students by making them employable and financially independent.

PROGRAMME SPECIFIC OUTCOMES (PSOS)

B.COM (GENERAL)

On successful completion of the B.Com. Programme, the students will be able to

PSO 1	acquire Fundamental knowledge in the arena of Business Management, Marketing, Accounting and to understand the web based business models and its applications
PSO 2	develop leadership qualities and managerial skills to be globally competent and spearhead entrepreneurial ventures.
PSO 3	Be acquainted with principles of various laws relating to formation and conduct of business.
PSO 4	Demonstrate interpersonal communication, business etiquette and relationship building skills.
PSO 5	Understand the importance of Ethics in Business, Social Responsibility, Corporate sustainability and impact of globalization

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23CM/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

OBJECTIVES OF THE COURSE

- To provide students an understanding of the basic concepts of cost accounting
- To classify the elements of cost and to determine the various estimates of cost.
- To expose students to the practical application of Costing
- To enable students to ascertain product and service cost through various methods
- To apply various costing techniques in the preparation of tenders and quotations.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	Explain the basic concepts of cost accounting	K1
CO2	Solve problems relating to Process and Operating Costing	K2
CO3	Analyse Material, Labour and Overhead Cost of production	K3
CO4	Estimate the cost price, selling price and the profit margin	K4
CO5	Prepare Cost Sheets, Tenders and Quotations	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Meaning, Objectives and Scope of Cost Accounting 1.2 Introduction to cost Audit and Records and Cost Standards 1.3 Advantages and Limitations of Cost Accounting, Difference Between Financial accounting and Cost Accounting 1.4 Unit Costing - Cost Center and Cost Units- Methods of Costing, Elements of Cost, Cost Concepts and Classification of Cost 1.4.1 Preparation of Cost Sheet, Quotations or Tenders	 K1, K2 K1, K2 K1, K2 K2 – K5	15	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	2.1 Material Cost and Material Control 2.1.1 Computation of Material Cost and Accounting Treatment for Normal, Abnormal Loss 2.2 Essentials of Material Control, Purchase Control – Purchase Procedure 2.2.1 Store Control :Techniques of Inventory Control – Economic Order Quantity, Level Setting 2.2.2 Issue Control: Methods of Material Issue – First In First Out, Last In First Out, Average Cost - Simple and Weighted Average Cost.	K1 –K2 K1 –K4 K1 –K2 K1 – K3 K2 – K5	13	CO1-5
3	Labour Cost, Remuneration and Incentives 3.1 Computation of Labour Cost with Overtime and Idle Time and Computation of Labour Turnover 3.2 Methods of Remuneration- Time Rate System, Piece Rate System, Taylor’s Differential Piece Rate System. 3.3 Incentive Plans -Halsey Premium Plan, Rowan Premium Plan	K1 – K3 K3 – K4 K3 – K4	13	CO1-4
4	Overheads 4.1 Importance and Classification of Overhead Costs 4.2 Apportionment and Allocation of Overheads 4.2.1 Primary Distribution of Overheads 4.2.2 Secondary Distribution of Overheads- Direct Distribution, Reciprocal and Non Reciprocal Methods 4.3 Methods of Absorption of Overheads 4.3.1 Direct Labour Hour Rate 4.3.2 Machine Hour Rate 4.3.3 Activity Based Absorption	K1, K2 K3 – K5 K3 – K5	11	CO1-5
5	Process and Operating Costing 5.1 Process Costing 5.1.1 Meaning and Features of Process Costing 5.1.2 Process Losses and Gains – Accounting Treatment of Normal and Abnormal Wastage 5.1.3 Inter-Process Profit 5.2 Operating Costing - Transport Costing only 5.3 Activity Based Costing (Theory only)	K1 – K5 K1 – K5 K1 - K2	13	CO1-5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the role of the marketing function within a firm
- To identify the elements of the marketing mix strategies
- To describe and explain key market segmentation and targeting strategies
- To compare various marketing and pricing strategies
- To recommend and justify an appropriate mix of the 4P's to create a cohesive marketing strategy for a new product

