OBJECTIVES OF THE COURSE

- To familiarize students with an understanding of the GST law in the country
- To provide students with the working knowledge of the principles and provisions of GST
- To enable students to analyze and understand the implications of GST
- To develop a comprehensive understanding of GST principles, mechanisms, and compliance requirements.
- To acquaint students with the legal and procedural aspects of GST, enabling accurate interpretation and application of tax regulations

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and interpret the concepts for GST	K1
CO2	comprehend different aspects of the Goods and Service Tax (GST) framework	K2
CO3	compute and examine the various payment and levying methods under GST	K3
CO4	record and analyze the transactions for compliance under GST.	K4
CO5	evaluate the effectiveness of GST Return's applicability in various fields	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Constitutional Framework of Indirect Taxes before GST (Taxation Powers of Union and State Government)	K1-K5	4	1-5
	1.2 Concept of VAT-Meaning, Variants and Methods, Major Defects in the Structure of Indirect Taxes prior to GST		5	
	1.3 Rationale for GST- Structure of GST (SGST CGST, UTGST & IGST) 1.3.1 GST Council, GST Network, State Compensation Mechanism, Registration.		6	
2	Levy and Collection of GST 2.1 Taxable Event- “Supply “of Goods and Services, Place of Supply, Within State, Interstate, Import and Export, Time of Supply	K1-K5	3	1-5
	2.2 Valuation for GST- Valuation Rules, Taxability of Reimbursement of Expenses		4	
	2.3 Exemption from GST- Small Supplies and Composition Scheme		4	
	2.4 Classification of Goods and Services- Composite and Mixed Supplies.		4	
3	Input Tax Credit 3.1 Basic concept, Simple Illustrations on Calculation of GST and Input Tax Credit	K1 – K5	5	1-5
	3.2 Order of Adjustment of Input Tax Credit against Output CGST, SGST, IGST.		7	
4	Payment of GST 4.1 Time of GST Payment	K1-K5	3	1-5
	4.1.1 Modes of Payment		3	
	4.1.2 Challan Generation		3	
	4.1.3 CPIN TDS and TCS		3	
5	Procedures and Special Provisions 5.1 Tax Invoice, Credit and Debit Notes, Returns, Audit in GST	K1- K5	3	1-5
	5.2 Assessment- Self-Assessment, Summary and Scrutiny.		2	
	5.3 Taxability of E-Commerce, Anti-Profiteering, Avoidance of Dual Control, E-way Bills, Zero-Rated Supply, Offences and Penalties, Appeals		3	
	5.4 Applicability of GST Audit		3

B.Com. DEGREE: CORPORATE SECRETARYSHIP

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE:23CO/MC/IN64

CREDITS:4

OBJECTIVES OF THE COURSE

- To provide students with hands-on training on secretarial responsibilities
- To familiarize students with the organization structure
- To enhance students' employability
- To widen the social and cultural experience of students
- To enable students to identify and develop professional skills

COURSE LEARNING OUTCOMES:

On successful completion of the internship, students will be able to

- Identify additional skills on career enhancement
- Acquire technical competence on secretarial activities undertaken
- Realign learning towards employability
- Handle responsibilities in the areas of Secretarial Practice and Administration
- Assess professional skills to enhance career prospects

ABOUT THE INTERNSHIP

The role of the interns includes:

- Engage in teams for execution of work assigned by the respective departments
- Handle assignments and Coordinate
- Work on documentation and drafting
- Identify regulatory compliance relating to Companies Act
- Preparation of agenda minutes and notices to conduct meetings
- Send emails to prospective clients
- Other duties such as:
- Front Office tasks
- KYC documents sharing and bank related documentation
- Tracking payments and presentation of bills for signature

GUIDELINES:

- The student will undergo practical training in a reputed organization for 100 hours.
- The student is expected to work in the secretarial department at least for 40 hours and the remaining 60 hours under other departments such as Finance, Marketing and HR
- Maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
 - Hours worked
 - Nature of work performed
 - Signature of the supervisor
- Submit interim reports to the faculty advisor after completion of every 25 hours of work
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 50 pages detailing the work assigned and performed in the organization.

- Introduction
- Profile of the Company
- Practical Aspects of Internship
- Advantages
- Limitations
- Findings
- Suggestions
- Conclusion

PATTERN OF ASSESSMENT

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI – 600 086

DEPARTMENT OF COMMERCE – SHIFT II

BACHELOR OF COMMERCE – HONOURS

PROGRAMME DESCRIPTION

B.Com (Hons.) - ACCA, is a three year under graduate programme introduced in the academic year 2020-21. This Programme integrates a bachelor's programme in Commerce with the globally recognized ACCA Certification, offered by the Association of Chartered Certified Accountants, UK. ACCA qualification helps students to become a Finance Professional with relevant and up-to-date knowledge and understanding required of future Strategic Professional Accountant in any industry. Students are given from ACCA, an exemption for 9 papers out of 13 papers and are provided training to enable them complete the 4 professional papers and become ACCA Affiliates along with the B.Com Hons. Degree.

The Programme is designed to provide students with a wide range of skills - managerial and professional, with an application oriented approach, which meets the industry demand. It facilitates the students to acquire broad and practical knowledge in the areas of Finance, Accounting, Management, Law and Marketing. Internship is an integral part of the B.Com (Hons) Programme, students are required to do an internship at the end of each semester. It plays a vital role in applying theoretical knowledge and gaining practical exposure. The programme enhances practical knowledge and employability through real-time simulation based projects.

B.Com Hons is an intensive programme with 172 credits, which augments the ability of the students in multiple avenues. It develops the students' analytical ability, communication skills and creative thinking, preparing the students for direct entry to business careers, entrepreneurship ventures and research through maximised industry interface.

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of 'Truth and Charity' thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately moulding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOS)

On successful completion of the B.Com. Honours Programme, the students will be able to

PSO 1	acquire relevant, forward-thinking business and finance skills required to meet innovation and change
PSO 2	develop competencies on financial reporting with respect to value-centric aspects of business
PSO 3	demonstrate cross-sector accounting and finance knowledge, skills, professional and ethical values needed in all organisations
PSO 4	communicate the impact of changes and potential changes in accounting regulation on financial reporting
PSO 5	apply appropriate strategic management techniques in evaluating and improving sustainability in business and environment

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI – 600 086

DEPARTMENT OF COMMERCE – SHIFT II

BACHELOR OF COMMERCE – HONOURS

PROGRAMME DESCRIPTION

B.Com (Hons.) - ACCA, is a three year under graduate programme introduced in the academic year 2020-21. This Programme integrates a bachelor's programme in Commerce with the globally recognized ACCA Certification, offered by the Association of Chartered Certified Accountants, UK. ACCA qualification helps students to become a Finance Professional with relevant and up-to-date knowledge and understanding required of future Strategic Professional Accountant in any industry. Students are given from ACCA, an exemption for 9 papers out of 13 papers and are provided training to enable them complete the 4 professional papers and become ACCA Affiliates along with the B.Com Hons. Degree.

The Programme is designed to provide students with a wide range of skills - managerial and professional, with an application oriented approach, which meets the industry demand. It facilitates the students to acquire broad and practical knowledge in the areas of Finance, Accounting, Management, Law and Marketing. Internship is an integral part of the B.Com (Hons) Programme, students are required to do an internship at the end of each semester. It plays a vital role in applying theoretical knowledge and gaining practical exposure. The programme enhances practical knowledge and employability through real-time simulation based projects.

B.Com Hons is an intensive programme with 172 credits, which augments the ability of the students in multiple avenues. It develops the students' analytical ability, communication skills and creative thinking, preparing the students for direct entry to business careers, entrepreneurship ventures and research through maximised industry interface.

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of 'Truth and Charity' thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately moulding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOS)

On successful completion of the B.Com. Honours Programme, the students will be able to

PSO 1	acquire relevant, forward-thinking business and finance skills required to meet innovation and change
PSO 2	develop competencies on financial reporting with respect to value-centric aspects of business
PSO 3	demonstrate cross-sector accounting and finance knowledge, skills, professional and ethical values needed in all organisations
PSO 4	communicate the impact of changes and potential changes in accounting regulation on financial reporting
PSO 5	apply appropriate strategic management techniques in evaluating and improving sustainability in business and environment

TOTAL TEACHING HOURS: 65

OBJECTIVE OF THE COURSE

- To provide students with an understanding of the data and its relevance in business
- To enable students to deal with numerical and quantitative issues in Business
- To provide a practical exposure on the various statistical methods and to arrive at rational decision through systematic analysis and interpretation
- To educate on the effective and efficient application of various statistical tools associated with research in business fields
- To familiarise students with the applications of statistical techniques for business decisions

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	comprehend the computation and significance of the statistical parameters	K1, K2
CO2	apply statistical techniques in problem solving	K3
CO3	examine the statistical techniques used for measuring and analysing business trends	K4
CO4	estimate the future values by studying the relationship between variables	K5
CO5	develop solutions and judgements for hypothetical situations	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Descriptive Statistics			
	1.1 Data types – Univariate Summaries	K1-K4	2	1-3
	1.2 Multivariate Summaries - Karl Pearson Co-efficient of correlation	K1-K4	3	1-3
	1.3 Partial Correlation of First Order and Second Order Co-efficient	K1-K4	3	1-3
	1.4 Co- efficient of Multiple Correlations	K1-K4	2	1-3
2	Test of Hypothesis			
	2.1 Procedure for Testing Hypothesis	K1-K2	2	1
	2.2 Parametric and Non-Parametric Approaches	K1-K2	2	1
	2.3 Test of Significance	K1-K6	7	1-5
	2.4 Variance Ratio Test 2.4.1 One-way Classification Model	K1-K6	2	1-5
	2.4.2 Two-way Classification Model	K1-K6	2	1-5
3	Categorical Data and Chi-square test			
	3.1 Introduction to Categorical Data	K1-K2	2	1
	3.2 Meaning and Conditions for applying Chi- Square Test	K1-K2	2	1
	3.3 Application of Chi Square Test - Test of Goodness of Fit and Test of Independence - Yates Correction	K1-K5	6	1-4
	3.4 Case Study	K1-K6	5	1-5
4	Regression Models			
	4.1 Properties of Regression coefficients and regression lines	K1-K2	4	1
	4.2 Simple Linear Regression	K1-K5	6	1-4
	4.3 Multiple Linear Regression	K1-K6	5	1-5
5	Analysis of Time Series			
	5.1 Utility and Components of Time Series	K1-K2	2	1
	5.2 Methods of Measuring Trend	K1-K6	4	1-5
	5.3 Measurement of Seasonal Variations	K1-K6	4	1-5

B.Com. DEGREE: HONOURS

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE: 23BH/MC/IN12

CREDITS: 2

Internship is an integral part of the B.Com. (Hons) Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

COURSE OUTCOMES FOR INTERNSHIP

- Apply theoretical knowledge gained in academic courses to real-world situations.
- Develop a better understanding of workplace dynamics, professional etiquette, and industry standards
- Build valuable connections for future career opportunities

OBJECTIVES OF INTERNSHIP

- To integrate theory and practise
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

Number of Credits

Students are expected to get a total of 14 credits in the six semesters. In the odd semesters the number of credits allotted is 2 per semester and even semesters at the rate of 4 per semester.

GUIDELINES:

- The student will undergo practical training in a reputed organization for 30 hours in the odd semester and 60 hours in the even semester
- The student is expected to work in the Finance department at least for 20/40 hours and the remaining 10/20 hours in other departments
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 25/50 pages detailing the work assigned and performed in the organization - Introduction of the Organisation/ Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

Pattern of Evaluation

Log book 20 marks

Project report & viva 80 marks

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To provide students with an overview of financial communication
- To educate students on the need for dissemination of true and fair information
- To expose students to the current financial communication practices
- To provide students with an insight into the risks, opportunities and expectations of financial communication

COURSE LEARNING OUTCOME

On successful completion of the course, the students will be able to

- Set up their financial goals
- Identify their risk appetite
- Choose the areas of investment
- Formulate their financial plan

Unit 1

(8 hours)

General Principles of Financial Communication

- 1.1 Financial Communication – Meaning
- 1.2 Principle of Equal Access to Information, Principle of Consistency
- 1.3 Dissemination of Accurate, True and Fair Information and Regulatory Information
- 1.4 Financial Communication Language

Unit 2

(10 hours)

Framework for Financial Communication

- 2.1 Disclosures of Periodic Information, Estimates or Prospective Information
- 2.2 Events Associated with a Company's Business, Events Affecting Shareholding Structure
- 2.3 Risks and Litigation
- 2.4 Rumours and Leaked Information

Unit 3

(8 hours)

Financial Communication Practices

- 3.1 Calendar and Organization
- 3.2 Financial Marketing and Targeting
- 3.3 Implementation of Financial Communication
- 3.4 Providing Management with Feedback on Market Perceptions

COs	DESCRIPTION	CL
CO1	Understand accounting for leases and investment	K1, K2
CO2	Apply financial accounting concepts in the preparation of final accounts for different entities	K3
CO3	Analyse the financial position of non-profit organisations	K4
CO4	Evaluate and interpret financial statements to make informed decisions	K5
CO5	Estimate company's financial performance using financial statements	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Branch and Departmental Accounts			
	1.1 Types of Branches - Dependent Branches – Features	K1-K2	1	1
	1.2 Supply of Goods at Cost Price - Invoice Price	K1-K3	2	1-2
	1.3 Branch Account in the books of Head Office (Debtors System Only)	K3-K5	2	2-4

UNIT	CONTENT	CL	HRS	CO
	1.4 Departmental Accounts – Objectives, Basis of Allocation of Expenses	K1-K2	1	1
	1.5 Trading and Profit and Loss Account in Columnar Form	K3-K5	2	2-4
	1.6 Inter Departmental Transfers at Invoice Price	K5	2	4
2	Accounting for Non-profit Entities 2.1 Non-profit Entities – Meaning, Features	K1-K2	3	1
	2.2 Receipts and Payments Account	K1-K6	4	1-5
	2.3 Income and Expenditure Account		3	
3	3.1 Accounting for Tangible Non-Current Assets – Meaning of Cost, Initial Measurement, Depreciation Methods, Distinction between Assets and Expenses	K1-K5	5	1-4
	3.2 Investment Accounts as per IAS - 40 – Definitions – Accounting Treatment, Conversion Treatment – IAS 16 to IAS 40		5	
	3.3 Accounting for Lease Transactions as per IFRS 16 – Definition and Key Terms, Types of Leases, Lessee Accounting, Lease Term, Short Life and Low Value Assets, Mid Year Leases	K1-K6	5	1-5
4	4.1 Accounting for Financial Instruments – Definition of Financial Instruments – Distinction between the Categories of Financial Instruments – Gains and Losses from Subsequent Measurement Treatment – Distinction between Debt and Equity Capital – Accounting for Compound Instruments	K2- K3	5	1-2
	4.2 Accounting for Revenue – Recognition, Five Step model, Measurement of Obligations	K3	5	2
	4.3 Accounting for Foreign Currency	K5	3	4
	4.4 Accounting for Income Taxes - Recognition, Classification (Current and Deferred), Measurement	K6	4	5
	4.5 Reporting Financial Information	K3	3	2

UNIT	CONTENT	CL	HRS	CO
5	Analysis and Interpretation of Financial Statements 5.1 Comparative Financial Statements vs Common size Financial Statements	K1-K6	3	1-5
	5.2 Calculation and Interpretation of Accounting Ratios and Trends to Address Users' and Stakeholders' Needs	K2-K3	2	1-2
	5.3 Limitations of Financial Statements	K5	1	4
	5.4 Interpretation Techniques and their Limitations	K3	1	2
	5.5 Interpretation Techniques for Specialised, Not-for-profit and Public Sector Entities	K6	2	5
	5.6 Introduction to Non-Financial Interpretation	K6	1	5

CORPORATE LAW

CODE: 23BH/MC/CO24

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To expose students to the various provisions of the Companies Act
- To understand the management, administration and regulations of companies
- To familiarise the provisions relating to dividends and audit
- To develop the ability to analyse case laws and legal precedents related to corporate law
- To gain comprehensive knowledge the fiduciary duties of the corporate officers and directors to the corporation and its shareholders

COURSE LEARNING OUTCOME

On successful completion of the course, the students will be able to:

COs	DESCRIPTION	CL
CO1	Understand the key legal concepts and principles in corporate law	K1, K2
CO2	Draft and interpret company documents such as Memorandum of association, articles of association etc.	K3
CO3	Analyse complex legal cases	K4
CO4	Evaluate the legal implications of different corporate actions and decisions	K5
CO5	Develop innovative solutions to complex legal challenges in corporate law	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Jurisprudence of Company Law	K1-K2	2	1
	1.2 Meaning – Nature - Features of a Company		2	
	1.3 Judicial Acceptance of the Company as a Separate Legal Entity	K1-K4	3	1-3
	1.4 Concept of Corporate Veil - Applicability of Companies Act - Definitions and Key Concepts		3	
2	Documents 2.1 Memorandum of Association-Articles of Association and its Alteration	K1-K6	3	1-5
	2.2 Role of Promoters and Pre-Incorporation Contracts	K1-K3	2	1-2
	2.3 Doctrine of Constructive Notice and Indoor Management	K1-K6	2	1-5
	2.4 Prospectus - Shelf Prospectus and Red Herring Prospectus - Misstatement in a Prospectus		3	
3	Issue of Shares and Debentures 3.1 Allotment and Forfeiture of Shares, Calls on Shares	K1-K3	2	1-2
	3.2 Public Offer and Private Placement; Issue of Sweat Capital	K1-K5	2	1-4

COST ACCOUNTING

CODE: 23BH/MC/CA24

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE:

- To acquire knowledge of the basic concepts of Cost Accounting
- To impart skills necessary for applying various cost accounting techniques
- To provide comprehensive knowledge on the role of cost accounting in business management and value creation
- To expose students to the application of cost accounting in management decision making
- To introduce the recent developments in cost accounting

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	Demonstrate understanding of the fundamental concepts of Cost Accounting	K1, K2
CO2	Apply the different methods and techniques of costing	K3
CO3	Explain the recent developments in cost accounting	K4
CO4	Measure the cost involved in the process of production	K5
CO5	Prepare the statement of cost for the different types of businesses	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Cost Accounting 1.1 Cost Accounting: Evolution, Meaning, Objectives and Scope	K1-K2	2	1
	1.2 Concepts of Costs, Elements of Cost, Cost Centre and Cost Unit		2	

UNIT	CONTENT	CL	HRS	CO
	1.3 Methods and Techniques of Costing		3	
	1.4 Preparation of Cost Sheet	K5-K6	5	4-5
2	Material, Labour and Overheads 2.1 Materials Control 2.1.1 Concept and Techniques- Procurement Procedures and Documentation: Methods of Purchasing; Procedure of Purchases, Stores and Issue of Material; Stock Verification	K1-K3	3	1-2
	2.1.2 Methods of Pricing of Material: FIFO, LIFO, Average, Weighted Average – Inventory Management: Techniques of Fixing Minimum, Maximum and Reorder Levels, Economic Order Quantity	K4-K5	6	3-4
	2.2 Labour Meaning and Classification of Labour Costs- Overtime and Idle Time - Labour Turnover	K1-K2	2	1
	2.2.2 Remuneration Systems and Incentive Schemes (Time Rate, Piece Rate, Halsey and Rowan Plan)	K3-K4	3	2-3
	2.3 Overheads 2.3.1 Meaning, Nature, Collection and Classification - Cost Allocation, Apportionment	K1-K4	2	1-3
	2.3.2 Primary and Secondary apportionment - Direct Re-apportionment, Repeated Distribution Method	K4-K6	3	3-5
3	Methods of Costing Job and Batch Costing 3.1.1 Introduction to Job and Batch Costing– Meaning, Characteristics, Benefits, Risks	K1-K2	2	1
	3.2 Process Costing 3.2.1 Introduction to Process Costing– Meaning, Characteristics, Benefits, Risks		2	
	3.2.2 Accounting Treatment of Normal Loss, Abnormal Loss, Abnormal Gain, Process Outputs, Equivalent Units, Process Accounts, Joint Products, By-Products, Point of Separation	K3-K6	6	2-5

UNIT	CONTENT	CL	HRS	CO
4	4.1 Service/Operation Costing 4.1.1 Introduction to Service/Operation Costing– Introduction - Meaning and Application of Operating Costing - Transport Costing – Problems on Transport Costing	K1-K4	5	1-3
	4.2 Activity Based Costing 4.2.1 Steps in the Implementation of ABC – Benefits from Adaptation of ABC System – Difficulties Faced by the Industries in the Successful Implementation of ABC - Problems on ABC	K1-K6	6	1-5
5	Recent Developments in Cost Accounting an Overview 5.1 Target Costing - Meaning, Advantages, Disadvantages, Target Cost for Manufacturing and Service Industries, Target Cost Gap	K1-K5	3	1-4
	5.2 Life Cycle Costing - Meaning, Advantages, Disadvantages, Life Cycle Cost for Manufacturing and Service Industries		2	
	5.3 Throughput Accounting - Meaning, Advantages, Disadvantages, Constraints, Tpar, Multi-Product Decision Making Problem		6	
	5.4 Environmental Accounting - Meaning, Advantages, Disadvantages, Environmental Costs, Methods of Accounting for the Environmental Cost		2

OBJECTIVES OF THE COURSE

- To provide the basic knowledge on economics
- To understand the importance of the laws of demand and supply
- To sensitise on the important concepts that have a direct impact on business
- To acquaint students with the market structures
- To comprehend the effect of price fixation on the market equilibrium

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COS	DESCRIPTION	CL
CO1	Define and explain economics and the importance of the Laws of Demand and Supply	K1
CO2	Understand the implications of fixing the price	K2
CO3	Apply the concept of profit maximisation	K3
CO4	Analyse the government policies and their implications on market structures	K4
CO5	Evaluate the costs and revenue of a business unit	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Economics – Definition, Problems of economics, branches of economics	K1-2	7	1-2
	1.2 Price Mechanism, Sectors of Economy	K2	8	2

UNIT	CONTENT	CL	HRS	CO
2	Market Equilibrium			
	2.1 Demand – Law of Demand, Exceptions to the Law of Demand, Changes in Demand	K1-4	4	1-4
	2.2 Supply – Law of Supply, Factors affecting Supply, Changes in Supply	K2	4	2
	2.3 Elasticity of Demand – Types and Elasticity of Supply	K1-5	4	1-5
	2.4 Market Equilibrium – Minimum Price and Maximum price fixation	K1-5	3	1-5
3	Cost and Revenue			
	3.1 Cost and types	K1-2	3	1-2
	3.2 Cost Curves – Short Run and Long run	K1-4	4	1-4
	3.3 Revenue – Revenue Curves	K1-4	4	1-4
	3.4 Break even and Profit Maximization	K1-5	4	1-5
4	Market Structures			
	4.1 Perfect Competition – Features and Profit	K1-4	3	1-4
	4.2 Imperfect Competition - Features and Profit	K1-2	3	1-2
	4.3 Monopoly, Monopolistic and Oligopoly	K1-5	4	1-5
5	Macro Concepts			
	5.1 Consumption Function, Savings Function and Investment function	K1-2	2	1-2
	5.2 Inflation, Deflation – Meaning and Causes	K1-2	2	1-2
	5.3 Business Cycles – Meaning, Phases, Countering and Managing Business Cycles	K1-4	3	1-4
	5.4 Government Policies – Fiscal Policy and Monetary Policy	K1-4	3	1-4

B.Com. DEGREE: HONOURS

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE: 23BH/MC/IN24

CREDITS: 4

Internship is an integral part of the B.Com (Hons) Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

COURSE OUTCOMES FOR INTERNSHIP

- Apply theoretical knowledge gained in academic courses to real-world situations.
- Develop a better understanding of workplace dynamics, professional etiquette, and industry standards
- Build valuable connections for future career opportunities

OBJECTIVES OF INTERNSHIP

- To integrate theory and practise
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

GUIDELINES:

- The student will undergo practical training in a reputed organization for 60 hours
- The student is expected to work in the Finance department at least for 40 hours and the remaining 20 hours in other departments
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- An Interim report to be submitted to faculty advisor after completion of 30 hours
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 50 pages detailing the work assigned and performed in the organization - Introduction of the Organisation/ Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

Pattern of Evaluation

Internship Report Evaluation:

Rubrics for Evaluation	Marks	Cognitive Level
Log book	10	K1
Interim Report	20	K2
Project report	40	K3-K4
Viva	30	K5
	100

COs	DESCRIPTION	CL
CO1	Acquire practical understanding of the decision-making process	K1
CO2	Identify measures of financial performance	K2
CO3	Analyze cost-volume-profit relationship for better decision-making	K3
CO4	Measure variances and compute deviations between the budgeted and actual costs	K4
CO5	Preparation of Budgets	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Absorption and Marginal Costing			
	1.1 Absorption Costing – Meaning, Advantages, Limitations and Applications	K1-K2	2	1-2
	1.2 Marginal Costing- Meaning, Advantages, Limitations and Applications- Breakeven Analysis	K1-K3	2	1-3
	1.3 Absorption Costing vs Marginal Costing – Profit Calculation under both Methods	K2-K4	3	2-4

UNIT	CONTENT	CL	Hrs	CO
	1.4 Cost Volume Profit Analysis – Break-Even Point, Margin of Safety, Contribution to Sales Ratio, in Single and Multi-product Situations, Target Profit or Revenue in Single and Multi-product Situations, Break-even Charts and Profit Volume Charts, Limitations of CVP Analysis	K3-K6	3	3-5
2	Application of Marginal Costing in Decision Making 2.1 Decision involving Limiting Factors - Scarce Resource Situation, Optimal Production Plan, Multiple Scarce Resource Problems, Shadow Prices, Slack	K1-K6	3	1-5
	2.2 Pricing Decisions – Price Elasticity of Demand, Straight Line Demand Equation, Optimum Selling Price, Demand Based Approach to Pricing, Cost Plus Pricing		3	
	2.3 Make or Buy Decisions - Make vs. Buy and Outsourcing Decisions, Make Cost and Buy-in Cost, In-House Costs and Outsource Costs of Completing Tasks, Relevant Costing Principles in Situations involving Shut Down, One-Off Contracts and the Further Processing of Joint Products		4	
	2.4 Selection of the Most Profitable Product Mix, Diversification of Products – Alternative Methods of Production		2	
	2.5 Relevant Costing – Concept, Relevant Costs Calculation, Opportunity Costs		3	
3	Standard Costing and Variance Analysis 3.1 Introduction to Standard Costing Systems – Purpose, Principles, Difference Between Standard, Marginal and Absorption Costing, Methods	K1-K2	3	1-2
	3.2 Variance Calculations and Analysis – Material, Labour, Overhead, Sales and Profit Variance	K3-K4	4	3-4
	3.3 Interpretation of Variances and Evaluation of Past Performance – Factors Influencing Behaviour, Effect on Staff Motivation, Variance in JIT and TQM Scenarios	K4-K6	5	4-5
	3.4 Reconciliation of Budgeted and Actual Profit under Standard Absorption Costing and under Standard Marginal Costing		3	
4	Performance Measurement 4.1 Introduction to Performance Measurement – Purpose, Role and Impact on Economic and Market Conditions	K1-K2	2	1-2

UNIT	CONTENT	CL	Hrs	CO
	4.2 Measures of Financial Performance - Profitability, Liquidity, Activity and Gearing	K4-K5	2	4-5
	4.3 Balanced Scorecard – Advantages, Limitations, Performance Indicators, Critical Success Factors, Key Performance Indicators		3	
	4.4 Cost Reduction Controls – Cost Reduction Methods, Value Analysis		2	
	4.5 Monitoring Performance – Non Financial Indicators, Measurement of Performance in Service Industry and Not For Profit Industry, Benchmarking		2	
5	Budget and Budgetary Control			
	5.1 Budget, Budgeting and Budgetary Control-Concepts and Importance	K1-K2	2	1-2
	5.2 Production Budget- Purchase Budget- Sales Budget – Cash Budget- Fixed and Flexible Budgets	K4-K6	3	4-5
	5.3 Budgetary Systems and Types of Budgets, Information used in Budgets	K1-K2	2	1-2
	5.4 Preparation of Flexed Budgets, Rolling Budgets and Activity-Based Budgets	K4-K6	2	4-5
	5.5 Beyond Budgeting Model – Meaning, Benefits and Problems	K1-K2	2	1-2
	5.6 Quantitative Analysis – High-Low Method, Learning Curve		3

(Effective from the academic year 2023-2024)

HUMAN RESOURCE MANAGEMENT

CODE:23BH/MC/HR34

CREDITS : 4

L T P : 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE:

- To introduce the fundamental concepts of Human Resource Management
- To impart knowledge on the process of selecting and onboarding employees effectively
- To understand the evaluation of employee performance through performance appraisals and feedback
- To examine the design and administration of compensation packages and employee benefits
- To explore the strategies for managing employee relations and conflicts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the significance of Human Resource Management in organisational success	K1, K2
CO2	Demonstrate the principles of an effective employee recruitment	K3
CO3	Analyse the effectiveness of a performance appraisal system	K4
CO4	Evaluate the components of a typical compensation package	K5
CO5	Develop a comprehensive HR strategy aligned with an organisation's goals	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENTS	CL	HRS	CO
1	Introduction to Human Resource Management 1.1 Evolution of HRM: HRM vs. Personnel Management	K1-K3	2	1-2
	1.2 HRM's Role in Organizations	K1-K4	2	1-3
	1.3 HRM and Competitive Advantage		2	
	1.4 Ethical and Legal Considerations		2	
	1.5 HRM Challenges and Trends	K1-K5	2	1-4
2	Talent Acquisition and Recruitment 2.1 Workforce Planning and Forecasting	K1-K6	3	1-5
	2.2 Job Analysis and Design		4	
	2.3 Recruitment, Selection and Training - An Overview	K1-K2	1	1
	2.4 Diversity and Inclusion in Recruitment	K1-K4	2	1-3
3	Performance Appraisal and Compensation Management 3.1 Feedback and Performance Improvement 3.1.1 Performance Appraisal and Feedback	K1-K5	2	1-4
	3.1.2 Career Development and Succession Planning	K1-K6	2	1-5
	3.1.3 Managing Employee Performance Issues	K1-K5	2	1-4
	3.2 Compensation and Benefits 3.2.1 Compensation Strategy and Pay Structures	K1-K5	2	1-4
	3.2.2 Benefits, Incentives and Rewards	K1-K4	2	1-3
	3.2.3 Compensation and Benefits Compliance		2	
4	Employee Relations 4.1 Employee Engagement and Motivation Techniques	K1-K3	3	1-2
	4.2 Employee Communication - Grievance Redressal	K1-K4	2	1-3
	4.3 Labor Relations and Dispute Resolution - An Overview	K1-K5	3	1-4
	4.4 Employee Rights and Privacy	K1-K4	2	1-3

UNIT	CONTENTS	CL	HRS	CO
5	Emerging Trends in HRM 5.1 International HRM - Managing HR in Global Context	K1-K4	3	1-3
	5.2 Human Resource Information Systems and AI - Overview	K1-K6	3	1-5
	5.3 Workforce Trends; Ethical and Sustainability issues in HRM		4

(Effective from the academic year 2023-2024)

MATHEMATICS FOR COMMERCE

CODE: 23BH/AC/MC35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the fundamental mathematical concepts pertaining to the discipline of commerce
- To employ different techniques to solve problems pertaining to matrices, equations and LPP
- To appreciate the concept of numerical differentiation and integration as an alternate tool to solve problems on differentiation and integration
- To promote problem solving skills and quantitative analysis
- To model and solve real time problem using linear programming method

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall and define the basic mathematical concepts on matrices, equations, differentiation, integration and linear programming problem	K1
CO2	Understand and compare the concepts relating to matrices, polynomials, numerical methods and linear programming problem	K2
CO3	Utilize suitable mathematical concepts and skills to solve problems including those in real life contexts	K3
CO4	Analyse and examine the problem relating to the applications of matrices, differentiation, integration and optimization	K4
CO5	Evaluate solutions to the problems related to matrices, equations, differentiation, integration and linear programming problem	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Matrices	K1- K5	2	1-5
	1.1 Types of matrices			
	1.2 Characteristic equation of a matrix		2	
	1.3 Cayley - Hamilton Theorem (without proof)		3	
	1.4 Eigen Values and Eigen Vectors		3	
	1.5 Diagonalization of 3x3 matrices with distinct Eigen values		3	
2	Theory of Equations	K1-K5	2	1-5
	2.1 Formation and Solution of Equation with Imaginary and Irrational Roots			
	2.2 Relation between Roots and Coefficients		2	
	2.3 Solution of Equations under given Conditions		3	
	2.4 Symmetric Functions of the Roots of an Equation in terms of its Coefficients		3	
	2.5 Reciprocal equations		3	
3	Numerical Methods	K1-K5		1-5
	3.1 Algebraic and Transcendental Equations			
	3.1.1 The Bisection Method		2	
	3.1.2 Newton Raphson Method		3	
	3.2 Simultaneous Equations	K1-K5		1-5
	3.2.1 Gaussian Elimination Method		2	
	3.2.2 Gauss - Jordan Elimination Method		2	
	3.2.3 Gauss Jacobi Iteration Method		2	
	3.2.4 Gauss - Seidal Iteration Method		2	
4	Numerical Differentiation and Numerical Integration	K1-K5		1-5
	4.1 Derivatives using Newton's forward difference Formula		3	
	4.2 Derivatives using Newton's backward difference Formula		3	
	4.3 Trapezoidal Rule		3	
	4.4 Simpson's one third rule		2	
	4.5 Simpson's three eight rule		2	

UNIT	CONTENT	CL	Hrs	CO
5	Linear Programming Problem	K1-K5		1-5
	5.1 General L.P.P.		3	
	5.2 Canonical and standard forms of L.P.P.		4	
	5.3 The Simplex Algorithm		3	
	5.4 The Big M – method		3

B.Com. DEGREE: HONOURS

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE: 23BH/MC/IN32

CREDITS: 2

Internship is an integral part of the B.Com (Hons) Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

COURSE OUTCOMES FOR INTERNSHIP

- Apply theoretical knowledge gained in academic courses to real-world situations.
- Develop a better understanding of workplace dynamics, professional etiquette, and industry standards
- Build valuable connections for future career opportunities

OBJECTIVES OF INTERNSHIP

- To integrate theory and practise
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

GUIDELINES:

- The student will undergo practical training in a reputed organization for 30 hours
- The student is expected to work in the Finance department at least for 20 hours and the remaining 10 hours in other departments
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 25 pages detailing the work assigned and performed in the organization - Introduction of the Organisation/ Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

Pattern of Evaluation

Internship Report Evaluation:

Rubrics for Evaluation	Marks	Cognitive Level
Log book	20	K1
Project report	50	K2-K4
Viva	30	K5
	100

CORPORATE GOVERNANCE

CODE: 23BH/MC/CN44

CREDITS: 4

L T P: 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE:

- To understand the practices of corporate governance
- To familiarize ethical issues related to good governance necessary for long term survival of business
- To develop knowledge on the recent practices in governance
- To gain familiarity in the theories of corporate governance
- To Analyse different strategies in the compliance of corporate governance

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Identify the key stakeholders in corporate governance	K1
CO2	Understand the need for corporate governance and role of directors in various sectors	K2
CO3	Apply corporate governance principles in business practice	K3
CO4	Analyse the reasons for corporate governance failure and propose solutions to prevent similar problems in the future	K4
CO5	Interpret and evaluate the effectiveness of a company's corporate governance practices	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Corporate Governance	K1-K3	2	1-3
	1.1 Corporate governance- Meaning, Principles, need and importance		3	
	1.2 Agency principle, Stakeholder relationship, Social responsibility	K2-K3	3	2-3
	1.3 Approaches – Rules based Vs Principles based	K3	2	3
2	Management Structure	K1-K2	3	1-2
	2.1 Management Structure of Corporate Governance	K2-K6	4	2-5
	2.1 Reporting to stakeholders- Integrated reporting, guiding principles, Environmental footprints, Internal management systems		3	2-4
3	Corporate Governance in Various Sectors	K1-K3	5	1-3
	3.1 Corporate Governance in Banks		5	
4	Theories of Corporate Governance	K1-K6	6	1-5
	4.1 Theories, Models and Benefits of Corporate Governance	K1-K5	6	1-5
	4.2 Insider Trading, Green Governance, Whistle blowing			
5	Recent Practices in Corporate Governance	K1-K3	3	1-3
	5.1 Codes and Standards on Corporate Governance	K2-K6	2	2-5
	5.2 Initiatives in India	K5-K6	3	5
	5.2 Maxwell Communication, Enron, World Com, Andersen Worldwide, Vivendi, Satyam Computer Services, Kingfisher Airlines	K4	2	4
	5.3 Common Governance Problems noticed in Corporate failures

MANAGEMENT ACCOUNTING AND CONTROL

CODE: 23BH/MC/MA44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide basic understanding on the concept of management accounting and control
- To enhance the understanding of the scope of management accounting in strategy formulation and execution
- To introduce the traditional and modern techniques of control
- To identify ethical dilemmas and issues that may arise in management accounting and control and propose ethical solutions
- To create management reports that summarise financial and non-financial information for decision-making

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the methods in management accounting and control	K1, K2
CO2	Identify and analyse problems and solutions in real-life situations	K3
CO3	Distinguish between levels of analysis for different variables for problems associated with management control	K4
CO4	Critically discuss the reasons to and consequences of Management Accounting and Control on various levels of analysis	K5
CO5	Develop strategies to improve the financial performance of a business based on financial analysis	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Management Accounting and Control 1.1 Management Accounting – Meaning, Objectives and Functions	K1-K2	3	1
	1.2 Nature and Scope of Management Accounting	K1-K3	2	1-2
	1.3 Difference between Cost and Management Accounting	K1-K4	2	1-3
	1.4 Role of Management Accounting in Decision Making and Control	K1-K5	3	1-4
2	Traditional and Modern Techniques of Control 2.1 An Overview of Traditional Techniques - Budgetary Control - Standard Costing - Financial Ratio Analysis - Internal Audit - Break-even Analysis	K1-K5	10	1-4
	2.2 Modern Techniques 2.2.1 Responsibility Accounting	K1-K6	2	1-5
	2.2.2 Management Audit		2	
	2.2.3 PERT and CPM		2	
	2.2.4 Management Information System		2	
3	Managerial Decision Making and Control 3.1 Introduction - Decision making process	K1-K4	2	1-3
	3.2 Differential analysis	K1-K6	3	1-5
	3.3 Types of managerial decisions	K1-K4	3	1-3
	3.4 Steps in decision making - Quantitative analysis and decision making	K1-K6	4	1-5
4	Trends in Management Accounting and Control 4.1 Inflation Accounting	K1-K5	3	1-4
	4.2 Quality Costing	K1-K5	3	
	4.3 Human Resource Accounting	K1-K5	3	
	4.4 Value Added Accounting	K1-K5	3	

UNIT	CONTENT	CL	Hrs	CO
5	Ethical Aspects of Management Accounting and Control			
	5.1 Stakeholder influence on organisation – Mendelow’s matrix	K1-K6	3	1-5
	5.2 Social and ethical issues impacting the strategy formulation	K1-K5	3	1-4
	5.3 Environmental Management Accounting	K1-K4	3	1-3
	5.4 Ethical Dilemmas in Management Accounting and Control	K1-K5	4	1-4

DIRECT TAXATION

CODE: 23BH/MC/DT44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE:

- To comprehend Income tax structure and its complexities
- To identify the significance and constitutional provisions relevant to direct tax
- To understand the procedure for computing taxable income from different heads
- To provide a broad conceptual framework for determining the taxable income and tax liability of an individual
- To familiarize the provisions relating to setoff and carry forward of losses and deductions applicable to an individual

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Demonstrate knowledge of concepts, principles and rules of taxation of individuals	K1, K2
CO2	Apply their knowledge to compute the income of individuals under different heads of income and determine tax liability	K3
CO3	Analyse the complex tax issues and recommend tax saving strategies	K4
CO4	Evaluate the effectiveness of different tax strategies and their impact on tax compliance	K5
CO5	Develop and implement tax planning strategies that meet the needs of individual taxpayers while complying with relevant tax laws and regulations.	K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Taxation	K1-K2	1	1
	1.1 Meaning of Tax, Importance and Features of Taxation		2	
	1.2 Types of tax – Direct and Indirect		3	
	1.3 Basic concepts – Person, Assessee, Assessment year, Previous year, Total income, Taxable Income	K1-K6	4	1-5
2	Computation of Salary income	K1-K3	2	1-2
	2.1 Definition, Meaning, Basis of Charge	K1-K4	4	1-3
	2.2 Allowances – Taxable and Exempted	K1-K6	4	1-5
	2.3 Perquisites		2	
	2.4 Other Receipts and Treatment of Provident Fund		3	
3	2.5 Deductions			
	3.1 Computation of Income from House Property	K1-K3	3	1-2
	3.1.1 Basis of Charge	K1-K6	4	1-5
	3.1.2 Computation of House Property Income		3	
	3.1.3 Deductions	K1-K5	2	1-4
	3.2 Profits and Gains of Business or Profession		2

B.Com. DEGREE: HONOURS

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE: 23BH/MC/IN44

CREDITS: 4

Internship is an integral part of the B.Com (Hons) Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

COURSE OUTCOMES FOR INTERNSHIP

- Apply theoretical knowledge gained in academic courses to real-world situations.
- Develop a better understanding of workplace dynamics, professional etiquette, and industry standards
- Build valuable connections for future career opportunities

OBJECTIVES OF INTERNSHIP

- To integrate theory and practise
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

GUIDELINES:

- The student will undergo practical training in a reputed organization for 60 hours
- The student is expected to work in the Finance department at least for 40 hours and the remaining 20 hours in other departments
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- An Interim report to be submitted to faculty advisor after completion of 30 hours
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 50 pages detailing the work assigned and performed in the organization - Introduction of the Organisation/ Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

Pattern of Evaluation

Internship Report Evaluation:

Rubrics for Evaluation	Marks	Cognitive Level
Log book	10	K1
Interim Report	20	K2
Project report	40	K3-K4
Viva	30	K5
	100

BOARDROOM ETIQUETTE

CODE: 23BH/SS/BE40

CREDITS: 0

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To introduce students to boardroom etiquette and practices
- To help students comprehend the importance of networking, communication, and time management skills for career success
- To enable students understand the applications of skills in the contemporary context

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Identify basic concepts related to business etiquette and corporate grooming
- Discuss the concepts in the context of effective writing and business correspondence
- Discuss its applications in different settings
- Appreciate the key minimum standards required by etiquette practice

Unit 1 (6 hours)

Business Communication

- 1.1 Business Correspondence
- 1.2 Business Attire
- 1.3 Personality Enrichment

Unit 2 (10 hours)

Business Protocol

- 2.1 Cubicle Protocol and Time Management
- 2.2 Etiquette in Meetings
- 2.3 The Art of Small Talk
- 2.4 Creating and Maintaining Personal Brand

Unit 3 (10 hours)