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Comprehend the various functions and roles of Marketing	K1
CO2	Examine the varied elements of Marketing Mix	K2
CO3	Categorise the processes involved in the Development of a new Product	K3
CO4	Compare and contrast the key market segmentation methods and targeting strategies	K4
CO5	Develop a pricing/marketing strategy for introducing a new/existing product	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

BUSINESS STATISTICS

CODE: 23CM/AC/BS25

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To give a practical exposure to the students on the various statistical methods
- To enable students to understand, analyse and interpret the data using various statistical tools and techniques
- To equip the students to apply the various forecasting techniques
- To facilitate rational decision making through systematic analysis and interpretation
- To educate the students on the effective and efficient application of various statistical tools associated with research in business fields

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Demonstrate knowledge on various statistical techniques	K1
CO2	Compute the statistical parameters to forecast business trends	K2
CO3	Apply parametric and non-parametric tests in hypothesis testing	K3
CO4	Analyse the statistical tools and techniques to arrive at rational decisions	K4
CO5	Undertake research in various business fields	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Analysis of Time Series		14	
	1.1 Utility and Component of Time Series	K1 – K2		CO 1-3
	1.2 Methods of Measuring Trend – Graphic method, Semi Average method, Moving Average method, method of Least Squares, Second Degree Parabola and Exponential trends	K2 – K5		CO1-5
	1.2.1 Shifting the trend origin	K2 – K5		
	1.2.2 Conversion of annual trend values to monthly values			

UNIT	CONTENT	CL	HRS	CO
	1.3 Measurement of Seasonal Variation- Method of Simple Averages, Ratio-to-Trend method, Ratio-to-Moving Average method, Link Relative method.			
2	Correlation and Regression 2.1 Simple Linear Correlation Analysis – Karl Pearson’s Co- Efficient and Spearman’s Rank Correlation, Bi-variate Analysis 2.2 Partial and Multiple Correlations 2.3 Regression Analysis and Regression Equations and Estimation, Bi-variate Analysis	K1 – K5 K1 – K4 K2 – K5	15	CO1-5
3	Test of Hypothesis 3.1 Procedure for Testing Hypothesis 3.2 Test of Significance for Large Sample 3.3 Test of Significance for Small Sample	K1 – K2 K1 – K4 K2 – K5	12	CO1-5
4	Chi- square Test 4.1. Meaning and Conditions for applying Chi – Square Test 4.2 Application, Uses and Limitations of Chi – Square Test 4.2.1 Test of Homogeneity 4.2.2 Test of Independence 4.3 Yates Correction	K1 – K2 K1 – K5 K1 – K2	12	CO1-5
5	Analysis of Variance 5.1 Variance Ratio Test 5.2 Assumption of Analysis of Variance 5.3 Techniques of Analysis of Variance 5.3.1 One Way Classification Model 5.3.2 Two Way Classification Model	K1 – K3 K1 - K2 K3 – K5	12	CO1-5

ENVIRONMENTAL STUDIES

CODE:23CM/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

PATTERN OF ASSESSMENT

Continuous Assessment Test: **Total Marks: 25** **Duration: 60 minutes**
Section A-10 x 1 = 10 Marks (All questions to be answered) Multiple Choice Questions
Section B - 3 x 5 = 15 Marks (3 out of 6 to be answered in 150 words each)

Other Component: **Total Marks: 25**
Any **one** of the following for 25 marks
Quiz/Scrap Book/Assignment / Poster Making/Case Study/Project/Survey/Model-Making

No End Semester Examination

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / B.B.A. / B.S.W. / B.C.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23CM/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable the students to analyse the financial data for effective managerial decision making
- To familiarise the students with the various budgeting techniques
- To expose the students to the practical applications of cost control concepts.
- To outline the techniques for effective planning and forecasting
- To facilitate the students to perform the analysis of variance, between actual cost and the predetermined standard cost.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Interpret the data for financial statement analysis	K1
CO2	Apply the relevant tools and techniques for cost control and effective planning	K2
CO3	Analyse the variance between actual cost and standard cost.	K3
CO4	Estimate the projections based on budgetary analysis	K4
CO5	Devise strategies for effective managerial decision making	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Management Accounting – Meaning, Definition, Nature and Scope 1.2 The difference and relationship between Management Accounting, Financial Accounting and Cost Accounting 1.3 Tools and Techniques of Management Accounting 1.4 Advantages and Limitations of Management Accounting 1.5 Duties and functions of Management Accountant, Organization for Management Accounting	 K1 – K2 K1 – K3 K1 – K4 K1 – K3 K1 – K4	 10	 CO1-5

COMPUTER APPLICATIONS IN BUSINESS

CODE: 23CM/AC/CB35

CREDITS: 5

L T P : 2 0 4

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE:

- To impart knowledge to the students on computer skills relating to business environment
- To expose students to the tools for financial analysis and reporting techniques using Tally
- To familiarise the students with data analysis techniques using Excel.
- To provide students hands on experience on business forecasting techniques
- To enable students to use appropriate tools for effective decision-making

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	Identify tools for financial data analysis and reporting techniques	K1
CO2	Estimate the financial position of a company using forecasting techniques	K2
CO3	Apply the advanced features in Tally and Excel in financial analysis	K3
CO4	Analyse budgets and payrolls for financial decision making	K4
CO5	Evaluate business projects using data analysis, time value and capital budgeting techniques	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Accounting Package – Tally 1.1 Introduction to Tally - Creation, Alteration and Deletion of a Company 1.2 Creation, Alteration and Deletion of Group and Ledger 1.3 Accounting Vouchers – Types, Voucher Entry 1.4 Preparation of Financial Statement – Day Book, Trial Balance, Profit and Loss and Balance Sheet 1.5 Ratio Analysis	K1 – K5 K1 – K5 K3 – K5 K3 – K5 K1 – K3	20	CO1-5

UNIT	CONTENT	CL	HRS	CO
2	MS Excel for Financial Statement and Business Forecasting 2.1 Techniques of Financial Statement Analysis 2.1.1 Comparative Statement 2.1.2 Common Size Statement 2.1.3 Trend Percentage	K1 – K5	12	CO1-5
3	3.1 Preparation of Budget – Sales Budget, Purchases budget, Cost of Production, Flexible Budget and Cash Budget 3.2 Payroll Analysis – Computation of salary and wages with allowances and deductions	K1 –K5 K1 –K5	16	CO1-5
4	Data analysis using Excel 4.1. Sorting of data, filtering data, pivot table 4.1.1 ANOVA, Correlation. Regression, Moving average, t-test, f-test, Chi Square and descriptive statistics using data analytics.	K1 –K5 K1 –K5	15	CO1-5
5	Application of Financial and Statistical function 5.1 Business Evaluation Techniques using financial functions 5.1.1 Time Value of Money - Future Value and Present Value 5.2 Evaluation Techniques 5.2.1 Pay Back Period 5.2.2 Net Present Value 5.2.3 Internal Rate of Return 5.3 Methods of Depreciation 5.3.1 Straight line method 5.3.2 Double declining balance method 5.3.3 Sum of the years digits method 5.4 Statistical Functions – Mean, Median, Mode, Standard deviation, Trend, ANOVA, Correlation. Regression, Moving average, t-test, f-test, Chi Square	K1 –K5 K1 –K5 K1 –K5 K1 –K5	15	CO1-5

**Allied Core Course offered by the Department of Mathematics for
B.Com. (General) Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICS FOR COMMERCE

CODE: 23MT/AC/MT45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the fundamental mathematical concepts pertaining to the discipline of commerce
- To employ different techniques to solve problems pertaining to matrices, equations and LPP
- To appreciate the concept of numerical differentiation and integration as an alternate tool to solve problems on differentiation and integration
- To promote problem solving skills and quantitative analysis
- To model and solve real time problem using linear programming method