Handling of Issues

- 3.1 Data Visualization and Presentation
- 3.2 Nurturing Career Within Company
- 3.3 Dealing with Key Decision Makers
- 3.4 Handling Social Situations, Handling Sensitive Issues: Courtesy and Building Trust

ENVIRONMENTAL STUDIES

CODE:23BH/GC/ES42

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water)and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

COMPUTER APPLICATIONS IN BUSINESS

CODE: 23BH/MC/CB54

CREDITS: 4

L T P: 0 1 4

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To give a practical exposure to the various statistical methods and arrive at rational decision through systematic analysis and interpretation
- To understand the effective and efficient application of various statistical tools associated with research in business
- To acquaint with the recent technologies used in business
- To generate Accounting and Inventory Masters, Vouchers and Basic reports in Tally
- To use spreadsheets for business data analysis

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Demonstrate understanding of the modern technologies used in business	K1, K2
CO2	Use software to perform statistical analysis	K3
CO3	Compute the value of a project using computer software	K4
CO4	Prepare plans and budgets using software	K5
CO5	Generate financial statements using software	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Accounting Package - Tally 1.1 Introduction to Tally	K1	2	1
	1.2 Creation, Alteration and Deletion of a Company	K3-K4	2	2-3
	1.3 Creation, Alteration and Deletion of Groups and Ledgers	K3-K4	2	2-3
	1.4 Accounting Vouchers – Types, Voucher Entry	K3-K4	5	2-3

UNIT	CONTENT	CL	HRS	CO
	1.5 Preparation of Financial Statements – Day Book, Trial Balance, Profit and Loss Account and Balance Sheet - Moving Data to Excel from Tally	K5-K6	4	4-5
2	Analysis using MS Excel 2.1 Introduction to Excel	K1	2	1
	2.2 Formatting Worksheets	K3-K4	3	2-3
	2.3 Mathematical and Statistical Operations, Text, Logical, Lookup and References using Excel Functions		4	
	2.4 Presentation of Data in MS Excel using Graph, Tables and PIVOT table	K4-K6	4	3-5
	2.5 Named Ranges in MS Excel	K5-K6	2	4-5
3	Business Evaluation & Control Techniques using Excel 3.1 Evaluation Techniques – Payback Period, NPV and IRR methods	K5-K6	3	4-5
	3.2 Preparation of Master Budgets	K3-K4	4	2-3
	3.3 Time Value of Money - Future and Present Value of Money and Annuity	K4-K6	3	3-5
4	Financial Statement Analysis using Excel 4.1. Techniques of Financial Statement Analysis 4.1.1 Comparative Statements	K1-K6	3	1-5
	4.1.2. Common Size Statements		3	
	4.1.3. Trend Percentages		3	
	4.2 Cash Flow Analysis		4	
5	Application of MS Excel and SPSS in Statistics 5.1. Univariate analysis	K4-K6	2	3-5
	5.2. Correlation Analysis – Correlation Coefficient	K5-K6	2	4-5
	5.3. Regression Analysis – Regression Equations	K3-K6	2	3-5
	5.4. Testing of Hypothesis for Small Sample	K3	2	2
	5.5. Application of Chi-Square Test – Test of goodness fit and Test of Independence	K3	2	2
	5.6. Analysis of Variance	K4	2	3

- To provide comprehensive knowledge on the performance management strategies
- To enable critical understanding of corporate failures
- To familiarise students with quality improvement methods

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the influence of performance management and quality control on the organisation's productivity	K1, K2
CO2	Apply appropriate strategic performance measurement techniques in evaluating and improving organisational performance	K3
CO3	Analyse data to identify trends, gaps and opportunities for improvement in organisational performance and quality	K4
CO4	Evaluate key performance indicators and quality metrics that align with company's strategic objectives	K5
CO5	Develop and implement effective performance measurement and quality control systems to monitor and track organisational performance and ensure adherence to quality standards	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Strategic Performance Measurement			
	1.1 Strategic Performance Measures in Private Sector	K2	2	1
	1.2 Different Measures of Performance	K1-K3	2	1-2
	1.3 Indicators of Liquidity and Gearing	K2-K6	2	1-5
	1.4 Use of Benchmarks in Assessing the Performance		2	
	1.5 Strategic Performance Measures in Not for Profit Sector	K3-K6	4	2-5
2	Divisional Performance and Transfer Pricing Issues	K1-K6	3	1-5
	2.1 ROI, RI and Economic Value Added measures			
	2.2 Need for Separate Measures in respect of Managerial and Divisional Performance	K2-K3	3	1-2
	2.3 Circumstances in which a Transfer Pricing Policy may be needed	K2-K4	3	1-3
	2.4 Alternative Bases for Transfer Pricing	K3-K5	3	2-4
3	Non-Financial Performance Indicators and Quality Control	K1-K5	3	1-4
	3.1 Interaction of Non-Financial Indicators with Financial Performance Indicators			
	3.2 Significance and Difficulties of Non-Financial Performance Indicators	K2-K3	2	1-2
	3.3 Japanese Business Practices and Management Accounting Techniques for Quality	K3-K5	3	2-4
	3.4 Six Sigma as a Quality Improvement Method	K3-K6	3	2-5
	3.5 Issues Related to Remuneration and Rewards	K1-K3	3	1-2
4	Sourcing and Coordination in Supply Chain			
	4.1 Role of Sourcing in Supply Chain- Supply Selection Assessment and Contracts	K2-K3	3	1-2
	4.2 Source Planning and Analysis- Bull Whip Effect	K3-K5	3	2-4
	4.3 Supply Chain Coordination- Effect of Lack of Coordination, Obstacles	K2-K4	3	1-3
	4.4 Building Strategic Partnership and Trust within a Supply Chain	K2-K6	3	1-5

5	Performance Evaluation and Corporate Failure 5.1 Alternative Views of Performance Measurement and Management – Balanced Scorecard, Performance Pyramid, Fitzgerald and Moon, Activity-Based Management, Value-Based Management	K1-K6	3	1-5
	5.2 Strategic Performance Issues in Complex Business Structures – Problems and Impact		3	
	5.3 Predicting and Preventing Corporate Failure – Z scores and Argenti Models		3	
	5.4 Critique Quantitative and Qualitative Corporate Failure Prediction Models	K4-K6	3	3-5
	5.5 Performance Improvement Strategies and Changes to Performance Management Systems	K3-K6	3	2-5

OBJECTIVES OF THE COURSE

- To familiarise the fundamental concepts in business policies
- To sensitize students on the business environment and culture
- To develop skills for decision making
- To provide an understanding of business continuity plan
- To evaluate the internal strengths and weaknesses of the business

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the various government policies that affect business operations	K1, K2
CO2	Apply knowledge of the external environment to analyze and develop business strategies	K3
CO3	Analyse the effects of different government policies on business operations	K4
CO4	Evaluate the ethical implications of different business policies and practices	K5
CO5	Develop creative solutions to complex business policy and environment issues	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Business Policies 1.1 Introduction	K1,K2	2	1
	1.2 Overview- Importance of Business Policies		3	
	1.3 Definitions of Policy, Procedure, Process and Programmes	K1-K4	2	1-3
	1.4 Types of Policies, Business Policy Statements	K1-K3	3	1-2
2	Business Policy and Decision Making 2.1 Factors Considered Before Framing Business Policies	K1-K5	2	1-4
	2.2 Steps Involved in Framing Business Policies	K1-K6	3	1-5
	2.4 Policy Cycle and its Stages – Implementation of Policy Change		3	
	2.4 Role of Policies in Strategic Management	K1-K4	2	1-3
3	Business Continuity Plan 3.1 Introduction	K1-K2	1	1
	3.2 Concepts of Business Continuity Plan (BCP)	K1-K3	2	1-2
	3.3 Relevance and Importance of BCP		2	
	3.4 Steps in Business Continuity Plan - Business Impact Areas	K1-K6	2	1-5
	3.5 BCP and its Influence on Strategic Management and Policy Making		3	
	3.6 Contingency Planning	K1-K5	2	1-4
4	Business Environment 4.1 Introduction – Nature and Significance	K1,K2	2	1
	4.2 Elements of Environment – Internal and External	K1-K4	3	1-3
	4.3 Changing Dimensions of Business Environment		2	
	4.4 Environmental Scanning - Techniques	K1-K6	3	1-5
5	Culture in an Organisation 5.1 Meaning and Need of Business Culture	K1-K2	3	1
	5.2 Theories on Culture – Schein’s Theory on Culture, Handy’s Cultural Types, Hofstede’s National Cultural Differences	K4-K5	4	3-4
	5.3 Cultural Web	K1-K3	3	1-2

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To introduce the basic concepts in research methodology in social science
- To comprehend the process and techniques of conducting research
- To familiarise the techniques of data collection, analysis of data and interpretation
- To identify and overcome the issues in selecting a research problem
- To enable students to write research proposals

COURSE LEARNING OUTCOMES

On successful completion of the course, student will be able to

COs	DESCRIPTION	CL
CO1	Know the concepts of Research	K1,K2
CO2	Analyse quantitative and qualitative data	K3
CO3	Frame research questions to meet the research objectives	K4
CO4	Discuss limitations and potential contribution to theory and practice of research	K5
CO5	Construct and document an appropriate research design	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENTS	CL	HRS	CO
1	Introduction			
	1.1 Research – Meaning - Definition – Characteristics – Purpose – Types – Significance	K1-K2	2	1
	1.2 Attributes of a Good Research and a Good Researcher	K2	2	1
	1.3 Business Research- Research and Business Decisions	K1-K6	2	1-5
	1.4 Ethics in research - Scope of Research in Business and Commerce – Research in India	K1-K4	2	1-3
	1.5 Formulation of Research Problem – Criteria, Sources, Selection of Research Problem	K1-K5	2	1-4
2	Literature Review and Research Design			
	2.1 Literature Review			
	2.1.1 Sources – Library Usage	K1-K2	1	1
	2.1.2 Different Types of Literature Review – Process of Literature Review	K2	2	1
	2.1.3 Different Formats of presenting Literature Review	K3	2	2
	2.1.4 Identification of Research Gap – Softwares Available for Literature Review and Citation - APA 6th Edition Formats	K3-K6	2	2-5
	2.2 Research Design			
	2.2.1 Meaning – Characteristics – Importance	K1-K2	1	1
	2.2.2 Types of Variables	K2	1	1
	2.2.3 Classification of Research Design	K1-K3	1	1-2
3	Sampling Techniques and Data Collection			
	3.1 Sampling Techniques			
	3.1.1 Probability and Non-Probability Sampling	K1-K2	2	1
	3.1.2 Sampling and non-sampling errors		1	
	3.1.3 Calculation of Sample Size	K1-K4	1	1-3
	3.2 Sources of Data			
	3.2.1 Primary Data – Interview, Questionnaire, Schedule, Observation, Case Study	K1-K4	2	1-3
	3.2.2 Secondary Data – Sources, Collection, Organisation and Evaluation		2	

UNIT	CONTENTS	CL	HRS	CO
4	Data Analysis and Interpretation			
	4.1 Introduction to Data Processing	K3	1	2
	4.2 Methods of Data Processing – Editing, Coding, Classification, Tabulation, Pictorial and Graphical Representation	K1-K4	4	1-3
	4.3 Data Analysis – Factors Influencing Data Analysis – Tools for Data Analysis	K4-K6	4	3-5
	4.4 Interpretation of the Outputs		3	
5	Report Writing			
	5.1 Research Reports – Meaning, Importance	K1-K2	4	1
	5.2 Layout of the Research Report	K2-K3	4	1-2
	5.3 Types of Reports	K3-K4	4	2-3

STRATEGIC MANAGEMENT DYNAMICS

CODE:23BH/MC/SD54

CREDITS : 4

L T P : 4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE :

- To understand the implementation and evaluation of strategic options and actions
- To introduce the concept of business success through innovative thinking, applying best in class strategies and disruptive technologies in the management of change
- To analyse the business strategies and their impact on business performance
- To evaluate external factors and their impact on an organization's strategic decisions
- To encourage students to think critically and make informed, evidence-based decisions in complex and dynamic strategic contexts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the nature of strategy and strategic decisions	K1, K2
CO2	Demonstrate working of a strategic plan for the organisation	K3
CO3	Analyse the strengths and weakness of organisational process and suggest improvements	K4
CO4	Evaluate the importance of talent management for business success	K5
CO5	Develop and manage business projects understanding the constraints and implications	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENTS	CL	HRS	CO
1	Strategic Analysis- External			
	1.1 Nature of Strategy and Strategic decisions	K1-K2	2	1
	1.2 Johnson, Scholes and Whittington Model	K1-K4	3	1-3
	1.3 Environmental issues – Strategic drift, Key drivers for change, Porter’s diamond	K1-K5	2	1-4
	1.4 Competitive forces –Porter’s five forces model, Market Segmentation, Porter’s value chain, Value Networks	K1-K6	3	1-5
2	Strategic Analysis - Internal			
	2.1 Internal Resources, Capabilities and Competencies of an Organisation	K1-K4	4	1-3
	2.2 Sustaining competitive advantage	K1-K5	2	1-4
	2.3 Contribution of Organisational Knowledge to the Strategic Capability	K1-K5	4	1-4
3	Strategic choice			
	3.1 Suitability, Feasibility and Acceptability	K1-K4	2	1-3
	3.2 Price based strategies -7Ps		2	
	3.3 Boston Consulting Group, Public sector matrix Portfolio models, Ansoff Matrix	K1-K5	3	1-4
	3.4 Business Growth, Internal Development or Business Combinations - Strategic Alliances and Partnering	K1-K5	3	1-4
4	Strategic Action			
	4.1 Implementing Strategic Plan	K1-K4	2	1-3
	4.2 Aspects of Change Management Process; Challenges		2	
	4.3 Business Change Life Cycle	K1-K5	2	1-4
	4.4 Harmon’s Process- Strategy Matrix	K1-K6	2	1-5
	4.5 Improving Processes in Organisation		2

SYLLABUS

(Effective from the academic year 2023-2024)

INTERNSHIP

CODE: 23BH/MC/IN52

CREDITS: 2

Internship is an integral part of the B.Com (Hons) Programme. To enable students to face the challenges of the business world, Internship Training is important. It plays a vital role in implementing theoretical knowledge and gaining practical exposure from the industry/organisation.

COURSE OUTCOMES FOR INTERNSHIP

- Apply theoretical knowledge gained in academic courses to real-world situations.
- Develop a better understanding of workplace dynamics, professional etiquette, and industry standards
- Build valuable connections for future career opportunities

OBJECTIVES OF INTERNSHIP

- To integrate theory and practise
- To gain working experience in a real working environment
- To engage in teams for execution of work assigned
- To widen their social and cultural experience
- To expose students to a wide spectrum of professional services in the field of commerce
- To gain insight on organization structure and its roles and responsibilities
- To help students identify and develop professional skills

GUIDELINES:

- The student will undergo practical training in a reputed organization for 30 hours
- The student is expected to work in the Finance department at least for 20 hours and the remaining 10 hours in other departments
- The student is required to maintain a log book duly counter signed by the supervisor of the organization
- Log book should contain the following details:
Hours worked, Nature of work performed, Signature of the supervisor
- A final consolidated report to be submitted to faculty advisor

Preparation of Final Report

The report should have a minimum of 25 pages detailing the work assigned and performed in the organization - Introduction of the Organisation/ Practical Aspects of Internship - Experience/Suggestions/Challenges/Conclusion

Pattern of Evaluation

Internship Report Evaluation:

Rubrics for Evaluation	Marks	Cognitive Level
Log book	20	K1
Project report	50	K2-K4
Viva	30	K5
	100

CORPORATE COMMUNICATION

CODE: 23BH/SS/CC50

CREDITS: 0

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To bring out the importance of communication in an organisation
- To identify the components which make an effective communication
- To evolve strategies for projecting a consistent image of an organisation and its personnel

COURSE LEARNING OUTCOMES

On successful completion of the course, student will be able to

- Apply theories and concepts of corporate communication
- Comprehend the different models of communication
- Undertake media research
- Explain the process of effective communication

Unit 1

Introduction

(10 hours)

1.1 Conceptualising communication

1.2 Models of communication – Classical, Intermediary, Interactive and Transactional models

1.3 Theories and Ideologies of mass communication

Unit 2

Media Research

(6 hours)

2.1 Research Concept, Elements, Design and Methods

2.2 Sampling Techniques

2.3 Qualitative and Quantitative media research methods

Unit 3

(10 hours)

3.1 Internal Communication

3.1.1 Importance of Communication

3.1.2 Methods of Internal Communication

3.1.3 Elements and Process of Effective Communication

3.2 Customer Communication

3.2.1 Development of Marketing Strategies

3.2.2 Evaluation of External Stakeholders

3.2.3 Design and Delivering News Team Report

INVESTMENT ANALYSIS AND APPRAISAL

CODE: 23BH/MC/IA64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide a conceptual framework for analysis from an investor's perspective of maximizing return on investment
- To emphasise on the need for Savings and Investment
- To familiarise with the different Investment avenues
- To plan and manage personal savings and investments
- To acquaint with the process of evaluating potential investment decisions and assessing their financial and strategic consequences, both domestically and internationally

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the principles of investment analysis and appraisal including risk assessment and return analysis	K1, K2
CO2	Apply tools and techniques to analyse financial performance of potential investments	K3
CO3	Analyse and interpret fundamental and technical indicators and their impact on investment decisions	K4
CO4	Evaluate investment opportunities using various investment analysis techniques	K5
CO5	Develop critical-thinking and problem-solving skills necessary to make informed investment decisions	K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

UNIT	CONTENT	CL	HRS	CO
1	Investment Analysis			
	1.1 Fundamental Analysis - EIC Framework	K1-K4	2	1-3
	1.2 Economic Analysis: Leading Lagging and Coincident Macro-Economic Indicators, Expected Direction of Movement of Stock Prices with Macroeconomic Variables in the Indian Context	K1-K6	4	1-5
	1.3 Industry Analysis: Stages of Life Cycle	K1-K6	2	1-5
	1.4 Company Analysis to Financial Strategies – Investment, Financing and Dividends	K1-K4	2	1-3
2	Share Valuation			
	2.1 Dividend Discount Models - No Growth, Constant Growth, Two Stage Growth Model, Multiple Stages	K1-K6	4	1-5
	2.2 Relative Valuation Models Using P/E Ratio, Book Value to Market Value	K1-K5	4	1-4
	2.3 Technical Analysis: Meaning, Assumptions, Difference between Technical and Fundamental Analysis	K1-K4	8	1-3
	2.3.1 Price Indicators- Dow Theory, Advances and Declines, New Highs and Lows - Circuit Filters			
	2.3.2 Volume Indicators - Dow Theory, Small Investor Volumes			
	2.3.3 Other Indicators - Futures, Institutional Activity			
3	Portfolio Analysis			
	3.1 Portfolio Risk and Return	K1-K5	2	1-4
	3.2 Markowitz Portfolio Model - Risk and Return for 2 and 3 Asset Portfolios – Concept of Efficient Frontier and Optimum Portfolio	K1-K6	5	1-5
	3.3 Market Model: Concept of Beta Systematic and Unsystematic Risk	K1-K4	3	1-3
	3.4 Investor Risk and Return Preferences - Indifference curves and the efficient frontier	K1- K5	3	1-4
4	Investment appraisal Techniques			
	4.1 Discounted cash flow techniques – NPV with Inflation, taxation, capital rationing, Probability analysis and sensitivity analysis, Risk adjusted discount rates	K1-K6	5	1-5
	4.2 Monte Carlo simulation, IRR, MIRR, Macaulay duration		3	
	4.3 Adjusted Present Value		2	
	4.4 International NPV		2	
	4.5 Islamic Finance	K1-K4	2	1-3

5	Risk and Return			
	5.1 Concept of Returns - Application of Standard Deviation, Coefficient of Variation, Beta, Alpha	K1-K6	3	1-5
	5.2 Bonds - Present Value of a Bond, Yield to Maturity, Yield to Call, Yield to Put, Systematic Risk, Price Risk, Interest Rate Risk, Default Risk	K1-K5	3	1-4
	5.3 Yield Curve and Theories regarding Shape of Yield Curve	K1-K4	2	1-3
	5.4 Unsystematic Risk and Non-Risk Factors that Influence Yields	K1-K5	2	1-4
	5.5 Duration and Modified Duration, Immunization of a Bond Portfolio	K1-K4	2	1-3

PROJECT

CODE: 23BH/MC/PR68

CREDITS: 8

L T P: 0 0 4

COURSE OUTCOMES FOR PROJECT

- Deepen understanding of specific topics within the broader field of commerce through focused investigation and analysis.
- Develop research skills including the ability to gather and evaluate information from various sources, synthesise findings, and draw conclusions.
- Utilise appropriate research methods, including qualitative and/or quantitative approaches, to collect and analyse data effectively.
- Effectively communicate research findings, methodologies, and conclusions through both written and oral presentations.
- Make a meaningful contribution to research in the field of accounting and finance

GUIDELINES FOR PROJECT

Project should be the independent work of the student. Each student will choose a topic of her interest and the student will be assigned to a supervisor.

The student can use Quantitative or Qualitative/Descriptive or both methods.

➤ Page Limit:

The project report should be submitted in the prescribed format having a maximum of 100 pages, typed in font Times New Roman -size 12, with 1 ½ line spacing on A4 Size paper.

➤ Contents of the Project:

- Contents Page
- The Project Copy will include Certificate of the Supervisor, Declaration, and Acknowledgement
- Four or five chapters
- Presentation of the Project Report – format

Chapter 1 Introduction - to include background of the study, objectives, Methodology, limitation of the study and chapter scheme

Chapter 2 – Review of literature

Chapter 3 – Theoretical aspects of the study

Chapter 4 – Data analysis

Chapter 5 – Suggestions and conclusion

At the end of the project, Bibliography must be given in Alphabetical/ Chronological order and necessary appendices may be added.

➤ **Submission:**

Each student may prepare two soft bound copies of the project, one for her and one copy to be submitted to the Head of the Department duly signed by the supervisor, on the scheduled date.

➤ **Guidelines for Evaluation:**

There will be double valuation for the project by the supervisor and an external examiner. The student will appear for viva -voce before a panel comprising External Examiner, Supervisor and Head of the Department. The maximum marks for the project is 100 – 75 marks for the project report and 25 marks for the viva-voce.

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI

DEPARTMENT OF COMMERCE – SHIFT II

**BACHELOR OF VOCATION – BANKING, FINANCIAL SERVICES AND
INSURANCE**

PROGRAMME DESCRIPTION

B.Voc- Banking, Financial Services and Insurance (BFSI) is a three year Bachelor's Degree Programme. It is a vocational training programme which provides a judicious mix of skills relating to a profession and a general appreciation of courses in Commerce and Business Administration. The programme ensures that the students have adequate knowledge and skills to enhance employability to face the challenges pertaining to the job at each exit point of the programme. NSQF is integrated within the B.Voc Degree Programme to meet industry requirements. The programme also enables the students to develop entrepreneurial skills to manage their own business. The methodology involves training through practical experience in the form of case studies, projects, presentations, industrial visits and interaction with experts from the industry. This programme is a blend of theoretical inputs, practical exercises and internship training.

The certification levels for this programme will lead to Diploma/Advanced Diploma/B. Voc. Degree in Banking Finance Services and Insurance (BFSI). Students may be awarded Diploma/Advance Diploma /Degree as indicated in the table below:

Award	Duration for class	Corresponding NSQF Level
Diploma	1 year	5
Advance Diploma	2 years	6
Degree	3 years	7

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of 'Truth and Charity' thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately moulding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Voc. in Banking, Financial Services and Insurance, the students will be able to

PSO 1	demonstrate comprehensive knowledge in different verticals of financial system
PSO 2	acquire a set of competencies required for career in varied organisations
PSO 3	apply appropriate analytical methods to analyse business issues
PSO 4	use business knowledge in the larger interest of the community
PSO 5	handle present complexities and future challenges in the business environment

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI

DEPARTMENT OF COMMERCE – SHIFT II

**BACHELOR OF VOCATION – BANKING, FINANCIAL SERVICES AND
INSURANCE**

PROGRAMME DESCRIPTION

B.Voc- Banking, Financial Services and Insurance (BFSI) is a three year Bachelor's Degree Programme. It is a vocational training programme which provides a judicious mix of skills relating to a profession and a general appreciation of courses in Commerce and Business Administration. The programme ensures that the students have adequate knowledge and skills to enhance employability to face the challenges pertaining to the job at each exit point of the programme. NSQF is integrated within the B.Voc Degree Programme to meet industry requirements. The programme also enables the students to develop entrepreneurial skills to manage their own business. The methodology involves training through practical experience in the form of case studies, projects, presentations, industrial visits and interaction with experts from the industry. This programme is a blend of theoretical inputs, practical exercises and internship training.

The certification levels for this programme will lead to Diploma/Advanced Diploma/B. Voc. Degree in Banking Finance Services and Insurance (BFSI). Students may be awarded Diploma/Advance Diploma /Degree as indicated in the table below:

Award	Duration for class	Corresponding NSQF Level
Diploma	1 year	5
Advance Diploma	2 years	6
Degree	3 years	7

VISION OF THE DEPARTMENT

In consistent with the vision of the College, we are in pursuit of excellence in Commerce, by providing a vibrant and innovative Centre of Learning for the students to realize their potential and facilitate them to become business leaders and entrepreneurs with essential virtues of 'Truth and Charity' thereby upholding the motto of the College.

MISSION OF THE DEPARTMENT

Our mission is to excel as a transformational leader in Commerce, by equipping the students with sound theoretical knowledge and application skills to surge ahead in their career, adequately moulding them to meet the challenges of the emerging "Knowledge Society" besides inculcating humane values in them for the well-being of the society

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Voc. in Banking, Financial Services and Insurance, the students will be able to

PSO 1	demonstrate comprehensive knowledge in different verticals of financial system
PSO 2	acquire a set of competencies required for career in varied organisations
PSO 3	apply appropriate analytical methods to analyse business issues
PSO 4	use business knowledge in the larger interest of the community
PSO 5	handle present complexities and future challenges in the business environment

OFFICE MANAGEMENT AND PRACTICES

CODE:23VB/VA/OM15

CREDITS:5

L T P:4 0 2

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To familiarise the students with the principle and practice of office management
- To comprehend the importance of record management by using appropriate filing and indexing methods
- To expose students to office machines and safety measures
- To enable students to understand the recent developments in office management
- To introduce students to the office automation tools

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe office management principles, policies and procedures	K1
CO2	relate the functions of office with other departments in an organization	K2
CO3	compare the traditional and the modern functions of office	K3
CO4	organise data to prepare and consolidate necessary reports	K4
CO5	evaluate the effectiveness of office management strategies and practices	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Office and Office Management			
	1.1 Meaning of Office, Function of Office, Primary and Administrative Functions, Importance of Office	K1-K2	5	1-2
	1.2 Relation of Office with Other Departments of Business Organisation – Concept of Paperless Office - Virtual Office, Back and Front Office, Open and Private Office	K1-K5	5	1-5
	1.3 Definition and Elements of Office Management, Duties of an Office Manager	K1-K4	5	1-4

UNIT	CONTENT	CL	HRS	CO
2	Filing and Indexing	K1-K3	11	1-3
	2.1 Meaning and Importance of Filing, Essential of Good Filing System			
	2.2 Centralized and Decentralized Filing System			
	2.3 Meaning, need of Indexing Types of Indexing used in the Business Organisation	K1-K5	4	1-5
	2.4 Third party Services			
3	Office forms	K1-K4	5	1-4
	3.1 Types of forms used in Business Organisation – Controls and Objectives			
	3.2 Specimens of Forms used in office – Recent Trends	K1-K5	10	1-5
	3.3 Methods of Capturing Information			
4	Office Record Management and Office Manuals	K1-K5	15	1-5
	4.1 Meaning, importance of Record keeping Management, Principles of Record Management and Types of Records kept in a Business Organisation.			
	4.2 Office Manuals – Meaning, Need, Types of Office Manuals and Steps in Preparing Office Manuals			
	4.3 Preparation of Organogram charts			
	4.4 Emerging Trends in Office Management			
5	Office Machines and Safety	K1,K2	5	1-2
	5.1 Importance, objectives of office machines.			
	5.2 Office Safety and Security – Meaning, Importance of Office Safety	K1-K5	13	1-5
	5.3 Safety hazards and steps to improve Office Safety, Security Hazards and Steps to improve Office Security.

OBJECTIVES OF THE COURSE

- To expose students to the computer basics
- To equip students to apply excel functions
- To enlighten students with basic business applications using computers
- To provide insights on formatting word document and excel spreadsheet
- To acquaint students with simple design and development tasks.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe computer hardware, software and the use of internet	K1
CO2	identify the errors or inconsistencies in word and Excel spread sheet	K2
CO3	apply formatting options in word and excel spread sheet	K3
CO4	analyse formulas and functions used in word document and Excel spread sheet	K4
CO5	critically evaluate the ethical considerations related to computer usage	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Applications of computers, Hardware, Firmware, Liveware, Software, System Software: Operating system, Translators, interpreter, compiler, Overview of operating system, function of operating system, Application software: General Purpose Packaged Software and tailor made software	K1-K2	9	1-2
	1.2 Meaning of Internet, Growth of internet, Owner of Internet, Anatomy of Internet, Net Etiquette , World Wide Web, Internet Protocols, Usage of Internet to society, Search Engines			
2	Business Communication using Word Processing 2.1 Working with Word Document, Opening an Existing Document/Creating a New Document, Saving the Document	K1-K5	9	1-5
	2.2 Selecting Text, Editing Text, Finding and Replacing Text			
	2.3 Formatting Text, Bullets and Numbering, Tabs, Paragraph Formatting, Page Setup			
3	Spreadsheet and its Business Applications 3.1 Spreadsheet Concepts	K1-K2	1	1-2
	3.2 Creating a Work Book, Saving a Work Book, Editing a Work Book, Inserting, Deleting Work Sheets, Entering Data in a Cell, Formula Copying, Moving Data from Selected Cells	K1-K5	2	1-5
	3.3 Inserting Charts- LINE, PIE, BA			
	3.4 Excel Functions 3.4.1 Mathematical- ROUND ALL, SUM, SUMIF, COUNT, COUNTIF	K1-K3 K1-K4	1	1-3 1-4
	3.4.2 Statistical – AVERAGE, MAX, MIN, STDEV, FREQUENCY, INTERCEPT, SLOPE	K1-K5	4	1-5
	3.4.3 Financial - PMT, PPMT, IPMT, Logical - IF, AND, OR.

ENVIRONMENTAL STUDIES

CODE: 23VB/UC/ES32

CREDITS : 2

L T P : 2 0 0

TOTAL TEACHING HOURS : 26

OBJECTIVES OF THE COURSE

- To create an awareness about current environmental issues
- To educate students on conservation and management of natural resources
- To encourage students to be ecosensitive and ecofriendly

Unit 1

Introduction

(6hrs.)

- 1.1 Components of the Environment – Classification and Characteristics of Resources – Renewable and Non – Renewable Resources
- 1.2 Need for Public Awareness in Conservation of Natural Resources
- 1.3 Energy Flow in Ecosystems – Aquatic and Terrestrial – Food Chain and Food Web

Unit 2

Pollution and Socio Economic Aspects of the Environment

(10hrs.)

- 2.1 Types of Pollution – Air, Water, Solid Waste, Noise
- 2.2 Problems - Green House Effect – Depletion of the Ozone Layer – Climate Change
- 2.3 Bio Diversity - Definition - Loss of Bio Diversity – Threats to Biodiversity and Conservation of Biodiversity
- 2.4 Human Behaviour: - Population – Urbanization – Poverty (As Cause and Result of Pollution and Degradation)
- 2.5 Technology: Agriculture and Industry – Deforestation. Misuse and Abuse of the Resources
- 2.6 Effects and Consequences of Environmental Problems

Unit 3

Sustainable Development, Remedies and Policy Implications

(10 hrs.)

- 3.1 Environmental Disasters Natural and Human Made – Bhopal Gas Tragedy – Chernobyl Accident – Fukushima Nuclear Crisis - Gulf War – Love Canal Episode – Tsunami – Volcanic Eruptions
- 3.2 Methods Evolved to Measure and Check Environmental Degradation and Pollution – Carbon Footprint, Carbon Credit, Ecological Footprint, and Ecological Shadow
- 3.3 Environmental Movements in India – Chipko Movement, Narmada Bachao Andolan, Sethu Samudram Project
- 3.4 Environmental Acts – Policy Measures with respect to India
- 3.5 International Environmental Agreement – Stockholm Conference – Montreal Protocol – Rio Meet – Kyoto Conference – UN Conference on Climate Change (Copenhagen)

Field visit

Eco initiatives at the campus: Garbage Segregation and Vermicomposting – Greywater Recycling – Rainwater Harvesting – Solar Powered Lights – Biodiversity

COST AND MANAGEMENT ACCOUNTING

CODE: 23VB/VM/CM46

CREDITS: 6

LTP: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To comprehend the difference between cost and management accounting
- To familiarize the students with the computation of material cost
- To expose students to methods of overhead absorption
- To enable students to understand and compute labour cost
- To provide an understanding on the project appraisal techniques

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the relationship between cost and management accounting	K1
CO2	interpret on various techniques used in management and cost accounting	K2
CO3	apply the different tools for determining various costs and overheads	K3
CO4	analyse and interpret on costs and budget	K4
CO5	assess the methods of project appraisal for computation of overheads	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1	3	1
	1.1 Meaning, Definition, Nature and Scope			
	1.2 Advantages and Limitations of Cost and Management Accounting			
	1.3 Difference and Relationship between Cost and Management Accounting	K1-K5	2	1-5

UNIT	CONTENT	CL	HRS	CO
2	Material Cost	K1-K5	4	1-5
	2.1 Computation of material cost			
	2.2 Accounting Treatment for Normal, Abnormal Loss and Scrap		6	
	2.3 Computation of EOQ and Stock Levels		6	
	2.4 Methods of Material issue-FIFO, LIFO, Average Cost-Simple and Weighted Average		6	
3	Labour cost	K1-K5		1-5
	3.1 Computation of labour cost with overtime and idle Time		4	
	3.2 Methods of Remuneration -Time Rate System, Piece Rate system, Taylor's Differential Piece Rate System		7	
	3.3 Incentive Plans-Halsay Premium Plan, Rowan Premium Plan		7	
4	Overheads	K1-K5		1-5
	4.1 Importance and classification of overheads cost		1	
	4.1.1 Primary Distribution of Overheads		3	
	4.1.2 Secondary Distribution of Overheads-Direct Distribution		4	
	4.2 Methods of Absorption of Overheads	K1-K5	1	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A -Not Exceeding 50 words for theory	K1 (6)	$3 \times 2 = 6$	3 K1 questions	3 K1 questions (2 theory and 1 problem)
B – Not Exceeding 150 words for theory	K2 (10)	$2 \times 5 = 10$	2 K2 questions	3 K2 questions (1 theory and 2 problem)
C	K3,K4 (20)	$2 \times 10 = 20$	1 K3 question 1 K4 question	1 K3 questions (only problems) Internal Choice 1 K4 questions (only problems) Internal Choice
D	K5(14)	$1 \times 14 = 14$	1 K5 question	2 K5 questions (Only problems)
	Total	50	8	10

Other Components: Total Marks: 50

Assignment, Open Book test, MCQ, Short Answer Test, Case Study

End Semester Examination:**Total Marks: 100****Duration: 3 Hours**

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A -Not Exceeding 50 words for theory	K1 (10)	5 x 2 = 10	5 K1 questions	5 K1 questions (2 Theory and 3 Problems)
B – Not Exceeding 150 words for theory	K2 (20)	4 ×5 = 20	4 K2 questions	6 K2 questions (one Theory and 5 Problems)
C	K3, K4 (40)	4 x 10 = 40	2 K3 questions 2 K4 questions	2 K3 questions (Only Problems) Internal Choice 2 K4 questions (Only Problems) Internal Choice
D	K5 (30)	2 x 15 = 30	2 K5 questions	3 K5 questions (Only Problems)
	Total	100	15	18

(Effective from the academic year 2023–2024)

COMPUTER APPLICATION IN BUSINESS PRACTICAL

CODE: 23VB/VE/CB45

CREDITS: 5

L T P: 2 0 3

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable students to understand the use of computer software in performing financial and statistical analysis
- To acquaint students with the techniques for financial statements analysis
- To provide a practical exposure on the various statistical methods and to arrive at decisions through systematic analysis and interpretation
- To educate on the effective and efficient application of various statistical tools associated with research in business fields
- To equip students to presentation the statistical data analysis using graphs, charts and PIVOT

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	outline various methods where computer software can be used to support existing businesses and strategies	K1
CO2	interpret financial data analysis for making decisions	K2
CO3	apply Excel packages in statistical analysis	K3
CO4	analyse financial statements using Excel	K4
CO5	asses the financial position of a business concern	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to MS Excel			
	1.1 Introduction to Excel	K1- K3	3	1-3
	1.2 Formatting Worksheets	K1-K5	3	1-5
	1.3 Presentation of Data in MS Excel using Graph, Tables and PIVOT table		4	

UNIT	CONTENT	CL	HRS	CO
2	Analysis using Excel	K1-K5		1-5
	2.1 Techniques of Financial Statement Analysis – Meaning and Importance		2	
	2.2 Comparative Statements		4	
	2.3 Common Size Statements		4	
	2.4 Trend Percentages		4	
3	Business Planning using Excel	K1-K5		1-5
	3.1 Preparation of Budgets – Production, Sales, Cash & Flexible		7	
	3.2 Cash Flow Analysis		8	
4	Business Evaluation Techniques using Excel	K1-K5		1-5
	4.1 Time Value of Money		3	
	4.2 Future and Present Value of Money		3	
	4.3 Future and Present Value of Annuity		4	
	4.4 Evaluation Techniques – Pay Back Period, NPV and IRR Methods		4	
5	Statistical Analysis using Excel	K1-K5		1-5
	5.1 Measures of Central Tendency & Dispersion – Mean, Median, Mode & Standard Deviation		3	
	5.2 Correlation Analysis – Correlation Co-efficient		3	
	5.3 Regression Analysis – Regression Equations		4	
	5.4 Time series analysis – Moving Averages, Least Squares		4

TIME MANAGEMENT

CODE: 23VB/US/TM43

CREDITS: 3

LTP: 1 0 2

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To understand the importance of time management
- To familiarize students with the time management tools
- To educate students on the importance of value of time
- To impart knowledge on scheduling
- To introduce the concepts of time evaluation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and list key principles and concepts related to time management.	K1
CO2	summarize the benefits of setting goals and prioritizing tasks in time management	K2
CO3	utilize time management tools and techniques to organize daily and long-term tasks	K3
CO4	evaluate the effectiveness of various time management strategies in different contexts	K4
CO5	evaluate one's own time management skills and develop a plan for ongoing improvement	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1-K2	3	1-2
	1.1 Meaning, Need, Importance, Objectives and Concepts in Time Management			
	1.2 Pre-Requisites, Process and tools in Time Management	K1-K3	3	1-3
	1.3 Principles of Time Management	K1-K4	3	1-4
	1.4 Planning & Goal Setting, Managing Yourself, dealing with other People, Your Time, Getting Results	K1-K5	4	1-5

UNIT	CONTENT	CL	HRS	CO
2	Time Mapping	K1-K2	2	1-2
	2.1 Employee Absence- Types, Overtime and Substitution			
	2.2 Delegation of work- Need and Significance of effective Delegation	K1-K4	2	1-4
	2.3 Maintaining Time Data 2.3.1 Methods, Annual, Monthly, Weekly Calendars and Shifting Plans	K1-K5	3	1-5
	2.4 Focus is on time and resources, Pre-analysis of performance		3	
	2.5 Drafting of action plan/ scheduling		3	
3	Time Evaluation	K1-K3	6	1-3
	3.1 Meaning and Importance of Time Evaluation			
	3.2 Complete Target Plan, Editing Actual Plan, Cross Application Time Sheet (CATS)	K1-K5	7	1-5

HUMAN RESOURCE MANAGEMENT

CODE: 23VB/VM/HR66

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To familiarize students on roles and responsibilities of HR Managers and the challenges Faced
- To acquaint students with strengths and weaknesses of different performance management system
- To enable students with concepts and factors of human resource planning, recruitment and selection
- To equip students with processes and mechanism of managing Human Resources.
- To provide comprehensive knowledge on the Recent Trends in Human Resource Management

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the principles and objectives of human resource management.	K1
CO2	explain the importance of HRM in supporting organizational goals and employee well-being	K2
CO3	identify the effectiveness of Training methods of employees and managers and the techniques involved	K3
CO4	compare various recruitment strategies in terms of their potential impact on organizational diversity and talent acquisition.	K4
CO5	evaluate the effectiveness of different performance appraisal methods.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1-K2	2 3	1-2
	1.1 Scope and Objectives of Human Resource Management			
	1.2 Significance and Functions of Human Resource Management	K1-K4	2	1-4
	1.3 Emerging Challenges of Human Resource Management- Workforce Diversity, Downsizing, Work Life Balance			
	1.4 Recent Trends in Human Resource Management	K1-K5	2	1-5

UNIT	CONTENT	CL	HRS	CO
2	Acquisition of Human Resources 2.1 Objectives, Characteristics and Process of HR Planning,	K1-K5	12	1-5

SYLLABUS

(Effective from the academic year 2023 – 2024)

PROJECT

CODE: 23VB/VM/PR615

CREDITS: 15

Project should be the independent work of the student. Each student will choose a topic of their interest and the student will be assigned to a supervisor.

The student can use Quantitative or Qualitative/Descriptive or both methods.

- **Page Limit:**

The Dissertation report should be submitted in the prescribed format having a maximum of 100 pages, typed in font Times New Roman -size 12, with 1½ line spacing on A4 Size paper.

- **Contents of the Report:**

- Contents Page
 - The report copy will include Certificate of the Supervisor, Declaration, and Acknowledgement
 - Four or five chapters
 - Presentation of the Report – format
 - Chapter 1 - Introduction - to include background of the study, objectives, Methodology, limitation of the study and chapter scheme
 - Chapter 2 – Review of literature
 - Chapter 3 – Theoretical aspects of the study
 - Chapter 4 – Data analysis
 - Chapter 5 – Findings/Suggestion and conclusion
- At the end of the project 'Bibliography' must be given in alphabetical/chronological order and necessary appendix may be added.

- **Submission:**

Each student may prepare two soft bound copies of the report, one for her and one copy to be submitted to the Head of the Department duly signed by the supervisor, on the scheduled date.

- **Guidelines for Evaluation:**

There will be double valuation for the Dissertation by the supervisor and an External Examiner. The student will appear for viva -voce before a panel comprising External Examiner, Supervisor and Head of the Department.

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VB/US/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religious in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Canticale of creatures Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic

- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion’s vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one’s past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CEHNNAI – 600 086

DEPARTMENT OF MATHEMATICS

PROGRAMME DESCRIPTION

The B.Sc. Mathematics Degree programme lays equal emphasis on motivating and training students towards higher education in the discipline and employability. While the courses cover a wide spectrum of skills for specific corporate and creative sectors, the logic inbuilt in the courses helps in improved analytical skills. Computational techniques introduced through the courses in the first and second years trains students to solve problems with creative and critical thinking. The theoretical inputs to develop interest in Mathematical Communication.