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define the basic mathematical concepts on matrices, equations, differentiation, integration and linear programming problem	K1
CO2	understand and compare the concepts relating to matrices, polynomials, numerical methods and linear programming problem	K2
CO3	utilize suitable mathematical concepts and skills to solve problems including those in real life contexts	K3
CO4	analyse and examine the problem relating to the applications of matrices, differentiation, integration and optimization	K4
CO5	evaluate solutions to the problems related to matrices, equations, differentiation, integration and linear programming problem	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyze K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Matrices 1.1 Types of Matrices 1.2 Characteristic Equation of a Matrix 1.3 Cayley - Hamilton Theorem (without proof) 1.4 Eigen Values and Eigen Vectors 1.5 Diagonalization of 3×3 Matrices with Distinct Eigen Values	K1- K5	13	CO1-5
2	Theory of Equations 2.1 Formation and Solution of Equation with Imaginary and Irrational Roots 2.2 Relation between Roots and Coefficients 2.3 Solution of Equations under given Conditions 2.4 Symmetric Functions of the Roots of an Equation in terms of its Coefficients 2.5 Reciprocal Equations	K1-K5	14	CO1-5
3	Numerical Methods Algebraic and Transcendental Equations 3.1 The Bisection Method 3.2 Newton - Raphson Method Simultaneous Equations 3.3 Gaussian Elimination Method 3.4 Gauss Jordan Elimination Method 3.5 Gauss Jacobi Iteration Method 3.6 Gauss Seidal Iteration Method	K1-K5	13	CO1-5
4	Numerical Differentiation and Numerical Integration 4.1 Derivatives using Newton's forward difference Formula 4.2 Derivatives using Newton's backward difference Formula 4.3 Trapezoidal Rule 4.4 Simpson's One Third Rule 4.5 Simpson's Three Right Rule	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
5	Linear Programming Problem 5.1 General L.P.P. 5.2 Canonical and Standard Forms of L.P.P. 5.3 The Simplex Algorithm 5.4 The Big-M method	K1-K5	13	CO1-5

BUSINESS RESEARCH

CODE: 23CM/MC/BR54

CREDITS:4

L T P: 5 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the fundamentals of business research.
- To identify the research gap through proper analysis of past studies.
- To familiarize research design and sampling techniques.
- To use appropriate data collection methods and apply statistical tools for justifying the study.
- To prepare and present the research report.

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	Comprehend and use the fundamentals of Research Methodology in their research and project work.	K1
CO2	Identifying the research problem and write reviews based on the study.	K2
CO3	Determine appropriate research design and sampling techniques.	K3
CO4	Gather data, process the data, and analyze it appropriately.	K4
CO5	Develop and test hypothesis and create a Business Research Report	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Research 1.1 Meaning, Objectives and Significance of research 1.2 Types of research, Approaches and Scientific Research 1.3 Research process and Criteria for good research 1.4 Challenges and Problems in Research	K1 - K2 K1 – K5 K1 - K4 K1 - K2	15	CO1-5
2	Defining Research Problems and Evaluating the Reviews 2.1 Selecting and defining the problem 2.2 Techniques involved in defining a problem 2.3 Significance of Review of Literature 2.4 Review of Literature - Sources	K1 - K3 K1 – K4 K1 – K4 K1 - K3	10	CO1-5
3	Research Design and Sampling Techniques 3.1 Meaning, Need, Features and Importance of research design 3.2 Research Design - Types 3.3 Sampling Designs – Steps, Criteria, Characteristics and types 3.4 Scaling – Meaning and Importance 3.5 Scaling Techniques – Likert's Scale	K1 – K2 K1 – K2 K1 – K2 K1 – K2	15	CO1-5
4	Data Collection and Analysis of Data 4.1 Data Collection – Primary data and Secondary data 4.2 Processing Operations in Analyzing data - Coding of data 4.3 Tools and techniques in Data Analysis using Excel	K1 – K2 K1 – K2 K1 – K2	15	CO1-5
5	Testing of Hypothesis, Interpretation and Report writing 5.1 Basic concepts and Procedure for testing Hypothesis 5.2 Interpretation – Meaning and Techniques 5.3 Report writing – Significance, Steps, Layout and Types 5.5 Mechanics of writing a report 5.6 Reference Styles – MLA, APA	K1-K6	10	CO1-5