VISION OF THE DEPARTMENT

- To inculcate in the students logical and analytical thinking, to increase their intellectual curiosity enabling them to become lifelong learners
- To continue to grow in their chosen professions and to function as dynamic citizens
- To establish an international reputation as a centre for excellence in teaching and research of Mathematics

MISSION OF THE DEPARTMENT

- To develop in students logical thinking, analytical reasoning and problem solving skills
- To equip the students with more technical and technological skills and scientific computing techniques based on Mathematical methods to meet the growing demand in the industrial, marketing, communication sectors, etc.
- To offer at all levels a wide array of mathematical approaches in a scientific computing environment to cater to the needs of teaching, research & industrial applications
- To equip them with enhanced employable skills
- To widen their horizon of knowledge with a focus on research

STELLA MARIS COLLEGE (AUTONOMOUS), CEHNNAI – 600 086

DEPARTMENT OF MATHEMATICS

PROGRAMME SPECIFIC OUTCOMES (PSO)

On successful completion of the B.Sc. Mathematics Programme, the students will be able to

PSO1	acquire sound knowledge and understanding in the varied fields of Mathematics and in its allied field of Statistics enabling them to think in a critical manner
PSO2	develop the rational and logical reasoning of students and instill in them a range of generic skills helpful for employment, internships and social activities
PSO3	communicate mathematical ideas, solutions, and proofs clearly and effectively through oral and written presentations
PSO4	impart students with sufficient knowledge and skills enabling them to undertake further studies in Mathematics and its allied areas on multiple disciplines concerned with Mathematics
PSO5	employ their knowledge, problem solving skills and analytical thinking to translate information into mathematical form and to use appropriate mathematical formulae, modeling techniques to process the information and draw relevant conclusions

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600 086

B.Sc. DEGREE : BRANCH I-MATHEMATICS - SHIFT II

COURSES OF STUDY

(Effective from the Academic Year 2023-2024)

CHOICE BASED CREDIT SYSTEM

C-Credit, L-Lecture Hours, T-Tutorial Hours, P- Practical Hours, Ex-Exam Hours, CA- Continuous Assessment Marks, ES-End Semester Marks, M-Maximum Marks										
Subject Code	Title of Course	C	L	T	P	Ex	CA	ES	M	

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH I –MATHEMATICS

SYLLABUS

(Effective from the academic year 2023-2024)

DIFFERENTIAL CALCULUS

CODE: 23MT/MC/DC14

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the concepts of differential calculus in depth
- To access the various methods to determine the radius of curvature, evolutes and envelopes of curves
- To discover the extreme values of differentiable functions and comprehend the implications of higher derivatives
- To interpret the concept of derivatives and their applications geometrically
- To analyze the behavior of various curves

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	KL
CO1	define and recall the basic concepts of differential calculus	K1
CO2	interpret various techniques in finding derivatives	K2
CO3	identify appropriate methods to find the solution of problems on differential calculus	K3
CO4	analyze and examine the results of calculus through illustrations with examples.	K4
CO5	evaluate higher order derivatives and determine the properties of well-known curves	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	KL	Hrs.	CO
1	Successive Differentiation 1.1 The nth derivatives of some special functions 1.2 The nth derivatives of rational algebraic functions 1.3 Leibnitz's Theorem for the nth derivative of the product of two functions	K1-K5	12	1-5

UNIT	CONTENT	KL	Hrs.	CO
2	Curvature 2.1 Formulae for radius of curvature 2.2 A theorem on curvature 2.3 Curvature at the origin 2.4 Chord of curvature through the origin (pole) 2.5 Centre of curvature 2.6 Property of the centre of curvature 2.7 Evolute and Involute 2.8 Properties of the evolute	K1-K5	13	1-5
3	Envelopes 3.1 Definition of envelope 3.2 Envelope of straight lines 3.3 Envelope of the curves 3.4 Envelope of a special family 3.5 Envelope of two-parameter family	K1-K5	14	1-5
4	Extrema of functions of two variables 4.1 Extrema with two variables 4.2 Necessary conditions for maximum and minimum of extrema with two variables 4.3 Determination of maxima and minima of extrema with two variables 4.4 Lagrange's method of undetermined multipliers	K1-K5	13	1-5
5	Characteristics of some special curves 5.1 Cycloid 5.2 Catenary 5.3 Evolutes of parabola and ellipse 5.4 Logarithmic (or Equiangular) spiral 5.5 Spiral of Archimedes 5.6 Witch of Agnesi 5.7 Cardioid 5.8 Limacon 5.9 Lemniscate Singular Points 5.10 Double Points 5.11 Classification of Double Points 5.12 Conditions for existence of double points on an algebraic curve	K1-K5	13	1-5

ALGEBRA AND TRIGONOMETRY

CODE: 23MT/MC/AT13

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To impart knowledge of solving algebraic, transcendental and trigonometric equations
- To gain understanding of the different expansions of circular functions and relation between circular and hyperbolic functions
- To identify diagonalizable matrices, apply Cayley Hamilton theorem in solving higher order matrix equations and to compute inverses
- Use the concepts of trigonometry to solve applications
- Using the various series expansions to compute the sum of infinite series and to find limits

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the fundamental notions of Algebra, Trigonometry and the various series expansions	K1
CO2	interpret the acquired knowledge and use it for expressing algebraic equations, categorizing trigonometric problems and to estimate the roots of the equations	K2
CO3	apply the concepts of equations, series categorization and the relation between trigonometric functions to solve relevant problems	K3
CO4	analyze the types of Eigenvectors and its applications, to estimate the sum of infinite series and to illustrate the occurrence of roots and approximation of limits	K4
CO5	evaluate higher order equations to predict their roots and to experiment on similar matrices for the diagonalization process, validate the trigonometric formulas using suitable examples	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Theory of Equations 1.1 Relations between the Roots and Coefficients of Equations involving Cubic and Higher Order 1.2 Symmetric Function of Roots 1.3 Transformation of Equations 1.4 Increase or Decrease the Roots of a Given Equation by a Given Quantity 1.5 Removal of Terms	K1- K5	11	CO1-5
2	Series Expansions 2.1 Exponential Series 2.2 Logarithmic Series 2.3 Application of Exponential and Logarithmic Series	K1- K5	12	CO1-5
3	Properties of Matrices 3.1 Eigenvalues and Eigenvectors 3.2 Cayley - Hamilton Theorem 3.3 Similar Matrices 3.4 Diagonalization of a Matrix	K1- K5	9	CO1-5
4	Trigonometry - I 4.1 Expansions of $\cos n\theta$, $\sin n\theta$ and $\tan n\theta$ 4.2 Expansions of $\cos^n \theta$ and $\sin^n \theta$ in a Series of Sines and Cosines of Multiples of θ . 4.3 Expansions of $\cos \theta$ and $\sin \theta$ in Powers of θ	K1- K5	10	CO1-5
5	Trigonometry - II 5.1 Euler's Formula for $e^{i\theta}$ 5.2 Hyperbolic Functions 5.3 Relations between Circular and Hyperbolic Functions 5.4 Inverse Hyperbolic Functions in Terms of Logarithmic Functions	K1- K5	10	CO1-5

ENVIRONMENTAL STUDIES

CODE:23MT/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies; Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-energy resources: renewable and non-renewable sources, impact of over-exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and *ex-situ* conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects and control measures -Impact of over-population on pollution and health – carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations Sustainable Development Goals of the 2030 Agenda
- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan
International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences

2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3

(6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si'*-On Care for our Common Home
- 3.5 Environmental Calendar

B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23MT/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

(Effective from the academic year 2023–2024)

PHYSICS FOR MATHEMATICS I

CODE: 23PH/AC/PM13

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To impart fundamental knowledge in the concepts and laws of physics.
- To train the students in visualizing the Physics behind the characteristics of solids and liquids at different conditions.
- To inculcate practical knowledge related to the dynamic theories evolved in mechanics, viscosity and theory of relativity.
- To engage the students in cultivating physics-based problem-solving abilities in different scientific scenarios
- To encourage the students to apply acquired theoretical knowledge to solve realistic problems

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	Description	CL
CO 1	acquire knowledge on elasticity, bending of beams and theories of surface tension and viscosity of liquids, mechanics, and the basic concepts of relativity.	K1
CO2	describe the elastic behaviour of solids, the physical properties of liquids that impact fluid motion, and explain the concepts of mechanics and relativity.	K2
CO3	apply the mathematical tools to solve simple and complex problems in physics	K3
CO 4	examine the behaviour of rigid bodies and liquids utilizing theoretical concepts.	K4
CO 5	formulate the knowledge gained in theory for real life and practical applications.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNITS	COURSE DETAILS	CL	Hrs	CO
1	Mechanics I 1.1 Impulse-Impact-Conservation of linear momentum: Internal forces and momentum conservation – center of mass- examples- General elastic collision of particles of different masses. 1.2 Significance of conservation laws- law of conservation of Energy- concepts of work- power – energy – potential energy.	K1-K5	6	1-5
2	Mechanics II 2.1 Simple Harmonic Motion: Periodic and Harmonic Motion- Formula for acceleration, velocity and displacement - Energy of a Harmonic Oscillator- oscillation in spring mass-springs in series and parallel. 2.2 Classical mechanics: Degrees of freedom and constraints - Generalized Coordinates - principle of virtual work - De Alembert's principle -Explanation of Lagrangian equation (No derivation) Application of Lagrangian equation in Atwood's machine and Simple pendulum.	K1-K5	7	1-5
3	Elasticity 3.1 Elastic properties: Hooke's law - Elastic limit moduli of Elasticity Poisson's ratio 3.2 Expression for Bending Moment - Depression at the loaded end of the cantilever – depression and elevation at the midpoint of a loaded beam (non-uniform and uniform bending) – Torsion in a wire – Torque per unit twist – torsional oscillations – Expression for period	K1-K5	6	1-5
4	Viscosity and Surface Tension 4.1 Viscosity: Coefficient of viscosity - Stream Line Flow and Turbulent Flow – Critical Velocity – Euler's Equation for unidirectional flow 4.2 Surface Tension: molecular theory of surface tension - Determination of Surface Tension by Drop Weight Method- Interfacial Surface Tension	K1-K5	7	1-5
5	Relativity 5.1 Inertial Frames of Reference – Newtonian Relativity – Galilean Transformation Equations 5.2 Postulates of Special Theory of Relativity- Lorentz Transformation Equations- Length Contraction - Time Dilation - Twin Paradox and Meson Paradox 5.3 Relativistic Momentum (no derivation) – Mass Energy Relation- Physical Significance.	K1-K5	13	1-5

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Experiments	CL	Hrs	CO
1. Determination of 'g'- Compound Pendulum. 2. Young's Modulus 'E' by Non-Uniform Bending- Pin and Microscope 3. Young's Modulus 'E' by Uniform Bending- Scale and Telescope 4. Rigidity Modulus 'G' - Torsional pendulum 5. Surface Tension and Interfacial Surface Tension – Drop Weight Method. 6. Determination of the Refractive Index of the material of a prism - Spectrometer. 7. Verification of Series and Parallel connections of resistance and Determination of Specific Resistance - Post Office Box 8. Characteristics of a Zener Diode 9. Verification of Newton's Law of Cooling for two liquids	K1-K5	39	1-5

INTEGRAL CALCULUS

CODE: 23MT/MC/IC23

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To evaluate integration of irrational functions and improper integrals
- To extend the idea of definite integral to double and triple integrals of functions of two or three variables
- Apply multiple integrals to compute volume and surface area of general regions
- To apply the change of variable technique in both double and triple integrals to simplify the integration process and solve practical problems
- To study the Beta and Gamma integrals and the relationship between them

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	recall and reproduce various integration techniques	K1
CO2	understand the concept of multiple and improper integrals	K2
CO3	employ various techniques in evaluating multiple integrals	K3
CO4	analyse and explain the results of multiple integral through illustrations with examples	K4
CO5	predict appropriate methods to find the solution of problems on integral calculus	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Methods of Integration 1.1 Integration of Irrational Functions of the Type: $\frac{1}{(x-k)\sqrt{ax^2+bx+c}}, \frac{1}{(Ax^2+B)\sqrt{Cx^2+D}},$ $\frac{1}{(ax^2+bx+c)\sqrt{Ax^2+Bx+C}}, \sqrt{(x-\alpha)(\beta-x)},$ $\frac{1}{\sqrt{(x-\alpha)(\beta-x)}}, \sqrt{\frac{x-\alpha}{\beta-x}}$	K1-K5	11	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
	1.2 Integration of functions of type: $\frac{1}{a+b \cos x}$, $\frac{1}{\sqrt{a^2 \cos^2 x + b^2 \sin^2 x}}$			
2	Improper Integrals 2.1 Infinite Integrals 2.2 Discontinuous Integrands 2.3 Comparison Test	K1-K5	9	CO1-5
3	Double Integrals 3.1 Iterated Integrals 3.2 Double Integrals over General Regions 3.3 Double Integrals in Polar Coordinates 3.4 Surface Area using Double Integrals	K1-K5	11	CO1-5

ANALYTICAL GEOMETRY

CODE: 23MT/MC/AG24

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the concepts of two-dimensional and three-dimensional coordinate geometry in depth
- To recognize the type of conic sections and understand its properties
- To study the conjugate diameters and properties of ellipse and hyperbola
- To describe the various forms of equations of a plane, straight lines, sphere and cone
- To solve problems related to geometry of two dimensions and three dimensions

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	identify the nature of a given general second degree equation and define the basics of plane, straight line, sphere and cone in 3D	K1
CO2	understand the different types of conics in 2D and 3D	K2
CO3	apply the formula for finding the centre, lengths and axes of a central conic and find the properties of ellipse and hyperbola as well as to describe the various forms of plane, straight line, sphere and cone	K3
CO4	analyse the different parameters of conics in 2D & 3D	K4
CO5	evaluate the problems related to the geometry of two-dimension and three-dimensions	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	General Second Degree Equation 1.1 Condition for a General Second Degree Equation to Represent a Conic 1.2 Centre of the Conic given by the General Second Degree Equation (Concept Only) 1.3 Lengths And Positions of the Axes of the Central Conic $Ax^2 + 2hxy + By^2 = 1$ (Concept Only)	K1- K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Ellipse 2.1 Conjugate Diameters of Ellipse 2.2 Properties of Conjugate Diameters of Ellipse Hyperbola 2.3 The Asymptotes 2.4 Angle Between the Asymptotes 2.5 Properties of the Asymptotes 2.6 The Conjugate Hyperbola 2.7 Conjugate Diameters of Hyperbola 2.8 Properties of Conjugate Diameters of Hyperbola 2.9 Rectangular Hyperbola	K1- K5	13	CO1-5
3	Plane 3.1 General Equation 3.2 Intercept Form 3.3 Normal Form 3.4 Angle Between Two Planes 3.5 Equation of Plane through the Line of Intersection of Two Given Planes 3.6 Length of Perpendicular from a given Point to a Plane	K1- K5	13	CO1-5
4	Straight Line 4.1 Symmetrical Form 4.2 Line Through Two Points 4.3 Reduction of the Unsymmetrical Form to the Symmetrical Form 4.4 Condition for a Line to Lie on a Plane 4.5 Plane through a Given Line 4.6 Condition for Two Lines to be Coplanar 4.7 Equation of the Plane Containing the Two Lines 4.8 Shortest Distance Between Two Skew Lines and Equation of the Line Containing the Shortest Distance	K1- K5	13	CO1-5

UNIT	CONTENT	CL	Hrs	CO
5	Sphere And Cone 5.1 Equation of a Sphere with Given Centre and Radius 5.2 General Form of the Equation of a Sphere 5.3 Plane Section of a Sphere 5.4 Intersection of two Spheres 5.5 Equation of a Circle on a Sphere 5.6 Equation of Sphere Passing through Given Circle 5.7 Tangent Plane to a Sphere 5.8 Right Circular Cone; Necessary Condition for a General Equation of Second Degree to Represent a Cone 5.9 Equation of a Cone with Given Vertex, Axis and Semi-Vertical Angle	K1- K5	14	CO1-5

PHYSICS FOR MATHEMATICS II

CODE:23PH/AC/PM23

CREDITS:3

L T P: 3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To deepen understanding on the fundamental laws and principles in physics.
- To equip students to study the theoretical concepts based on charges, geometrical and physical optics and the characteristics of Operational Amplifier.
- To elucidate the students with the concepts of electricity, magnetism, optics and electronics in realistic situations.
- To guide students to deduce expressions for various theories pertaining to physics using mathematical concepts.
- To allow students to examine concepts to resolve problems across multiple scientific contexts.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	understand the fundamental principles of electricity, magnetism, optics and electronics.	K1
CO 2	describe the theory of charges in electric and magnetic field, optical aberrations, interference, diffraction, polarization and also the theory behind working of digital circuits.	K2
CO 3	illustrate the behavior of charges using Gauss's Law and Maxwell's electromagnetic equations, importance of different types of telescopes, significance of physical properties in optics and Boolean algebra.	K3
CO 4	analyze the gained knowledge to derive expression for electric field, electric potential, force on a current carrying conductor in a magnetic field, aberrations, determination of wavelength and De Morgan's Theorem.	K4
CO 5	evaluate problems in physics and in realistic situations utilizing theoretical concepts.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Electricity 1.1 Introduction – Coloumb’s law, electric flux, Gauss's law and proof – Differential form of Gauss's law - Applications of Gauss theorem- Infinite line of charge, uniformly charged solid sphere - Field due to a uniformly charged hollow cylinder. 1.2 Electric potential - Electric potential as a line integral of electric field, potential due to a point charge – Relation between electric field and electric potential – Work done in moving a charge (earthed inside and outside) – Capacitance - Capacitance of spherical capacitor.	K1 – K5	6	1-5
2	Magnetism 2.1 Magnetic induction – Force on a Charge in a Magnetic Field, in an electromagnetic Field (Lorentz Force) – Biot-Savart law – Ampere’s circuital law - Maxwell’s electromagnetic Equations (No derivation) – Physical significance of the equations. 2.2 Electromagnetism: Force on a current carrying conductor in a magnetic field – Torque on a current loop in a uniform magnetic field – Moving coil Ballistic Galvanometer – Theory, current and charge sensitivity of B.G.	K1 – K5	7	1-5
3	Geometrical Optics 3.1 Lens Aberrations: Monochromatic aberrations – Spherical aberration in lenses – Methods of minimizing spherical aberration- Coma, Astigmatism, distortion- Chromatic aberration – achromatic combination of lenses in contact and lenses separated by a distance. 3.2 Optical Instruments: Telescopes – Angular magnification of telescopes - Refractive astronomical telescope – Terrestrial telescope – Reflecting telescopes – Radio telescope – Hubble telescope.	K1 – K5	6	1-5
4	Physical Optics 4.1 Interference: Thin films - Plane parallel film – Interference due to reflected and transmitted light – Newton’s rings – Measurement of wavelength. 4.2 Diffraction: Theory of plane transmission grating - Normal incidence – Determination of wavelength - Polarization – Double refraction – Nicol prism – Optical activity – Uses of polaroids.	K1 – K5	7	1-5
5	Electronics 5.1 Introduction to amplifiers - Operational amplifier – Ideal Op-Amp - CMRR –Inverting and non-inverting Op-Amp - Summing, difference, integral and differential Op-Amp. 5.2 Boolean algebra- De Morgan’s Theorem – Verification - Algebraic simplification – Implementation of Boolean algebra into circuits - Karnaugh map up to four variables.	K1 – K5	13	1-5

(Effective from the academic year 2023-2024)

ELEMENTS OF GRAPH THEORY

CODE: 23MT/MC/EG34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand basic concepts of graph theory
- To interpret the concepts of connectedness and their nature of connectivity
- To discover the properties of trees and its characterisation
- To apply graph theory based tools in solving practical problems
- To analyze the applications of graph theory in various fields

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and list the basic concepts of graph theory	K1
CO2	summarize and outline the various graph theoretical terminologies	K2
CO3	identify and apply suitable methods to find solutions to problems related to graph theory	K3
CO4	analyse and examine the properties of various types of graphs through illustrative examples	K4
CO5	choose suitable graph theoretical concepts to estimate the various graphical parameters for any given graph	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Basic Concepts of Graph theory 1.1 Graphs-Vertices and Edges 1.2 Degrees 1.3 Subgraphs 1.4 Isomorphism 1.5 Matrices 1.6 Operations on Graphs	K1- K5	13	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Degree Sequences 2.1 Degree Sequences 2.2 Graphic Sequences Connectedness 2.3 Walks, Trails and Paths 2.4 Connectedness and Components 2.5 Blocks	K1- K5	13	CO1-5
3	Eulerian and Hamiltonian Graphs 3.1 Eulerian Graphs 3.2 Konigsberg Bridge Problem 3.3 Hamiltonian Graphs 3.4 Closure of a Graph	K1- K5	13	CO1-5
4	Trees 4.1 Characterisation of Trees 4.2 Centre of a Tree Planarity 4.3 Definition and Properties 4.4 Characterization of Planar Graphs	K1- K5	13	CO1-5
5	Directed Graphs 5.1 Directed Graphs 5.2 Indegree and Outdegree 5.3 Sequential Representation of Directed Graphs Graph Algorithms 5.4 Prim's Algorithm 5.5 Kruskal's Algorithm 5.6 Fleury's Algorithm	K1- K5	13	CO1-5

DIFFERENTIAL EQUATIONS

CODE: 23MT/MC/ DE34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the basic types of ordinary differential equations and partial differential equations
- To gain logical skills in the formulation of differential equations
- To appreciate the use of differential equations as a powerful tool to solve real life problems
- To critically analyze the various methods in solving differential equations
- To interpret the solution obtained in solving differential equations

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the basic types of ordinary, partial differential equations and system of differential equations	K1
CO2	understand and illustrate the methods used for solving the problems	K2
CO3	apply differential equations to model and solve the real world problems	K3
CO4	classify and analyze various methods used in solving differential equations	K4
CO5	evaluate general solutions of ordinary and partial differential equations	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Second Order Differential Equations 1.1 Second Order Differential Equations with Constant Coefficients 1.2 Particular Integral	K1-K5	14	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
	1.3 Special Methods of Finding Particular Integral 1.4 Particular Integral of the Form $e^{ax}, \sin ax, \cos ax, x^m$ 1.5 Second Order Differential Equations with Constant Coefficients, Particular Integral of the Form $e^{ax}V$ where V is a Function of x			
2	Second Order Differential Equations with Variable Coefficients 2.1 Linear Equations With Variable Coefficients 2.2 Equations Reducible to the Linear Homogeneous Equation 2.3 Variation of Parameters Simultaneous Differential Equations 2.4 Simultaneous Equations of the First Order and First Degree 2.5 Simultaneous Linear Differential Equations with Constant Coefficients	K1-K5	13	CO1-5
3	Partial Differential Equations of the First Order 3.1 Introduction 3.2 Formulation of Partial Differential Equation by Eliminating Arbitrary Constants and Arbitrary Functions 3.3 Classification of Integrals 3.4 Some Particular Method – $f(p,q) = 0, z = px + qy + f(p,q), f(z,p,q) = 0, f(x,p) = F(y,q)$ 3.5 Linear Partial Differential Equation of Order One - Lagrange's Method	K1-K5	13	CO1-5
4	Partial Differential Equations of Higher Order with Constant Coefficients 4.1 Homogeneous Linear Partial Differential Equations with Constant Coefficients 4.2 Solutions of Partial Differential Equations 4.3 Complementary Function 4.4 Particular Integral of the form e^{ax+by}, x^r, y^s	K1-K5	13	CO1-5

(Effective from the academic year 2023-2024)

MATHEMATICAL STATISTICS I

CODE: 23MT/AC/ST35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVE OF THE COURSE

- To provide an understanding of random variables, cumulative distribution functions, and the properties associated with probability distributions
- To comprehend mathematical expectation, covariance, moment generating functions, and conditional expected values, and their practical applications
- To analyze and apply special discrete probability distributions, such as binomial and Poisson distributions and their relationships
- To explore the properties and characteristics of the normal distribution
- To examine the concepts of correlation and regression, and their applications in analyzing relationships between variables.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the basic concepts of probability distributions, expectations, correlation and regression	K1
CO2	demonstrate a comprehensive understanding of concepts related to random variables, mathematical expectation, probability distributions and relation between two variables	K2
CO3	apply the statistical principles to solve problems involving one and two-dimensional variables	K3
CO4	analyse and interpret various probability distributions, and the relational coefficients	K4
CO5	critically evaluate the appropriateness and effectiveness of statistical models and tools	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Random Variables 1.1 Cumulative Distribution Function 1.2 Properties of Cumulative Distribution Function 1.3 Two-Dimensional Random Variables 1.4 Marginal and Conditional Probability Distribution	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Mathematical Expectation 2.1 Mean and Variance and their Properties 2.2 Expected Value of a Function of one and two Dimensional Random Variable 2.3 Covariance of X, Y 2.4 Conditional Expected Values 2.5 Moment and Cumulant Generating Function 2.6 Characteristic Function 2.7 Tchebycheff Inequality	K1-K5	14	CO1-5
3	Special Discrete Probability Distributions 3.1 Binomial Distribution: Characteristic Function, Mean, Mode and Variance, Recurrence Formula 3.2 Poisson Distribution: Moment Generating Function, Central Moments, Recurrence Formula, Mode and Additive property 3.3 Poisson Distribution as a Limiting Form of Binomial Distribution	K1-K5	14	CO1-5
4	Normal Distribution 4.1 Normal distribution: Mean, Variance, Median, Mode, Central Moments, Mean Deviation about the Mean, Quartile Deviation, Moment Generating Functions, Additive Property 4.2 Normal Probability Curve and its Characteristics 4.3 Normal Distribution as a Limiting Form of Binomial Distribution	K1-K5	13	CO1-5
5	Correlation 5.1 Scatter Diagram 5.2 Types of Correlation 5.3 Correlation Coefficient and its Properties 5.4 Correlation of Grouped Bi-variate Data 5.5 Rank Correlation Coefficient 5.6 Merits and Demerits Regression 5.7 Equation of the Regression Line of Y on X 5.8 Properties of Regression Coefficients 5.9 Standard Error of Estimate of Y	K1-K5	12	CO1-5

**Allied Core Course offered by the Department of Mathematics for
B.C.A Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICS FOR COMPUTER SCIENCE I

CODE: 23MT/AC/MS35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the concept of diagonalization through Eigen values and Eigen vectors
- To utilize various methods in solving problems related to transcendental, algebraic equations and a system of linear equations
- To acquire knowledge in numerical integration and differentiation that are used in computer applications
- To introduce simplex technique to solve linear programming problems
- To appreciate the use of appropriate mathematical concepts and skills to solve problems in real life contexts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the various applied mathematical concepts such as matrices, vector analysis, numerical methods and linear programming problems	K1
CO2	understand the fundamentals relevant to the methods utilized in solving problems related to equations, numerical integration and vector differentiation	K2
CO3	apply appropriate mathematical techniques in solving related problems and model real time situations	K3
CO4	analyse the different methodology adapted to solve a particular problem	K4
CO5	evaluate and make inference from the solutions obtained for related problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Matrices 1.1 Eigen Values and Eigen Vectors of Square Matrices of Order ≤ 3 1.2 Cayley - Hamilton Theorem 1.3 Diagonalization of Matrices	K1-K5	11	CO1-5
2	Vector Analysis 2.1 Scalar and Vector Point Functions 2.2 Gradient 2.3 Divergence and Curl 2.4 Solenoidal and Irrotational Vectors 2.5 Problems using Vector Identities	K1-K5	14	CO1-5
3	Solution of Transcendental and Algebraic Equations 3.1 The Bisection Method 3.2 Newton-Raphson Method Solution of Simultaneous Equations 3.3 Gauss Elimination Method 3.4 Gauss Jordan Elimination Method	K1-K5	14	CO1-5
4	Numerical Differentiation and Integration Numerical Differentiation 4.1 Derivatives using Newton's Forward Difference Formula 4.2 Derivatives using Newton's Backward Difference Formula Numerical Integration 4.3 Trapezoidal Rule	K1-K5	12	CO1-5
5	Linear Programming Problem 5.1 Linear Programming Formulation 5.2 Graphical Method 5.3 General L.P.P. 5.4 Canonical and Standard Forms of L.P.P. 5.5 The Simplex Algorithm	K1-K5	14	CO1-5

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23MT/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

SEQUENCES AND SERIES

CODE: 23MT/MC/SS44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the fundamentals of sets and functions on real numbers
- To understand the concept of convergence of a real sequence
- To discuss the techniques of testing the behavior of infinite series of real Numbers
- To express periodic functions as infinite series
- To determine the Fourier series expansions of certain functions and investigate its convergence

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the fundamental concepts of sets, sequences and series	K1
CO2	understand various concepts related to sets, sequences and series	K2
CO3	apply related theorems and techniques to solve problems on real numbers, sequences and series	K3
CO4	analyze the structure and properties of real numbers, sequences and series	K4
CO5	evaluate the limits of sequences and series and test their convergence	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Sets and Functions 1.1 Functions – Real Valued Functions 1.2 Equivalence, Countability 1.3 Real Numbers 1.4 Least Upper Bounds	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Sequences of Real Numbers 2.1 Definition of Sequence and Subsequence 2.2 Limit of a Sequence 2.3 Convergent and Divergent Sequences 2.4 Bounded Sequences 2.5 Monotone Sequences 2.6 Operations on Convergent and Divergent Sequences	K1-K5	13	CO1-5
3	Supremum, Infimum and Cauchy's Sequences 3.1 Limit Superior and Limit Inferior 3.2 Cauchy Sequences Series of Real Numbers 3.3 Convergence and Divergence 3.4 Series with Non-negative Terms 3.5 Alternating Series 3.6 Conditional Convergence and Absolute Convergence	K1-K5	14	CO1-5
4	Tests for Convergence of a Series of Real Numbers 4.1 Tests for Absolute Convergence 4.2 Series whose terms form a Non-increasing Sequence 4.3 Summation by Parts	K1-K5	14	CO1-5
5	Fourier Series 5.1 Definition of Fourier Series 5.2 Expansions of Periodic Functions with Period 2π 5.3 Odd and Even Functions 5.4 Half-range Fourier Series 5.5 Development in cosine and sine Series	K1-K5	12	CO1-5

OBJECTIVES OF THE COURSE

- To motivate the students to think logically and apply the techniques in problem solving
- To introduce the concepts of ordered relation and understand the fundamental properties of lattices and Boolean algebra
- To apply the knowledge of abstract mathematical structures in computer science
- To introduce the fundamental concepts of formal languages, grammars and automata theory
- To understand deterministic and non-deterministic machines and classify machines by their power to recognize languages

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	acquire the knowledge of logical techniques and identify their applications	K1
CO2	recognize and apply the concepts of logic, lattices, Boolean algebra and Automata in related fields	K2
CO3	demonstrate the characterization of propositional calculus, lattices, Boolean functions and automata	K3
CO4	interpret the sets under study to apply in data structures and theory of computer languages	K4
CO5	assess the emerging fields to utilize the intrinsic concepts of discrete mathematics	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To gain a comprehensive understanding of basic concepts of sampling theory
- To understand point estimation and interval estimation concepts
- To learn the principles of ANOVA, including one-way and two-way classification and apply these techniques to analyze and compare means across multiple groups
- To acquire the skills to analyze time series data, including trend analysis, seasonal decomposition, and forecasting methods
- To select appropriate sampling methods for different types of data and research questions, and apply these methods effectively in practice

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the fundamental definitions and techniques employed in distributions and statistical tools	K1
CO2	demonstrate a comprehend understanding on statistical principles and their applications, especially in estimation, tests of significance, time series analysis, and analysis of variance	K2
CO3	apply sampling theory, time series analysis, ANOVA, and estimation methods to the given data, addressing practical problems and making appropriate decisions	K3
CO4	analyse real world data sets, trends and patterns in time series data, and perform comprehensive hypothesis tests, confidence intervals and ANOVA experiments, including the interpretation of data given	K4
CO5	evaluate the robustness of sampling procedures, estimation theory, time series models, ANOVA experiments, and their impact on the validity of statistical conclusions	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Sampling Theory 1.1 Introduction 1.2 Types of Sampling 1.3 Method of Drawing Random Sample 1.4 Sampling Distributions of Sample Mean and Sample Proportion Distributions used in Sampling Theory 1.5 Standard Normal Distribution, Chi-Square Distribution, Student's <i>t</i> -Distribution, Snedecor's <i>F</i> -Distribution 1.6 Relations between Standard Normal, Chi-Square, <i>t</i> , <i>F</i> -Distribution	K1-K5	13	CO1-5
2	Theory of Estimation 2.1 Introduction 2.2 Point Estimation- Criteria for Good Estimators 2.3 Methods of Point Estimation Interval Estimation 2.4 Introduction 2.5 Approximate Confidence Limits (Large Samples) 2.6 Exact Confidence Limits (any Sample Size)	K1-K5	13	CO1-5
3	Tests of Significance 3.1 Statistical Hypothesis – Level of Significance, Critical Region, One-Tailed and Two-Tailed Tests, Type I & II Errors, Power of a Test 3.2 Large Sample Tests 3.3 Chi-Square Test for Goodness of Fit 3.4 Test For Independence of Attributes 3.5 Yate's Correction 3.6 Small Sample Tests	K1-K5	14	CO1-5
4	Analysis of Variance 4.1 Introduction 4.2 Different Sources of variation 4.3 Technique in One-Way Classification 4.4 Locating Unequal Pairs of Means 4.5 Technique in Two-Way Classification	K1-K5	12	CO1-5

B.Com (General) Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICS FOR COMMERCE

CODE: 23MT/AC/MT45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the fundamental mathematical concepts pertaining to the discipline of commerce
- To employ different techniques to solve problems pertaining to matrices, equations and LPP
- To appreciate the concept of numerical differentiation and integration as an alternate tool to solve problems on differentiation and integration
- To promote problem solving skills and quantitative analysis
- To model and solve real time problem using linear programming method

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall and define the basic mathematical concepts on matrices, equations, differentiation, integration and linear programming problem	K1
CO2	understand and compare the concepts relating to matrices, polynomials, numerical methods and linear programming problem	K2
CO3	utilize suitable mathematical concepts and skills to solve problems including those in real life contexts	K3
CO4	analyse and examine the problem relating to the applications of matrices, differentiation, integration and optimization	K4
CO5	evaluate solutions to the problems related to matrices, equations, differentiation, integration and linear programming problem	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyze K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Matrices 1.1 Types of Matrices 1.2 Characteristic Equation of a Matrix 1.3 Cayley - Hamilton Theorem (without proof) 1.4 Eigen Values and Eigen Vectors 1.5 Diagonalization of 3×3 Matrices with Distinct Eigen Values	K1- K5	13	CO1-5
2	Theory of Equations 2.1 Formation and Solution of Equation with Imaginary and Irrational Roots 2.2 Relation between Roots and Coefficients 2.3 Solution of Equations under given Conditions 2.4 Symmetric Functions of the Roots of an Equation in terms of its Coefficients 2.5 Reciprocal Equations	K1-K5	14	CO1-5
3	Numerical Methods Algebraic and Transcendental Equations 3.1 The Bisection Method 3.2 Newton - Raphson Method Simultaneous Equations 3.3 Gaussian Elimination Method 3.4 Gauss Jordan Elimination Method 3.5 Gauss Jacobi Iteration Method 3.6 Gauss Seidal Iteration Method	K1-K5	13	CO1-5
4	Numerical Differentiation and Numerical Integration 4.1 Derivatives using Newton's forward difference Formula 4.2 Derivatives using Newton's backward difference Formula 4.3 Trapezoidal Rule 4.4 Simpson's One Third Rule 4.5 Simpson's Three Right Rule	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
5	Linear Programming Problem 5.1 General L.P.P. 5.2 Canonical and Standard Forms of L.P.P. 5.3 The Simplex Algorithm 5.4 The Big-M method	K1-K5	13	CO1-5

MATHEMATICS FOR COMPUTER SCIENCE II

CODE: 23MT/AC/MS45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the fundamental concepts of discrete and continuous probability distributions
- To perform hypothesis tests and make inferences about population parameters based on sample data
- To determine whether there is a statistically significant association or relationship between two categorical variables by conducting a Chi-Square test of independence
- To analyze the relationships between variables using correlation and regression analysis, and make predictions based on regression models
- To assess significant differences between means using Analysis of Variance

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

Cos	Description	CL
CO1	define and recall the basic statistical tools and techniques available to study any given data	K1
CO2	understand the core principles and terminology of statistics, including population, sample and distribution functions	K2
CO3	apply the knowledge and extract meaningful insights and patterns from data, enabling informed decision-making	K3
CO4	examine and interpret data through rigorous statistical methods and techniques	K4
CO5	develop problem-solving skills by using statistical methods to address complex and multifaceted issues in real life	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Theoretical Distributions 1.1 Binomial Distribution 1.2 Properties of Binomial Distribution 1.3 Fitting of Binomial Distribution 1.4 Normal Distribution 1.5 Characteristics of the Normal Curve	K1-K5	13	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Tests of Significance 2.1 Testing of Hypothesis 2.2 Tests of Significance for Attributes 2.3 Tests of Significance for Large Samples 2.4 Tests of Significance for Difference between Means of two Samples	K1-K5	15	CO1-5
3	Chi-Square Test 3.1 Characteristics and Assumptions 3.2 Goodness of Fit 3.3 Test of Independence	K1-K5	12	CO1-5
4	Correlation and Regression 4.1 Correlation and Causation 4.2 Types of Correlation 4.3 Karl Pearson's Coefficient of Correlation 4.4 Correlation of Grouped Bi-variate Data 4.5 Regression 4.6 Difference between Correlation and Regression 4.7 Methods of Studying Regression – Algebraic Method	K1-K5	13	CO1-5
5	Analysis of Variance 5.1 Basic Designs of Experiment 5.2 One Way Classification 5.3 Two Way Classification	K1-K5	12	CO1-5

VECTOR ANALYSIS AND APPLICATIONS

CODE: 23MT/MC/VA53

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To familiarize the concept of magnitude and direction of a vector quantity
- To introduce the concept of vector differentiation and vector integration
- To discover the various scalar and vector differential operators
- To apply vector integration to evaluate line, surface and volume integrals
- To establish the relations between Gauss divergence, Green's and Stoke's theorem

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	understand the basic definitions of vector differentiation and vector integration	K1
CO2	explain and illustrate the concepts of vector differential operators and its geometrical significance	K2
CO3	apply the concepts of vector differentiation and vector integration to solve problems	K3
CO4	analyse the properties of vector differential operators and to classify line, surface and volume integral problems	K4
CO5	evaluate and describe the importance of integral theorems through the concepts studied	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Vector Differentiation 1.1 Scalar and Vector Point Functions 1.2 Level Surfaces 1.3 Directional Derivative of a Scalar Point Function 1.4 Gradient of a Scalar Point Function 1.5 Gradient of a Vector Point Function	K1-K5	11	CO1-5
2	Divergence and curl 2.1 Divergence and Curl of a Vector Point Function 2.2 Laplacian Differential Operator 2.3 Divergence and Curl of a Gradient 2.4 Divergence and Curl of a Curl	K1-K5	10	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
3	Vector Integration 3.1 Line Integrals 3.2 Independence of Path of Integration 3.3 Conservative Field and Scalar Potential 3.4 Line Integral of a Conservative Vector	K1-K5	11	CO1-5
4	Surface and Volume Integrals 4.1 Surface Integrals 4.2 Volume Integrals 4.3 Cylindrical and Spherical Polar Coordinates	K1-K5	10	CO1-5
5	Integral Theorems 5.1 Integral Theorems 5.2 Gauss' Divergence Theorem(Statement Only) 5.3 Integral Theorems Derived from the Divergence Theorem 5.4 Green's Theorem in Plane (Statement Only) 5.5 Stoke's Theorem (Statement Only) 5.6 Integral Theorems Derived from Stoke's Theorem	K1-K5	10	CO1-5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enhance the knowledge of abstract mathematics on the real line and metric spaces
- To describe the fundamental properties of the real numbers that underpin the formal development of real analysis
- To demonstrate skills in constructing rigorous mathematical arguments for proving connected, bounded, complete and compact metric spaces
- Apply the theory to solve a variety of problems at an appropriate level of difficulty
- To introduce the concepts of Riemann Integration and analyze its properties

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	define and recall the abstract mathematical concepts on the real line and metric spaces	K1
CO2	illustrate the theoretical concepts using relevant examples	K2
CO3	identify potential solutions to problems involving limit, continuity, uniform continuity, convergence, derivatives and integration	K3
CO4	analyse the abstract concepts and choose appropriate methods for proving the theoretical results	K4
CO5	compare the various methods in mathematical analysis that can be applied to evaluate analytical problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Limits and Continuity on \mathbb{R}^1 1.1 Limit of a Function on the Real Line 1.2 Functions Continuous at a Point on the Real Line 1.3 Reformulation Metric Spaces 1.4 Definitions with Examples	K1- K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Limits and Continuity on Metric Spaces 2.1 Limits in Metric Spaces 2.2 Functions Continuous on a Metric Space 2.3 Open Sets 2.4 Closed Sets	K1- K5	14	CO1-5
3	Connectedness and Completeness on Metric Spaces 3.1 Connected Sets 3.2 Bounded Sets and Totally Bounded Sets 3.3 Complete Metric Spaces	K1- K5	12	CO1-5
4	Compactness on Metric Spaces 4.1 Compact Metric Spaces 4.2 Continuous Functions on a Compact Metric Space 4.3 Continuity of an Inverse Function 4.4 Uniform Continuity	K1- K5	12	CO1-5
5	Riemann Integration 5.1 Definition of the Riemann Integral 5.2 Properties of the Riemann Integral 5.3 Derivatives 5.4 Rolles' Theorem 5.5 The Law of the Mean 5.6 Fundamental Theorem of Calculus	K1- K5	15	CO1-5

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	6	$3 \times 2 = 6$ (4 questions to be set)
B	K2	4	$4 \times 1 = 4$ (4 MCQ to be set)
C	K3	15	$1 \times 15 = 15$ (2 questions to be set)
D	K4	15	$1 \times 15 = 15$ (2 questions to be set)
E	K5	10	$1 \times 10 = 10$ (2 questions to be set)

Other Components:

Total Marks: 50

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Marks	Pattern
A	K1	10	$5 \times 2 = 10$ (6 questions to be set)
B	K2	10	$10 \times 1 = 10$ (10 MCQ to be set)
C	K3	30	$2 \times 15 = 30$ (4 questions to be set)
D	K4	30	$2 \times 15 = 30$ (4 questions to be set)
E	K5	20	$2 \times 10 = 20$ (4 questions to be set)

INTEGRAL TRANSFORMS

CODE: 23MT/MC/IT54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To develop an understanding of the basic types of integral transforms
- To apply the concepts of Laplace transforms in evaluating integrals and solving differential equations
- To apply Laplace transforms to solve differential equations and Z-transform to solve difference equations
- To analyze the various concepts of Laplace, Fourier and Z-transforms
- To solve difference equations using Z-transforms