INCOME TAX LAW AND PRACTICE

CODE: 23CM/MC/IT 54

CREDITS: 4

L T P : 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint the students with the Provisions of the Income Tax Act
- To understand the significance of residential status of an individual in Income Tax Assessment
- To enable the students to compute the income under different heads of income
- To educate the students on the computation of taxable income and tax liability
- To familiarise the students with various deductions available under Sec. 80 for tax planning of an individual

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	Remember the Provisions of the Income Tax Act relevant to an Individual Assessee	K1
CO2	Elaborate the scope of total income and categorise them under each head of income	K2
CO3	Compute the income under each Head for an individual	K3
CO4	Analyse the various options available for deductions	K4
CO5	Assess the total taxable income and tax liability	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Taxation 1.1 Importance and Relevance of Taxation 1.2 An overview of the Income Tax Act 1961 1.3 Types of Tax - Direct and Indirect Taxation 1.4 Important Definitions under The Income Tax Act 1961- Assessee, Persons, Assessment Year - Previous Year, Total Income 1.5 Residential Status and Scope of Total Income	K1, K2 K1, K2 K1, K2 K1 – K3 K1 – K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Computation of Salary Income and Income from House property 2.1 Computation of Income under the Head Salary 2.1.1 Allowances - Perquisites - Profit in Lieu of Salary, Treatment of Provident Fund 2.1.2 Deductions, Computation of Salary Income 2.2 Computation of Income under the Head House Property 2.2.1 Basis of Charge 2.2.2 Computation of Self-occupied and Let-out House 2.2.3 Deductions	K1 – K5 K1 – K5 K1 – K5 K1 – K5 K1 – K5 K1 – K5	15	CO1-5
3	Computation of Profits and Gains of Business or Profession 3.1 Income chargeable under the Head Profits and Gains of Business and Profession 3.2 Income and Expenditure - allowed and disallowed 3.3 Depreciation	K1 – K5 K1 – K5 K1 – K5	12	CO1-5
4	Computation of Capital Gains and Income from other sources 4.1 Meaning and Types of Capital Gains 4.1.1 Computation of Short Term and Long Term Capital Gains 4.1.2 Exempted Capital Gains 4.2 Income from Other Sources 4.2.1 Basis of Charge, Casual and Other Income 4.2.2 Computation of Taxable Income from Other Sources	K1 – K5 K1 – K5	13	CO1-5
5	Computation of Total Income and Tax Liability 5.1 Set off and carry forward of losses 5.2 Computation of Gross total income 5.3 Deductions allowed under Section 80 for an Individual 5.4 Computation of Taxable Income and Tax Liability. 5.4.1 Old and New Tax Regime – An Overview	K1 – K5 K1 – K5 K1 – K5 K3 – K5 K1-K3	13	CO1-5

RETAIL MANAGEMENT

CODE: 23CM/ME/RM45

CREDITS: 5

L T P : 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint the students with the knowledge of contemporary retail management issues
- To give a clear picture on the concepts of retailing
- To enable the students to understand the functioning of the retail industry
- To comprehend the buyer behaviour in Retail business
- To expose the students to the challenges faced in Retail business

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	relate to the concepts of Retail Management in practice	K1
CO2	gain a perspective on challenges of Retail markets	K2
CO3	examine the factors influencing Retail marketing mix and analyse their components	K3
CO4	justify the consumer behaviour and buying process	K4
CO5	evaluate the modern trends in retailing	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Retailing 1.1 Meaning, Definition of Retailing, Growing Importance of Retail Concept 1.2 Functions of Retailing-Dynamic Nature 1.3 Retail Formats 1.4 Retail Business in India-Influencing Factors, Present Indian Retail Scenario	K1 – K2 K1-K2 K2-K3 K1- K5	12	CO1-5

UNIT	CONTENT	CL	HRS	CO
2	Retail Marketing Mix 2.1 Product-Decisions related to Choice of Goods and Service Delivery 2.2 Pricing-Influencing Factors, Approaches to Pricing 2.3 Supply Channel –Principles and Retail Logistics 2.4 Retail Promotion-Objectives and Promotional Mix	K1-K3 K1-K4 K3-K5 K1-K2	12	CO1-5
3	Retail Operations 3.1 Factors Influencing Location of Stores - Atmospherics 3.2 Stores Layout and Visual Merchandising- Stores Designing, Space Planning and Inventory Management 3.3 Merchandise Management- Need, Importance and Process, Retail Strategies	K1 -K2 K1-K5 K1-K5	15	CO1-5
4	Consumer Behaviour in Retail Business 4.1 Buying Decision Process and Implication in Retailing 4.2 Customer Shopping Behaviour- Customer Service and Customer Satisfaction 4.3 Customer Relationship – Customer Retention	K2-K5 K1-K3 K1-K3	15	CO1-5
5	Emerging Trends in Retailing 5.1 Changing Nature of Retailing 5.2 Organised Retailing, Modern Retailing and E- Tailing 5.3 Challenges faced by Indian Retail Sector- Legal Aspects in Retailing, Social and Ethical Issues in Retailing	K1-K2 K3-K4 K3-K5	11	CO1-5

SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

CODE: 23CM/ME/SP45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide conceptual knowledge on investment and securities analysis
- To develop an understanding on wealth maximization and risk minimization using securities and portfolio analysis techniques.
- To provide computational knowledge on investment alternatives that maximize the returns and minimize the risk.
- To familiarize the concept of intrinsic value of a security through fundamental analysis.
- To study the movements and fluctuations through technical charts and patterns.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	build conceptual knowledge and understanding on investment and securities analysis	K1
CO2	undertake portfolio analysis to determine risk and return for portfolio construction	K2
CO3	study the movements and fluctuation through technical charts and patterns	K3
CO4	apply EIC approaches for investment decisions and portfolio construction	K4
CO5	estimate the value of bonds and equities for investment decisions	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO

MARKETING ANALYTICS

CODE: 23CM/ME/MA45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable students to summarize data using excel sheet and construct pivot table.
- To develop knowledge about pricing models and theories.
- To exposes student on practical knowledge about sales forecasting using excel
- To develop understanding about market segmentation using classification tree and cluster analysis
- To study about forecasting new product sales using bass diffusion model using excel.

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	tabulate data using excel sheet and construct pivot table and charts	K1
CO2	develop knowledge on pricing models and theories	K2
CO3	apply practical knowledge about sales forecasting using excel	K3
CO4	explain market segmentation using cluster and decision tree analysis	K4
CO5	evaluate New Product Sales and Customer Value	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HOURS	CO
1	Introduction – Summarizing Marketing Data using Excel 1.1 Slicing and Dicing Marketing Date with Pivot table 1.2 Summarizing marketing data using excel charts 1.3 Summarizing marketing data using excel functions	K1 – K4 K1 – K5 K1 – K5	10	CO1 -5
2	Pricing 2.1 Price Bundling 2.2 Price skimming and sales 2.3 Non – linear pricing	K1 – K2 K1 – K3 K1 – K5	15	CO1 -5

UNIT	CONTENT	CL	HOURS	CO
3	Forecasting Sales 3.1 Ratio to moving average forecasting methods. 3.2 Simple linear regression and correlation 3.3 Multiple regressions to forecast sales	K1 – K5 K1 – K5 K1 – K5	15	CO1-5
4	Market Segmentation 4.1 Cluster Analysis 4.2 Collaborative Filtering 4.3 Using classification trees for segmentation	K1 – K5 K1 – K5 K1 – K6	10	CO1 -5
5	Forecasting New Product Sales and Customer Value 5.1 Using S curve to forecast sales of a new product 5.2 The Bass diffusion model 5.3 Using the Copernican principle to predict duration of future sales 5.4 Calculating Lifetime customer value – using customer value to value a business 5.5 Customer value, Monte Carlo Simulation, and Marketing Decision	K1 – K4 K1 – K4 K1 – K6 K1 – K6 K1 – K5	15	CO1-5

CONSUMER RIGHTS

CODE: 23CM/UI/CR23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To provide knowledge about consumerism and related laws
- To enable an understanding of the importance of consumer rights
- To educate students on the rights and responsibilities of a consumer

COURSE LEARNING OUTCOMES

On successful completion of this course students will be able to

- Identify the need for consumer protection and the areas covered by consumer protection law
- Learn and evaluate the various forms of consumer exploitation
- Analyse and evaluate the rights of the consumer
- Understand the business malpractices and legislative regulations to protect consumers.