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the suitable techniques of differential and integral calculus and concepts of differential equations to solve Laplace, Fourier and Z-transforms	K1
CO2	understand the concepts involved in Laplace, Fourier and Z-transforms	K2
CO3	apply the concepts of the integral transforms under study to solve problems of differential and difference equations	K3
CO4	analyse the problems based on Laplace, Fourier and Z-transforms	K4
CO5	evaluate Laplace, Fourier and Z-transforms of various functions using the appropriate methods	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Laplace Transform 1.1 Definition of Laplace Transform 1.2 Laplace Transform of e^{at} , $\cos at$, $\sin at$ and t^n , where n is a Positive Integer	K1- K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
	1.3 Laplace Transform of Periodic Functions 1.4 Some General Theorems 1.5 Evaluation of Integrals using Laplace Equations 1.6 Inverse Laplace Transform			
2	Application of Laplace Transform to Differential Equations 2.1 Laplace Transform to Solve System of Differential Equations with Constant Coefficient 2.2 Laplace Transform to Solve Ordinary Differential Equations with Variable Coefficients 2.3 Laplace Transform to solve Differential Equations Involving Integrals 2.4 Laplace Transform to Evaluate Certain Integrals	K1- K5	14	CO1-5
3	Fourier Transforms 3.1 Definition of Fourier Transforms, Fourier Cosine Transform & Fourier Sine Transform 3.2 Alternative Form of Fourier Complex Integral Formula 3.3 Relationship between Fourier Transform and Laplace Transform 3.4 Properties of Fourier Transforms	K1- K5	12	CO1-5
4	Z-Transforms 4.1 Definition of Z-Transforms 4.2 Properties of Z-Transforms 4.3 Z-Transforms of Some Basic Functions	K1- K5	13	CO1-5
5	Inverse Z-Transforms 5.1 Inverse Z-Transforms 5.2 Evaluation of Inverse Z-Transforms using Expansion Method, Long Division Method - Partial Fractions Method - by Cauchy's Residue Theorem 5.3 Formation of Difference equations and Use of Z-Transform to Solve them	K1- K5	14	CO1-5

MATHEMATICS THROUGH SCIENTIFIC SOFTWARE

CODE: 23ID/IC/MS55

CREDITS: 5

L T P: 1 0 5

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce software tools for implementing mathematical concepts
- To acquire proficiency in using different functions of Python to compute solutions of basic mathematical and statistical problems
- To demonstrate the use of Python and Excel to solve equations along with visualizing the solutions
- To acquire skill in choosing the suitable libraries of Python to solve problems on mathematical modeling
- To develop simple functions for handling problems involving mathematics and statistics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	understand the basics of spreadsheet and Python	K1
CO2	acquire the knowledge of various built in library functions for expressing and solving mathematical problems in Excel and Python	K2
CO3	apply the software tools for implementing Mathematical concepts and obtain solutions	K3
CO4	evaluate different types of formulas and functions available in Excel and Python to determine the best one for a given set of data.	K4
CO5	build user-defined functions for simple applications using Python and Excel	K5

UNIT	CONTENT	CL	Hrs	CO
1	Microsoft Excel 1.1 Introduction to Excel : Navigation and Selecting - View Options - Data Entry, Data Types, Editing and Deleting - Fill Handle 1.2 Formulas - Functions : Autosum, Sum, Average, Max, Min, Count, CountIF, SumIF, AverageIF	K1 - K5	13	CO1-5

UNIT	CONTENT	CL	Hrs	CO
	1.3 Creating Named Ranges and Constants - Absolute and Cross Reference 1.4 Formatting - Borders - Alignment tools - Number Formats - Format Painter - Styles and Themes 1.5 Managing Rows & Columns - Find & Replace 1.6 Filtering - Sorting - Conditional Formatting - Data Validation			
2	Advance Excel Options 2.1 Importing Data - Data Cleaning 2.2 Database functions : dsum, daverage, dmax, dmin, dcount, VLOOKUP, HLOOKUP 2.3 Printing : Preview, Orientation, Margin and Scale, Page Break, Print Titles, Header and Footer 2.4 Charts: Chart Types, Move and Resize Chart, Changing Chart Styles and Chart Elements 2.5 Pivot Table - Freeze Panes 2.6 Form Controls 2.7 Macros - Solver - Goal Seek	K1 - K5	13	CO1-5
3	Python Basics 3.1 Variables, Reserved words, Comments, Formatting Text and Numbers 3.2 User Defined Functions 3.3 Looping and Branching 3.4 Importing Standard Mathematical Functions 3.5 Basic Mathematical Operations, Different Kinds of Numbers, Working with Fractions, Complex Numbers 3.6 Getting User Input, Fractions and Complex Numbers as Input	K1 - K5	18	CO1-5
4	Mathematics with Python using NumPy and SymPy 4.1 Creating Vectors, Lists, Arrays, Scalars and Matrices 4.2 Arithmetic Operations on Matrices, Eigen Values & Eigen Vectors 4.3 Solving System of Equations 4.4 Working with Expressions, Factorizing and Expanding Expressions, Substituting in Values 4.5 Converting Strings to Mathematical Expressions	K1 - K5	17	CO1-5

UNIT	CONTENT	CL	Hrs	CO
	4.6 Solving Quadratic Equations, Solving for One Variable in Terms of Others, Solving a System of Linear Equations. 4.7 Plotting Expressions Input by the User, Plotting Multiple Functions			
5	Statistics Using Python 5.1 Analyzing Data: Mean, Median, Mode, Frequency Table, Measuring the Dispersion, Variance, Standard Deviation, Correlation, Scatter Plot 5.2 Visualizing Data with Graphs – Understanding the Cartesian Coordinate Plane, Creating Graphs with Matplotlib, Customizing Graphs 5.3 Reading Data: Reading Data from a Text File, Reading Data from a CSV file, Creating a Grouped Frequency Table from a Data File	K1 - K5	17	CO1-5

VECTOR SPACES AND LINEAR TRANSFORMATIONS

CODE: 23MT/MC/VL64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce basic concepts of vector spaces, inner product spaces and linear transformations
- To develop an understanding of linear algebraic structures
- To enable understanding of the concept of linear transformations and their matrix representation
- To illustrate the importance of linear algebra in applied mathematics
- To interpret the concepts in inner product space to solve problems in applicable areas

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall and define basic concepts in vector spaces and linear transformations	K1
CO2	understand the concepts pertaining to vector spaces, linear transformation and inner product spaces	K2
CO3	apply appropriate method to solve related problems in linear algebra	K3
CO4	analyse and examine the concepts of linear algebra through illustrations and examples	K4
CO5	establish the concepts of vector spaces, linear transformation and inner product spaces and evaluate the related problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Vector Spaces 1.1 General Vector Spaces and Subspaces 1.2 Linear Combinations 1.3 Linear Dependence and Independence 1.4 Properties of Bases	K1-K5	13	CO1-5
2	Rank and Orthogonalization of Vectors 2.1 Rank 2.2 Orthonormal Vectors and Projections 2.3 Gram-Schmidt Orthogonalization Process 2.4 Kernel, Range and the Rank-Nullity Theorem	K1-K5	13	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
3	Transformations 3.1 Matrix Transformations, Rotations and Dilations 3.2 One-to-one Transformations and Inverse Transformations 3.3 Transformations and Systems of Linear Equations	K1-K5	13	CO1-5

PRINCIPLES OF COMPLEX ANALYSIS

CODE: 23MT/MC/CA65

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce the theory and properties for functions of a complex variable and its transformation for special functions.
- To realize the mapping in the complex plane through linear fractional transformations.
- To understand the concepts of analyticity and complex integration
- To apply appropriate techniques proper and definite integrals and generating power series
- To expose a fertile area of pure mathematics as a source of powerful technique that are widely applied in sciences and advanced Engineering mathematics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall and define basic concepts in complex valued functions	K1
CO2	demonstrate understanding of different techniques to solve basic problems in complex analysis	K2
CO3	apply the fundamental principles and theoretical concepts of complex analysis in problem solving	K3
CO4	analyze various techniques to classify analytic functions and to solve problems	K4
CO5	evaluate and interpret mathematical arguments and proofs in complex analysis	K5

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	6	$3 \times 2 = 6$ (4 questions to be set)
B	K2	4	$4 \times 1 = 4$ (4 MCQ to be set)
C	K3	15	$1 \times 15 = 15$ (2 questions to be set)
D	K4	15	$1 \times 15 = 15$ (2 questions to be set)
E	K5	10	$1 \times 10 = 10$ (2 questions to be set)

Other Components:

Total Marks: 50

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Marks	Pattern
A	K1	10	$5 \times 2 = 10$ (6 questions to be set)
B	K2	10	$10 \times 1 = 10$ (10 MCQ to be set)
C	K3	30	$2 \times 15 = 30$ (4 questions to be set)
D	K4	30	$2 \times 15 = 30$ (4 questions to be set)
E	K5	20	$2 \times 10 = 20$ (4 questions to be set)

PRINCIPLES OF MECHANICS

CODE: 23MT/MC/PM65

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the concept of different forces and moments and their equilibrium with reference to a coordinate system
- To deal with parallel forces, couples and equilibrium of coplanar forces
- To widen the appreciation of the variety of phenomena covered by mechanics such as friction and demonstrate its application in real life
- To determine the moment of inertia of some standard bodies and discuss the equilibrium of a uniform cable hanging freely under its own weight
- To explain and analyze the motion of a particle in a resisting medium

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall and define the motion and equilibrium of objects in different frames of references	K1
CO2	understand and recognize the different concepts of statics and dynamics applied in real life	K2
CO3	apply the mathematical abstractions to solve physical problems	K3
CO4	analyse mechanical problems as mathematical models and examine their behaviours and properties	K4
CO5	formulate and construct mechanical models and demonstrate its application to cater real life problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

OPERATIONS RESEARCH

CODE: 23MT/ME/OR45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To formulate linear programming problem for simple mathematical models
- To develop mathematical skills to analyse and solve linear programming problems and network models arising from a wide range of applications
- To identify best techniques to solve a specific problem in linear programming model of OR
- To apply CPM and PERT techniques, to plan, schedule and control project activities
- To analyse the applications of different techniques learnt and to choose the appropriate technique for industry related problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the basic theory and concepts of operations research	K1
CO2	understand the operations research methodology to decision making	K2
CO3	apply the various techniques to solve LP problems	K3
CO4	analyse the various techniques and identify the best technique to solve LP problems	K4
CO5	evaluate the different models and explain its importance in real life problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Linear Programming 1.1 Formulation of Linear Programming Problems 1.2 Graphical Method of Solution 1.3 Canonical and Standard Form 1.4 Simplex Method 1.5 Artificial Variable Technique: Big-M Method	K1-K5	14	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Duality in LPP 2.1 Formulation of Dual LPP 2.2 Characteristics of the Dual Problem 2.3 Primal-Dual Optimal Solutions Transportation Model 2.4 Introduction and Assumptions to the Model 2.5 Matrix Terminology 2.6 Formulation and Solution of Transportation Model 2.6.1 North West Corner Rule 2.6.2 Least Cost Method 2.6.3 Vogel's Approximation Method 2.6.4 MODI's Optimality Test 2.7 Variants in Transportation Problems	K1-K5	14	CO1-5
3	Assignment Model 3.1 Definition and Formulation of the Assignment Models 3.2 Mathematical Representation of Assignment Models 3.3 Comparison with Transportation Model 3.4 Hungarian Method for Solution of the Assignment Problems 3.5 Variants of the Assignment Problem 3.6 Travelling Salesman Problem Sequencing Models and Related Problems 3.7 Sequencing Problems – Assumptions in Sequencing Problems 3.8 Processing n Jobs through One Machine (SPT rule only) 3.9 Processing n Jobs through Two Machines	K1-K5	12	CO1-5
4	Theory of Games 4.1 Theory of Games 4.2 Characteristics of Games 4.3 Game Models – Definitions	K1-K5	13	CO1-5

B.Sc. DEGREE: BRANCH – I – MATHEMATICS
SYLLABUS

(Effective from the academic year 2023-2024)

PROJECT

CODE: 23MT/ME/PR45

CREDITS: 5

PREPARATION OF PROJECT

The project shall contain around 25 pages and shall be typed with double spacing.
The format is as follows:

1. Cover page shall contain
 - a) Title of the project
 - b) Project submitted at the elective level for the B.Sc. Degree course in the ____ semester
 - c) Name of the Candidate
Department number
 - d) Department of Mathematics
Stella Maris College (Autonomous), Chennai – 600 086
 - e) Month, Year
2. The project shall contain
 - a) Contents page
 - b) At least 2 chapters including an introductory chapter (comprising motivation, basic concepts needed / used in the project and outline of the project)
 - c) Conclusions / interpretations arrived at may be given at the end of each problem in the chapter concerned
 - d) List of figures / list of abbreviations (if needed) shall be given as an appendix
 - e) Bibliography shall be given in alphabetical order at the end in MLA format
3. Each candidate may prepare 3 copies of the project, one copy for her and submit 2 copies to the Head of the department before the commencement of the end semester examination.
4. The Controller of Examination is requested to arrange for the valuation of the Project as well as the conduct of the Viva – Voce at the college where the candidates take examinations, within two weeks of the last date of examination for B.Sc. degree. The panel of examiners will consist of an internal-external examiner and the Supervisor.
The guidelines for the Viva-Voce examiners would be that
 - a) They will satisfy themselves that this is a work of the candidate as certified by the department

- b) The project is in the given format and
- c) The candidate has clear understanding of the concepts, discussed in the project.

The department should certify as follows:

*This is to certify that the project in the broad area_____titled
_____is submitted by_____at the elective level for the
degree of Bachelor of Science (Mathematics) during the year _____*

*sd/
Head of the Department*

*sd/
Supervisor*

5. PATTERN OF ASSESSMENT: There will be double valuation for the project by the supervisor and an internal-external examiner who will conduct the viva – voce.

Project – 75 marks

Rubrics for evaluation	Marks	Cognitive Level
Key Facts, Theories, and Concepts	10	K1
Conceptual Clarity	10	K2
Methodology and Application of Knowledge	15	K3
Critical Analysis of the Data / Problem	25	K4
Assessing the Significance and Implications of the Study	10	K5
Original Contribution to the Field	5	K6

Viva Voce – 25 marks

Rubrics for evaluation	Marks	Cognitive Level
Clarity, Organization and Understanding of the Project	10	K2
Ability to Apply the Knowledge to Defend the Work	10	K3
Ability to Critically Evaluate and Demonstrate the Work and Respond to Questions	5	K5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To explore the new vistas of the universe governed by mathematics
- To visualize application of mathematics in space science
- To comprehend the astronomical occurrences involving celestial entities.
- To grasp the creation of the cosmos conceptually.
- To classify types of stars and to illustrate star charting and gain insights into telescopes

COURSE LEARNING OUTCOMES

on successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	explain fundamental ideas in the field of astronomy	K1
CO2	acquire the knowledge of the concepts governed by mathematics to the universe	K2
CO3	showcase the principles governing the movement of celestial objects	K3
CO4	analyze and spot the celestial bodies in the sky by naked eye / binoculars / telescopes	K4
CO5	visualize the real time application of mathematics in space science	K5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086
B.Sc. DEGREE: BRANCH I –MATHEMATICS
SYLLABUS

(Effective from the academic year 2023-2024)

NUMERICAL METHODS WITH PROGRAMS IN C++
(Theory and Practical)

CODE: 23MT/ME/NM45

CREDITS: 5

L T P: 4 0 2

TOTAL TEACHING HOURS: 78

PREREQUISITES: Knowledge of C/C++ Programming

OBJECTIVES OF THE COURSE

- To obtain numerical solutions of algebraic and transcendental equations
- To find numerical solutions of system of linear equations and check the accuracy of the solution
- To describe various interpolating and extrapolating methods
- To solve initial and boundary value problems in differential equations using numerical methods
- To apply the various numerical method solutions to real life problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and recall the various concepts in numerical methods	K1
CO2	compare and relate the different numerical techniques available to solve real time problems	K2
CO3	apply numerical methods to obtain approximate solutions to mathematical problems and implement them in computer programming using C++ language	K3
CO4	analyse and evaluate the accuracy of numerical method solutions by interpreting the errors	K4
CO5	determine suitable numerical methods for various mathematical operations and tasks, such as interpolation, integration, the solution of linear and nonlinear equations, and the solution of differential equations	K5

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate

UNIT	CONTENT	CL	Hrs	CO
1	Numerical Solutions of Algebraic and Transcendental Equation 1.1 Bolzano's Bisection Method 1.2 Newton Raphson Method Iterative Methods of Solving Simultaneous Equations 1.3 Jacobi's Method 1.4 Gauss Seidel Iteration Method Practical 1.5 C++ Program to Find the Smallest Positive Root / the Largest Negative Root of the Equation $f(x) = 0$ by using the Bisection Method and Newton Raphson Method 1.6 C++ Program to Solve a System of Linear Algebraic Equations using Gauss Jacobi's Iteration Method and Gauss Siedel Method	K1- K5	10+6	CO1-5
2	Finite Differences 2.1 Forward Differences 2.2 Backward Differences 2.3 Central Differences Interpolation with Equal Intervals 2.4 Gregory-Newton's Forward and Backward Interpolation Formulae 2.5 Central Difference Interpolation Formulae – Gauss Forward and Backward Interpolation Formulae, Stirling's Interpolation Formula Interpolation with Unequal Intervals 2.6 Lagrange's Interpolation Formula for Unequal Intervals Practical 2.7 C++ Program to Interpolate and Extrapolate using the Given Pairs of Values of x and y by Newton's Forward and Backward Interpolation Formulae 2.8 C++ Program to Interpolate y using the Given Pairs of Values of x and y by Lagrange's Interpolation Formula	K1- K5	12+6	CO1-5

UNIT	CONTENT	CL	Hrs	CO
3	Numerical Differentiation 3.1 Values of the Derivatives of y based on Newton's Forward and Backward Interpolation Formulae, Stirling's Formula 3.2 Second Order Derivatives of $f(x)$ using Newton's Formulae - Maximum and Minimum Value of $f(x)$ Practical 3.3 C++ Program to Find the Derivative at the Initial Point of a Tabulated Function by Newton Forward and Backward Interpolation Formula	K1- K5	10+4	CO1-5
4	Numerical Integration 4.1 Newton Cote's Quadrature Formula 4.2 Trapezoidal Rule 4.3 Simpson's One Third Rule 4.4 Simpson's Three Eighth Rule Practical 4.5 C++ Program to Evaluate $\int_a^b f(x) dx$ Numerically using Trapezoidal and Simpson's rule	K1- K5	10+4	CO1-5
5	Numerical Solution to Ordinary Differential Equations 5.1 Numerical Solution of a Differential Equation 5.2 Euler's Method 5.3 Runge Kutta Method Practical 5.4 C++ Program to Solve the Differential Equation $\frac{dy}{dx} = f(x,y)$; $y(x_0) = y_0$ at the Pivotal Points by Euler's Method 5.5 C++ Program to Solve the Differential Equations $\frac{dy}{dx} = f(x,y)$; $y(x_0) = y_0$ at the Specified Pivotal Points by using Runge Kutta Method of the Fourth Order	K1- K5	10+6	CO1-5

L T P: 2 0 3

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand about object-oriented languages and their applications
- To introduce basic concepts of C++ language
- To provide knowledge about various conversions
- To enlighten the various inheritance system
- To impart knowledge on files and exception handling

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall various concepts relating to languages and applications	K1
CO2	understanding various functions and tools of C++	K2
CO3	apply appropriate tools to solve various problems	K3
CO4	analyse different techniques in programming	K4
CO5	assess suitable areas of application	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Basics of C++ 1.1 Introduction to C++ 1.2 Tokens, Keywords, Identifiers, Variables, Operators, Manipulators 1.3 Data Types - Expressions and Control Structures in C++ 1.4 Simple C++ Programs	K1- K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Functions in C++ 2.1 Main Function 2.2 Function Prototyping 2.3 Parameters Passing in Functions 2.4 Values Return by Functions 2.5 Inline Functions 2.6 Friend and Virtual Functions 2.7 Math Library Functions	K1- K6	13	CO1-5
3	Classes and Objects 3.1 Constructors and Destructors 3.2 Operator Overloading and Type Conversions 3.3 Type of Constructors 3.4 Function, Definition - Function Overloading – Function Overriding	K1- K6	13	CO1-5
4	Inheritance and Pointers 4.1 Single Inheritance 4.2 Multilevel Inheritance 4.3 Multiple Inheritance 4.4 Hierarchical Inheritance 4.5 Hybrid Inheritance 4.6 Pointers 4.7 Virtual Functions and Polymorphism 4.8 Managing Console I/O Operations	K1- K6	14	CO1-5
5	Working with Files 5.1 Classes for File Stream Operations 5.2 Opening and Closing a File 5.3 End-of-file Deduction 5.4 File Pointers 5.5 Updating a File 5.6 Error Handling during File Operations 5.7 Command line Arguments	K1- K6	13	CO1-5

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To acquaint students with the fundamental principles and underpinnings of computational theory
- To present an abstract computer model while providing an overview of how Automata theory is applied in various contexts
- To equip students with a deep understanding of formal languages and computational models, fostering their ability to analyze and solve complex problems in mathematics and computer science

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	comprehend the relationship between languages and computational processes	K1
CO2	assess the computational capabilities of machines	K2
CO3	examine the practical applications of automata	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to the Theory of Computation 1.1 Mathematical Preliminaries and Notations, Sets, Functions and Relations 1.2 Graphs and Trees, Proof Techniques 1.3 Three Basic Concepts 1.4 Languages, Grammars and Automata 1.5 Some Applications	K1- K3	10	CO1-3

UNIT	CONTENT	CL	Hrs	CO
	Finite Automata 1.6 Deterministic Finite Accepters 1.7 Deterministic Accepters and Transition Graphs 1.8 Languages and Dfas, Regular Languages 1.9 Nondeterministic Finite Accepters, Definition of a NDA 1.10 Why Nondeterminism?			
2	Regular Languages and Regular Grammars 2.1 Regular Expressions 2.2 Languages Associated with RE 2.3 RE Denote RL , RE for RL 2.4 RG, Right- and Left-Linear Grammars Context Free Languages 2.5 Context Free Grammar 2.6 Left Most and Right Most Derivations	K1- K3	8	CO1-3
3	Project 3.1 Application of Finite Automata and Formal Language 3.2 Design of Vending Machine 3.3 Document Language Design 3.4 Cryptography 3.5 DNA Computing	K1- K3	8	CO1-3

SYLLABUS

(Effective from the academic year 2023-2024)

COMBINATORICS

CODE: 23MT/UI/CO23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To equip students with the foundational knowledge and techniques useful for counting
- To introduce generalized permutations and combinations and the inclusion-exclusion principle
- To provide opportunities for students to apply combinatorial techniques to solve problems in computer science, statistics and operations research
- To acquaint the knowledge of generating functions as a powerful tool for solving combinatorial problems
- To foster problem-solving skills to approach combinatorial problems critically

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- recall the foundational knowledge and techniques for counting objects and events systematically
- understand the important notions of combinatorics and their applications
- apply various techniques for combinatorial mathematics to tackle complex counting problems
- analyze different combinatorial structures and implement their applications in combinatorial analysis
- examine various large and complex real world problems using clear and logical combinatorial arguments to support their solutions

Unit 1

Basic Tools

1.1 The Sum Rule and the Product Rule

1.2 Permutations and Combinations

1.3 The Pigeonhole Principle

1.4 Problems on the Sum Rule and Product Rule

1.5 Problems on Permutations and Combinations

1.6 Problems on the Pigeonhole Principle

Unit 2

Further Basic Tools

- 2.1 Generalized Permutations and Combinations
- 2.2 Sequence and Selections
- 2.3 The Inclusion – Exclusion Principle

Unit 3

Problems on Generalized Permutations, Combinations and the Inclusion-Exclusion Principle

- 3.1 Problems on Generalized Permutations and Combinations
- 3.2 Problems on Sequence and Selections
- 3.3 Problems on the Inclusion-Exclusion Principle
- 3.4 Problems on the Permanent of a Matrix

Unit 4

Generating Functions and Recurrence Relations

- 4.1 Ordinary Generating Functions
- 4.2 Partitions of a Positive Integer
- 4.3 Recurrence Relations

Unit 5

Problems on Generating Functions and Recurrence Relations

- 5.1 Problems on Ordinary Generating Functions
- 5.2 Problems on Partitions of a Positive Integer
- 5.3 Problems on Recurrence Relation

BOOK FOR STUDY

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF ENGLISH

PROGRAMME DESCRIPTION

The B.A. English and Communications Skills Degree programme lays equal emphasis on honing both literary and language skills. Through a range of texts from literatures across the globe, the programme intends to train students to engage critically with multiple genres and sensitise them to varied social contexts and multiple cultural and literary traditions. It also aims to provide students with opportunities to hone their communication skills in various professional contexts in a global environment that employs multiple modes of communication. While the courses cover a wide spectrum of skills for specific corporate and creative sectors—including advertising, business, public service and health care—it also seeks to prepare students for higher studies in the discipline. The overarching vision of the programme is to create independent learners equipped with creative, critical, and analytical skills required for lifelong learning.

VISION OF THE DEPARTMENT

Enable students to become socially conscious individuals by nurturing their literary sensibilities, language competencies and critical thinking.

MISSION OF THE DEPARTMENT

- To impart knowledge and skills for a holistic understanding of literatures in English in the capacity to interpret, evaluate, and contextualize literary and social texts.
- To equip students with language and communication skills for further research and career opportunities.
- To inculcate the spirit of research in tandem with an independent pursuit of learning in their study.
- To create socially responsible individuals who display critical sensibility towards experiences of diverse communities.
- To disseminate knowledge on the expanding fields in language and literature that would prepare them to a wide variety of meaningful professional employment opportunities upon graduation.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the B.A. English and Communication Skills programme, the students will be able to

PSO 1	Identify and analyse generic features of different literary texts to apply critical ideas and values in various professional contexts
PSO 2	Demonstrate communication skills to present clear and coherent expressions of knowledge and ideas
PSO 3	Apply theories, methods, and practices effectively and respond to real-world challenges and opportunities
PSO 4	Display critical sensibility to lived experiences, with awareness of both self and society.
PSO 5	Evaluate texts as part of the political, social, cultural and environmental realities

DEPARTMENT OF ENGLISH (SELF-FINANCED)

B.A. DEGREE: ENGLISH AND COMMUNICATION SKILLS

SYLLABUS

(Effective from the academic year 2023-2024)

PRESENTATION SKILLS

CODE: 23CE/MC/PS13

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To relate and introduce concepts integral for an effective oral presentation and delivery
- To outline and demonstrate speeches for different occasions
- To construct presentations by gathering relevant information, determining the needs of the audience and defining the purpose of the presentation.
- To discover the effective ways of using audio-visual aids for productive oral presentations
- To create confidence in students with the use of multimedia tools in presentation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	outline presentation styles and express effective presentation skills	K1, K2
CO2	compare and contrast speeches for different occasions	K3
CO3	identify rhetorical devices and organise presentations using the concepts	K4
CO4	critically appraise the use of non-verbal communication that enhances presentations	K5
CO5	design and develop presentations using multimedia tools and techniques	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Creating a Presentation Features of an Information and Persuasion Presentation Basic Presentation Patterns Creating Visual Information Preparing an Outline and Acknowledging Sources	K1-K6	10	1-5

INTRODUCTION TO PROSE AND POETRY

CODE: 23CE/MC/PP13

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To define the generic features of varied prose and poetic forms
- To demonstrate an understanding of the different literary techniques and devices with relation to texts
- To identify ideas and themes in texts
- To analyse a variety of prose texts and poems with reference to context, content and form
- To formulate critical analyses of prose texts and poems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	identify forms, techniques, themes and devices of prose and poetry.	K1
CO2	relate forms, techniques, themes and devices to the prescribed texts.	K2
CO3	apply features and concepts discussed to the prescribed texts.	K3
CO4	critically examine the use of techniques and devices in the prescribed texts.	K4
CO5	evaluate the prescribed texts with reference to techniques, devices and formal elements and formulate critical responses.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Prose Forms 1.1. Prose Forms (Essay, Speech, News Article, Biography ...)	K1-K6	6	1-5
2	Prose: A Selection 2.1. Charles Lamb: Dream Children 2.2. Abraham Lincoln: The Gettysburg Address 2.3. Ramchandra Guha: The Locality and the Nation, <i>The Hindu</i> , Sunday Magazine, 31 August 2003 2.4. George Mikes: Tea 2.5. Severn Suzuki: Earth Summit	K1-K6	16	1-5

3	Introduction to Poetic Forms 3.1. Poetics Forms (Lyric, Elegy, Ode, Ballad....)	K1-K6	6	1-5
4	Poetry: A Selection 4.1. William Shakespeare: Sonnet 18 4.2. John Keats: Ode to a Nightingale 4.3. Maya Angelou: Phenomenal Woman 4.4. Jackie Kay: In My Country	K1-K6	14	1-5
5	Practical Application Tasks Analysis of prose and poetic texts on the syllabus	K5& K6	10	1-5

ENVIRONMENTAL STUDIES

CODE:23CE/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23CE/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

SYLLABUS

(Effective from the academic year 2023 - 2024)

INTRODUCTION TO DRAMA AND FICTION

CODE: 23CE/MC/DF25

CREDITS: 5

LTP: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce drama and fiction as a social product and a literary form
- To introduce students to the formal aspects and characteristics of drama and fiction
- To familiarise students with the characteristics of the sub-genres of drama and fiction
- To facilitate a close reading of plays, novels and short stories
- To train students to use concepts and techniques in the critical analysis of drama and fiction

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	define various dramatic forms, techniques, devices and different aspects of fiction.	K1, K2
CO2	relate dramatic forms and techniques to plays and aspects of fiction to short stories and novels.	K3
CO3	apply literary concepts pertaining to drama and fiction.	K4
CO4	examine the use of techniques and devices in plays, short stories and novels that help in exploring ideas and issues	K5
CO5	evaluate the texts with reference to techniques, devices and formal elements of drama and fiction and formulate critical responses to them.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Elements, Devices, Types and Styles of Drama 1.1 Elements & Devices: plot, structure, characters, setting, stage directions, dialogue, soliloquy, aside, irony 1.2 Types: tragedy, comedy, tragicomedy, melodrama, farce 1.3 Styles: realism, epic theatre, absurdist drama, experimental theatre	K1-K6	10	1-5
2	Drama 2.1 Shakespeare: <i>Macbeth</i> 2.2 Anton Chekhov: <i>A Marriage Proposal</i> 2.3 Girish Karnad: <i>Hayavadana</i>	K1-K6	25	1-5
3	Aspects and Genres of Fiction 3.1 Aspects of the Novel: plot, characterisation, point of view / focalisation, theme, setting 3.2 Genres: epistolary, picaresque, bildungsroman, gothic, detective fiction, historical, science fiction, dystopian 3.3 Features of the Short Story	K1-K6	10	1-5

LITERATURE AND IDEAS

CODE: 23CE/AC/LI35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint students with the major schools of thought that have impacted literature
- To enable students to make connections between concepts from various schools of philosophy
- To guide students to an understanding of the major shifts in schools of thought
- To train students to analyse literary texts using these ideas as frames of reference
- To provide students with a critical understanding of real life using concepts from major schools of thought

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the concepts of major schools of thought and relate them to their appropriate contexts.	K1
CO2	compare and contrast the relationship between different schools of thought	K2
CO3	identify the major philosophical concepts in literary texts.	K3
CO4	critically analyse literary texts using these concepts.	K4
CO5	evaluate literary texts and develop a critique of real life using these concepts.	K5-K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Romanticism 1.1 Rousseau: The Social Contract - General Will, Particular Will, Noble Savage, Sovereign, State of Nature 1.2 Immanuel Kant: Critique of Pure Reason - a priori, a posteriori, Analytic, Synthetic, Noumena, Phenomena 1.3 G.W.F. Hegel: Phenomenology of the Mind - Absolute Consciousness, Totality, Negation, Hegelian Triad, Self-Consciousness, Master-Slave Dialectic Text: William Wordsworth: The Prelude Book I (Lines: 147-249)	K1-6	14	1-5
2	Marxism and Psychoanalysis 2.1 Freud and Jung: Id, Ego and Superego; Collective Unconscious 2.2 Karl Marx: Base and Superstructure Text: Charles Dickens: <i>Hard Times</i> (Chapters 1-5) Sylvia Plath: Mirror	K1-6	12	1-5
3	Existentialism 3.1 Schopenhauer: The World as Will 3.2 Nietzsche: Apollonian and Dionysian Principles 3.3 Sartre: Awful Freedom Texts: Ted Hughes: Tiger Psalm Franz Kafka: <i>Metamorphosis</i>	K1-6	14	1-5
4	Feminist Thought 4.1 Toril Moi: Feminine, Feminist, Female 4.2 bell hooks: Black Women - Shaping Feminist Theory Text: Makbula Manzoor: On the Road (from <i>Galpa: Short Stories by Women from Bangladesh</i>)	K1-6	15	1-5

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23CE/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint students with the historical development and progression of Gender and Queer Studies.
- To help students understand gender construction and perpetuation in society
- To familiarise students with literary works originating in relation to gender dynamics and gendered ways of thinking
- To enable students to analyse the multifaceted dimensions of gender, including its intersectionality with race, class, sexuality, and other social constructs
- To equip students with the critical skills to interpret and interrogate literary texts and extend this understanding to real life contexts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	show adequate knowledge of the history and development of Gender and Queer Studies	K1
CO2	demonstrate an understanding of how society constructs and perpetuates gender roles and norms.	K2
CO3	identify literary works within the context of gender specific viewpoints	K3
CO4	examine the complex aspects of gender, considering how it intersects with race, class, sexuality, and various social constructs	K4
CO5	evaluate and formulate critical responses to literary texts with a focus on gender norms and stereotypes.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Judith Lorber: Night to His Day: The Social Construction of Gender 1.2 Kimberlé Crenshaw: Introduction from Mapping the Margins: Intersectionality, Identity Politics, and Violence against Women of Color	K1 - K6	13	1-5
2	Poetry & Short Story 2.1 Adrienne Rich: Snapshots of a Daughter-in-law 2.2 Grace Nichols: The Fat Black Woman Goes Shopping 2.3 Rudyard Kipling: If 2.4 Mary Jean Chan: The Window 2.5 Mrinal Pande: Girls	K1 - K6	12	1-5
3	Fiction & Autobiography 3.1 Shyam Selvadurai: <i>Funny Boy</i> 3.2 Revathi: <i>The Truth About Me: A Hijra Life Story</i>	K1 - K6	17	1-5
4	Drama 4.1 Caryl Churchill: <i>Top Girls</i>	K1 - K6	15	1-5
5	Practical Application Tasks Analysing literary texts or passages through the practical application of gender-related concepts.	K5 & K6	8	5

ENGLISH LANGUAGE TEACHING

CODE: 23CE/MC/LT55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To distinguish between language acquisition and language learning
- To explain the components of the curriculum, different kinds of tests and evaluation
- To explain the theories related to the psychology of language learning
- To demonstrate the understanding of methods and approaches of English Language Teaching in microteaching
- To evaluate the needs of the different levels of learners and design materials and lesson plans for teaching the four skills of language

COURSE LEARNING OUTCOMES

On successful completion of the course the student will be able to

COs	DESCRIPTION	CL
CO1	define language acquisition and language learning; identify the theories related to psychology of language learning; recognise the various teaching approaches and methods in language teaching; describe the various kinds of tests and their purposes.	K1
CO2	differentiate between language acquisition and language learning; demonstrate an understanding of the theories related to psychology of language learning; summarise various teaching approaches and methods in language teaching; distinguish between the various kinds of tests and their purposes.	K2
CO3	demonstrate knowledge about language skills, appropriate teaching methods and the different tasks that could be used to train language learners; apply the theories related to psychology of language learning in language teaching.	K3
CO4	analyse the needs of the learners belonging to diverse backgrounds and select appropriate teaching approaches and methods in teaching them.	K4
CO5	evaluate the needs of the learners and create lesson plans and lessons to develop their overall language competence.	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**Interdisciplinary Core Course Offered by the Departments of English (Self-financed)
and Psychology to B.A. English and Communication Skills and
B.Sc. Psychology Degree Programmes**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LITERATURE AND PSYCHOLOGY

CODE: 23ID/IC/LP55

CREDITS: 5

LTP: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce students to the interdisciplinary aspects between Literature and Psychology
- To help students understand the fundamentals of human behaviour
- To encourage students to employ psychological concepts in their understanding of literary texts
- To critically appreciate literary texts using theories from different schools of psychology
- To equip students to assess real and literary characters through a psychological lens.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define key terms and concepts related to the study of literature and psychology.	K1
CO2	demonstrate the ability to interpret literary texts from literary and psychological perspectives	K2
CO3	apply concepts in psychology to understand real and literary characters	K3
CO4	examine the interdisciplinarity of various literary work	K4
CO5	evaluate and develop critical interpretation of literary texts using theories from different schools of psychology	K5 & K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Schwartz and Willbern: "Literature and Psychology" from <i>Interrelations of Literature</i> 1.2 Overview of personality and personality theories 1.3 Introduction to major theorists 1.3.1 Melanie Klein 1.3.2 Karen Horney 1.3.3 Jacques Lacan 1.3.4 Julia Kristeva	K1 - K6	16	1 - 55
2	Social Psychology 2.1 Social cognition, Social influence 2.2 Grief 2.3 Mari Selvaraj: <i>Pariyaerum Perumal</i> 2.4 Dylan Thomas: Do Not Go Gentle into That Good Night	K1 - K6	12	1 - 5
3	Psychosis 3.1 Hallucinations and Delusions, Schizophrenia 3.2 Causes and Treatment of Psychosis 3.3 Edgar Allan Poe: The Tell-Tale Heart	K1 - K6	10	1 - 5
4	Trauma and Attachment 4.1 Attachment theory 4.1.1 Adult attachment 4.2 Trauma theory 4.2.1 Causes and impacts of trauma 4.2.2 Resilience and trauma 4.3 Carol Ann Duffy: Warming her Pearls 4.4 Saadat Hasan Manto: Thanda Gosht	K1 - K6	20	1 - 5

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

WORLD CLASSICS IN TRANSLATION

CODE: 23CE/ME/WC45

CREDITS: 5

LTP: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand and appreciate the qualities that make a work of literature a classic
- To describe the classical works of literatures from across different parts of the world
- To relate the classical texts to their varied national and global identities and cultures
- To compare and contrast different genres of writing stemming from different cultures and nationalities
- To critically assess world classics from social, cultural, historical and literary perspectives

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	list the different qualities that make a work of literature a Classic	K1, K2
CO2	discuss Classics from across the globe with reference to the historical and cultural contexts	K3
CO3	interpret different literary texts by applying the theories and ideas of classical theorists	K4
CO4	analyse Classics from around the world with special attention to the genre, techniques and context	K5
CO5	evaluate and formulate critical responses to classical texts stemming from different regions and cultures	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to World Classics 1.1 Italo Calvino: Why read Classics? 1.2 A.K. Ramanujan: Some Thoughts on ‘Non-Western’ Classics: With Indian Examples	K1 - K6	10	1-5
2	Epic 2.1 Homer: <i>The Iliad</i> (Book I) 2.2 Ilango Atikal: <i>Cilappatikaram</i> , Trans. R. Parthasarathy (Book 1 – Cantos 1–3; Book 2 – Cantos 18–22)	K1 - K6	20	1-5
3	Poetry 3.1 Rumi 3.1.1. Worm’s Waking 3.1.2. In Baghdad Dreaming of Cairo, In Cairo dreaming of Baghdad (from <i>The Essential Rumi</i> (1995) translated by Coleman Barks. San Francisco: Harper Collins) 3.2 Dante: <i>Inferno</i> (Canto 3)	K1 - K6	20	1-5
4	Drama 4.1 Zeami Motokiyo: <i>Hagoromo</i>	K1 - K6	5	1-5
5	Short Story and Fiction 5.1 Boccaccio: <i>The Decameron</i> (Book I: 3rd day: IX story) 5.2 Somadeva: Visamasila, <i>The Kathasaritsagara</i> Translated by Arshia Sattar	K1 - K6	10	1-5

CONTENT AND COPY EDITING

CODE: 23CE/ME/CC45

CREDITS: 5

LTP: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To expose the students to the basic principles of editing
- To enable students to understand ethics in editing
- To familiarise students with the skills required for copy-editing
- To train students to use different editing software
- To train students to edit for accuracy and appropriacy of content, grammar and vocabulary

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	define the role of an editor	K1
CO2	understand professional ethics in editing	K2
CO3	apply editing skills to produce error-free documents	K3
CO4	examine the content and organisation of information for any issues, and rectify them	K4
CO5	assess and edit material for coherence, syntax, structure, style, readability, and marketability	K5-K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	The Editorial Triangle 1.1 Role and Responsibility of the editor 1.2 The Editing Process – workflow 1.3 The Writer-Editor-Reader Relationship	K1-K6	5	1-5
2	Content Editing 2.1 Determining readership 2.2 Checking for accuracy of information 2.3 Coherence, Syntax, Structure	K1-K6	20	1-5
3	Copy Editing 3.1 The role of the copyeditor 3.2 Standardisation – Style Sheet and Style Manual 3.3 Mechanics of editing 3.3.1 Copy-editing marks 3.3.2 Punctuation 3.3.3 Grammar – Cohesion, Subject-Verb Agreement, Dangling Participles 3.4 Citation styles	K1-K6	20	1-5
4	Editing Tools 4.1 Editing on MS Word 4.2 Editing PDF	K1-K6	10	1-5
5	Professional Ethics 5.1 Over-editing & under-editing 5.2 Acknowledging Sources 5.3 Cultural sensitivity and political correctness	K1-K6	10	1-5

(Effective from the academic year 2023-24)

LITERATURE AND FOOD

CODE: 23CE/ME/LF45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- Define the intrinsic connection between food and literature
- Outline terms and concepts related to food
- Identify the interdisciplinary nature of food studies in combination with the skills that can be enhanced with relation to food and writing
- Discover the various modes of writing about food
- Evaluate, assess and interpret literary and non- literary texts based on their interaction with food and forms of writing that they employ

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	define the various theories, concepts and ideas related to literature and food	K1
CO2	interpret and outline the socio – political, historical and cultural contexts of food	K2
CO3	identify the divergent cultural and cross-cultural contexts and notions of food	K3
CO4	analyse and examine the inevitable connection between food and writing and be able to put it to use	K4
CO5	appraise and evaluate texts based on interdisciplinary ideas related to literature and food	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Literature and Food 1.1 Roland Barthes: Toward a Psychosociology of Contemporary Food Consumption	K1-K6	8	1-5
2	Basics of Food Writing 2.1 What is Food Writing? Meaning and Significance of Food Writing 2.2 Food Writing Formats - The Interview, Travel Story, Recipe with a Story, Review, Personal Essay, Blogs 2.3 Analysing Gastrocriticism and using it effectively in writing about food 2.4. Food and Life Writing 2.4.1 Nigel Slater : Excerpts from Toast: <i>The Story of a Boy's Hunger</i>	K1-K6	12	1-5
3	Food, Women and Identity 3.1. Jessica Soffer: <i>Tomorrow There Will be Apricots</i> 3.2. Jeo Baby: <i>The Great Indian Kitchen</i>	K1-K6	18	1-5
4	Food, Diaspora and Ethnicity 4.1. Bill, Judy, Sarah and Kaitlin Leung: <i>The Woks of Life</i> 4.2. Jhumpa Lahiri: Mrs. Sen's from the <i>Interpreter of Maladies</i> 4.3 Shan Foods : Khaana With Parosi	K1-K6	15	1-5
5	Food and Fantasy 5.1 Laura Esquivel : <i>Like Water for Chocolate</i> 5.2. Maurice Sendak: <i>Chicken Soup with Rice</i>	K1-K6	12	1-5

DEPARTMENT OF ENGLISH (SELF-FINANCED)

B.A. DEGREE: ENGLISH AND COMMUNICATION SKILLS

SYLLABUS

(Effective from the academic year 2023 - 2024)

PROJECT

CODE:23CE/ME/PR45

CREDITS:5

OBJECTIVES OF THE COURSE

- To provide students with the skills to undertake independent research on an area of their interest
- To enable students to identify a research gap
- To train students to formulate a clear research question
- To inculcate in students the skillset required to carry out structured, ethical research
- To train students in writing a well-organised and well-documented short research paper.