Unit 1

Consumers

- 1.1 Meaning of Consumers-Customers
 - 1.1.1 Consumer Movements – Historical Perspectives
 - 1.1.2 Concept of Consumerism – Need and Importance

Unit 2

Consumer Exploitation

- 2.1 Meaning, Causes of Consumer Exploitation
- 2.2 Forms of Consumer Exploitation – Underweight Measures, High Prices, Substandard Quality, Poor or Inadequate After Sales Services
- 2.3 Challenges of Consumer Exploitation

Unit 3

Consumer Rights and Duties

- 3.1 Consumer Rights – John F Kennedy's Consumer Bill of Rights
- 3.2 Types of Consumer Rights – (Right to Safety, Right to Information (RTI), Right to Redressal, Right to Consumer Education)
- 3.3 Duties of Consumers

Unit 4

Copra Act 1986

- 4.1 Introduction to COPRA Act
- 4.2 Consumer Protection Council – Central, State, Districts Consumer Protection Councils
- 4.3 Consumer Dispute Redressal Procedure

Unit 5

Consumerism in India

- 5.1 Reasons for the Growth of Consumerism in India
- 5.2 Recent Trends in Consumerism
- 5.3 Problems Faced by Consumers in India – Case Studies

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI

DEPARTMENT OF COMMERCE – SHIFT II

BACHELOR OF COMMERCE IN CORPORATE SECRETARYSHIP

PROGRAMME DESCRIPTION

B.Com. Corporate Secretaryship, a three-year degree programme, primarily focuses on the areas of secretarial practices and corporate laws. The programme is designed to bridge the gap between conceptual learning and practical application to inculcate professional corporate expertise. The combination of core skills and specialised knowledge provided in this programme would enable students to adapt effectively to the dynamic business environment. Internship and Practical Application are an integral part of the programme. An exposure to corporate proceedings enables the students to maintain documents in accordance with accounting standards and procedures. Drafting and Conveyancing, the flagship course in Corporate Secretaryship, helps in enriching the professional skills of the students.

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of ‘Truth and Charity’ thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately molding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Com. in Corporate Secretaryship programme, the students will be able to

PSO 1	Acquire knowledge in the various areas of Corporate Secretaryship and laws relating to Trade and Commerce
PSO 2	Keep pace with dynamic global industry changes
PSO 3	Assess, rectify and report the incidents of legal compliance and breaches
PSO 4	Appreciate the significance of ethics in business and identify unethical practices
PSO 5	Demonstrate a comprehensive knowledge of the concepts and sustainable principles and practices

ORGANISATION STRUCTURE & MANAGEMENT

CODE:23CO/MC/OS13

CREDITS:3

L T P:3 1 0

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To enable students to appreciate the principles of management
- To familiarize students with the different management thoughts
- To acquaint students with the need for competence, trust and teamwork in the organisation
- To provide an understanding of the functions of management
- To expose students to the recent practices in management