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to

COs	Description	CL
CO1	define a research area.	K1
CO2	identify the research gap in the area.	K2
CO3	construct a research framework, cogent arguments to fill in the research gap.	K3
CO4	examine and make ethical and optimal use of resources .	K4
CO5	interpret and evaluate the ideas, and develop an argument to compose a well-organised and well-documented research paper.	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5–Evaluate K6 – Create		

Description: Analysis/argument in the form of an extended research paper on a topic or aspect of a topic following the MLA (Eighth Edition) documentation and citation style.

Length : Around 3000-4000 words/10-20 pages, organised in 2 to 3 chapters

Scope : Students could work on

- a) an author/authors
- b) a particular theme or issue in the context of a literary work
- c) use a given theoretical approach to a particular text/group of texts

The above entails extensive reading of primary and secondary texts.
(to be done in consultation with the supervisor)

- Requirement:** An abstract of 150-200 words
1. A clear thesis statement
 2. Works Cited
 3. Documentation and Bibliography using MLA (Eighth Edition) format
 4. Drafting and revising process to be followed – with a percentage of the marks to be allotted to drafts as given below

PATTERN OF ASSESSMENT:

Total marks: 100 marks

Continuous Assessment

Total Marks:50

Annotated Bibliography

20 marks

Draft 1

30 marks

Cognitive Level	Marks	Rubrics for Evaluation
K1	5+5	MLA format for citation of secondary source (annotated bibliography 5, draft 5)
K2	15	Explanation of the relevance of the secondary source (annotated bibliography)
K3	5	Explaining the conceptual framework (draft)
K4	10	Textual analysis and use of secondary sources (draft)
K5	5	Research arguments, relevance, coherence, appropriate use of academic language (draft)
K6	5	Research conclusions (draft)

End Semester Evaluation

Total Marks: 100

Dissertation

75 marks

Knowledge Level	Marks	Rubrics for Evaluation
K1	5	MLA Documentation
K2	5	Formulating and explaining research problem/question
K3	15	Explaining the conceptual framework
K4	25	Textual analysis and use of secondary sources
K5	15	Research arguments, relevance, coherence, appropriate use of academic language
K6	10	Research conclusions

Viva voce

25 marks

PATTERN OF ASSESSMENT:

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

4 out of 6 600-word essays

(4 x 25=100)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF ENGLISH (SELF-FINANCED)

B.A. DEGREE: ENGLISH AND COMMUNICATION SKILLS

SYLLABUS

(Effective from the academic year 2023-2024)

POETRY OF THE ROMANTIC AGE

CODE:23CE/UI/PR23

CREDITS:3

OBJECTIVES OF THE COURSE

- To enable students to undertake independent learning and research
- To introduce students to the English Romantic Movement and its literature

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- trace the evolution of thought from the Pre-Romantics to the Romantics
- understand the key aspects of the English Romantic Movement
- read, analyse and appreciate poetry written by various Romantic poets

Unit 1

1.1 Introduction to the Romantic Movement

Unit 2

2.1 The Pre-Romantics

Unit 3

3.1 William Wordsworth

Ode on Intimations of Immortality from Early
Recollections of Childhood

3.2 Samuel Taylor Coleridge

Dejection: An Ode

Unit 4

4.1 John Keats

Ode on a Grecian Urn

4.2 Percy Bysshe Shelly

To a Skylark

Unit 5

5.1 George Byron

Don Juan: Canto I (6-64)

BOOKS FOR REFERENCE

Black, Joseph et al. *The Broadview Anthology of Romantic Poetry*. Broadview Press, 2016.

Feldman, Paula. Ed. *British Women Poets of the Romantic Era: An Anthology*. John Hopkins Press, 1997.

Hough, Graham. *The Romantic Poets*. Routledge, 2016.

Simpson, David. *Irony and Authority in Romantic Poetry*. Macmillan Press, 1979. Wordsworth, Jonathan and Jessica Wordsworth. Eds. *The Penguin Book of Romantic Poetry*. Penguin Books, 2003.

PATTERN OF ASSESSMENT:

End-Semester Examination:
Four out of six 600-word essays

Total Marks: 100

Duration: 3 hours
4 x 25 = 100 marks

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF COMPUTER SCIENCE

PROGRAMME DESCRIPTION

The Bachelor of Computer Applications offers knowledge on the underlying concepts of computer technology, use of different programming languages as a tool for solving problems in different domains and the technology trends. This degree not only helps the students to pursue career in IT industry or master's programme in the discipline but also opens up their avenues in different domains of their interest as Computer technology plays a vital role in almost all disciplines.

This programme is structured to face the unique challenge of laying down a strong foundation of basics and fundamentals and keeping up with the rapid changes and advancements of computer technology. The programme introduces to the student various programming tools and techniques and the design and development of solutions and enables them to apply the knowledge appropriately to solve different problems. Students are given an understanding on mathematical concepts and entrepreneurship. This programme not only emphasises gaining knowledge in computer technology but also focusses on value education and ethics. It seeks to motivate the students to share their knowledge with the underprivileged and the oppressed.

Students completing Bachelor of Computer Applications will be equipped in computer technology ready to learn and innovate and skilled in choosing their career or higher studies clubbed with responsibility and righteousness.

VISION OF THE DEPARTMENT

To provide a wholesome educational environment, a platform for the students to reinvent themselves and launch into the technological and scientific arena together with human values.

MISSION OF THE DEPARTMENT

To impart learning as a process towards knowledge, research and productivity and provide education as a tool to excel in one's area of competence.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF COMPUTER SCIENCE

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.C.A. Programme, the students will be able to

PSO1	able to comprehend and apply the computing theory and practices, finding effective solutions to affairs, local and global.
PSO2	acquire, hone professional and critical thinking skills and capability to engage in independent and lifelong learning leading to a successful career in the broad context of technological change.
PSO3	communicate and function effectively as an individual, or as a member or leader in diverse teams, and in diversified domains.
PSO4	assess and apply the principles in the design, development, and presentation of solutions in the field of computer application and demonstrate employability/entrepreneurial skills with a commitment to professionalism.
PSO5	relate the impact of technology on society and evolve sustainable and ethical solutions.

SYLLABUS

(Effective from the academic year 2023-2024)

FUNDAMENTALS OF COMPUTING

CODE:23CS/MC/FC13

CREDITS: 3

L T P: 2 1 2

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To demonstrate programming skills
- To enable the students to write and debug simple C programs
- To understand the process involved in execution of the program
- Ability to understand modular program development
- To compare and decide on best strategies to develop a code and debug.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and reproduce the structure of programming	K1
CO2	explain the fundamental concepts, branching, looping, arrays, and functions in C programming,	K2
CO3	utilize Linux commands and C programming concepts learnt to solve simple problems	K3
CO4	analyze the different types of functions and scope of variables	K4
CO5	develop an appropriate flow of logic to solve a given problem and choose proper debugging strategies for fixing errors	K5,K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Strategies for Problem Solving Problem Solving - General Problem-Solving Techniques 1.2 Files and directories, Editing text Login - Files and Directories - File Paths* - File/Directory Permissions –chmod command - Directory Navigation - cd, pwd, ls, ls -l commands - Creating and Manipulating Files and Directories using a Terminal -mkdir, cp, mv, rm, rm -R commands - Binary and Data Files - cat command - GUI based File Explorer – Difference between CLI and GUI - Command Based Text Editor - Creating/Opening/Closing a file - Making Changes and Saving - Copy/Cut and Paste operation - Find and Replace operation - Undo and Redo operation - File Navigation - Using a GUI Application - GUI based Text Editor	K1-K3	10	1-3
2	2.1 Basic elements of C Programming Basic Structure of a C program - #include, main function, blocks, statements –Compilation- Machine Language & High Level Language, Compiler, Executable - Variables - Integer Data Types - int, short, long - Unsigned Counterparts – Supported Range - sizeof operator - printf	K1-K6	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	- Special Characters - new line, horizontal tab - scanf - Arithmetic Expression - Arithmetic Operators - Operator Precedence - Overflow and Underflow - Floating Point Data Types -float, double - Precision – Compound Assignment Operators - Increment and Decrement operators - Boolean Expression - Relational Operators - Logical Operators – Character Data Type - char – getchar – putchar - literals - C Tokens - Variable Naming Rules - Single and Multi-line Comments - Type Conversions - Bitwise Operators			
3	3.1 Debugging GDB - Adding Debugging Symbols to the Executable - Breakpoints – Starting Debugging Session - next command - Viewing Source - Inspecting Variables and its Type - continue command - Ending session - GDB command abbreviations	K1-K5	9	1-5
4	4.1 Branching and Looping, Arrays, Flowcharting Statements and Blocks - If – Else - Else If - Switch -case, break, default – Loops – For, Infinite Loop, While – Do-while - Break and Continue - Conditional Expressions - Goto and Labels - Array – Single and Two Dimensional Arrays - Flow Charts – Symbols - Start/Stop - Process - Decision Making - Input/Output - Connector)	K1-K6	15	1-5
5	5.1 Functions Function Prototype - Function Definition - Function call - Passing Arguments -Returning Values - Passing Arrays - Call Stack - GDB commands - Backtrace - Frame - Step - Difference between Next and Step – Finish - Recursion - Variable scope - Automatic Variables, External Variables, Static Variables - Constants – Const Keyword, Symbolic Constants - Enums - Built-in Functions - math.h: sqrt, pow, stdlib.h: rand, exit, abs	K1-K6	16	1-5

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23CS/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

PROCEDURE ORIENTED PROGRAMMING

CODE:23CS/MC/PO24

CREDITS: 4

L T P: 2 0 4

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the concepts involved in structures, unions, pointers, file handling and preprocessing.
- To demonstrate the understanding of basic data structures by implementing using C.
- To understand in detail the steps involved in the translation of source code to object code
- To evaluate the issues, dependency and different methods of solving a given problem and develop a better solution.
- To develop problem-solving skills by presenting real-world problems and creating solutions using C.

COURSE LEARNING OUTCOMES

COs	DESCRIPTION	CL
CO1	recall the concepts involved in structures, unions, pointers, file handling and preprocessing	K1
CO2	explain the acquired knowledge appropriately to a given problem	K2
CO3	choose appropriate data structures to solve any given problem	K3
CO4	analyze the different C concepts involved in designing a large program	K4
CO5	assess the issues, dependency and different methods to develop a better solution for any given problem	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Pointers Pointers variable – Address of and Dereferencing operators – Declaring a pointer –Initializing a pointer - Pointers and Function Arguments – Dynamic memory allocation – malloc, calloc, realloc and free - Pointers and Arrays - Address Arithmetic - Character Pointers and Functions - Pointer Arrays - Pointers to Pointers - Multi-dimensional Arrays - Initialization of Pointer Arrays - Pointers vs. Multi-dimensional Arrays - Pointers to Functions 1.2 String Concepts String representation – Initialization - Length – Compare – Copy – Concatenate –Substring - Search – Replace – Conversion to int and vice versa 1.3 String built-in functions strlen, strcmp, strcpy, strcat, strchr, strstr, atoi	K1-K3	20	1-3
2	2.1 Structures and Unions Defining a Structure - Declaring a structure variable - Member operator – Structures and Functions - Arrays of Structures - Pointers to Structures - Nested Structures - Arrow operator - Self-referential Structures - Typedef - Unions - Bit-fields	K1-K5	19	1-5
3	3.1 Designing a Large Program Issues in developing a large program - Module & its Components (Header files, Object files & The process of linking) - Make utility – MakeFile structure (Rules, Targets, Prerequisites, Commands) – Variables - Dependency Checking –Minimizing Rebuilds - Invoking Make – Basic Make syntax Storage classes – extern keyword in multiple files	K1-K6	12	1 - 5
4	4.1 File I/O File Pointers - Opening a file - Creating a file - Closing - Reading - Writing - File Access (Sequential, Random) - Error Handling 4.2 Command Line Arguments	K1-K5	17	1-5
5	5.1 Pre-processing File Inclusion, Macro Substitution, Conditional Compilation, Macros – Simple, Nested, Argumented	K1-K2	10	1

OPTIONAL SELF STUDY

The following source code will help enhance C skills of the students. Hence it is recommended.

- Source code walkthrough and demo - Listing Directories Example

B.A. / B.Sc. / B.Com. /B.C.A/ B.S.W Degree Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23CS/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water)and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

PATTERN OF ASSESSMENT

Continuous Assessment Test: **Total Marks: 25** **Duration: 60 minutes**
Section A-10 x 1 = 10 Marks (All questions to be answered) Multiple Choice Questions
Section B - 3 x 5 = 15 Marks (3 out of 6 to be answered in 150 words each)

Other Component: **Total Marks: 25**
Any **one** of the following for 25 marks
Quiz/Scrap Book/Assignment / Poster Making/Case Study/Project/Survey/Model-Making

No End Semester Examination

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / B.B.A/ B.C.A/B.S.W. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23CS/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

ACCOUNTING FOR BUSINESS

CODE: 23CM/AC/AB25

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To familiarize students with the basic accounting principles
- To expose students to the importance of cost ascertainment
- To provide an understanding on the project appraisal techniques
- To enable students to take better decisions in business
- To educate students with ratio analysis

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	comprehend with the basics of accounting	K1
CO2	interpret Cost analysis to understand and control expenses.	K2
CO3	apply appraisal techniques for project evaluation	K3
CO4	develop the ability to use accounting information on business decisions	K4
CO5	measure and judge the financial position of an organization through Ratio analysis	K5

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Accounting – Meaning, Objectives and Branches of Accounting 1.2 Introduction to Double Entry System 1.3 Preparation of Journal and Trial Balance 1.1 Preparation of Trading, Profit and Loss Account and Balance Sheet of a Sole Trader	K1-K2 K1-K2 K1-K4 K1-K5	15	CO 1-5
2	Cost Ascertainment 2.1 Meaning of Cost, Types of cost – Direct and Indirect 2.2 Preparation of Statement of Cost and Profit 2.3 Ascertainment of Cash Requirement – Budgets – Preparation of Cash Budget	K1-K3 K1-K5 K1-K5	10	CO 1-5

UNIT	CONTENT	CL	HRS	CO
3	Project Appraisal Techniques 3.1 Evaluation Techniques 3.2 Pay Back Period 3.3 Average Rate of Return 3.4 Net Present Value 3.5 Internal Rate of Return and Profitability Index	K1-K4 K1-K4 K1-K4 K1-K5 K1-K5	15	CO 1-5
4	Decision-Making Technique 4.1 Marginal Costing - Meaning, Advantages, Limitations, Breakeven Analysis 4.2 Cost-Volume Profit Analysis- P/V Ratio - Margin of Safety 4.3 Application – Key factor, Product Mix and Sales Mix	K1-K4 K1-K5 K1-K5	15	CO 1-5
5	Techniques for Analysing Financial Positions 5.1 Techniques for Financial Statement Analysis – Comparative Statement, Common Size Statement and Trend Analysis 5.2 Ratio Analysis – Profitability, Liquidity and Solvency	K1-K5 K1-K5	10	CO 1-5

OBJECT ORIENTED PROGRAMMING

CODE:23CS/MC/OP34

CREDITS: 4

L T P: 2 0 4

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To learn the basic concepts of object oriented programming
- To understand and demonstrate the concepts of inheritance and interfaces
- To provide an understanding of concepts such as packages, exception handling
- To introduce the concepts of multithreading and generics
- To give insight about java library

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and reproduce basic concepts of object oriented programming	K1
CO2	explain the object oriented concepts, multithreading, generics and libraries	K2
CO3	utilize object oriented concepts and library to find a solution for simple problems	K3
CO4	select a suitable object oriented concept for the given problem	K4
CO5	build solution for a real world problem using the object oriented concepts, generics and libraries	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Basic Concepts Features of Java –Bytecode - Data Types – Variables – Arrays - Operators - Control Statements - Scanner - Javadoc	K1-K4	18	1-4
	1.2 Classes, Objects and Constructors Classes - Overloading Methods- Overloading Constructors- Objects as Parameters - Returning Objects – Access Control - static - final - Nested and Inner Classes	K1-K6		1-5
2	2.1 Inheritance Inheritance Basics - Types of inheritance: Single, Multilevel, Hierarchical - Member Access - super - Method Overriding - Dynamic Method Dispatch - Abstract Classes - final with Inheritance 2.2 Interfaces Defining an Interface- Implementing Interfaces- Partial Implementations – Applying Interfaces – Variables in Interfaces – Extending Interfaces	K1-K6	16	1-5

UNIT	CONTENT	CL	Hrs	CO
3	3.1 Packages Defining a Package - Finding Packages and classpath - Access Protection – Importing Packages 3.2 Exception Handling Exception-Handling Fundamentals - Exception Types - Uncaught Exceptions – Using try and catch- Multiple catch Clauses - Nested try Statements – throw – throws – finally - Java’s Built-in Exceptions - Creating Own Exception Subclasses - Checked and Unchecked Exceptions	K1-K6	14	1-5
4	4.1 Multithreaded Programming The Java Thread Model - Creating a Thread - Synchronization 4.2 Generics Generics - Simple Generics example, Generic Class with two type parameters, General form of a Generic class, Bounded Types	K1-K3	15	1-5
5	5.1 Java Library String Handling – Exploring Java. Lang: Primitive type Wrappers - Number, Double and Float, Character – Math 5.2 Java.util Collection Framework - Interfaces: Collection, list, Enumeration, Iterator, List Iterator - Classes: Array List - Utility Classes - Random, Calendar	K1-K3	15	1-3

FUNDAMENTALS OF DATABASE MANAGEMENT SYSTEMS

CODE: 23CS/MC/FD34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable the students to understand the difference between database systems and file systems and the importance of relational data model
- To enable a comprehensive and detailed understanding of the features and characteristics of database systems
- To understand functional dependencies and normalization of database and be able to apply the same on a database
- To be able to apply knowledge to new problem
- To demonstrate an understanding on transaction processing, concurrency control and DB recovery techniques

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and differentiate the flat file system with database management system and relational database	K1
CO2	explain the database design and modeling techniques with transaction and recovery management	K2
CO3	utilize relational data modeling and conceptual modelling in storing and retrieving data	K3
CO4	analyze relational database management techniques to store and manage data effectively	K4
CO5	develop a normalized database using SQL/PLSQL for any real time scenario	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Introduction to Databases Introduction - An example - Characteristics of the Database Approach - Actors on the Scene - Workers behind the Scene - Advantages of using the DBMS Approach - A Brief History of Database Applications -When Not to Use a DBMS 1.2 Database System Concepts and Architecture Data Models, Schemas and Instances - Three Schema Architecture and Data Independence - Database Languages and Interfaces – The Database System Environment - Centralized and Client/Server Architectures for DBMSs - Classification of Database Management Systems	K1-K3	9	1-3

UNIT	CONTENT	CL	Hrs	CO
2	2.1 The Relational Data Model and Relational Database Constraints Relational Model Concepts - Relational Model Constraints and Relational Database Schemas - Update Operations, Transactions and Dealing with Constraint 2.2 Data Modeling Using the Entity-Relationship Model Using High-Level Conceptual Data Models for Database Design - A Sample Database Application - Entity Types, Entity Sets, Attributes and Keys - Relationship Types, Relationship Sets, Roles and Structural Constraints - Weak Entity Types - Refining the ER Diagram – ER Diagrams, Naming Conventions and Design Issues - Relationship Types of Degree Higher than Two	K1-K6	14	1-5
3	3.1 Basic SQL SQL Data Definition and Data Types - Specifying Constraints in SQL - Basic Retrieval Queries in SQL- Insert, Delete and Update Statements in SQL - Additional Features of SQL 3.2 More SQL: Complex Queries, Views and Schema Modification More Complex SQL Retrieval Queries - Specifying Constraints as Assertions – Views - Schema Change Statements in SQL 3.3 The Relational Algebra Unary Relational Operations: Select and Project - Relational Algebra Operations from Set Theory - Binary Relational Operations: Join and Division, Additional Relational Operations, Examples of Queries in Relational Algebra.	K1-K6	14	1-5
4	4.1 DB design and normalization Basics of Functional Dependencies and normalization for relational DB-relational: 1 NF, 2 NF, 3 NF and BCNF 4.2 PL/SQL PL/SQL Blocks – Architecture - Data Types and their usage - Control Structures - Exceptions - Predefined, User Defined Cursors and Triggers: Introduction – Cursors - Cursor Management – Procedures – Functions - Triggers and its types	K1-K6	14	1-5
5	5.1 Transaction processing and Concurrency control Transaction and System Concepts, Desirable Properties of Transactions, Characterizing Schedules Based on Recoverability and Serializability, Transaction Support in SQL - Concurrency Control Techniques, Validation Concurrency Control Techniques.	K1, K2	14	1, 2

SOFTWARE ENGINEERING AND TESTING

CODE: 23CS/MC/TE34

CREDITS: 4

L T P: 3 1 1

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE:

- To understand the software process and life cycle models.
- To make use of life cycle models and frameworks for a given scenario
- To analyze the requirement engineering and scenario models
- To evaluate the testing scenario based on test cases
- To understand the software configuration and project management techniques

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the software process models and the phases of a software project	K1
CO2	compare different software development process models and distinguish the appropriate models for real time project	K2
CO3	apply the knowledge, techniques and skills in the development of a software product.	K3
CO4	design an appropriate architectural model and test the application	K4
CO5	choose the software process models and testing techniques for an application	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Software Engineering Nature of Software -Software Process - Principles	K1-K3	14	1 - 3
	1.2 Software process models Defining a framework activity, Waterfall model, Incremental process models, RAD model	K1-K6		1-5
	1.3 Agile development Agility - Principles of an Agile process - Extreme programming(XP) - XP process -Scrum			
2	2.1 Understanding Requirements Requirement Engineering-Establishing the Groundwork- Eliciting Requirements –Developing Use Cases - Building the Requirements Model -Negotiating Requirements - Validating Requirements-	K1-K6	13	1 - 5

UNIT	CONTENT	CL	Hrs	CO
	2.2 Requirements Modelling Analysis Rules of Thumb - domain analysis -UML models that supplement use case- Data modelling concepts - class based modelling			
3	3.1 Software Testing Software Testing Techniques - Test Case Design - Unit testing -Integration testing -Test driven development - Validation testing, alpha & beta Testing-System testing White-Box testing -Basis Path Testing - Control Structure Testing - Black-Box Testing	K1-K6	13	1-5
4	4.1 Quality Management McCall's Quality factors – Quality assurance – Review – Informal Reviews-Formal Technical reviews– Walkthrough – Inspection 4.2 Project Metrics Size-Oriented metrics, LOC, Function Point 4.3 Software Configuration Management Software Configuration Management – The SCM Repository, The SCM Process	K1-K5	13	1-5
5	5.1 Project Management Concept The Management Spectrum – People - The Product - The Process – The Project - The W5HH Principle. 5.2 Estimation for Software Project The Project Planning Process - Software Scope and Feasibility – Resources - COCOMO Model -Reactive Vs Proactive Risk Strategies – RMMM plan	K1-K3	12	1 -3

BACHELOR OF COMPUTER APPLICATIONS

SYLLABUS

(Effective from the academic year 2023-2024)

DATABASE MANAGEMENT SYSTEMS PRACTICAL

CODE: 23CS/MC/P132

CREDITS: 2

L T P: 0 0 4

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To understand the database management concepts and database design
- To understand and normalize the table based on the dependencies
- To be able to store and retrieve data using SQL commands with keys and constraints
- To understand procedures and functions using PL/SQL
- To be able to apply exceptions handling and triggers

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals concepts of relational database management system	K1
CO2	demonstrate the sql queries and pl/sql procedures, functions, cursors, error handling and triggers	K2
CO3	apply sql commands and pl/sql to store and retrieve data from the database	K3
CO4	examine the database design and relational database management	K4
CO5	design and create database along with normalization, keys and constraint	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

List of exercises	CL	Hrs	CO
1. Schema design 2. ER modeling using a tool 3. DDL commands 4. DML and TCL commands 5. SQL programming 6. Sub queries 7. Single Row and Aggregate functions, Set operations. 8. Joins 9. Views, index, synonyms and sequence 10. Report generation 11. Cursors 12. Procedures & Functions 13. Triggers 14. Exception Handling	K1-K6	52	1-5

PATTERN OF ASSESSMENT:**Continuous Assessment Test: Total Marks: 50 Duration: 90 minutes**

CRITERION	Knowledge Level	Marks
Writing SQL Commands and PL/SQL programs	K1	5
Record Notebook, Viva	K2	10
Execution	K3, K4	25
Result and Output	K5, K6	10
	Total	50

Other Components: Total Marks: 50

Case study/ Practical/ Mini Project

End Semester Examination: Total Marks: 100 Duration: 3 Hours

CRITERION	Knowledge Level	Marks
Writing SQL Commands and PL/SQL programs	K1	10
Record Notebook, Viva	K2	20
Execution	K3, K4	50
Actual and Expected Output Comparison and result	K5, K6	20
	Total	100

IMAGE EDITING AND DOCUMENTATION

CODE: 23CS/MC/ID31

CREDIT: 1

L T P: 0 0 1

TOTAL TEACHING HOURS: 13

OBJECTIVES OF THE COURSE

- To pursue practical skills in image editing and animation using GIMP
- To impart creativity through logo design and 2D animation in GIMP
- To give students the knowledge and understanding to prepare formatted documents and powerful presentations
- To familiarize the basics and advanced concepts of Word, Excel and PowerPoint
- To understand the method of protecting documents and Presentation using Canva

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate image editing using GIMP, documentation using word processing and tables, charts using excel	K1
CO2	explain the textures, logos and animation using GIMP and also formatting options in word document and excel for personal, academic and business sectors	K2
CO3	apply the tools and techniques to edit an image and to format a document/Spreadsheet/Presentation	K3
CO4	examine the tools and techniques in GIMP, Word document, Spreadsheet and Presentation	K4
CO5	design an image using the design elements and create a report as well as presentation with proper formatting	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

Topics

Photo Editing

GIMP Basics – Image Handling Basics – Working with Images - Photograph Retouching – Global Transformations – Local Transformations – Painting and Drawing - Dodging, Burning and Smudging – Selections, Overlaying and Blending Modes – Digital Collage

Textures, Logos and 2D Animation

Creating Textures - Logos - Animation – Building an Animated GIF by Hand – Using Animation Tools – Using GAP

Designing a Website

Laying Out a Website – Fixed and Variable Width Designs – Web Design Tools – Optimizing Images for the Web

Word Processing: Introduction – The Style Advantage, Outlining, - Autocorrect – Compatibility with previous versions of word –Drawing Canvas –Styles and Character/Font Formatting - Bullets and Numbering –Character Formatting –Paragraph Formatting –Styles and paragraph Formatting - Structural Formatting, paragraph Decoration- Find, Replace and GO To - Language Tools –AutoCorrect – Auto Format – Tables – Pictures and SmartArt – Headers and Footers - Symbols and Equations –Charts – Inserting Objects and Files –Blogging-Templates and Themes
Bookmarks –Tables of Contents –Footnotes and Endnotes -Citations and Bibliography - Indexing - Table of Authorities –Hyperlinks and Cross-References –Envelopes and Labels - Data Documents and Mail Merge –The Ribbon -Security, Tracking and Comments - Protection Type - Integration with other office Applications –Excel, PowerPoint

Spreadsheet

Data entry, Using formulae and functions, Formatting data, Creating charts, List, Sorting, Filtering, Working with forms, Grouping, Linking and Protecting sheets, Data validation, printing spreadsheets. Tool: MS-Excel

Presentation Tool Introduction to PowerPoint – Changing the view – Creating a good presentation - Creating and saving Presentation Files –Creating New Slides and Text Boxes

Working with Layout, Themes and Masters – Formatting Text –Formatting Paragraphs – Correcting and Improving Text - Creating and Formatting Tables- Creating SmartArt Diagrams - Importing Image Files into PowerPoint – Compressing Images – Creating a Photo Album Layout – Working with Charts

Working with External Content - Copying Content from Other Programs - Adding Sound Effects, Music and Soundtracks - Creating Animation Effects and Transitions – Creating Support Materials –Preparing for a Live Presentation –Limiting User Access to a Presentation

CANVA- Presentation Template –Tools and Features – Downloading and Sharing

PATTERN OF ASSESSMENT:

Component - 50 marks

component 1: Image Editing using GIMP

component 2: Prepare a report on a topic

All K-Levels will be assessed

No End Semester Examination

MATHEMATICS FOR COMPUTER SCIENCE I

CODE: 23MT/AC/MS35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the concept of diagonalization through Eigen values and Eigen vectors
- To utilize various methods in solving problems related to transcendental, algebraic equations and a system of linear equations
- To acquire knowledge in numerical integration and differentiation that are used in computer applications
- To introduce simplex technique to solve linear programming problems
- To appreciate the use of appropriate mathematical concepts and skills to solve problems in real life contexts

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the various applied mathematical concepts such as matrices, vector analysis, numerical methods and linear programming problems	K1
CO2	understand the fundamentals relevant to the methods utilized in solving problems related to equations, numerical integration and vector differentiation	K2
CO3	apply appropriate mathematical techniques in solving related problems and model real time situations	K3
CO4	analyse the different methodology adapted to solve a particular problem	K4
CO5	evaluate and make inference from the solutions obtained for related problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Matrices 1.1 Eigen Values and Eigen Vectors of Square Matrices of Order ≤ 3 1.2 Cayley - Hamilton Theorem 1.3 Diagonalization of Matrices	K1-K5	11	CO1-5
2	Vector Analysis 2.1 Scalar and Vector Point Functions 2.2 Gradient 2.3 Divergence and Curl 2.4 Solenoidal and Irrotational Vectors 2.5 Problems using Vector Identities	K1-K5	14	CO1-5
3	Solution of Transcendental and Algebraic Equations 3.1 The Bisection Method 3.2 Newton-Raphson Method Solution of Simultaneous Equations 3.3 Gauss Elimination Method 3.4 Gauss Jordan Elimination Method	K1-K5	14	CO1-5
4	Numerical Differentiation and Integration Numerical Differentiation 4.1 Derivatives using Newton's Forward Difference Formula 4.2 Derivatives using Newton's Backward Difference Formula Numerical Integration 4.3 Trapezoidal Rule	K1-K5	12	CO1-5
5	Linear Programming Problem 5.1 Linear Programming Formulation 5.2 Graphical Method 5.3 General L.P.P. 5.4 Canonical and Standard Forms of L.P.P. 5.5 The Simplex Algorithm	K1-K5	14	CO1-5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand web design and demonstrate the skills in creating dynamic web-pages using HTML5, CSS, JavaScript and PHP.
- To choose and apply different front-end design techniques using HTML5 and CSS
- To analyse, compare and distinguish between the web technologies
- To assess and choose websites layout, add behaviour to elements and persist data on the client-side and database.
- To implement the concepts on designing and developing a dynamic responsive website

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the concepts of web development with HTML5, CSS, JavaScript and PHP	K1
CO2	learn and design a webpage with different elements using the learnt web technologies	K2
CO3	apply the knowledge and design a webpage with different web elements	K3
CO4	explain and infer the use of HTML5, CSS, JavaScript and PHP in creating and designing interactive dynamic websites	K4
CO5	develop a dynamic responsive website with interactivity and server-side functionality	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

SYLLABUS

(Effective from the academic year 2023–2024)

OPERATING SYSTEMS PRACTICAL

CODE: 23CS/MC/P242

CREDITS: 2

L T P: 0 0 4

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To reinforce the understanding of operating system concepts by using Linux commands and system calls
- To understand the concept of process and process scheduling and user management
- To understand how virtual memory regions are used by a program
- To understand file and directory permissions
- To know how file systems are mounted and unmounted

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	tools available in Linux to monitor running processes, adjust process and priorities	K1, K2
CO2	differentiate between foreground and background processes, user time and system time taken by a program	K3
CO3	explain how file security model works in a multi user environment, virtual memory map of a program	K4
CO4	elaborate the concepts of user and storage device management	K5
CO5	discuss how a process is created and terminate a process and operations performed on files	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction Referring to man pages using command man Identify machine architecture using command uname Users and groups Create a group using groupadd command Create a user using useradd command Change the password for a user Change to different user using su command	K1-K5	3	1- 4

UNIT	CONTENT	CL	Hrs	CO
2	<p>Processes</p> <p>View the current list of processes using command ps command</p> <p>-Identify the option that will help you to see the command used to start the process</p> <p>-Identify the option that will help you to see the state of each process</p> <p>-List the various states of a Linux process</p> <p>Kill command (InterProcess Communication)</p> <p>-Number of signals that are supported in Linux</p> <p>-Forcefully terminate a process using command kill</p> <p>-Identify the signal passed to a program when Ctrl + C is pressed</p> <p>-Identify the real and effective UIDs of a process using command “\$ cat /proc/<pid>/status”</p> <p>-View the process tree using the command pstree. Trace the parent process of all processes.</p> <p>Process Scheduling</p> <p>Change the priority of a process using nice command</p> <p>-View the nice value of processes using ps command</p> <p>Write a C program to simulate stack overflow error. Control stack size using command ulimit.</p> <p>Write a C program to create a new process using a system call fork.</p>	K1 - K6	14	1-5
3	<p>Memory management</p> <p>Study the given C program. Identify the virtual memory regions used by the program.</p> <p>Find the shared library dependencies of an executable using command ldd</p> <p>Time</p> <p>Determine the amount of time taken by a program using command time.</p> <p>Difference between real time, user time and system time</p> <p>Files and Directories</p> <p>List the files in the current directory using command ls</p> <p>Print the current working directory using command pwd</p> <p>Create a directory using command mkdir</p> <p>Change to the given directory using command cd</p> <p>Remove a file using command rm</p> <p>Remove a directory using command rmdir</p> <p>Copy a file using command cp</p> <p>Move a file using command mv</p> <p>Identify the attributes of a file using command stat</p> <p>Change the ownership of a file using command chown</p> <p>Change file permissions using command chmod</p>	K1-K6	14	1-5

UNIT	CONTENT	CL	Hrs	CO
	Using the shell built-in umask to control the permissions of a new file			
4	Shell Identify user's shell using the command “echo \$SHELL” Write a C program to display the environment variables available to it. Push a foreground process to the background View the list of processes started from prompt using command jobs Bring a background process to the foreground System Calls Inspect the system calls made by a program using command strace Using command “man syscalls”, check the list of system calls supported by Linux. Write a C program named copy.c that uses the system calls open, read, write, and close to copy a file to another file.	K1- K6	14	1-5
5	Interprocess Communication Feed the output of a program as input to another program using a pipe Ex: “\$ ls wc -l” File Systems View the file systems currently mounted using command mount Mount a file system using command mount Unmount a file system using command umount Examine the file /etc/fstab. Identify the role of the entries in this file	K1-K5	7	1-4

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the fundamental concepts of discrete and continuous probability distributions
- To perform hypothesis tests and make inferences about population parameters based on sample data
- To determine whether there is a statistically significant association or relationship between two categorical variables by conducting a Chi-Square test of independence
- To analyze the relationships between variables using correlation and regression analysis, and make predictions based on regression models
- To assess significant differences between means using Analysis of Variance

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and recall the basic statistical tools and techniques available to study any given data	K1
CO2	understand the core principles and terminology of statistics, including population, sample and distribution functions	K2
CO3	apply the knowledge and extract meaningful insights and patterns from data, enabling informed decision-making	K3
CO4	examine and interpret data through rigorous statistical methods and techniques	K4
CO5	develop problem-solving skills by using statistical methods to address complex and multifaceted issues in real life	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO

OBJECTIVES OF THE COURSE

- To understand the division of network functionalities into layers.
- To be familiar with the components required to build different types of networks.
- To be exposed to the required functionality at each layer.
- To learn the flow control and congestion control algorithms.
- To introduce the latest networking technologies.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the network types and the protocol layers.	K1
CO2	infer the TCP/IP protocol layers in detail.	K2
CO3	identify the flow control, error control and address spaces.	K3
CO4	analyse the services provided in various layers.	K4
CO5	estimate the cyclic redundancy check, checksum, Network address translation for various IPV6 address and wireless network standards.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Introduction Data Communication– Networks – Network Types – Internet History – Standard and Administration	K1, K2	10	1,2
	1.2 Network Models Protocol Layering – TCP/IP Protocol Suite – The OSI Model	K1-K3		1-3
2	2.1 Physical Layer Data and Signals - Digital Signals – Performance Transmission Modes - Multiplexing - Transmission Media - Switching – Packet and Circuit switching	K1-K4	13	1-4
3	3.1 Data Link Layer Data Link Control – Framing - Fixed Size Framing, Variable size framing, Flow and Error Control, Data Link Layer protocols, Cyclic Codes, Cyclic Redundancy Check, Checksum 3.2 MAC and Ethernet Random Access, Controlled Access, Ethernet Protocol	K1-K5	15	1-5

4	4.1 Network Layer Logical Addressing - IPv4 Addresses, Addressing, Network Address Translation IPv6 Addresses – Structure, Address Space 4.2 Transport Layer Transport Layer Services Connectionless and Connection-Oriented Protocols	K1-K5	15	1-5
5	5.1 Application layer Domain Naming System – DNS Name Space, Distribution of name space, DNS in the Internet, Resolution, DNS messages, Remote logging, Email, File transfer 5.2 Wireless Networking Components of Wireless Communication System, Wireless Networking Standards - Bluetooth Technology Other Wireless Technologies	K1-K5	12	1-5

ESSENTIALS OF DATA SCIENCE

CODE:23CS/MC/DS54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable the students to understand the basics of python language
- To enable a comprehensive and detailed understanding of the data science, data formats and data exploratory analysis
- To apply machine learning techniques
- To analyze various visualizations techniques in python
- To explore the various applications of data science

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals of data science and python	K1
CO2	explain the data science process	K2
CO3	identify machine learning techniques and derive inferences from data	K3
CO4	examine various machine learning techniques for problems	K4
CO5	evaluate and select optimal machine learning model based on metrics	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Python language Basics The Python Interpreter-IPython basics- Python Language Basics 1.2 Built-in Data Structures Functions and Files Data Structure and Sequences-Functions-Files 1.3 NumPy Basics Arrays and Vectorized Computation The NumPy ndarray: A Multidimensional Array Object -Universal Functions	K1-K6	10	1-5
2	2.1 Introduction of Data Science and Data pipeline Data Science -Data Science Process- Data Loading, Storage and File Formats – Reading and Writing Data in Text Format-Binary Data Formats-Interacting with Web API-Interacting with Databases 2.2 Visualization Matplotlib – Simple Line Plots-Simple Scatter Plots-Visualizing Errors-Density and Contour Plots-Histogram, Binnings and Density -Customizing Color Bars Customizing Plot Legends - Multiple Subplots-Text and Annotation-Customizing Ticks	K1-K3 K1-K6	15	1-3 1-5

3	3.1 Data Cleaning and Preparation Handling Missing Data-Data Transformation-String Manipulation 3.2 Data Wrangling Join, Combine and Reshape Hierarchical Indexing – Combining and Merging Datasets-Reshaping and Pivoting Getting Started with Pandas-Introduction to Pandas Data Structures- Essential Functionality.	K1-K6	15	1-5
4	4.1 Machine Learning Introduction to Machine Learning- Need for Machine Learning 4.2 Supervised Learning Classifications and Regression-Generalization-Overfitting-Underfitting- Supervised Machine Learning Algorithms-K-Nearest Neighbor-Linear Models-Naïve Bayes Classifiers-Decision Tree-Ensemble of Decision Trees 4.3 Unsupervised Learning Types of Unsupervised Learning -Dimensionality Reduction, Feature Extraction Clustering- Model Evaluation and Improvement- Cross Validation- Grid Search - Evaluation metrics and Scoring- Using evaluation metrics in model selection	K1-K6	15	1-5
5	5.1 Natural Language Processing (NLP) Language Processing – Texts and Words- Accessing Text Corpora-Lexical Resources – Wordnet- Normalizing the Text-Tokenizing the Text- Segmentation- Using a Tagger – Tagging-Automatic and Ngram- Transformation Based Tagging – Classifying the Text	K1-K6	10	1-5

SYLLABUS

(Effective from the academic year 2023-2024)

FUNCTIONAL WEB DEVELOPMENT

CODE:23CS/MC/FW54

CREDITS: 4

L T P: 3 0 2

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide awareness about ReactJS and keep updated yourself with latest trends
- To understand functional programming
- To manage data by using State and Props of React
- To create smaller components to build Interactive User interfaces
- To understand about React and how it fits into your web application developing process

COURSE LEARNING OUTCOMES

COs	DESCRIPTION	CL
CO1	define the fundamental concepts of functional programming and React	K1
CO2	explain the importance of react components	K2
CO3	build web pages using functional programming and React concepts	K3
CO4	examine the performance of web applications developed using React	K4
CO5	develop web applications with client and server-side operations in JavaScript using React	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Introduction to Functional Programming Definition - Benefits of functional programming in web development - Introduction to pure functions and immutability - Functional programming paradigms and principles 1.2 JavaScript Fundamentals for Functional Programming Review of JavaScript basics - Functions as first-class citizens - Higher-order functions and callbacks - Arrow functions and lexical scoping	K1-K3	12	1-3
2	2.1 Working with Arrays Transforming arrays with map, filter, and reduce - Composing functions - Dealing with nested arrays - Functional programming with arrays in web development 2.2 Functional Asynchronous Programming Asynchronous JavaScript with Promises- Chaining and error handling in Promises - Using async/await for asynchronous operations - Functional approaches to handling asynchronous code	K1-K3	12	1-3
3	3.1 Introduction to React Introduction to React and its significance - Setting up a development environment - Creating and rendering React components - Incorporating JSX with Babel 3.2 Component Development Understanding the component lifecycle - Developing functional and class components – Using props: Passing data, Validating props, creating custom validators, default props - Handling events and user interactions	K1-K6	16	1-5
4	4.1 State Management and Hooks Managing component state - Introduction to React Hooks - useState, useEffect - Implementing custom hooks for component logic - Applying hooks for functional component development	K1-K6	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	4.2 State Management with Redux (or Context API) Introduction to Redux (or Context API) - Actions, reducers, and the store - Connecting Redux to a React application - Managing application state with Redux			
5	5.1 Forms and User Input Handling user input and form data in React- Building controlled and uncontrolled form components- Validating form data and implementing custom validation logic 5.2 CRUD Operations	K1-K6	13	1-5

BOOKS FOR STUDY

Atencio, Luis. "Functional Programming in JavaScript: How to improve your JavaScript programs using functional techniques". Simon and Schuster, 2016

Banks, Alex, and Eve Porcello. "Learning React: Functional Web Development with React and Redux". O'Reilly Media, Inc., 2017

Garreau, Marc. "Redux in action". Simon and Schuster, 2018.

BOOKS FOR REFERENCE

Haverbeke, Marijn. "Eloquent javascript: A modern introduction to programming". No Starch Press, 2018.

Anthony, Accomazzo, Murray Nathaniel, and Lerner Ari. "Fullstack React: The Complete Guide to ReactJS and Friends". 2017.

WEB RESOURCES

<https://react.dev/reference/react>

<https://react.dev/learn>

<https://pll.harvard.edu/course/design-principles-react>

PRACTICAL EXERCISES

- Implementing basic JavaScript
- Implementing Emerging JavaScript (Let, Const, Arrow Functions, Import and Export, Classes)
- Implementing Functions, Recursion
- Implementing Component Life Cycle
- Implementing Components, Props
- Implementing State Management
- Implementing Forms
- Implementing Redux
- Implementing CRUD operations

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Theory :

Total Marks: 25

Duration: 45 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A (Objective type questions)	K1 (5)	$1 \times 10 = 10$	5	5
	K2 (5)		5	5
B (Internal Choice)	K2 (5)	$3 \times 5 = 15$	1	2
	K3 (5)		1	2
	K4 (5)		1	2
	Total	25	13	16

Practical:

Total Marks: 25

Duration: 45 minutes

Knowledge Level	Marks
K5	15
K6	10
Total	25

Other Components:

Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion

Two to three components will be prescribed

End Semester Examination:

Theory:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A (Objective type questions)	K1 (6)	$10 \times 1 = 10$	6	6
	K2 (4)		4	4
B	K1 (4)	$5 \times 2 = 10$	2	2
	K2 (6)		3	3
C (Internal Choice)	K1 (5)	$6 \times 5 = 30$	1	2
	K2 (5)		1	2
	K3 (10)		2	4
	K4 (10)		2	4
	Total	50	21	27

Project - 50 marks (Demonstration and Viva)

Rubrics for Evaluation	Marks	Cognitive Level
Web Application Front-end Design	15	K1-K6
Implementation with Database connection	15	K1-K6
Execution of the Project and Viva	20	K1-K6

SYLLABUS

(Effective from the academic year 2023-2024)

ESSENTIALS OF DATA SCIENCE PRACTICAL

CODE:23CS/MC/P452

CREDITS: 2

L T P: 0 0 3

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable the students to understand the basics of python language
- To enable a comprehensive and detailed understanding of the data science, data formats and data exploratory analysis
- To explore different machine learning techniques
- To explore different visualizations techniques in python
- To develop a new application based on python

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals of python language	K1
CO2	interpret the use of data after acquisition, cleansing, analytics, and visualization	K2
CO3	identify machine learning techniques and derive inferences from data	K3
CO4	examine the machine learning algorithms to manage, explore, and deep understanding of data	K4
CO5	design and construct a novel solution for a scenario/application	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

LIST OF EXERCISES	CL	Hrs	CO
1. Basic python programs 2. The installation of python packages - Scikit-learn toy datasets 3. Loading the datasets of different formats and dataset creation. 4. Cleaning and pre-processing datasets 5. Missing data substitution 6. Data transformation 7. Data wrangling: Splitting large datasets and combining datasets 8. Indexing and pivoting 9. Machine learning: Supervised Learning algorithms 10. K-nearest neighbor 11. Linear model 12. Naïve bayes 13. Decision tree 14. Random forest 15. Unsupervised learning algorithms 16. Natural language processing (NLP) 17. Clustering: k-means, agglomerative and dbscan clustering 18. Model evaluation 19. Visualization with different plots 20. Applications: case study	K1-K6	39	1-5

PATTERN OF ASSESSMENT:**Continuous Assessment Test: Total Marks: 50 Duration: 90 minutes**

CRITERION	Knowledge Level	Marks
Psuedo Code/ Algorithm	K1	5
Record Notebook, Viva	K2	10
Implementation	K3, K4	25
Result and Output	K5, K6	10

(Effective from the academic year 2023-2024)

CRITICAL ANALYSIS ON AN ADVANCED TECHNOLOGY

CODE:23CS/MC/CA51

CREDITS:1

L T P:0 0 2

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To allow students to explore and critically analyse the selected technology
- To provide an opportunity for students to learn about the changes in the technological landscape
- To enable students with the skills and knowledge of the process of writing
- To equip students with skills to synthesise new ideas and present them clearly and firmly, both orally and in writing
- To train students to work with academic integrity and to work in groups

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the core concepts of the chosen technology	K1
CO2	demonstrate and infer clear, precise ideas on the technology	K2
CO3	identify the significance, bias and applications of the technology	K3
CO4	critically analyse, argue and counter argue on the chosen technology	K4
CO5	formulate new ideas, opinions and create clear, grammatically correct, ethically sound, well-organised piece of writing	K5, K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

Students will be formed into groups. The groups will have to select a topic related to the Emerging /Advanced Trends and Technologies in the field of Computer Science. Each group has to give three presentations to their fellow classmates and their guide. They need to prepare the synopsis and detailed report in consultation with their guide.

Workshop on Report Writing

PATTERN OF ASSESSMENT

Component - 50 marks

Component I - Presentation / Review (Includes continuous evaluation of 3 presentations)

Component II – Final Paper / Final Project

End-Semester Examination

Total Marks: 100

Rubrics for Evaluation	Marks	Cognitive Level
Documentation	30	K1, K2
Paper/Project	30	K1-K6
Presentation	20	K1-K6
Viva	20	K1-K6

Format of the Report

Abstract

Short description of the paper. Describe what the technology is, why it is significant or interesting, and your conclusion.

- Introduction
 - What is technology?
 - What is the significance of the technology?
 - How do you plan to use the technology?
- Literature Review
 - What is the current thinking, findings, and approaches on the technology?
- Methods/ Approaches
 - What is your opinion of the utility, relevance, challenges or quality of the technology you have selected? (Support with project/papers)
- Conclusion
 - What are your conclusions?
 - What do your conclusions mean?
 - How do your results fit into a broader context?

HUMAN COMPUTER INTERACTION

CODE: 23ID/IC/HC55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand constraints, get an insight into the design space, and on deep knowledge of the materials of the design, that is, the user, the task, and the machine.
- To analyze the design technologies for individuals and persons with disabilities.
- To examine the psychological attributes of the user, provide the students with a basic overview of the capabilities and limitations that affect the ability to use computer systems in terms of developing interactions.
- To understand constraints and get insights on the design space with interactive design basics
- To evaluate modelling interactions through descriptive modelling methods and technologies

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals of HCI and interactive design concepts	K1
CO2	classify various types of interaction, user models and psychological factors	K2
CO3	apply design rules, user centered approaches and psychological factors to interaction design	K3
CO4	analyse physical designs, Participant observation and modelling interaction with relevance to user feedback system.	K4
CO5	evaluate expressive interfaces and computer-mediated communication	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<p>1.1 Introduction to Interaction Design Introduction-Good and poor design-What is Interaction Design? -What is involved in the process of Interaction Design? -The goals of interaction design-More on usability: Design and usability principles</p> <p>1.2 The Human Understanding the human mind- computation: connectionism and symbol systems. Levels of information processing. Memory- Atkinson and Shrifin model; structure of the working memory</p> <p>1.3 The Computer Devices – Memory – Processing and Networks</p> <p>1.4 Interaction Models Frameworks – Ergonomics: Bias - Arrangement of controls and displays, physical environment of interaction, health issues, use of colours, and ergonomics and HCI. – Styles – Elements – Interactivity -Experience, engagement and fun understanding and designing experience and physical design & engagement</p>	<p>K1 –K4</p> <p>K1 –K4</p> <p>K1 –K3</p> <p>K1 –K4</p>	<p>15</p> <p>1-3</p> <p>1-3</p> <p>1-3</p>	<p>1-4</p> <p>1-3</p> <p>1-3</p> <p>1-3</p>
2	<p>2.1 Understanding Users Cognition- Attention: visual and auditory attention. Parallel processing. Perception perceptual grouping- figure and ground, similarity, proximity, continuity, symmetry, closure</p> <p>2.2 Designing for collaboration and communication Introduction- Social mechanisms used in communication and Collaboration Ethnographic studies of collaboration and Communication-Conceptual frameworks</p> <p>2.3 Understanding how interfaces affect users Introduction- What are affective aspects? - Expressive Interfaces-User Frustration- Virtual characters: agents</p>	K1-K4	12	1-4
3	<p>3.1. Types of Users Visualizers and verbalizers. High and low OSL. Variety and Novelty Seekers. Need for cognition. Designing for special populations- children, the elderly and the disabled</p> <p>3.2 Observing users Introduction-Goals, questions and Paradigms-What and when to observe -How to observe- Participant observation and Ethnography-Data collection- Indirect observation tracking users' activities- Analyzing, interpreting and presenting data</p> <p>3.3. Asking users and experts Introduction -Asking users: Interviews- Asking users: Questionnaires- Asking users: Inspections- Asking users: Walkthroughs</p>	K1-K4	15	1-4
4	4.1. Interactive Design Basics	K1-K5	18	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

BACHELOR OF COMPUTER APPLICATIONS

SYLLABUS

(Effective from the academic year 2023–2024)

SECURITY CONCEPTS

CODE: 23CS/MC/SC65

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To comprehend the basic terminologies in computer security including the CIA triad
- To understand how information is secured using cryptography tools
- To identify the proper authentication methods and access control mechanism
- To become familiar with various types of malware and attacks
- To introduce basic hardening tricks and internet security protocols

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic terminologies, design principles, basic hardening in computer security and the CIA triad	K1
CO2	explain various encryption techniques, malicious software, attacks, internet security protocols	K2
CO3	choose appropriate cipher techniques and authentication mechanism for securing the resources	K3
CO4	examine authentication , access control mechanism and firewalls implemented in an organization	K4
CO5	evaluate cryptographic tools, firewall rules, causes and consequences of the buffer overflow attack	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Computer security basics CIA triad - authenticity - accountability – system resource - vulnerability – assets of a computer system – active and passive attacks – attacks and threat consequences – FIPS 200 minimum security requirements – security design principles: fail-safe default, open design, least privilege, isolation, layering – attack surfaces	K1-K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	1.2 Securing information – I Cryptography - symmetric encryption - symmetric cipher model- substitution techniques: Caesar cipher, Playfair cipher - transposition techniques – steganography			
2	2.1 Securing information – II Comparison of DES, 3DES, AES – one-way hashing functions – hash function requirements – public key encryption – digital signatures – public key certificates 2.2 User Authentication Password based authentication and its vulnerabilities – hashed passwords – token based authentication, memory cards and smart cards – biometric authentication	K1- K5	14	1-5
3	3.1 Access control Difference between authentication and authorization – audit – elements of access control: subjects, objects and access rights – access control lists – traditional UNIX file access control – role based access control 3.2 Malicious Software Malware – virus – worms – trojan horse – spyware – phishing - spammers – backdoors 3.3 Attacks SQL injection attacks - denial of service attacks	K1-K4	14	1-4
4	4.1 Buffer Overflow Buffer overflow – an example program in C - stack smashing – function call mechanism – stack buffer overflow example in C 4.1 Firewalls Need for firewalls – firewall design goals – characteristics used to filter traffic – capabilities and limitations of a firewall – packet filtering firewall – personal firewall – DMZ networks – virtual private networks	K1- K5	15	1-5
5	5.1 Internet security protocols and standards SSL – TLS – TLS handshake – HTTPS 5.2 Basic Hardening Removing unnecessary services/applications/protocols - chroot jail	K1,K2	10	1, 2

Demonstration

Computing hash value for a file to verify its integrity using md5sum/sha256sum - Buffer flow attack in a C program - Creating firewall rules using netfilter package in Linux - Restricting applications access to a directory using chroot jail - SQL Injection attack

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To learn the basic concepts and terminologies of cloud computing
- To understand the cloud-enabling technologies and security aspects
- To analyze on cloud infrastructure mechanisms
- To provide an understanding about cloud architecture and management
- To introduce cloud metrics and models

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts of cloud computing	K1
CO2	explain the cloud-enabling technology and infrastructure	K2
CO3	apply the cloud mechanisms to establish cloud computing paradigm	K3
CO4	identify the appropriate cloud architecture suitable for the scenario	K4
CO5	develop a better solution for an application	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Understanding Cloud Computing Introduction – Basic Concepts and Terminology – Goals and Benefits – Risks and challenges 1.2 Fundamental Concepts and Models Roles and Boundaries – Cloud Characteristics – Cloud Delivery Models – Cloud Deployment Models 1.3 Cloud-Enabling Technology Broadband Networks and Internet Architecture – Data Center Technology	K1, K2	15	1,2

UNIT	CONTENT	CL	Hrs	CO
2	2.1 Web Technology Virtualization Technology – Web Technology – Multitenant Technology – Service Technology 2.2 Fundamental Cloud Security Basic Terms and Concepts – Threat Agents – Cloud Security Threats – Additional Considerations 2.3 Cloud Infrastructure Mechanisms Logical Network Perimeter – Virtual Server – Cloud Storage Device – Cloud Usage Monitor – Resource Replication – Ready-made Environment	K1-K5	15	1-5
3	3.1 Specialized Cloud Mechanisms Automated Scaling Listener – Load Balancer – SLA Monitor – Pay-per-use Monitor – Audit Monitor – Failover System – Hypervisor – Resource Cluster – Multi-Device Broker – State Management Database 3.2 Cloud Management Mechanisms Remote Administration System – Resource Management System – SLA Management System – Billing Management System	K1-K4	20	1-4
4	4.1 Fundamental Cloud Architectures Workload Distribution Architecture – Resource Pooling Architecture – Dynamic Scalability Architecture – Elastic Resource Capacity Architecture – Service Load Balancing Architecture – Cloud Bursting Architecture – Elastic Disk Provisioning Architecture – Redundant Storage Architecture 4.2 Cloud Delivery Model Considerations Cloud Delivery Models: The Cloud Provider Perspective – The Cloud Consumer Perspective 4.3 Service Quality Metrics and SLAs Service Quality Metrics – SLA Guidelines – Case Study Example	K1-K5	18	1-5
5*	5.1 Practical Demonstration Virtualization in Cloud - Infrastructure as a Service - Software as a Service 5.2 Case Studies Google Web Service – Amazon Web Service – Azure Cloud Service	K1-K5	10	CO1-5

PROJECT

CODE:23CS/MC/PR64

CREDITS: 4

OBJECTIVES OF THE COURSE

- To help students apply the concepts learned throughout the course and develop an application
- To enable students to understand and analyze project requirements effectively
- To equip the students with project management skills that enable them to deliver the product on time within specified constraints
- To encourage students to work collaboratively to analyze problems
- To brainstorm innovative solutions, and implement an optimal solution.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall fundamental of concepts and terminologies necessary for the project	K1
CO2	interpret workflows to gather essential data for system design	K2
CO3	identify the development environment suitable to develop a functional prototype for the project	K3
CO4	examine project requirements and resolve bottlenecks in the implementation phase	K4
CO5	design and construct a solution and critically evaluate the effectiveness of the project solution in addressing the specified problem, considering its impact, scalability, and potential for further improvement	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

Content	CL	CO
Project requirements gathering and analysis	K1-K6	1-5
System analysis and design		
System design (database design, screen design, report design)		
Development of a working model of project		
Deployment, testing, and documentation

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

ADVANCED JAVA PROGRAMMING

CODE:23CS/ME/AJ45

CREDITS: 5

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand XML basics and backend
- To enable the students to create window-based applications using JavaFX and CSS
- To be able to understand the advanced tools and to use canvas for drawing
- To understand concepts behind web technology
- To develop web-based applications using Servlets and JSP

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the core concepts of web application development	K1
CO2	explain the different applications using javafx, servlet, jsp and database connectivity	K2
CO3	apply the knowledge to build a window/web application	K3
CO4	analyse and differentiate between window and web application with backend	K4
CO5	develop an interactive window/web application	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Basics of XML Need for XML - Well Formed XML Documents - Validating an XML Document using XML Schema 1.2 Database Connectivity JDBC Database Connectivity - Types of JDBC Drivers - Establishing a Connection - Executing Statements - Prepared Statements - Callable Statements - Mapping SQL Types to Java- ResultSetMetadata	K1-K6	12	1-5

UNIT	CONTENT	CL	Hrs	CO
2	2.1 JavaFX Basics JavaFX - JavaFX Application Life Cycle, Defining the Main Window by using the Stage class, Key JavaFX packages 2.2 Scene Graph Using and Integrating Scene graph in JavaFX Application - Scene Class – Event Handling - Node Types - Primitive Nodes, LayoutPanels, Complex Nodes – Node Basics - Image and ImageView 2.3 Layouts and JavaFX Basic Controls HBox - VBox - StackPane - FlowPane - GridPane - BorderPane - Control Class - Basic Controls -Labeled Controls, Controls for Text Input, ProgressIndicator and ProgressBar - Tooltip of a Control - Menus -ToolBar – Separators	K1-K6	20	1-5
3	3.1 Additional JavaFX Controls Controls with a Data Model - ComboBox, ListView, TableView, TreeView – Controls that act as Containers - Canvas 3.2 Styling a Control CSS Basics - CSS in JavaFX - Using Selectors 3.3 Introduction to HTTP HTTP Protocol - HTTP Request, Get, Post, HTTP Response, HTTP Response codes - Client side and Server side programming	K1-K6	13	1-5
4	4.1 Web Applications Web Applications and Web Containers - Web components - Web Application Life Cycle - Creating, Building and Deploying - Web Archive Structure 4.2 Servlet Technology Need for Servlets - Characteristics of Servlets - Comparison between Servlets and other Server side scripting languages - Working of Servlet - javax.servlet package - Life Cycle of Servlet - Session - Interservlet communication – Request Dispatcher Interface	K1-K6	17	1-5
5	5.1 Java Server Pages Introduction – Comparison between JSP and Servlets – Life Cycle – Structure – Components - JSP Tags - JSP Session - Cookie – Static content- Dynamic content – Scripting Elements	K1-K6	16	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

BACHELOR OF COMPUTER APPLICATIONS

SYLLABUS

(Effective from the academic year 2023-2024)

DISTRIBUTED NETWORKING

CODE: 23CS/ME/DN45

CREDITS : 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand foundations of Distributed Systems.
- To be able to analyse the architectures.
- To understand in detail the system level and support required for distributed system.
- To understand how processes are treated in distributed networks.
- To discuss security and reliability issues in distributed networking.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the characteristics and architectural components of distributed systems	K1
CO2	explain the principles and concepts of distributed networking	K2
CO3	apply learned concepts to real-world distributed network scenarios	K3
CO4	describe the challenges and solutions for communication in distributed systems	K4
CO5	determine the suitable architectures, virtualization and investigate security and reliability issues in distributed networking	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Introduction From networked systems to distributed systems- Distributed versus decentralized systems- A simple classification of distributed systems- Pitfalls 1.2 Architectures Architectural styles-Middleware organization- Layered-system architectures- Symmetrically distributed system architectures-Hybrid system architectures	K1, K2	18	CO1, CO2

UNIT	CONTENT	CL	Hrs	CO
2	Processes Introduction to threads- Threads in distributed systems- Virtualization- Principle of virtualization- Containers - Comparing virtual machines and containers- Application of virtual machines to distributed systems-Clients- Servers - Code migration	K1-K5	16	CO1-CO5
3	Communication Foundations: Layered Protocols- Types of Communication-Remote procedure call-Message-oriented communication- Message-oriented persistent communication- Example: Advanced Message Queuing Protocol (AMQP) - Multicast communication	K1-K5	16	CO1-CO5
4	Fault tolerance Introduction to fault tolerance - Process resilience - Reliable client-server communication-Reliable group communication-Distributed commit-Recovery	K1-K5	18	CO1-CO5
5	Security Introduction to security- Authentication-Trust in distributed systems-Authorization	K1-K5	10	CO1-CO5

GAME PROGRAMMING

CODE: 23CS/ME/GP45

CREDITS: 5

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the concepts of Game design and development using Flash and ActionScript
- To enable the learning processes, mechanics and issues in Game Design
- To enable the students to create characters and control their movement
- To detect and avoid the collision
- To understand the natural motion using physics concepts and develop games

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the concepts of game designing and development	K1
CO2	explain the learning processes, mechanics and issues in designing a game	K2
CO3	apply the concepts and mechanics of Game Design	K3
CO4	examine the created characters, movements, collision and natural motion	K4
CO5	develop games using Flash and ActionScript	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Programming Foundations - How to Make a Video Game Laying the foundation - Writing your first program - Publishing the SWF file 1.2 Making Objects Understanding Interactive Objects - Drawing the first page - Creating a Character, using Buttons	K1-K6	15	1-5
2	2.1 Programming Objects Displaying the First Page of the Storybook - Programming Buttons - Understanding - Events and Event listeners - Programming Storybook Buttons 2.2 Controlling Movie Clip Objects Movie Clip Properties - Controlling Movie Clip Timelines	K1-K6	16	1-5

UNIT	CONTENT	CL	Hrs	CO
3	3.1 Decision Making Designing a GUI - Building a Simple Guessing Game - Learning more about Variables, Making Decisions, Polishing up 3.2 Controlling a Player Character Controlling a Player Character with the Keyboard - Setting Screen Boundaries – Scrolling	K1-K6	16	1-5
4	4.1 Bumping into Things Changing a Dynamic Text Field - Triggering a Change of State - Reducing a Health Meter - Updating a Score - Picking up and Dropping Objects – Drawbacks of hitTestObject - Using hitTestPoint - Creating Objects with Block Movement – Working with Axis - Based Collision Detection 4.2 Object-Oriented Game Design Introducing Object-Oriented Programming	K1-K6	18	1-5
5	5.1 Platform Game - Physics and Data Management Natural Motion using Physics	K1-K6	13	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Theory :

Total Marks: 25

Duration: 45 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A (Objective type questions)	K1 (5)	$1 \times 10 = 10$	5	5
	K2 (5)		5	5
B (Internal Choice)	K2 (5)	$3 \times 5 = 15$	1	2
	K3 (5)		1	2
	K4 (5)		1	2
	Total	25	13	16

Practical : **Total Marks: 25**

Duration: 45 minutes

Knowledge Level	Marks
K5	15
K6	10
Total	25

Other Components: **Total Marks: 50**

Assignment, seminar, quiz, open book test, group discussion, mini project

Two to three components will be prescribed

End Semester Examination:

Theory: **Total Marks: 50**

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A (Objective type questions)	K1 (6)	$10 \times 1 = 10$	6	6
	K2 (4)		4	4
B	K1 (4)	$5 \times 2 = 10$	2	2
	K2 (6)		3	3
C (Internal Choice)	K1 (5)	$6 \times 5 = 30$	1	2
	K2 (5)		1	2
	K3 (10)		2	4
	K4 (10)		2	4
	Total	50	21	27

Project - 50 marks (Demonstration and Viva)

Rubrics for Evaluation	Marks	Cognitive Level
Storyboard	10	K1
Clarity, flow, balance, length, integration, fun	10	K2
Implementation	15	K3, K4
Execution of the Game	15	K5, K6

ARTIFICIAL INTELLIGENCE

CODE : 23CS/ME/AI45

CREDITS: 5

L T P:5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To familiarize students with the principles and techniques of Artificial Intelligence
- To understand the different environments in any given problem space
- To explore different search techniques for solving problems
- To appreciate and understand the various AI applications in different fields
- To relate the concepts in Artificial Intelligence with the current Trends

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals and concepts involved in Artificial Intelligence	K1
CO2	understand the different environments involved in problem solving	K2
CO3	identify appropriate search algorithms and heuristic methodologies required for a given problem	K3
CO4	analyze the environment of the given problem	K4
CO5	evaluate a given problem using different knowledge representation methods and derive inferences	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Overview of AI Introduction – The foundations – Evolution – Example Applications 1.2 Intelligent Agents Agents and Environments – The concept of Rationality – Task Environment and its properties – Agent structure – Working of the components of Agent programs	K1-K3	14	1-3

UNIT	CONTENT	CL	Hrs	CO
2	2.1 Solving problems by searching Problem solving Agents – Goal and Problem Formulation through 8-queens problem, route-finding problem Uninformed Search Strategies – Informed Search Strategies – Heuristic functions 2.2 Local Search Algorithms Hill climbing – simulated annealing – Local Beam Genetic Algorithms – Local Search in Continuous spaces	K1- K5	15	1-5
3	3.1 Searching in partially observable or nondeterministic environments Searching with Nondeterministic Actions - Searching with Partial Observations - Online Search Agents and Unknown Environments 3.2 Adversarial Search Games -Optimal Decision in Games - Alpha-Beta Pruning - Imperfect Real-Time Decisions - Stochastic Games - Partially Observable Games - Use of AI in Game Programs - Alternative Approaches	K1-K5	15	1-5
4	4.1 Constraint Satisfaction Problems Introduction - Inference in CSPs - Backtracking Search - Local Search - The Structure of Problems 4.2 Logic and Inference Knowledge based agents-Propositional Logic - First-Order logic- Unification- Forward chaining-Backward chaining - Resolution	K1-K5	14	1-5
5	5.1 Quantifying uncertainty and Probabilistic Reasoning Acting Under Uncertainty - Basic Probability Notation - Inference using Full Joint Distributions - Representing knowledge under Uncertain Domain - Semantics and Inference of Bayesian Networks - Hidden Markov Models 5.2 Recent Trends* Contemporary Trends	K1-K5	20	1-5

***5.2 - Only for Components. Not included for End Semester Exam.**

INTERNET OF THINGS

CODE: 23CS/ME/IT45

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce the concepts of Internet of Things (IoT)
- To identify the various data models and framework of IoT
- To understand the standards and protocols associated with IoT
- To learn how to develop an IoT application.
- To define the concepts of reliability, security and privacy in IoT

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the fundamental concepts of IoT	K1
CO2	classify the framework involved in IoT and its governance	K2
CO3	apply the scope of different standards and protocols	K3
CO4	examine the core concepts of IoT and its working mechanisms	K4
CO5	interpret the perspective of having a reliable and secure IoT models	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 IoT Ecosystem Concepts and Architectures Introduction – IoT definition and evolution – IoT Architectures – OpenIoT Architecture for IoT/Cloud Convergence - Resource Management – IoT Data Management and Analytics - Communication Protocols – Internet of Things applications 1.2 Scheduling Process and IoT Services Lifecycle - IoT enabling technologies – IoT levels and Deployments templates – Introduction to M2M - Difference between IoT and M2M – SDN and NFV for IoT	K1-K3	16	1-3
2	2.1 IoT Data and Framework Essentials Introduction - Programming framework for IoT– The foundation of Stream processing in IoT - Continuous Logic processing system – Challenges and Future directions – Anomaly detection – Problem statement and definitions – Efficient incremental local modelling – IoT Governance	K1-K3	14	1-3

UNIT	CONTENT	CL	Hrs	CO
3	3.1 RF Protocols RFID, NFC;IEEE 802.15.4: ZigBee - ZWAVE, THREAD - Bluetooth Low Energy (BLE) - IPv6 for Low Power and Lossy Networks (6LoWPAN) - Routing Protocol for Low power and lossy networks (RPL) - CoAP - XMPP - Web Socket- AMQP – MQTT – WebRTC - PuSH Architectural Considerations in Smart Object Networking - TinyTO Protocol 3.2 Introduction to IoT based applications Scenarios – Architecture overview – Sensors – The gateway – Data Transmission – Internet of Vehicles (IoV) – IoV Characteristics, technologies and its application	K1-K5	16	1-5
4	4.1 Developing Internet of Things Introduction-IoT Design Methodology – Case study on IoT system for Weather monitoring – IoT Device - IoT physical devices and endpoints - Exemplary Device: Raspberry Pi - Raspberry Pi interfaces – Programming Raspberry Pi and with python – Other IoT devices	K1 - K5	17	1-5
5	5.1 IoT Reliability, Security and Privacy Introduction - Concepts - IoT Security Overview – Security Frameworks for IoT – Privacy in IoT networks – IoT characteristics and reliability issues – Addressing reliability – Error detections – Fault Preventions - Case studies illustrating IoT Design	K1-K5	15	1-5

Demonstration

IoT Concepts – Arduino Boards, Raspberry Pi and using simulators, Mason software

ALGORITHM DESIGN TECHNIQUES

CODE: 23CS/ME/AD45

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To be able to understand the various algorithm design techniques and strategies
- To be able to choose the right strategy for solving a problem
- To understand NP hard and NP complete problems
- To understand String Algorithms and its applications
- To be able to analyze and evaluate the algorithms based on different strategies

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the algorithm design techniques and strategies	K1
CO2	explain the various classes of problems	K2
CO3	apply different strategies for solving problems	K3
CO4	examine the complexity associated with different strategies	K4
CO5	choose an appropriate strategy and develop an algorithm	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Divide and conquer General method – Binary Search – Finding the maximum and minimum – Recurrence relations 1.2 Greedy method General method – Job sequencing with deadlines – 0/1 knapsack problem – Minimum cost spanning trees – Single source shortest path problem	K1-K5	16	1-5
2	2.1 Dynamic Programming General method – All Pairs Shortest Paths – Single Source Shortest Paths – 0/1 knapsack problem – Travelling-salesperson problem	K1-K5	13	1-4
3	3.1 Backtracking General method – 8-Queen’s problem – Sum of subsets problem – Graph coloring – Hamiltonian cycles	K1-K5	17	1-5

UNIT	CONTENT	CL	Hrs	CO
	3.2 Branch and Bound General method – 0/1 knapsack problem – LC Branch and Bound Solution – FIFO Branch and Bound solution			
4	4.1 String Algorithms Radix Sort – Tries – Substring search: Naïve, Rabin-Karp, KMP – Data Compression: Run Length Encoding, Huffman Compression 4.2 Randomized Algorithms General method - Quicksort	K1-K5	16	1-4
5	5.1 NP-Hard and NP-Complete problems Basic concepts – P and NP – Deterministic vs Non-deterministic algorithms – NP-Hard and NP-Complete classes 5.2 Approximation Algorithms General method – Load balancing problem	K1-K4	16	1-4

MOBILE APP DEVELOPMENT FOR ANDROID

CODE:23CS/ME/MA45

CREDITS: 5

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the app development environment and recall the anatomy of an Android application
- To identify and apply the different Android components in building a mobile app
- To analyse the UI, layouts, storage and services
- To be able to work with layouts, database connectivity and advanced UI
- To design and create a mobile app in Android environment

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the core concepts of mobile app development	K1
CO2	explain the different Android components, UI controls, layouts, listeners, storage and database concepts	K2
CO3	apply the knowledge to build mobile applications	K3
CO4	analyse and differentiate between activities, intents, fragments	K4
CO5	develop an interactive mobile application	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	1.1 Introduction to Mobile App Concept – Various App Development Platforms – Android - History, Versions - Overview of Android architecture - Android Stack - Linux, Dalvik Virtual Machine, Core Libraries, Application Framework, Applications - OS vs IOS 1.2 Understanding an Android App Creating an Example Android Application - Anatomy of Android Application	K1-K6	12	1-5

UNIT	CONTENT	CL	Hrs	CO
2	2.1 Activities, Intents, Fragments Activities and Activity Lifecycle - Activity state changes - Example, Saving and restoring UI state - Intents - Explicit and Implicit Intents, Example - Fragments- Creating, Adding and managing fragments, Handling Fragment events, Example 2.2 Android User Interface Creating views and view groups - Layouts - Linear, Table, Relative, Absolute, Frame, Scroll view - Changing screen orientation - Creating GUI – button, text, checkbox, radio, Menus - Event Handling - ClickListener, FocusChangeListener, Touch Listener, MenuItemClickListener, LongClickListener	K1-K6	20	1-5
3	3.1 Persistent Storage Files – Using application specific folders and files, creating files, reading data from files, listing contents of a directory Shared Preferences – Creating shared preferences, saving and retrieving data using Shared Preference Database 3.2 Database Programming SQLite - SQLite classes, Cursor, SQLite database, SQLite Queries – create, insert, select, update and delete - Connecting to a Remote database using MySQL/PHP	K1-K6	16	1-5
4	4.1 Enhancing Android User Interface Notification - Action Bar – Dialogs – Search - Styles and Themes – Defining, using Inheritance, Android themes, Default styles and themes, Android SMS – Deploying App in Play Store – Multilingual 4.2 Location Based Services Using Location Manager, Location Provider - Using emulator with Location based services – Selecting a Location provider – Finding your current location – Best practice for location updates – Using proximity alerts – Using the Geocoder – Creating map based activities	K1-K4	15	1-4
5	5.1 Advanced User Experience Designing for every screen size and density – Ensuring Accessibility – Introducing Android Text-to-Speech – Using Speech recognition 5.2 Case Study Case study on recent apps	K1-K4	15	1-4

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Theory :

Total Marks: 25

Duration: 45 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A (Objective type questions)	K1 (5)	$1 \times 10 = 10$	5	5
	K2 (5)		5	5
B (Internal Choice)	K2 (5)	$3 \times 5 = 15$	1	2
	K3 (5)		1	2
	K4 (5)		1	2
	Total	25	13	16

Practical :

Total Marks: 25

Duration: 45 minutes

Knowledge Level	Marks
K5	15
K6	10
Total	25

Other Components:

Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion

Two to three components will be prescribed

End Semester Examination:**Theory:****Total Marks: 50****Duration: 90 minutes**

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A (Objective type questions)	K1 (6)	10 x 1 = 10	6	6
	K2 (4)		4	4
B	K1 (4)	5 x 2 = 10	2	2
	K2 (6)		3	3
C (Internal Choice)	K1 (5)	6 x 5 = 30	1	2
	K2 (5)		1	2
	K3 (10)		2	4
	K4 (10)		2	4
	Total	50	21	27

Project - 50 marks (Demonstration and Viva)

Rubrics for Evaluation	Marks	Cognitive Level
Mobile Application Front-end Design	15	K1-K6
Implementation with Database connection	15	K1-K6
Execution of the Project and Viva	20	K1-K6

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To expose the students to various functional units of a computer
- To understand the post assembly operations
- To expose students to various web tools

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the various functional units of a computer	K1
CO2	explain post assembly operations and hardware problems	K2
CO3	choose an appropriate web tool to create and publish contents	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Computer System Hardware Introduction - Inside a Computer Cabinet - Motherboard, BIOS, CMOS, Ports and Interfaces, Expansion Slots, Ribbon cables, Memory Chips, Storage Devices, Processor – Primary Memory, Secondary Memory, Magnetic disk – Hard disk, Optical Disk – CD-ROM 1.2 Plug and Play Devices Mouse – Keyboard – Printer – Scanner - Webcam - Digital Devices – Microphone – External Hard Drive	K1-K2	10	CO1-2
2	2.1 Post Assembly Operations in Practice Partitioning of Hard drive - Installation of Software - System and Application Software – Antivirus, MS Office package, installing updates from internet, Control Panel Features Programs, Manage User accounts, Network & Internet, Clock, Language and Region, Appearance and Personalization, System and Security, Hardware and Sound. 2.2 Troubleshooting Hardware problems Approach towards Hardware problems - Troubleshooting - Mother Board, Processor, RAM, Hard drive, I/O Devices, Keyboards, Monitors and Video Cards.	K1-K2	9	CO1-2

UNIT	CONTENT	CL	HRS	CO
3	3.1 Web Tools The Read / Write Web – Weblogs - Pedagogy and Practice, Get Started – Wikis – Easy Collaboration for all – Flickr - Creating, Publishing and Using Images Online – Podcasting, Video and Screen casting - Multimedia Publishing for the Masses 3.2 Ways to improve one's digital life Functionality – Security	K1-K3	7	CO1-3

INTRODUCTION TO DATA ANALYSIS

CODE:23CS/GE/DA22

CREDITS:2

L T P:1 0 1

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To recognize different types of data and understand the implications of data type for subsequent analyses
- To understand the various data collection tools and techniques
- To apply predictive data analysis to draw the relationships between data

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	relate the different types of data exists in real world	K1
CO2	compare various tools and techniques for collecting data	K2
CO3	experiment with data collected using predictive data analysis to derive conclusions	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Fundamentals of Data Analysis Purpose of Data Analysis- Different Types of Data- Quantitative and Qualitative Data- Numerical, Categorical- Sources of Data -Primary and Secondary 1.2 Data Collection Steps, Tools and Techniques of Data Collection - Data layout- Coding - Entering data	K1, K2	8	1,2
2	2.1 Data Cleaning Checking for errors- Spell Checking, removing duplicate rows, fixing numbers and signs, fixing dates and times, merging and splitting columns, transforming and rearranging columns and rows, reconciling table data by joining or matching. 2.2 Importing Data Importing Text or Microsoft Word Data into Excel- Importing Data from the Web into Excel- Validating Data. 2.3 Summarizing data Summarizing Data with Histograms- Summarizing Data with Descriptive Statistics- Using PivotTables to Describe Data- Summarizing Data with Database Statistical Functions	K1-K3	9	1-3

UNIT	CONTENT	CL	HRS	CO
3	3.1 Predictive Data Analysis Sensitivity Analysis with Data Tables -Filtering Data- Consolidating Data -Using Correlations to Summarise Relationships - Incorporating Qualitative Factors into Multiple Regression Functions- Analysis of Variance: One-Way ANOVA - Randomised Blocks and Two-Way ANOVA- Software Tools	K1-K3	9	1-3

BACHELOR OF COMPUTER APPLICATION

SYLLABUS

(Effective from the academic year 2023-2024)

BLOCKCHAIN

CODE:23CS/UI/BC23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To acquire knowledge on different types of software system architecture and cryptography tools used in block chain
- To understand the components and the working of block chain
- To learn about the various attacks in block chain

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- explain the various essential concepts for block chain
- describe the working of block chain and the types of block chain
- identify the limitations and attacks in block chain

Unit 1

1.1 Essential concepts for block chain

Types of software system architecture: centralized, decentralized, distributed, peer-to- peer cryptography - private key, public key, hash function, digital signature

Unit 2

2.1 Introduction to block chain

Block chain - difference between databases and block chain - benefits of block chain – distributed ledger - components of block chain: node, transaction, block, chain, miners, consensus protocol - working of block chain – permissioned and permission-less model - types of block chain: public, private, hybrid, consortium

Unit 3

3.1 Consensus algorithm

Consensus, distributed consensus, consensus in synchronous and asynchronous systems, Proof of Work (PoW) protocol - byzantine general problem - fault tolerance - attacks: double spending, Sybil, Denial of Service (DoS)

Unit 4

4.1 Limitations of block chain

Lack of privacy - security model - limited scalability - high costs - hidden centrality – lack of flexibility - critical size

4.2 Use cases of block chain

Government sector – health – Internet of things – education – financial

Unit 5

Cryptocurrency and Bitcoin

Bitcoin benefits and drawbacks – Working of bitcoin – Bitcoin transactions –
Constructing a transaction - Bitcoin mining – Bitcoin security principles – User security
best practices

BOOKS FOR REFERENCE

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF PSYCHOLOGY

PROGRAMME DESCRIPTION

The Bachelor's programme will place emphasis on the genetic, physical, physiological, sensory, cognitive, temperamental and social components that mediate the study of human behaviour. The course covers topics such as developmental psychology, basic psychology, social psychology, biological psychology, research methods and statistics, counselling psychology, abnormal psychology, experimental psychology, rehabilitation psychology, psychological testing, applied psychology and organizational psychology. Students will explore these topics through lectures, assignments, audio-visual teaching aids and laboratory practices. By the end of the programme, students will be able to effectively apply theoretical knowledge in different domains of psychological practice.

VISION OF THE DEPARTMENT

To create an inclusive, integrated and healthy community that facilitates in building an empathetic, humane and empowered society

MISSION OF THE DEPARTMENT

Maximize individual potential by equipping every student with the knowledge of Psychology thereby bringing about holistic growth of self and transforming them into ambassadors for social intervention

TELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF PSYCHOLOGY

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the B.Sc. Psychology Programme, the students will be able to

PSO 1	evaluate various concepts, theories and approaches in psychology and be able to apply the same in professional contexts
PSO 2	apply a biological, sociological and psychological lens to understanding human behavior
PSO 3	accurately diagnose psychological disorders and identify the appropriate etiology and treatment method for physical and mental disabilities as well as proficiency in psychological assessments
PSO 4	interpret research findings, formulate a research study and carry out a research project using appropriate methodology, and display report writing skills
PSO 5	communicate effectively, think critically, display sound ethical judgements and practice in line with the discipline's code of ethics that inculcates empathy, non-judgmental behavior and sensitivity towards people from marginalized sociocultural backgrounds

(Effective from the academic year 2023-2024)

GENERAL PSYCHOLOGY- I

CODE: 23PY/MC/GP14

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To illustrate the different schools, subfields and possible careers in psychology
- To distinguish between the processes involved in sensation and perception
- To analyze the biological processes underlying consciousness and distinguish between the levels of consciousness
- To compare and contrast the different theories of learning and demonstrate their practical applications
- To classify the types and processes of memory and recommend techniques to improve memory

COURSE LEARNING OUTCOMES

On successful completion of the course, student will be able to:

COs	DESCRIPTION	CL
CO1	define the basic concepts in psychology	K1
CO2	describe the processes underlying the human mind	K2
CO3	apply the understanding of human behavior in everyday life	K3
CO4	correlate the theoretical frameworks which form the basis of psychology	K4
CO5	critique the various approaches and perspectives of psychology	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Definition of Psychology 1.2 Psychology as a science: Research methods of Psychology 1.3 Different schools of Psychology and modern perspectives of Psychology 1.4 Scope and branches of Psychology	K1- K5	10	1-5
2	Sensation and Perception 2.1 Sensation: Basic concepts and processes in sensation 2.2 Types of senses- visual, auditory, olfactory, vestibular and kinesthetic. 2.3 Sensory adaptation, habituation and integration of senses 2.4 Perception- basic concepts, learning, set, motivation and emotion; figure ground separation. 2.5 Different processes of perception- laws of organization, depth perception, constancy of perception, perception of movement	K1- K5	14	1-5

UNIT	CONTENT	CL	HRS	CO
3	Consciousness 3.1 Fundamental Process, nature of consciousness 3.2 Variations in levels of consciousness and brain activity 3.3 Sleep and dreams: Stages of sleep and sleep disorders 3.4 Dreams: theory of dreams 3.5 Meditation, Hypnosis, psi phenomena 3.6 Psychoactive drugs	K1- K5	13	1-5
4	Learning 4.1 Definition of learning 4.2 Classical conditioning – Theories, extinction, spontaneous recovery, stimulus generalization and discrimination, significance of classical conditioning 4.3 Operant conditioning- Reinforcers and punishers, schedules of reinforcement, significance of punishment, shaping, stimulus generalization and discrimination, escape learning and avoidance learning, significance of operant conditioning 4.4 Cognitive Learning – Latent learning, insight learning, imitation 4.5 Social Learning – Modelling, characteristics of the modeling situation, processes of observational learning	K1- K5	14	1-5
5	Memory 5.1 Meaning and Stages of memory 5.2 Atkinson and Shiffrin Model: sensory, short-term, long term memory 5.3 Levels of processing theories 5.4 Long term memory-organizations and process 5.4.1 Organization of long term memory 5.4.2 Encoding and storing long term memories 5.4.3 Retrieval from long term memory 5.5 Forgetting- Motivated forgetting, Interference, amnesia 5.6 Techniques of improving memory	K1- K5	14	1-5

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	6 marks (2 x 3 marks)	2 (Answer All)	50 words
	K2	6 marks (2 x 3 marks)	2 (Answer All)	50 words
B	K4	16 marks (2 x 8 marks)	2 (Internal Choice-Answer Any 1 of 2)	400 words
	K5	8 marks (1 x 8 marks)	1 (Internal Choice-Answer any 1 of 2)	400 words
C	K3	14 marks (1 x 14 marks)	2 (Answer any 1)	800 words

2 to 3 ‘Other Components’ will be assessed for 50 marks, with the same range and weightage of K Levels prescribed for the course.