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the concept, importance and framing of organization structure and classical approach to management	K1
CO2	compare the various types of control process and changes in organisation	K2
CO3	apply the analytical skills for planning and decision making	K3
CO4	distinguish between different organizational structures and leadership styles	K4
CO5	assess the various skills and procedures required for effective management of employees in an organization	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Organisation Structure 1.1. Meaning, Importance and Role of Organisation Structure	K1-K2	1	1-2
	1.2 Theory of Organisation Structure	K1-K5	1	1-5
	1.3 Impact of Environment and Cultural Variables on Organisational Structure		1	
	1.4 Building Blocks of Organisation Structure 1.4.1 Centralisation		2	
	1.4.2 Formalisation		2	
	1.4.3 Hierarchical Levels	K1-K3	2	1-3
	1.4.4 Departmentation	K1-K5	2	1-5
2	Introduction to Management 2.1. Management Thought 2.1.1 Classical and Neo Classical Systems – Contingency and Contemporary	K1-K2	1	1-2
	2.1.2 Approach to Management - Henri Fayol, F.W Taylor, George Elton Mayo and Peter.F Drucker	K1-K5	4	1-5
	2.2 Functions of Management I 2.2.1 Planning - Meaning, Importance, Types and Process	K1-K4	3	1-4
	2.2.2 Organising – Nature and Importance, Organising Trends and Practices – Chain of Command, Unity of Command, Span of Control, Delegation and Empowerment	K1-K5	4	1-5
3	Functions of Management II 3.1 Staffing 3.1.1 Recruitment and Selection	K1 – K5	2	1-5
	3.1.2 Training – Need and Types	K1 – K4	2	1-4
	3.2 Directing	K1 – K5	2	1-5
	3.2.1 Motivation – Meaning and Maslow’s Theory of Motivation		2	
	3.2.2 Leadership		2	
	3.2.3 Communication – Types, Process and Barriers		2	

4	Functions of Management III 4.1 Controlling - Meaning, Importance, Steps in the Process of Controlling, Types and Techniques of Controlling	K1 – K5	4	1-5
	4.2 Co-ordinating - Meaning, Need, Requisites		4	
5	Recent Developments in Management 5.1 Change Management - Concept, Nature and Process of change	K1- K5	4	1-5
	5.2 Knowledge management, Total Quality Management and Business Process – Re-Engineering - An Overview		5

QUANTITATIVE TECHNIQUES FOR BUSINESS

CODE: 23CO/AC/QT15

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To familiarize students on the use of statistical tools
- To provide an understanding of the process of analysis and interpretation
- To expose students to the concepts related to testing of hypothesis
- To enable students to study the relationship between variables used in research
- To apply the appropriate statistical tools for data analysis

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify appropriate statistical techniques for business data analysis.	K1
CO2	relate statistical approaches to solve real time business problems	K2
CO3	classify and compare business data for decision making	K3
CO4	analyze and interpret the relationship between variables	K4
CO5	evaluate the effectiveness of statistical tools in solving business problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Descriptive Statistics 1.1 Data Types – Univariate Summaries	K1- K2	1	1-2
	1.2 Multivariate Summaries - Karl Pearson's Co-efficient of Correlation	K1- K5	5	1-5
	1.3 Partial Correlation of First Order and Second Order Co-efficient Co- efficient of Multiple Correlations		4	
2	Test of Hypothesis 2.1 Procedure for Testing Hypothesis	K1-K2	1	1-2
	2.2 Test of Significance	K3-K4	1	3-4
	2.3 Parametric and Non-Parametric Approaches	K1-K2	1	1-2
	2.4 Test on Single Parametric Value – z Test, t Test	K3-K5	5	3-5
	2.5 Test for Difference of Two Parametric Values		5	
	2.6 Variance Ratio Test 2.6.1 One-way Classification Model – One-way ANOVA	K1-K5	1	1-5
	2.6.2 Two-way Classification Model – Two-way ANOVA		6	
3	Categorical data and Chi-square test 3.1 Introduction to Categorical Data	K1-K2	1	1-2
	3.2 Meaning and Conditions for Applying Chi-Square test		1	
	3.3 Application of Chi Square Test - Test of Goodness of Fit and Test of Independence – Yates Correction	K1-K5	8	1-5
4	Regression 4.1 Regression – Meaning and Definition, Comparison Between Correlation and Regression	K1-K2	1	1-2
	4.2 Regression lines on X on Y and Y on X, Regression Equation, Multiple Regression	K1-K5	9	1-5

UNIT	CONTENT	CL	HRS	CO
5	Times Series Analysis			
	5.1 Meaning, Definition, utility, Components	K1-K2	1	1-2
	5.2 Method of Free Hand and Semi-Average	K1-K4	2	1-4
	5.3 Computation of Method of Least Square	K2-K5	6	2-5
	5.4 Computation of Seasonal Variations		6

ENVIRONMENTAL STUDIES

CODE:23CO/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23CO/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23CO/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)