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	15 marks (5 x 3 marks)	5 (Answer All)	50 words
	K2	15 marks (5 x 3 marks)	5 (Answer All)	50 words
B	K4	24 marks (3 x 8 marks)	3 (Internal Choice-Answer Any 1 of 2)	400 words
	K5	16 marks (2 x 8 marks)	2 (Internal Choice-Answer any 1 of 2)	400 words
C	K3	30 marks (2 x 15 marks)	4 (Answer any 2)	800 words

SOCIAL PSYCHOLOGY I

CODE: 23PY/AC/SP15

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce students to the basic concepts of Social Psychology
- To infer the perceptual processes of self and others
- To familiarize students on how attitudes can be formed and changed
- To demonstrate an understanding of social influence and its related factors
- To communicate the dynamics of interpersonal attraction and prosocial behavior

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to

COs	Description	CL
CO1	identify the aspects of social psychology in real life	K1
CO2	understand and associate the theories related to social behavior	K2
CO3	apply knowledge of social dynamics to interpersonal relationships	K3
CO4	distinguish between the diverse facets of social behavior	K4
CO5	deconstruct attitudes, perspectives and behaviours towards others in everyday contexts	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Social Psychology: 1.1 Meaning and Definition of Social Psychology 1.2 Nature of Social Psychology 1.3 Scope of Social Psychology 1.4 Research methods in social psychology	K1- K5	13	1-5
2	Social Perception 2.1 Definition of Self-concept: self- image, self-esteem, self- presentation 2.2 Impression Formation and Impression Management 2.3 Attribution- Meaning and definition 2.4 Theories of attribution; attribution errors	K1- K5	13	1-5
3	Attitude 3.1 Nature and Formation of Attitudes	K1- K5	13	1-5

UNIT	CONTENT	CL	HRS	CO
	3.2 Theories of attitude change-Cognitive dissonance theory, Reinforcement theory and Balance theory 3.3 Persuasion- meaning and definition 3.3.1 Paths leading to persuasion- the central route and the peripheral rout 3.3.2 Persuasive elements- Communicator, Message, Audience 3.3.3 Cognitive processes underlying persuasion 3.4 Resistance to Persuasion			
4	Conformity 4.1 Definition of Conformity 4.2 Factors influencing conformity 4.3 Classic studies- Sheriff, Asch, Milgram's obedience studies 4.4 Resisting Social Pressure	K1- K5	13	1-5
5	Interpersonal Attraction and Altruism 5.1 The Beginning of Attraction: Proximity, physical attraction, similarity, the need to affiliate. 5.2 Theories of interpersonal attraction- Sternberg's love triangle, learning and cognitive theory 5.3 Altruism, Prosocial Behaviour: meaning and definition 5.4 Internal and external influences on decision to help 5.4.1 Increasing helping Behaviour	K1- K5	13	1-5

B.A. / B.Sc. / B.Com. / B.B.A. / B.C.A. / BSW Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23PY/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

(Effective from the academic year 2023-2024)

GENERAL PSYCHOLOGY II

CODE: 23PY/MC/GP24

CREDITS: 4

LTP: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart knowledge of cognitive processes like thinking, reasoning and language
- To help evaluate and critique the different theoretical conceptualizations of intelligence
- To help students interpret the role of motivation with respect to human behaviour
- To enhance skills to discern the influences of motivation and emotion through the various theories
- To enable an understanding of personality approaches and assessments

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	describe the fundamental psychological processes and theories	K1
CO2	explain the concepts and principles of psychology	K2
CO3	apply psychological principles to everyday life	K3
CO4	analyze the expanded knowledge of various approaches in psychology	K4
CO5	evaluate logical and objective conclusions about behavior and mental processes	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Thinking, Reasoning and Language 1.1 Basic elements of thought-Concepts, propositions and images 1.2 Reasoning 1.3 Decision Making and Problem Solving - Trial and error, algorithms, heuristics (Representative & Availability. Working Backward, Subgoals), Insight, Problems with decision-making and problem solving (Functional Fixedness, Mental sets, Confirmation bias) 1.4 Language	K1- K5	10	1-5
2	Intelligence and Creativity 2.1 Definition and determinants of Intelligence	K1- K5	14	1-5

UNIT	CONTENT	CL	HRS	CO
	2.2 Theories of intelligence: Factor theories (Spearman's G factor, Thurstone's theory) and cognitive theories; assessment of intelligence 2.3 Recent trends in intelligence-multiple intelligence, emotional intelligence, social intelligence, environmental intelligence 2.4 Creative Thinking- insight in creative thinking, stages in creative thinking, nature of creative thinking and characteristics of creative thinkers.			
3	Motivation 3.1 Definition of Motivation, Motivation and Behavior 3.2 Theories of motivation – Instinct, Drive reduction, Arousal, Incentive, Cognitive, Humanistic approaches. 3.3 Types - Biological motives, Social motives 3.4 Frustration and conflict of motives	K1- K5	13	1-5
4	Emotion 4.1 Definitions of Emotions: Nature of emotions 4.2 Cognitive appraisal and emotion, Subjective experience and emotion, bodily Changes and emotion, facial expression and emotion 4.3 Theories of emotion – James Lange Theory, Cannon Bard Theory, Cognitive Theory 4.4 Assessment of Emotions- Management of emotions	K1- K5	14	1-5
5	Personality 5.1 Definition and Concept of Personality 5.2 Determinants of Personality 5.3 Overview of Approaches – Psychoanalytic approach, Behaviouristic approach, Cognitive approach, Humanistic approach 5.4 Assessment of Personality – Questionnaire, Rating Scales and Projective Tests	K1- K5	14	1-5

BIOLOGICAL PSYCHOLOGY II

CODE: 23PY/MC/BP23

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To help students understand how the nervous system develops
- To impart knowledge on the biological basis for homeostasis
- To communicate about neuroanatomical underpinnings of human emotions
- To explain the influence of hormones on behavior
- To expound the biological rationale in psychological processes like learning and memory

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COS	DESCRIPTION	CL
CO1	recall the development of the nervous system	K1
CO2	infer the neurobiological underpinnings of behavior	K2
CO3	relate the learning to biological basis of human behavior	K3
CO4	outline the operations of learning, memory and emotions	K4
CO5	assess appropriate neurological functions connected to human behaviors	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Development of the nervous system 1.1 Phases of neurodevelopment 1.2 Postnatal development in Human Infants 1.3 Neuro-plasticity in adults 1.4 Disorders of Neurodevelopment – ASD, motor disorders.	K1-K5	10	1- 5
2	Homeostasis I: Biological basis of temperature regulation and sex 2.1 Homeostasis and Allostasis 2.2 Controlling body temperature- advantages of constant high body temperature, brain mechanisms and fever.	K1-K5	10	1- 5

UNIT	CONTENT	CL	HRS	CO
	2.3 Sex and hormones- organizing effects of sex hormones, activating effects of sex hormones, parental behavior. 2.4 Evolutionary interpretations of mating behavior.			
3	Homeostasis II: Biological basis of thirst and hunger 3.1 Mechanisms of water regulation 3.2 Osmotic thirst, hypovolemic thirst, sodium-specific hunger 3.3 Digestion and food selection 3.4 Brain mechanisms of hunger 3.5 Eating disorders	K1-K5	11	1- 5
4	Learning and memory 4.1 Localized representations of memory 4.2 Theories of the function of the hippocampus 4.3 Basal Ganglia, other brain areas in memory 4.4 Types of amnesia	K1-K5	11	1- 5
5	Biology of emotions 5.1 Emotions, autonomic arousal 5.2 Brain areas associated with emotions 5.3 Functions of emotions	K1-K5	10	1- 5

OBJECTIVES OF THE COURSE

- To introduce students to the basic processes of group dynamics
- To infer the types and determinants of aggressive behaviour
- To familiarize students on how prejudices are formed and maintained
- To demonstrate an understanding of the sources of conflicts and strategies for peace-making
- To communicate the application of social psychological concepts in a number of settings

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	identify the sources of individual and group processes	K1
CO2	explain the processes underlying certain social attitudes and behaviour	K2
CO3	relate the knowledge of social phenomena to individual functioning	K3
CO4	categorize various facets of social thought and behaviour	K4
CO5	evaluate strategies to manage individual attitudes and thoughts as well as group interrelations	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Group Dynamics: 1.1 Meaning and Definition of Groups 1.2 Formation of groups 1.3 Social facilitation, Social loafing 1.4 Deindividuation 1.5 Group Polarization 1.6 Group think 1.7 Leadership	K1- K5	13	1-5
2	Aggression 2.1 Meaning and Definition of aggression 2.2 Types of Aggression 2.3 Theoretical Perspectives- Biological theories, Drive theories, Social learning theories, Frustration-aggression theory	K1- K5	12	1-5

UNIT	CONTENT	CL	HRS	CO
	2.4 Influence on aggression- Social determinants, Situational determinants 2.5 Management of aggression			
3	Prejudice 3.1 Meaning and definition of prejudice 3.2 The Nature of Prejudice 3.3 Sources of Prejudice- Social, cognitive, motivational sources 3.4 Features of prejudice- Discrimination, stereotypes, racism, sexism, ageism 3.5 Consequences of prejudice; methods to reduce prejudice	K1- K5	14	1-5
4	Conflict and Peace Making 4.1 Meaning and Definition of conflicts 4.2 Conflict: Social dilemmas, competition, perceived injustice, Misperception. 4.3 Conflict resolution – Concept and strategies 4.4 Peacemaking: meaning and definition 4.5 Strategies for peace: Contact, co-operation, communication, conciliation.	K1- K5	13	1-5
5	Application of Social Psychology: 5.1 Legal System 5.1.1 Effects of police procedures and media coverage 5.1.2 Eyewitness Testimony- Effects of judges and defendant 5.2 Social Psychology and the sustainable future 5.2.1 Psychology and climate change 5.2.2 Enabling sustainable living 5.3 Application of Social Psychology to Work Settings 5.3.1 Social Perception 5.3.2 Group Dynamics 5.3.3 Conflict in Work Settings 5.4 Applying Social Psychology in political behaviour 5.4.1 Causes of political behaviour, political attitudes and beliefs 5.4.2 Cognitive processes in deciding, role of groups, group identification and intergroup competition in political behaviour.	K1- K5	13	1-5

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	6 marks (2 x 3 marks)	2 (Answer All)	50 words
	K2	6 marks (2 x 3 marks)	2 (Answer All)	50 words
B	K4	16 marks (2 x 8 marks)	2 (Internal Choice- Answer Any 1 of 2)	400 words
	K5	8 marks (1 x 8 marks)	1 (Internal Choice- Answer any 1 of 2)	400 words
C	K3	14 marks (1 x 14 marks)	2 (Answer any 1)	800 words

2 to 3 ‘Other Components’ will be assessed for 50 marks, with the same range and weightage of K Levels prescribed for the course.

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	15 marks (5 x 3 marks)	5 (Answer All)	50 words
	K2	15 marks (5 x 3 marks)	5 (Answer All)	50 words
B	K4	24 marks (3 x 8 marks)	3 (Internal Choice- Answer Any 1 of 2)	400 words
	K5	16 marks (2 x 8 marks)	2 (Internal Choice- Answer any 1 of 2)	400 words
C	K3	30 marks (2 x 15 marks)	4 (Answer any 2)	800 words

**General Core Course Offered for
B.A. / B.Sc. / B.Com. / BBA / B.C.A. / BSW Degree Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23PY/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

(Effective from the academic year 2023-2024)

LIFE SKILLS: PERSONALITY DEVELOPMENT

CODE: 23EL/SS/PD13

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To make students aware of their strengths and weaknesses
- To help them hone their communication skills
- To equip them with skills required to raise self-esteem and confidence levels
- To help them acquire competencies to achieve personal and academic excellence
- To enable students to become effective team players

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	identify strengths and weaknesses in themselves and others.	K1
CO2	relate with others through effective communication and body language.	K2
CO3	make use of interpersonal skills in team work, and organise their activities.	K3
CO4	survey the opportunities for learning and growth.	K4
CO5	evaluate their strengths, weaknesses, opportunities and threats, and develop their personality.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Self Awareness</u> 1.1 Self esteem 1.2 Strengths and weaknesses 1.3 Accepting oneself 1.4 Giving/receiving compliments 1.5 Giving/receiving constructive criticism	K1-K4	13	1-4
2	<u>Personal Effectiveness</u> 2.1 Interpersonal skills – Communication and listening skills 2.2 Creative thinking 2.3 Dealing with stress 2.4 Adapting to change 2.5 Team work and group dynamics 2.6 Leadership skills	K1-K6	13	1-5
3	<u>Charting the Future</u> 3.1 Time management 3.2 Goal setting 3.3 Choice of career/vocation 3.4 Career mapping	K1-K6	13	1-5

SYLLABUS

(Effective from the academic year 2023-2024)

DEVELOPMENTAL PSYCHOLOGY I

CODE: 23PY/MC/DP34

CREDITS: 4

LTP: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To help students distinguish between different theories of human development
- To enable students to illustrate the process of conception of life and its evolution through babyhood
- To aid students to associate and predict the consequences of play and parenting on early childhood development
- To guide students to infer the physical, cognitive and social factors impacting development in late childhood
- To help relate the developmental changes occurring in adolescence and break down the tasks pertaining to the stage

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	Description	CL
CO1	recall the facets of human development that occurs from prenatal stage to adolescence	K1
CO2	explain the different theories of development	K2
CO3	discuss the characteristics of development in relation to their personal actions and behaviour	K3
CO4	categorize changes in the physical, cognitive, and psychosocial aspects of development across the stages	K4
CO5	estimate the developmental goals and concerns humans experience till adolescence	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Human Development 1.1 Human Development through the Life Span 1.2 Psychosexual development (Freud) 1.3 Cognitive Development (Piaget) 1.4 Moral Development - Kohlberg 1.5 Psychosocial Development – Eric Erickson	K1- K5	13	1-5
2	Prenatal Development, Infancy and Babyhood 2.1 Conception: Fertilization, Heredity and Environment 2.2 Prenatal Development, Birth: stages, methods, and settings of childbirth. 2.3 Characteristics of infancy and babyhood,	K1- K5	13	1-5

UNIT	CONTENT	CL	HRS	CO
	2.4 Physical and motor development in infancy and babyhood 2.5 Cognition and language development in infancy and babyhood 2.6 Psychosocial development- emotions, temperament, attachment 2.7 Hazards in infancy and babyhood			
3	Early Childhood 3.1 Characteristics of early childhood. 3.2 Physical and motor development in early childhood. 3.3 Cognition and language development in early childhood. 3.4 Play development in early childhood 3.5 Effect of parenting in early childhood 3.6 Hazards in early childhood.	K1- K5	13	1-5
4	Late childhood 4.1 Characteristics of late childhood 4.2 Physical and motor development in late childhood 4.3 Cognition and language development in late childhood 4.4 Family influence in late childhood 4.5 Peer group influence in late childhood 4.6 Hazards in late childhood	K1- K5	13	1-5
5	Adolescence 5.1 Characteristics of Adolescence, Developmental tasks of adolescence 5.2 Physical development- physical changes, physical and mental health 5.3 Cognitive development in adolescence 5.4 Psychosocial development- identity formation, family relationships, sex roles, relationship with peers, personality changes, children in conflict with the law.	K1- K5	13	1-5

INTRODUCTION TO RESEARCH METHODOLOGY

CODE: 23PY/MC/RM34

CREDITS: 4

LTP: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable students to understand the basic concepts involved in the field of psychological research
- To equip students with the skills to undertake and complete mini-research studies of varied research designs
- To illustrate the various data collection techniques in the field of psychological research
- To impart students with the knowledge of various standardization procedures
- To train students to practice ethical values in research as outlined by the American Psychological Association

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	recollect the basic concepts in research	K1
CO2	outline the theoretical underpinnings underlying human behaviour in research	K2
CO3	demonstrate critical thinking skills in undertaking psychological research	K3
CO4	critique scientific literature and methodologies and analyse data in research	K4
CO5	appraise the use of qualitative and quantitative procedures and tools in research	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Research in Psychology 1.1 Definition and Meaning of Research 1.2 Methods of Knowing: Method of Tenacity, Intuition, Authority, Rational method, Empirical method and Scientific method 1.3 Characteristics and Objectives of Research	K1- K5	10	1-5

UNIT	CONTENT	CL	HRS	CO
	1.4 Types of Research: Descriptive vs. Analytical, Applied vs. Fundamental, Quantitative vs. Qualitative, Conceptual vs. Empirical, One-time vs. Longitudinal, Field-setting vs. Laboratory vs. Simulation research, Clinical research, Exploratory vs. Formalised, Historical research, Conclusion-oriented vs. Decision-oriented. 1.5 Significance and Criteria of Good Research			
2	Quantitative and Qualitative Research Process 2.1 Overview of the Research Process 2.2 Formulation, Selection, and Technique involved in defining Qualitative and Quantitative Research Problems 2.3 Constructs and Variables in Research 2.4 Hypothesis- types, procedure for hypothesis testing, types of errors, one-tailed and two-tailed tests. 2.5 Review of Literature 2.6 Sampling- steps, criteria, types of sampling designs- non-probability and probability sampling. 2.7 Research Designs 2.7.1 Exploratory design- survey of concerning literature, experience survey and analysis of insight-stimulating examples 2.7.2 Descriptive design 2.7.3 Experimental design – basic principles, informal experimental designs	K1- K5	14	1-5
3	Methods of Data Collection and Interpretation of Data 3.1 Sources of data – Primary and Secondary sources 3.2 Observation as a method of data collection 3.3 Interview as a method of data collection 3.4 Questionnaires and Surveys as a method of data collection 3.5 Case study as a method of data collection 3.6 Processing and Interpretation of Quantitative and Qualitative data	K1- K5	13	1-5
4	Measurement and Standardization in Research 4.1 Measurement in Research 4.2 Scales of Measurement 4.3 Reliability- test-retest, split half, parallel forms, inter-rater, and qualitative reliability	K1- K5	14	1-5

UNIT	CONTENT	CL	HRS	CO
	4.4 Validity- face, content, construct, criterion, internal, external and qualitative validity 4.5 Sources of error in measurement			
5	Writing formats and Ethics in Research 5.1 Quantitative and Qualitative Writing formats 5.2 American Psychological Association Guidelines - an overview 5.3 Ethical and Legal Considerations in Research: personal disclosure, debriefing, authenticity, and credibility of the research report; the role of researchers in cross-cultural contexts; and issues of personal privacy	K1- K5	14	1-5

STATISTICS IN PSYCHOLOGY

CODE: 23PY/AC/ST35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce students to the key concepts of statistics
- To familiarize students to various descriptive statistical methods used in Psychology
- To acquaint students with the basic elements of statistical testing
- To help students to distinguish between parametric and non-parametric test
- To enable students to understand the assumptions underlying different statistical techniques

COURSE LEARNING OUTCOMES

On successful completion of the course, student will be able to:

COs	DESCRIPTION	CL
CO1	describe fundamental concepts of statistics	K1
CO2	explain the practical relevance of statistical measures in analyzing and summarizing data	K2
CO3	apply statistical techniques to draw conclusions from data	K3
CO4	analyze and interpret statistical results	K4
CO5	evaluate the limitations and assumptions of different statistical methods	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Statistics 1.1 Meaning, need and importance of statistics in psychology 1.2 Functions and limitations of statistics 1.3 Organization of data 1.3.1 Coding, Tabulation and Classification of Data 1.3.2 Frequency Distributions- Discrete and continuous, Cumulative frequencies, Percentage frequencies 1.3.3 Graphical Representations- Bar Graph, Histogram, Pie Graph, Frequency Polygon 1.4 Introduction to descriptive and inferential statistical methods	K1- K5	13	1-5

UNIT	CONTENT	CL	HRS	CO
2.	Measures of Central Tendency & Variability 2.1 Arithmetic & Weighted Mean, Median, Mode 2.2 Merits and demerits of the measures of central tendencies 2.3 Range, Quartile Deviation, Average Deviation, Standard Deviation, Coefficient of variation	K1-K5	16	1-5
3	Normal Distribution 3.1 Sampling distribution and standard error of means, z test 3.2 Characteristics of normal distributions 3.3 Applications of normal distribution 3.4 Measures of Divergence from normality- Kurtosis, Skewness	K1- K5	10	1-5
4	Parametric tests 4.1 Characteristics of parametric tests 4.2 Correlation- types of correlation, estimating correlation coefficient (Pearson's product moment) 4.3 t test- single sample t test, independent sample t test, paired samples t test 4.4 Theoretical foundations-F test*, ANOVA*	K1- K5	13	1-5
5	Non-parametric tests 5.1 Characteristics and assumptions of non-parametric distributions 5.2 Estimating Spearman's rank order correlation coefficient, chi square test 5.3 Theoretical foundations-Mann Whitney U test*, Sign test*	K1- K5	13	1-5

*These tests are for theoretical understanding only; not for computation.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / BBA / B.C.A. / BSW / Degree Programme**

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23PY/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

B.Sc. DEGREE: PSYCHOLOGY

SYLLABUS

(Effective from the academic year 2023-2024)

DEVELOPMENTAL PSYCHOLOGY II

CODE: 23PY/MC/DP44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart a multicultural perspective on developmental concepts and processes
- To enable the students in understanding the various stages of adulthood development
- To aid in the application of theories to understand developmental conflicts and resolutions in adulthood
- To guide students to critically evaluate existing norms in adult human development
- To help relate the developmental changes occurring in adulthood and break down the tasks pertaining to the stage

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	define concepts, processes, and tasks of varying stages of adulthood	K1
CO2	discuss the different theories of development	K2
CO3	relate the various factors that influence overall development	K3
CO4	analyze changes in the physical, cognitive, and psychosocial aspects of development across the stages	K4
CO5	criticize the theories and existing research through a multicultural lens	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Early Adulthood 1.1 Characteristics of adulthood developmental task 1.2 Physical development 1.3 Health in adulthood, changes in interest in adulthood, social mobility, sex role adjustment 1.4 Personal and social hazards of adulthood, intellectual development 1.5 Vocational adjustment, marital adjustment, adjustment to parenthood	K1- K5	13	1-5
2	Middle Adulthood 2.1 Characteristics of middle age, developmental tasks 2.2 Physical changes, Sensory and Psychomotor functioning 2.3 Health in middle age 2.4 Cognitive development during middle adulthood	K1- K5	13	1-5

UNIT	CONTENT	CL	HRS	CO
3	Middle Adulthood-Psychosocial Aspects 3.1 Personal and social hazards 3.2 Changes in interests, work in the middle age 3.3 Adjustment to changed family patterns, marital hazards of middle age 3.4 Relationship with maturing children and aging parents.	K1- K5	13	1-5
4	Late Adulthood 4.1 Characteristics of old age, developmental tasks 4.2 Physical development, sensory and psychomotor functioning, intellectual changes 4.3 Health in old age, social adjustment in old age 4.4 Physical hazards, psychological hazards, successful aging	K1- K5	13	1-5
5	Late Adulthood-Psychosocial Aspects 5.1 Lifestyle and social issues related to aging 5.2 Relationship with siblings, friends, adult children; family management of elder care 5.3 Adjustment to retirement, adjustment to single-hood, vocational and family hazards of old age, living arrangements for the elderly; 5.4 Death: facing death and loss, Kübler-Ross Model; Medical, legal, and ethical issues, Finding meaning and purpose in life and death	K1- K5	13	1-5

EXPERIMENTAL PSYCHOLOGY PRACTICAL

CODE: 23PY/MC/EP45

CREDITS: 5

L T P: 3 0 4

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To enable students to understand the use of experiments in Psychology
- To acclimatize them to interpret and draw conclusions based on the norms given in the manual
- To aid the students in building competencies in conducting experiments and reporting the same
- To enable students to develop the skills required for various psychological experiments
- To facilitate students to write reports of experiments while adhering to APA conventions.

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	Description	CL
CO1	identify use of specific experiments appropriate to the requirements	K1
CO2	explain the experimental procedures in scientific testing	K2
CO3	apply the knowledge and skills acquired to use relevant and appropriate experiments based on the need	K3
CO4	analyze the data obtained from the psychological testing process	K4
CO5	assess the methodology of testing and synthesize the results and implications of the experiment	K5 & K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

Ten Experiments to be conducted.

1	Distraction of Attention
2	Determination of two point threshold
3	Division of Attention
4	Span of Attention
5	Visual Acuity
6	Mapping of Blind Spot
7	Colour Blindness
8	Muller Lyer Illusion
9	Set in perception

10	Perception of Space in Depth
11	Perception of Size Constancy
12	Transfer of Learning - Habit Interference
13	Maze Learning
14	Knowledge of Results
15	Study of Learning by Insight
16	Proactive and Reactive Inhibition
17	Study of Bilateral Transfer
18	Concept Formation
19	Problem Solving
20	T Puzzle
21	Heart and Bow
22	Motor Learning
23	Manual Dexterity
24	Finger Dexterity

THEORIES OF PERSONALITY

CODE: 23PY/AC/TP45

CREDITS: 5

LTP: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce students to the different personality theories
- To familiarize students with psychoanalytic and neo psychoanalytic theories
- To aid the students in understanding the contributions of Indian philosophers to personality
- To help students appreciate the differences among theories
- To enable students to broaden their knowledge about trait and humanistic theories.

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	identify and list major theories of personality, including their key proponents and historical contexts	K1
CO2	elucidate the core principles and key concepts of the personality theories	K2
CO3	apply the concepts from various personality theories to interpret the behavior and characteristics of individuals in hypothetical scenarios	K3
CO4	evaluate and compare different personality theories.	K4
CO5	critically assess the strengths, weaknesses, and empirical support for the various theories of personality	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Personality Theories 1.1 Definition and meaning of personality 1.2 Meaning and definition of theory, Scientific Statements- Objective & Subjective data, operational definition 1.3 Personality in the history of psychology, Dimensions of personality 1.4 Application of Personality Theories-assessment, research and psychotherapy	K1-K5	12	1-5

UNIT	CONTENT	CL	HRS	CO
2	Psychoanalytic and Neo-psychoanalytic theories 2.1 Sigmund Freud-Structure, Psychosexual Stages, Defense Mechanisms, Assessment, Psychoanalysis 2.2 Carl Jung-Psychic Energy, The Ego, Psychological Types, Personal and Collective unconscious, Self-realization, Mid-life crisis, Assessment, Psychotherapy 2.3 Alfred Adler- Inferiority Feelings, Striving for superiority, Style of life, Social interest, Birth Order, Assessment, Adlerian Psychotherapy	K1-K5	15	1-5
3	Trait and Type Theories 3.1 Raymond Cattell- Approach to Personality Traits, Source Traits, Dynamic Traits, Influence of Heredity and Environment, Stages of Personality Development, 16PF 3.2 Hans Eysenck- Dimensions of Personality, Causal agents of behavior, application	K1-K5	13	1-5
4	Humanistic Theories 4.1 Carl Rogers- Actualization, The Self, Congruence and Incongruence, Development of Personality, Fully Functioning Person, psychotherapy 4.2 Abraham Maslow- Personality Development, Hierarchy of Needs, Study of Self-Actualizers	K1-K5	13	1-5
5	Other Theories 5.1 Hippocrates and Galen's initial conceptualizations of personality 5.2 Sheldon's theory of personality 5.3 Contributions of Indian Philosophers (Overview)-J. Krishnamurthy, Sri Aurobindo, Rajneesh (Osho)	K1-K5	12	1-5

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To help students identify the difference between adaptive and maladaptive behavior
- To guide the students in the diagnosis of disorders based on the clinical manifestation of anxiety symptoms using an appropriate classification system
- To explore the causal factors and treatment of mood disorders
- To demonstrate the importance of appropriate evidence-based approaches in treating and managing substance abuse disorder
- To impart knowledge on the theoretical approaches in understanding learning disorders

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the basis of abnormal psychology and the differences between adaptive and maladaptive behavior.	K1
CO2	differentiate between major theoretical orientations in abnormal psychology.	K2
CO3	interpret maladaptive behavior using different theoretical perspectives.	K3
CO4	analyze the standards for the diagnosis and classification of major psychopathological conditions.	K4
CO5	recommend psychotherapeutic interventions for treating maladaptive behavior.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Abnormal Psychology 1.1 Psychological abnormality - definition of abnormal behavior 1.2 Historical views of abnormal behavior and its treatment, current perspectives of abnormality 1.3 Incidence of mental disorders. classification of mental disorders – International Classification of Diseases – 10 (ICD-10) and Diagnostic and Statistical Manual of Mental Disorders (DSM) – an overview 1.4 Humanitarian approach, contemporary views of abnormal behavior	K1- K5	17	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Anxiety and obsessive-compulsive related disorders 2.1 Anxiety disorders – generalized anxiety disorder, panic disorders 2.2 Phobias - specific phobias, social phobia 2.3 Biological, psychological and sociocultural factors causing anxiety disorders 2.4 Treatment of anxiety disorders 2.5 Obsessive-compulsive disorder- causes, diagnostic criteria, and treatment outcomes 2.6 Overview of intermittent explosive disorder, pyromania, kleptomania, gambling, excoriation disorder, trichotillomania	K1- K5	15	1-5
3	Mood Disorders 3.1 Mood disorders- unipolar mood disorders 3.2 Biological, psychological and socio-cultural factors causing unipolar mood disorders 3.3 Bipolar disorders 3.4 Biological, psychological and sociocultural factors causing bipolar disorders 3.5 Treatment and management	K1- K5	17	CO 1-5

B.Sc. DEGREE: PSYCHOLOGY

SYLLABUS

(Effective from the academic year 2023- 2024)

APPLIED PSYCHOLOGY

CODE: 23PY/MC/AP54

CREDITS: 4

LTP: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To familiarize students with the many scopes of psychology
- To educate students on the implications of cognition and affective states on behaviour
- To expand and apply previous knowledge in new and relevant contexts
- To explore and interpret the interactions between individual and society
- To impart knowledge about diverse fields of applied psychology

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define concepts, theories, and careers related to human behaviour	K1
CO2	discuss psychological models in local, national and global levels of applied fields	K2
CO3	demonstrate knowledge of how theoretical foundations of psychology translate into practical applications	K3
CO4	dissect the interactions and experiences of individuals in diverse contexts from the lens of psychology	K4
CO5	evaluate the scope and roles of niche fields of applied psychology and their career prospects	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HS	CO
1	Introduction to Applied Psychology 1.1 Definition of Applied Psychology 1.2 Overview of subfields of applied psychology 1.3 Need for Applied Psychology 1.4 Comparative Psychology 1.4.1 Definition and History of comparative psychology in the origins of psychological science 1.4.2 Comparative Psychology: Behaviourism, Comparative psychopathology, Psychotherapy 1.4.3 Comparative Approach to Research and Practice	K1- K5	13	1-5
2	Sports Psychology 2.1 Meaning and Definition of Sports Psychology 2.2 Nature and Scope of Sports Psychology 2.3 Role of Sports Psychologists	K1- K5	13	1-5

UNIT	CONTENT	CL	HS	CO
	2.4 Personality characteristics, Motivational types and styles, Pathological Motivation, Aggression, Social factors in sports, Arousal and Anxiety in Performance			
3	Military Psychology 3.1 Meaning and Definition of Military Psychology 3.2 Nature and Scope of Military Psychology 3.3 Role of Military Psychologists: Fitness for duty evaluations, Behavioural medicine and Neuropsychology, Substance use, Suicide prevention, Combat stress 3.4 Brief Psychotherapy and Psychological interventions for Disaster and Trauma	K1- K5	13	1-5
4	Forensic Psychology 4.1 Meaning and Definition of Forensic Psychology 4.2 Nature of Forensic Psychology, Role of Forensic Psychologists 4.3 Police Psychology, Legal Psychology, Criminal Psychology, Victimology, Correctional Psychology 4.4 Profiling- Crime Scene profiling, Suspect-based profiling, Psychological Autopsy, Geographical and Psychological profiling	K1- K5	13	1-5
5	Educational Psychology 5.1 Meaning and Definition of Educational Psychology 5.2 Classroom Management and Learning Environment 5.3 Student Diversity- Individual styles of learning and thinking, Multiple intelligences, Gifted and talented students, Gender differences, Accommodating cultural diversity 5.4 Special Education- Overview of categories of disabilities, Responsibilities of teachers for students with disabilities	K1- K5	13	1-5

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	6 marks (2 x 3 marks)	2 (Answer All)	50 words
	K2	6 marks (2 x 3 marks)	2 (Answer All)	50 words
B	K4	16 marks (2 x 8 marks)	2 (Internal Choice-Answer Any 1 of 2)	400 words
	K5	8 marks (1 x 8 marks)	1 (Internal Choice-Answer any 1 of 2)	400 words
C	K3	14 marks (1 x 14 marks)	2 (Answer any 1)	800 words

2 to 3 'Other Components' will be assessed for 50 marks, with the same range and weightage of K Levels prescribed for the course.

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	15 marks (5 x 3 marks)	5 (Answer All)	50 words
	K2	15 marks (5 x 3 marks)	5 (Answer All)	50 words
B	K4	24 marks (3 x 8 marks)	3 (Internal Choice-Answer Any 1 of 2)	400 words
	K5	16 marks (2 x 8 marks)	2 (Internal Choice-Answer any 1 of 2)	400 words
C	K3	30 marks (2 x 15 marks)	4 (Answer any 2)	800 words

PSYCHOLOGICAL ASSESSMENT PRACTICAL

CODE: 23PY/MC/PA55

CREDITS: 5

L T P: 3 0 4

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To familiarize students with the interplay of different types of variables and modes of enquiry in the field of psychology.
- To enable students to develop skills required for psychological testing.
- To facilitate skeptical thinking among students while assessing subjects.
- To train students to utilise sound judgment and non-bias while reporting and interpreting scores
- To impart knowledge about the ethical considerations of psychological testing and administration.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	recollect the basic concepts in psychological assessments	K1
CO2	elaborate the theoretical foundations underlying human behaviour in testing	K2
CO3	apply the knowledge and skills acquired to use relevant and appropriate assessments based on the requirements	K3
CO4	analyze the data obtained from the psychological testing process	K4
CO5	assess the methodology of testing and synthesize the results and implications of the assessment	K5 & K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6-Create		

Ten tests to be conducted:

S.no	Name of the Test
1.	Multiple Intelligence Scale
2.	Raven's Standard Progressive Matrices
3.	Bhatia's Battery of performance test
4.	Wechsler Adult Intelligence Test (WAIS)
5.	Wechsler Intelligence Scale for Children (WISC)
6.	Binet Kamath Test of Intelligence
7.	Achievement Motivation Scale
8.	Wallach-Kogan Creativity Test
9.	Eysenck Personality Inventory
10.	Test of Self -concept scale
11.	Test of values

12.	Locus of Control
13.	Adjustment Scale
14.	Self-esteem Scale
15.	Trait and State Anxiety Scale
16.	Trait and State Anger Expression Inventory
17.	Becks Depression Scale
18.	Sentence completion test
19.	Chatterjee's non-language preference record
20.	NEO-FFI
21.	Career Maturity Scale
22.	Vocational Preference Inventory
23.	MMPI
24.	Vineland Social Maturity Scale
25.	Marriage Attitude Scale
26.	Alcohol and Drugs Attitude Scale
27.	Differential Aptitude Test
28.	Family Environment Scale
29.	Suicidal Ideation scale
30.	Hamilton's Anxiety Scale

LITERATURE AND PSYCHOLOGY

CODE: 23ID/IC/LP55

CREDITS: 5

LTP: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce students to the interdisciplinary aspects between Literature and Psychology
- To help students understand the fundamentals of human behaviour
- To encourage students to employ psychological concepts in their understanding of literary texts
- To critically appreciate literary texts using theories from different schools of psychology
- To equip students to assess real and literary characters through a psychological lens.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define key terms and concepts related to the study of literature and psychology	K1
CO2	demonstrate the ability to interpret literary texts from literary and psychological perspectives	K2
CO3	apply concepts in psychology to understand real and literary characters	K3
CO4	examine the interdisciplinarity of various literary work	K4
CO5	evaluate and develop critical interpretation of literary texts using theories from different schools of psychology	K5 & K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Schwartz and Willbern: "Literature and Psychology" from <i>Interrelations of Literature</i> 1.2 Overview of personality and personality theories 1.3 Introduction to major theorists 1.3.1 Melanie Klein 1.3.2 Karen Horney 1.3.3 Jacques Lacan 1.3.4 Julia Kristeva	K1 - K4	16	1-4
2	Social Psychology 2.1 Social cognition, Social influence 2.2 Grief 2.3 Mari Selvaraj: <i>Pariyaerum Perumal</i> 2.4 Dylan Thomas: Do Not Go Gentle into That Good Night	K1 - K6	12	1-5
3	Psychosis 3.1 Hallucinations and Delusions, Schizophrenia 3.2 Causes and Treatment of Psychosis 3.3 Edgar Allan Poe: The Tell-Tale Heart	K1 - K6	10	1-5
4	Trauma and Attachment 4.1 Attachment theory 4.1.1 Adult attachment 4.2 Trauma theory 4.2.1 Causes and impacts of trauma 4.2.2 Resilience and trauma 4.3 Carol Ann Duffy: Warming her Pearls 4.4 Saadat Hasan Manto: Thanda Gosht	K1 - K6	20	1-5

HUMAN COMPUTER INTERACTION

CODE: 23ID/IC/HC55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand constraints, get an insight into the design space, and on deep knowledge of the materials of the design, that is, the user, the task, and the machine
- To analyze the design technologies for individuals and persons with disabilities
- To examine the psychological attributes of the user, provide the students with a basic overview of the capabilities and limitations that affect the ability to use computer systems in terms of developing interactions
- To understand constraints and get insights on the design space with interactive design basics
- To evaluate modelling interactions through descriptive modelling methods and technologies

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the foundations of HCI and interactive design concepts	K1
CO2	classify various types of interaction, user models and psychological factors	K2
CO3	apply design rules, user centered approaches and psychological factors to interaction design	K3
CO4	analyse physical designs, participant observation and modelling interaction with relevance to user feedback system	K4
CO5	evaluate expressive interfaces and computer-mediated communication	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate 		

UNIT	CONTENT	CL	HRS	CO
1	<p>1.1 Introduction to Interaction Design Introduction-Good and poor design -What is Interaction Design? -What is involved in the process of Interaction Design? -The goals of interaction design-More on usability: Design and usability principles.</p> <p>1.2 The Human Understanding the human mind- Input-Output channels. Levels of information processing. Memory- Atkinson and Shrifin model; structure of the working memory.</p> <p>1.3 The Computer Devices – Memory – Processing and Networks.</p> <p>1.4 Interaction Models Frameworks – Ergonomics: Bias - Arrangement of controls and displays, physical environment of interaction, health issues, use of colours, and ergonomics and HCI. – Styles – Elements – Interactivity-Experience, engagement and fun understanding and designing experience and physical design & engagement.</p>	K1 –K3	15	1-3
2	<p>2.1 Understanding Users Cognition- Attention: visual and auditory attention. Parallel processing. Perception perceptual grouping- figure and ground, similarity, proximity, continuity, symmetry, closure.</p> <p>2.2 Designing for collaboration and communication Introduction- Social mechanisms used in communication and Collaboration Ethnographic studies of collaboration and Communication-Conceptual frameworks</p> <p>2.3 Understanding how interfaces affect users Introduction- What are affective aspects? - Expressive Interfaces-User Frustration Virtual characters: agents</p>	K1-K4	12	1-4
3	<p>3.1. Types of Users Visualizers and verbalizers. High and low OSL. Variety and Novelty Seekers. Need for cognition. Designing for special populations- children, the elderly and the disabled.</p> <p>3.2 Observing users Introduction-Goals, questions and Paradigms-What and when to observe -How to observe- Participant observation and Ethnography-Data collection- Indirect observation tracking users' activities- Analyzing, interpreting and presenting data.</p> <p>3.3. Asking users and experts Introduction -Asking users: Interviews- Asking users: Questionnaires- Asking users: Inspections- Asking users: Walkthroughs</p>	K1-K3	15	1-3

UNIT	CONTENT	CL	HRS	CO
4	4.1. Interactive Design Basics Process – Scenarios – Navigation – Screen Design – Iteration and Prototyping. 4.2. HCI in Software Process Software Life Cycle – Usability Engineering – Prototyping in Practice – Design Rationale. 4.3. Design Rules Principles, Standards, Guidelines, Rules -Universal Design-User centered approaches to interaction design	K1-K5	18	1-5
5	5.1 Modelling Interaction Descriptive models. Predictive model- A model continuum model 5.2 Groupware Introduction-Groupware Systems-Computer-mediated Communication-Meeting and decision support systems-Shared applications and artifacts-Frameworks for groupware- Implementing synchronous groupware 5.3 Ubiquitous computing and augmented realities Introduction-Ubiquitous computing applications research-Virtual and augmented reality-Information and data visualization 5.4. Hypertext, multimedia and the World Wide Web Introduction-Understanding hypertext- Finding Things-Web technology and issues - Static web content-Dynamic web content	K1-K5	18	1-5

(Effective from the academic year 2023-2024)

ABNORMAL PSYCHOLOGY II

CODE: 23PY/MC/AB65

CREDITS: 5

LTP: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To impart knowledge on the theoretical approaches in understanding Schizophrenia and related disorders
- To guide the students in the diagnosis of disorders based on the clinical manifestation of personality disorders
- To explore the causal factors of somatoform and dissociative disorders
- To guide the students in the diagnosis of disorders based on the clinical manifestation of stress symptoms using an appropriate classification system
- To demonstrate the importance of appropriate evidence-based approaches in treating and managing sexual disorders

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	define the basis of abnormal psychology and the differences between adaptive and maladaptive behavior.	K1
CO2	differentiate between major theoretical orientations in abnormal psychology.	K2
CO3	interpret maladaptive behavior using different theoretical perspectives.	K3
CO4	analyze the standards for the diagnosis and classification of major psychopathological conditions.	K4
CO5	recommend psychotherapeutic interventions for treating maladaptive behavior.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Schizophrenia and related disorders 1.1 Schizophrenia- clinical features of schizophrenia, subtypes of schizophrenia 1.2 Overview of schizophrenia related disorders- delusional disorder, brief psychotic disorder, schizophreniform disorder, schizoaffective disorder, shared psychotic disorder 1.3 Causes of schizophrenia 1.4 Treatment and management	K1- K5	17	1-5

UNIT	CONTENT	CL	HRS	CO
2	Personality Disorders 2.1 Disorders of adult personality and behaviour - clinical features, causes 2.2 Specific personality disorders – paranoid, schizoid, dissocial, histrionic, borderline 2.3 Treatment and management	K1- K5	15	1-5
3	Somatoform and Dissociative Disorders 3.1 Somatoform disorders- conversion disorder, somatization disorder, pain disorder, hypochondriasis and body dysmorphic disorder 3.2 Dissociative disorders- dissociative amnesia and fugue, depersonalization disorder, dissociative identity disorder stressor and trauma-related disorders 3.3 Biological, psychological and sociocultural factors causing somatoform and dissociative disorders 3.4 Treatment and management	K1- K5	12	1-5
4	Stress Disorders 4.1 Acute stress disorder and post-traumatic stress disorder 4.2 Overview of adjustment disorders 4.3 Biological, psychological and sociocultural factors causing stress and trauma-related disorders 4.4 Treatment and management	K1- K5	17	1-5
5	Sexual Disorders and Gender Identity Disorder 5.1 Sexual dysfunctions 5.2 Causes and treatment of sexual dysfunctions 5.3 Paraphilias – causes and treatment 5.4 Gender identity disorder 5.5 Biological, psychological and sociocultural factors of causation 5.6 Treatment and management	K1- K5	17	1-5

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	6 marks (2 x 3 marks)	2 (Answer All)	50 words
	K2	6 marks (2 x 3 marks)	2 (Answer All)	50 words
B	K4	16 marks (2 x 8 marks)	2 (Internal Choice-Answer Any 1 of 2)	400 words
	K5	8 marks (1 x 8 marks)	1 (Internal Choice-Answer any 1 of 2)	400 words
C	K3	14 marks (1 x 14 marks)	2 (Answer any 1)	800 words

2 to 3 'Other Components' will be assessed for 50 marks, with the same range and weightage of K Levels prescribed for the course.

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Mark Allocation	No of Questions	No of Words
A	K1	15 marks (5 x 3 marks)	5 (Answer All)	50 words
	K2	15 marks (5 x 3 marks)	5 (Answer All)	50 words
B	K4	24 marks (3 x 8 marks)	3 (Internal Choice-Answer Any 1 of 2)	400 words
	K5	16 marks (2 x 8 marks)	2 (Internal Choice-Answer any 1 of 2)	400 words
C	K3	30 marks (2 x 15 marks)	4 (Answer any 2)	800 words

COUNSELLING PSYCHOLOGY

CODE: 23PY/MC/CP64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce students to the basic concepts of counselling psychology
- To familiarize students on the different approaches to counselling
- To educate students on the stages of counselling as given by the Egan model
- To impart knowledge about counselling diverse groups
- To educate students about the characteristics and roles of counsellors

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	identify the scope of counselling psychology in real life	K1
CO2	elucidate the fundamental concepts and principles of counseling psychology	K2
CO3	apply counseling techniques and interventions to hypothetical client scenarios	K3
CO4	analyse the nuances of counselling processes and outcomes	K4
CO5	estimate the efficacy and effectiveness of different approaches in counselling	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Counselling- An Introduction 1.1 Introduction: Definitions of counselling 1.2 Characteristics of an effective counsellor 1.3 Functions of counsellors 1.4 Goals of counselling 1.5 Ethics in counselling 1.6 Different modalities in counselling- virtual therapy vs in person therapy	K1- K5	13	1-5
2	Approaches to Counselling 2.1 Psychodynamic Approach 2.2 Behaviouristic Approach 2.3 Humanistic Approach 2.4 Trait-Factor Approach 2.5 Gestalt Approach 2.6 Existential Approach 2.7 Eclectic approach	K1- K5	13	1-5

UNIT	CONTENT	CL	HRS	CO
3	The Egan Model of Counselling–the Skilled Approach 3.1 <u>Stage–1</u> Problem Exploration and Clarification Part I– Attending and Listening, orienting oneself to the present Micro skills – active listening – verbal and non-verbal messages and behavior Part II–Helper’s response and clients self-exploration Helpers skills–accurate empathy (primary level), respect, genuineness, concreteness Client’s skill –self-exploration 3.2 <u>Stage–2</u> Integrative understanding/dynamic self-understanding Part I – Focusing, summarizing, probing for missing experiences, behaviour Feelings Part II – Helper’s skills – all the skills of Stage-1, self-disclosure, immediacy, confrontation Client’s skill –non-defensive listening, dynamic self-understanding	K1- K5	13	1-5
4	The Egan Model of Counselling– the Skilled Approach 4.1 <u>Stage-3</u> Facilitating action; developing a new perspective; preferred scenario Part I– Helping the client see alternatives Helping the client choose and formulate an action plan Helping the client implement and evaluate Part II–Helper’s skill-All the skills of stages 1&2 4.2 Termination of counselling- readiness of termination, client responses to termination, counselors responses to termination, ending in a positive way	K1- K5	13	1-5
5	Counselling of Special Groups 5.1 Marital and Family Counselling 5.2 School counselling 5.3 Career counselling 5.4 Workplace counselling 5.5 Grief counselling 5.6 Counselling suicidal clients 5.7 Crisis Counselling	K1- K5	13	1-5

REHABILITATION PSYCHOLOGY

CODE: 23PY/MC/RP65

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To familiarize students with concepts related to rehabilitation psychology
- To help students classify disabilities and be sensitive to the needs and potentials of those with disabilities
- To aid students in conducting needs analysis for persons with disabilities and formulate an intervention plan based on the same
- To assist students to examine the significance of various rehabilitation programs
- To explore existing policies and laws for persons with disabilities at both national and international levels

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	describe the role of a rehabilitation psychologist in practice and their services within a network of biological, psychological, social, environmental and political capacities	K1
CO2	outline the conceptual frameworks in rehabilitation psychology	K2
CO3	apply rehabilitation assessment tools and intervention strategies to study cases	K3
CO4	analyze the impact of psychosocial, environmental and cultural factors on the rehabilitation process	K4
CO5	evaluate factors affecting disabilities and psychosocial interventions used in the rehabilitation process	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Rehabilitation Psychology 1.1 Basic constructs- Impairment, handicap, disability 1.2 Meaning and definition of rehabilitation 1.3 Goals, objectives and principles of rehabilitation 1.4 Impact of Disability 1.4.1 Individual- person variables, immediate environment, larger culture and subculture 1.4.2 Family- family systems theory, family coping resources 1.4.3 Community	K1- K5	15	1-5

UNIT	CONTENT	CL	HRS	CO
2	Classes of disabilities and their management 2.1 Vision impairment- Nature, causes and types, characteristics, assessments, management techniques 2.2 Hearing and speech impairment- Nature, causes and types, characteristics, assessments, management techniques 2.3 Intellectual disability- Nature, causes and types, characteristics, assessments, management techniques 2.4 Neuromuscular and orthopaedic disabilities- Nature, causes and types, characteristics, assessments, management techniques	K1- K5	16	CO 1-5
3	Rehabilitation of persons with disabilities 3.1 Psychological adjustment to disability- Kerr's levels of adaptation to disability, stage theories of disability 3.2 Personality assessment- observational methods, personality inventories and projective techniques 3.3 Training need analysis, planning and implementation of training programme 3.4 Careers for the disabled 3.5 Role of rehabilitation psychologist in different settings	K1- K5	16	CO 1-5
4	Areas of Rehabilitation 4.1 Vocational Rehabilitation- process, participants in the rehabilitation program, vocational evaluation and assessments 4.2 Addiction rehabilitation- Drug addiction and Alcoholism 4.3 Disaster rehabilitation and reconstruction- Concepts, types, problem areas 4.4 Individual and community-based rehabilitation	K1- K5	16	CO 1-5
5	Frameworks for intervention 5.1 Addressing Barriers to Rehabilitation 5.2 National Action Plan for skill training of persons with disabilities 5.3 Overview of Indian laws- Rehabilitation Council of India Act 1992, Rights of People with Disabilities 2016, Mental Healthcare Act 2017 5.4 International programs for the disabled- United Nations Conventions on the Rights of People with Disabilities 2007	K1- K5	15	CO 1-5

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: PSYCHOLOGY

SYLLABUS

(Effective from the academic year 2023-2024)

ORGANISATIONAL PSYCHOLOGY

CODE: 23PY/ME/OP45

CREDITS: 5

LTP: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVE OF THE COURSE:

- To introduce the development and scope of the field organisational psychology
- To enable students to gain understanding of the dynamics of human interaction within an organisational context
- To impart knowledge on the patterns of recruitment, training and assessment of personnel in organisations
- To familiarize students with theories and factors contributing to motivation and satisfaction on the job
- To provide insight on group-related processes in the organisation

COURSE LEARNING OUTCOMES:

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	identify and state the concepts related to organizational behaviour	K1
CO2	define and discuss individual and group level processes involved in organizational psychology	K2
CO3	apply the theories and concepts of organizational psychology in the field	K3
CO4	investigate the functions of organizational psychologist and HR manager	K4
CO5	appraise the merits and limitations of different models and theories in different organizational setups	K5

UNIT	CONTENT	CL	HOURS	CO
1	Introduction to Organisational Psychology 1.1 Definition of organization and organisational structure 1.2 Relevance of psychology in organisation 1.3 Meaning, definition and scope of organisational psychology 1.4 Historical development of organisational psychology; pioneers of personnel selection 1.5 Challenges for organisational psychology- continuing globalization, workforce demographics, workforce diversity, social media, employee well-being at work, positive work environment, ethical behaviour	K1- K5	10	1-5

UNIT	CONTENT	CL	HOURS	CO
2	Organisational culture and dynamics 2.1 Organisational culture 2.1.1. Definition, creating and sustaining an ethical and customer responsive culture. 2.1.2. Employees learn culture 2.2 Organisational Dynamics 2.2.1 Role of managers 2.2.2 Forces for change 2.2.3 Managing planned change 2.2.4 Resistance to change 2.2.5 Overview to the approaches to change	K1- K5	12	1-5
3	Assessment of job, performance and people 3.1 Job analysis- definition 3.1.1 Job oriented approach, person oriented approach 3.1.2 Purpose of job analysis 3.2 Performance appraisal- definition 3.2.1 Reasons for appraisal 3.2.2 Methods of performance appraisal 3.3 Selecting employees- definition 3.3.1 Recruitment process, interviews and psychological tests 3.4 Training-Definition 3.4.1 Training methods- on the job and off the job training	K1- K5	13	1-5
4	Work Motivation and Job Satisfaction 4.1 Meaning and definition of motivation 4.1.1 Early theories of work motivation- need hierarchy, two-factor theory, Mclelland's theory of needs 4.1.2 Contemporary theories of motivation- ERG theory; reinforcement theory, self determination theory, goal setting theory 4.2 Job satisfaction 4.2.1 Nature of job satisfaction 4.2.2 Antecedents of job satisfaction- environmental and personal antecedents 4.2.3 Potential effects of job satisfaction	K1- K5	14	1-5
5	Work Groups, Work Teams and Leadership 5.1 Definition of work groups and work teams 5.1.1 Important group concepts- roles, norms, group cohesiveness, process loss 5.1.2 Building effective teams- context, composition, work design, process 5.2 Leadership 5.2.1 Definition of leadership 5.2.2 Behavioural theories- managerial grid 5.2.3 Contingency theories- Fred Fiedler model	K1- K5	16	1-5

UNIT	CONTENT	CL	HOURS	CO
	5.2.4 Situational theory- Hersey and Blanchard's model 5.2.5 Contemporary theories of leadership- charismatic leadership, transactional and transformational leadership

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: PSYCHOLOGY

SYLLABUS

(Effective from the academic year 2023-2024)

PROJECT

CODE: 23PY/ME/PR45

CREDITS: 5

OBJECTIVES OF THE COURSE

- To enable students to understand and apply basic research methods in psychology
- To aid students to critically analyse major theoretical positions in research methodology
- To promote an understanding of basic theoretical concepts of their research topic
- To guide students in conduction of research
- To edify students report writing skills

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to:

COs	Description	CL
CO1	explain the theoretical concepts of research topic.	K2
CO2	prepare a proposal for conduction of research.	K3
CO3	analyze and interpret the research findings.	K4
CO4	critique existing literature and identify gaps in knowledge within the field of psychology.	K5
CO5	compile the research findings and scientific material as per APA conventions.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

Students must undertake a survey on a relevant topic. Every student is required to complete this project under the supervision and guidance of a faculty member. This report will be evaluated internally by two examiners.

The research proposal and viva voce for the same will be the continuous assessment.

The project report and viva voce will be evaluated for 100 marks as an end semester exam.

GUIDELINES FOR PROJECT REPORT

Page Limit: The Project should be typed in Times New Roman font style, size 12, with 1½ line spacing. APA format should be followed throughout the thesis.

Cover Page- should include

Title of the Project

Project Report submitted by *Name of the candidate, Department No., Bachelor of Science in Psychology, Month, Year*

Logo of the College

The project report includes

- Contents Page
- Certificate of the Research Guide and Head of the Department and Acknowledgement by the Candidate
- Chapter I – Introduction to the Study
- Chapter II- Review of Literature
- Chapter III – Method of Investigation
- Chapter IV- Results and Discussion
- Chapter V – Summary and Conclusion
- References
- Appendix

SUBMISSION

Each student shall submit two copies of the project to the Head of the Department on the date specified by the Controller of Examinations. One copy of the project will remain in the College.

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 25

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

DEPARTMENT OF SOCIAL WORK

PROGRAMME DESCRIPTION

The BSW programme in Social Work offers knowledge, values and skills necessary to explore Social Work as a profession. The curriculum offers human rights, social justice, policy, human behaviour, health, administration, gender and research courses that promote social and economic justice and enhance social functioning of individuals, families, groups, organisations and communities. The Field Work component allows students' to practice theoretical knowledge in various scenarios under the guidance and supervisions of faculty in NGO settings. It is an integral part of the programme to organise innovatively designed workshops, seminars and interactive programmes to facilitate in-depth learning. The programme provides students a platform and opportunities to pursue their higher studies and effect development at all levels.

The exercise for framing the Learning Outcome-based Curriculum Framework for BSW helped in consolidating the Programme Educational Objectives, Programme Outcomes and Programme Specific Objectives in the context of the Educational Objectives framed by the Institution. This process was useful in contextualizing the learning outcomes that students would attain on completion of the course. The themes such as Academic Knowledge, Skill Enhancement, Student Centric Learning, Social Responsibility and Eco-Friendly approaches and Sustainability are used to provide a basis for estimating outcomes of the course.

VISION OF THE DEPARTMENT

To build a body of knowledge relevant to Professional Social Work and shape Social Work professionals committed to development and social change founded on values of Truth, Justice and Peace.

MISSION OF THE DEPARTMENT

- Advocate a strong 'Rights Based Approach' in the curriculum.
- Identify development agendas that complement the profession.
- Share knowledge, views, new ideas and thus grow in professionalism.
- Establish effective working relationships through a wide range of networks, collaborations and field placements particularly with those who stand up for human rights and social justice.
- Facilitate students in finding viable linkages with Social Work agencies and other organizations.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.S.W. Programme, the students will be able to

PSO 1	graduates can identify development agendas of the profession that is globally relevant. Graduates will be able to use the 'Rights Based Approach' and 'Evidence Based Practice'. Graduates are equipped to become Social Work professionals committed to innovative practices for social change, development and research founded on values of truth, justice and peace.
PSO 2	graduates in Social Work can work in/promote social enterprise and demonstrate professional skills to empower the less privileged and vulnerable communities. Graduates can analyze and critically examine the context leading to social development.
PSO 3	graduates demonstrate personal and professional development from experiences based on student centric learning practices. Graduates explore and experiment to enhance their commitment and competence towards the profession.
PSO 4	graduates can contribute their knowledge, views, and innovative ideas to celebrate diversity and practice inclusion. Graduates become socially responsible citizens contributing to a peaceful society and country.
PSO 5	graduates establish partnerships, collaborative networking to promote equity, equality and sustainable environment thereby create a just and humane society.

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23SW/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

ENVIRONMENTAL STUDIES

CODE:23SW/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies; Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-energy resources: renewable and non-renewable sources, impact of over-exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and *ex-situ* conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects and control measures -Impact of over-population on pollution and health – carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations Sustainable Development Goals of the 2030 Agenda
- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster

- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan
International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

RURAL CAMP

CODE:23SW/MC/RC31

CREDITS:1

The students will attend the rural camp before concurrent Field Work. The broad aim of Field Work is to provide opportunities for students to apply the knowledge learnt in the classroom environment and to plan, implement and evaluate these experiences while working with individuals, groups and communities. These will be in keeping with the placement agency's philosophy, policy and goals and use of guided supervision. The rural camp will have to be organised before September first week for five working days in a rural area in Tamil Nadu.

OBJECTIVES OF RURAL CAMP

- To develop an understanding of the rural social system with special reference to a specific poverty group
- To apply the government intervention in relation to poverty groups in the region and the related structures of decision-making and intervention.
- To analyse in-group living, appreciate its value in terms of self-development, interpersonal relationships, sense of organisation, management and mutual responsibility.
- To assess and acquire skills in planning, organising, implementing the camp.
- To create awareness programmes based on contemporary issues.

COURSE LEARNING OUTCOMES

On successful completion of Course, students will be able to:

COs	DESCRIPTION	CL
CO1	understand the social system existing in rural areas and to work with different groups.	K1-K2
CO2	analyse the conditions of different groups and implement specific interventions.	K3
CO3	categorize the needs and problems of the people in the community.	K4
CO4	apply the knowledge of practice in organizing programmes	K5
CO5	create, Plan and demonstrate abilities to work in teams.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	1.1 Needs of the people in rural communities 1.2 Problems and issues related to rural communities	K1-K6	12	1-5
2	2.1 Government programmes and challenges in rural areas. 2.2 Voluntary Organizations, GO's and Corporation Schools in the communities, collaboration and challenges.	K1-K6	12	1-5
3	3.1 Assessment of the problems in the rural communities. 3.2 Socio-economic conditions and problems in Rural communities.	K1-K6	12	1-5
4	4.1 Planning Community Programmes. 4.2 Programmes related groups for activities and awareness Programmes	K1-K6	12	1-5
5	5.1 Community Visits to BDO, PHC, Balwadi and other Government Organisations, Voluntary Organizations, and documentation. 5.2 Implementing various need-based activities, awareness programmes through street theatre and songs.	K1-K6	12	1-5

BASIC RESEARCH AND STATISTICS FOR SOCIAL WORK

CODE: 23SW/MC/RS54

CREDITS:4

L T P:4 0 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To define the concepts in Social Research and Social Work Research
- To understand the competence to conceptualise a problem, analyse and assess social problems and needs at the micro-level
- To apply the skills in conducting research by developing ability to prepare appropriate tools
- To analyse and interpret data through appropriate tables
- To determine the need for Social Work Research

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the connections between Social Research and Social Work Research	K1
CO2	discuss about the guidelines to conceptualize a problem, analyse, and assess social problems and needs	K2
CO3	demonstrate the ability to prepare appropriate tools	K3
CO4	apply the knowledge on Research and Statistics	K4
CO5	summarize appropriate methodology in Research	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Research 1.1 Social Research – Definition, Stages in the Social Research Process 1.2 Concept of Objectivity in Research, Scientific Approach to Research, Variables, Concepts, Constructs, Hypothesis 1.3 Types of Research (Pure, Applied, Action Research) 1.4 Social Work Research – Definition, Meaning, Stages in the Social Work Research Process. 1.5 Relevance of Research in Social Work 1.6 Social Work Research as a Method of Social Work	K1-K5	10	1 – 5
2	Basic Research Designs and Tools for Data Collection 2.1 Research Design – Descriptive, Experimental and Exploratory, Qualitative, Quantitative, Mixed, Participatory Research 2.2 Identifying and Formulating a Research Problem Relevant to Social Work 2.3 Sources of Data – Primary and Secondary 2.4 Tools for Data Collection – Observation, Interview Schedule, Interview Guide, Mailed Questionnaire, Google Forms	K1-K5	10	1-5
3	Sampling and Scaling Techniques 3.1 Concepts and Meaning of Sampling – Frame, Unit and Universe 3.2 Sampling Techniques – Random Sampling – Simple Random, Stratified, Multistage. Non-Random Sampling–Convenient, Purposive, Snowball and Quota. 3.3 Measurement– Definition, Meaning, Types, Need and Uses – of Nominal, Ordinal, Interval, Ratio.	K1-K5	11	1 – 5
4	Data Processing, Analysis, Interpretation and Reporting 4.1 Data Processing – Editing, Coding, Classification, Tabulation, Transcription 4.2 Outline of a Good Research Report 4.3 Diagrammatic Presentation of Data – One-, Two- and Three-Dimensional Diagrams, Pie Charts	K1-K5	11	1 – 5
5	Basic Statistical analysis of data 5.1 Statistics – Definition, Meaning, Need and Importance of Statistics in Research 5.2 Frequency and Percentage Distribution – Preparation of One-, Two- and Three-Way Tables 5.3 Measures of Central Tendency – Mean, Median and Mode – Definition, Meaning, Need and Importance, Calculation – Continuous and Discrete Series (Direct Method Only)	K1-K5	10	1-5

FIELD WORK- V

CODE: 23SW/MC/FW53

CREDITS:3

OBJECTIVES OF THE FIELDWORK

- To understand the skills in resource mobilization and assist in agency administration
- To orient students in identifying 3 cases and do case analysis
- To gain knowledge to conduct 2 groups activities
- To develop skills to organise and conduct a programme based on the needs assessed
- To create the skills to execute simple referrals, report writing

COURSE LEARNING OUTCOMES

On successful completion of Field Work, students will be able to:

COs	DESCRIPTION	CL
CO1	understand the skills in resource mobilization	K1- K2
CO2	identify 3 cases then draw up a face sheet and do case analysis	K3
CO3	gain knowledge to identify groups in existence and study the activities of the group also conduct group work with any one existing group	K4
CO4	create the skills to execute simple referrals, report writing and do agency administration	K5
CO5	develop skills to organise and conduct a programme based on the needs assessed	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Students will be trained in Resource Mobilisation, Agency Administration and they will apply the inputs in the respective fieldwork.	K1-K6	12	1-5
2	Students have to identify three individual cases, do case analysis by practicing core competencies matching the field work agency in which the trainee is placed.	K1-K6	12	1-5
3	Student Trainees have to do two group activities	K1-K6	12	1-5
4	Student Trainees have to execute simple referrals, do Report writing and Documentation work.	K1-K6	12	1-5
5	Student Trainees have to develop skills to organise and conduct a programme based on the needs assessed in the fieldwork setting.	K1-K6	12	1-5

B.S.W. DEGREE: BACHELOR OF SOCIAL WORK

SYLLABUS

(Effective from the academic year 2019–2020)

STUDY TOUR

CODE:23SW/MC/ST50

OBJECTIVES OF THE COURSE

- To enable students to acquire knowledge on INGO's/NGO's/GO's, outside Chennai city and interact with experts in the field.
- To build skills with regard to time management
- To promote team building skills
- To enable students, acquire knowledge on tribes, and their indigenous practices.
- To acquire ability to critically analyse situations.
-

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on INGO's/NGO's/GO's, outside Chennai city and interact with experts in the field.	K1- K2
CO2	to learn skills with regard to time management	K3
CO3	consider and practice team building skills	K4
CO4	critically examine and analyse with concepts related to tribes.	K5
CO5	gain insight into interventions for tribal communities practices.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Study tours are structured experiences which provide an opportunity to the students to visit either INGO's/NGO's /GO's outside Chennai city or visit tribal communities and interact with them, learn their life style, practices and the indigenous medicines used by them. Study tours are arranged for three days. Students will learn about social realities, through inputs by experts in the field and group experiences. Study tour is part of the course completion.

PATTERN OF ASSESSMENT

End-Semester Examination

Cognitive Level	Pattern
K1	To fulfil requirements of Attendance for Study Tour
K2	Submission of day-wise report
K3	Participation during the study tour (question and answer session, cultural activities)
K4	Consolidated Report that will include reports with photographs
K5	Sharing of experiences
K6	Personal and Professional Skills acquired

MINI RESEARCH PROJECT ON SOCIAL ISSUES

CODE:23SW/MC/PR64

CREDITS:4

LTP:3 0 2

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To develop an understanding about research projects and the process involved.
- To understand the use of Social Work research as a method in Social Work.
- To enable students to formulate a problem and research questions on current social issues.
- To facilitate students to frame Interview schedule questionnaires.
- To familiarize students with using an interview schedule, questionnaire and collect data, generate tables and collate the findings of the study.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	identify and describe attitudes and knowledge used in research projects.	K1-K2
CO2	demonstrate the understanding of the skills such as planning, critical thinking and problem solving in undertaking research projects.	K3
CO3	analyse the range of activities to be undertaking for conducting research studies in fieldwork setting.	K4
CO4	evaluate the use of theoretical frameworks in projects.	K5
CO5	develop ideas on the application of research framework in addressing social issues.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Students will be trained in identifying and selecting topics for research. Students would be divided into groups and would be encouraged to do presentations. One topic will be finalized with inputs from all the faculty.	K1-K6	12	1-5
2	Students will have to collect secondary data. Research methodology will be finalized after consultations with all the faculty members.	K1-K6	12	1-5
3	Students have to work on tool for data collection under the guidance and supervision of faculty	K1-K6	12	1-5
4	Student have to collect data and undertake data analysis	K1-K6	12	1-5
5	Students have to prepare research report as per the format given.	K1-K6	12	1-5

Every student in her VI Semester is required to complete a project under the supervision and guidance of a faculty member who will guide the class as a whole on topics related to social issues and social work practice. The report will be evaluated internally by 2 examiners.

- Faculty of the Social Work Department who has guided the student.
- A second faculty of the BSW Department.

The Faculty guiding the students will evaluate the project report for 60 marks and the Internal/External examiner shall evaluate the project report for 40 marks. A candidate failing in the research project will be required to repeat it under guidance during the following academic year and secure at least a minimum of 50 marks.

GUIDELINES FOR THE PROJECT REPORT

Page Limit: The Project Report can have minimum 70 to 100 pages typed in Times New Roman font style, size 12, with 1 1/2-line spacing in A4 Size Paper.

Cover Page- should include Logo of the College and Title of the Project Report.

Project submitted to Stella Maris College (Autonomous) in partial fulfilment of the requirement for the Degree of Bachelors of Social Work by Name of the candidate, Department No., Department of Social Work (UG), Month, Year

PATTERN OF ASSESSMENT

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

B.S.W. DEGREE BACHELOR OF SOCIAL WORK

SYLLABUS

(Effective from academic year 2023-2024)

ECOLOGY, DEVELOPMENT AND SOCIAL WORK INTERVENTION

CODE:23SW/ME/EI45

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To gain clear understanding on the changing environment.
- To aid students to examine the degradation of ecology, need for protecting land resources, agriculture and water resources.
- To analyze the issues related to environment, and the need to carry out social work interventions.
- To assimilate waste disposal and its importance.
- To enable students to develop knowledge on Agenda for green future.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	acquire relevant knowledge and recognise the changes in environment and the need for protecting the ecology, land resources, agriculture and water resources.	K1
CO2	understand the importance of sustainable development and waste disposal.	K2
CO3	discuss the ethical implications involved in protecting the environment.	K3
CO4	categorize and plan for green future.	K4
CO5	formulate Social work Interventions for issues related to environment.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Ecology and Conservation of Forest 1.1 Concept of Ecology, Ecosystem - types of Ecological pyramids, ecology degradation, ecological development, conservation of indigenous culture and traditions. 1.2 Symbiotic relationship between tribals and forest, forest and development, focus on the inclusive growth of tribes, community participation in forest management, case study of Chipko Movement, sacred groves forests, India's Bishnoi community and their conservation practices. 1.3 Man and biosphere programmes; concept of conservation reserves and Community reserves, importance of wildlife corridor in minimizing the conflicts and conservation. Forest resources: economic and ecological importance of forests, forest management strategies, sustainable forestry.	K1-K5	14	1-5
2	Soil degradation, Social Work Intervention towards Sustainable development. 2.1 Land as a resource, soil health; ecological importance of soil; types and causes of soil degradation; impact of soil loss and soil degradation on agriculture and food security; land use planning, need for soil conservation and restoration of soil fertility. 2.2 Food resources: World food problems, techniques to increase world food production. Effects on farming communities and food security; effects on nutrient cycles; future effects of soil degradation; emerging threats to land degradation in developing countries. 2.3 Sustainability-issues related to sustainability, Eco-social approach to sustainability. Right to sustainable development, Articles 48A and 51A(g). Environmental Social Work- concepts, principles, advocacy, lobbying, environmental education for schools and colleges. Role of a Social Worker in conservation of the environment.	K1-K5	11	1-5
3	Water resources and conflicts in India 3.1 Water resources: supply, renewal, and use of water resources. Demand for water (agriculture, industrial, domestic); overuse and depletion of surface and ground water resources; water quality standards in India; hot spots of surface water; role of state in water resources management shortages and strategies of water conservation.	K1-K5	16	1-5

UNIT	CONTENT	CL	HRS	CO
	<p>3.2 Water resources and sharing problems, case studies on Kaveri and Krishna river water disputes; case studies of dams-Narmada and Tehri dam – social and ecological losses versus economic benefits; Multi-purpose river valley projects in India and their environmental and social impacts.</p> <p>3.3 National conflicts on water sharing between India and the neighbouring states; agreements to resolve these conflicts.</p>			
4	<p>Waste disposal and its effect on environment</p> <p>4.1 Impact of solid waste on environment, human and plant health; effect of solid waste and industrial effluent discharge on water quality and aquatic life; mining waste and land degradation.</p> <p>4.2 Types of industrial waste: hazardous and non-hazardous; effect of industrial waste on air, water and soil, industrial waste management and its importance, stack emission control and emission monitoring. Drawbacks in waste Management techniques.</p> <p>4.3 Municipal Solid Wastes (Management and Handling) Rules 2000; Hazardous Wastes Management and Handling Rules 1989; Bio-Medical Waste (Management and Handling) Rules 1998; Eco-friendly or green products.</p>	K1-K5	11	1-5
5	<p>Green future</p> <p>5.1 Agenda of green development; reduction of ecological footprint; role of green technologies towards a sustainable future; major challenges and their resolution for implementation green technologies.</p> <p>5.2 Green practices to conserve natural resources (organic agriculture, agroforestry, reducing paper usage and consumption, etc.); emphasis on waste reduction instead of recycling.</p> <p>5.3 Innovation for green future-its importance, role of advancement in science in developing environmental friendly technologies.</p>	K1-K5	11	1-5

SOCIAL WORK INTERVENTION IN DISASTER MANAGEMENT

CODE: 23SW/ME/DR45

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To know and understand various disasters
- To apply the disaster management process in the field
- To analyse the role of a social worker in disaster management
- To evaluate the role of Government in Disaster Management with the help of case studies
- To develop an understanding of Disaster Management

COURSE LEARNING OUTCOMES

On successful completion of Field Work, students will be able to:

COs	DESCRIPTION	CL
CO1	Know and understand various disasters	K1
CO2	Apply the disaster management process in the field	K2
CO3	Analyse the role of a social worker in disaster management	K3
CO4	Evaluate the role of Government in Disaster Management with the help of case studies	K4
CO5	Develop an understanding of Disaster Management	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Disasters – Introduction 1.1 Concept and Definition of Disaster; 1.2 Types of Disaster –Nature Induced Disasters with case studies and Human Induced Disasters with case studies. 1.3 Impact of disasters- Physical, Psychological, PTSD, Social, Economic, Ecological and Political.	K1-K5	14	1-5

UNIT	CONTENT	CL	HRS	CO
2	Disaster Management Phases 2.1 Goals of Disaster Management 2.2 Pre-disaster Phase: Prevention, mitigation, and preparedness Disaster Phase: Search and rescue, relief mobilization and management, evacuation. and camp management Post Disaster Phase: Reconstruction, rehabilitation, and recovery 2.3 Importance of Disaster Management	K1-K5	12	1-5
3	Disaster Prevention and Preparedness 3.1 Reduce Vulnerability, Disaster Risk Reduction, Disaster mapping, community based disaster preparedness programme, emergency preparedness, resource utilization, public awareness and education; first-aid training, 3.2 Role of NGOs, INGOs in disaster situations 3.3 Role of Volunteers and Media in Disaster Situations	K1-K5	13	1-5
4	Social Work Interventions in Disaster Management 4.1 Disaster Assessment, SWOC Analysis, Capacity Building, advocacy, networking and co-ordination in Disaster management. 4.2 Disaster counselling and Crisis intervention 4.3 Role of a Social Worker in Disaster Management	K1-K5	13	1-5
5	Role of the Government in disaster management 5.1 Role of the Central and State Government in disaster management 5.2 The Disaster Management Act- 2005, Hyogo Framework 5.3 Third UN World Conference on Disaster Risk Reduction in Sendai-2015-2030 (The Four Priorities for Action)	K1-K5	13	1-5

SOCIAL WORK WITH PERSONS WITH DISABILITIES

CODE: 23SW/ME/DS45

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS : 65

OBJECTIVES OF THE COURSE

- To understand the different types of Disabilities
- To orient the students about the various issues of people with disabilities
- To gain knowledge about various policies and laws related to people with disabilities
- To develop the ability to analyse and implement the various Rehabilitative measures for people with disabilities
- To create the ability to work with people with disabilities as full-fledged social workers.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Acquire knowledge about the different types of Disabilities.	K1
CO2	Explain about the various issues of people with disabilities	K2
CO3	Gain knowledge about various policies and laws related to people with disabilities	K3
CO4	Analyse and implement the various Rehabilitative measures for people with disabilities	K4
CO5	Gain insight to work for people with disabilities as full-fledged social workers.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Disability 1.1 Definition of Disability; Impairment and Handicap; Causes of Disabilities; 1.2 Types of various Disabilities and specific psychosocial issues involved in each disability Physical Disabilities- Locomotor, Cerebral palsy, sensory, spinal cord injury, stroke disability,	K1-K5	14	1 – 5

UNIT	CONTENT	CL	HRS	CO
	Multiple sclerosis. Mental Disability: Intellectual Disability, learning disability, Mental Illness, multiple disabilities, 1.3 Prevention of Disabilities at Primary, Secondary and Tertiary Levels			
2	Needs and Problems of Persons with Disabilities 2.1 Problems of People with Disabilities- related to activities of daily living, education, sexuality, integration, employment, interpersonal relationships and marriage Needs and problems of people living with disabilities across the Life Span. 2.2 Problems faced by Family members of People with Disabilities, 2.3 Disability and Gender issues-problems faced by women and girls with disabilities.	K1-K5	12	1-5
3	Contextual Understanding of Disability: 3.1 Contextual understanding of Disability from Medical perspectives 3.2 Contextual understanding of Disability from Social perspectives 3.3 Understanding of Strengths and Limitations of People with Disabilities.	K1-K5	12	1 –5
4	The Rehabilitation Process 4.1 Process of Rehabilitation: Early Identification and Treatment, 4.2 Education, Vocational Rehabilitation and Social Inclusion within the Family and Community 4.3 Different types of Aids and Assistive devices	K1-K5	14	1 – 5
5	Intervention strategies and the Rights of Persons with Disabilities 5.1 Social Work Intervention in working with People with Disabilities. Micro level- Counselling, 5.2 Mezzo level - Family Counselling and Parent Guidance and Training Self Help/support Groups, Life Skills Enrichment of people with Disabilities. 5.3 Macro Level- Community Awareness and Education, Community based Rehabilitation, Inclusive Approach and Accessibility. The Rights of Persons with Disabilities Act, 2016	K1-K5	13	1-5

FOOD, NUTRITION AND FOOD SECURITY

CODE: 23SW/ME/FN45

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To define the concepts in Food, Nutrition and Food Security
- To understand the food groups, deficiency diseases, adulteration in food
- To apply the government programmes in Nutrition
- To classify the world food problems and the importance of Food Security
- To evaluate the benefits from available food resources

COURSE LEARNING OUTCOME

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the connections between health and food choices	K1
CO2	discuss about the guidelines Food Guide Pyramid and how to use it in their daily eating habits	K2
CO3	demonstrate the six classes of nutrients found in food and the roles they play in nutrition	K3
CO4	apply the knowledge on food adulteration	K4
CO5	criticise their own eating habits and food choices	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Food and Basic Nutrition 1.1 Food – Definition, Meaning, Classification of foods, Functions and sources of Carbohydrates, Proteins, Fats, Minerals, and Vitamins 1.2 Energy Functions of Food - Body building, Protection and Regulation and Maintenance foods 1.3 Concept of a Balanced Diet. 1.4 Nutrition – Definition of Nutrition and Nutrients, interrelationship between Nutrition and Health. 1.5 Food Guide – Basic food groups, usage of the food guide. 1.6 Role of Water in Nutrition	K1-K5	14	1 – 5

UNIT	CONTENT	CL	HRS	CO
2	Health and Nutritional Problems in India 2.1 Definition of Health and Fitness, Factors influencing Health and Wellbeing 2.2 Nutrient requirements for pregnant women, lactating mothers, pre-school, School going and elderly 2.3 Exercise, Physical Fitness and Health – their inter-relationship, Gender and Health 2.4 Protein Energy Malnutrition 2.5 Nutritional Problems related to – Iron, Vitamin B12, Iodine, Vitamin A, Folate, Vitamin C	K1-K5	14	1-5
3	Food Adulteration, Contamination and Food Hygiene 3.1 Common Adulterants, Food colourants –Permitted and Non permitted flavours of Spices, vegetables and fruits, fats and oils, meat, milk- artificial flavours. Health hazards of food adulterants. 3.2 Contamination of foods -different sources of contamination of foods-by plants, animal, sewage, soil, air, water, human beings. Fermentation, Putrefaction and Decay. 3.3 Food Hygiene - Food safety, Hygienic ways of handling food.	K1-K5	12	1 – 5
4	Government Programmes in Combating Malnutrition 4.1 Integrated Child Development Services (ICDS) Programme 4.2 Balwadi Nutrition Programme 4.3 Special Nutrition Programme 4.4 Vitamin A Prophylaxis Programme/ National Programme for Control of Blindness 4.5 National Nutritional Anaemia Prophylaxis Programme 4.6 National Iodine Deficiency Disorder Control Programme 4.7 Nutrition Programme for Adolescent Girls 4.8 Supplementary Nutrition Programme 4.9 Mid-Day Meal Programme 4.10 Minimum Needs Programme	K1-K5	14	1 – 5
5	Food Security 5.1 Definition of Food Security, Significance of Food Security, Effects of Food Insecurity, Challenges to achieving Food Security 5.2 Impact of Globalisation Policies on Food Security 5.3 Global Hunger Index 5.4 Right to Food, National Food Security Act 2013 5.5 Antyodaya Anna Yojana 2000	K1-K5	11	1 – 5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

PROGRAMME DESCRIPTION

B.A. TOURISM AND TRAVEL MANAGEMENT

The B.A. Degree programme on Tourism and Travel Management has been initiated by Stella Maris College in keeping with the felt need to have well-trained personnel with requisite skills and competency to take up careers in the tourism and hospitality industry. Being a service industry there is ample scope for jobs both in the semi-skilled and skilled sectors. Being a skill development programme, the students will be industry ready on completion. In the conduct of the programme there will be a close collaboration with leading travel and hospitality agencies to ensure maximum industry exposure and experience. Students will be doing courses on Front Office Management, Travel Agency and Tour Operators Management, Advertising for Tourism, Public Relations for Tourism, Human Resource Management, Hospitality Management, Tourism and Cuisines, Tourism Law, Airport Customer Relations, Entrepreneurship in Tourism, etc., and they will be able to take up careers as Front Office Personnel, Travel Desk Operators, Travel Agents, Tour Operators, Tour Guides, Tour Managers, Human Resource Managers, Housekeeping Managers, Food and Beverage Managers, Tourism Board personnel, and Travel Consultants.

VISION

To build a community of empowered women - students, teachers, and alumnae - who are responsible citizens and have the knowledge, skills, and sensitivity to value and protect India's diversity, heritage, and culture, and who practice the values of inclusiveness, compassion and humaneness.

MISSION

To create in our students an understanding of the fundamental facets and the methods of scholarship in the fields of history and tourism; expose them to rigorous academic standards; and to create a lively educational environment enriched by collaboration with industry and hands-on learning

Programme Specific Outcomes (PSOs)

BA Tourism & Travel management

On successful completion of the programme, graduates will

PSO 1	understand the scope of the tourism industry and evaluate opportunities for entrepreneurship.
PSO 2	enhance their communication, teamwork, and leadership skills.
PSO 3	apply their knowledge to develop the tourism and hospitality industry
PSO 4	show openness to diversity and the promotion of global citizenship.
PSO 5	display understanding of and sensitivity to socio-economic, cultural and environmental issues.

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23TT/GC/ES12

CREDITS:2

L T P: 2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

B.A. / B.Sc. / B.Com. / B.S.W/ B.B.A Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23TT/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS: HEALTH, ENERGY AND COMPUTER BASICS

CODE:23TT/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

EVENT MANAGEMENT

CODE: 23TT/MC/EM54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To know the possibilities and challenges of event management as a career.
- To understand strategies necessary for planning successful events.
- To understand the use market research to organise successful events.
- To help students discover the best use of media promotional tools.
- To understand how to prepare budgets and get feedback for events.

COURSE LEARNING OUTCOMES

On completion of this course students will be able to

COs	DESCRIPTION	CL
CO1	identify and explain different kinds of events.	K1, K2
CO2	demonstrate knowledge of strategies required to plan successful events	K3
CO3	compare the effectiveness of different kinds of media in communication about events.	K4
CO4	evaluate the success of events with feedback.	K5
CO5	construct budget and cost sheets required for an event	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Introduction to Event Management 1.2 Meaning, scope and historical perspective 1.3 Size and types of Events - Code of Ethics	K1-K4 K1-K5 K1-K5	15	1-5

UNIT	CONTENT	CL	HRS	CO
2	Preparation for an event 2.1 Conducting market research, establishing viability, capacities, costs and facilities, plans, timescales and contracts. 2.2 Clarity - SWOT analysis 2.3 Media coverage, advertising, budget, special considerations and evaluating success.	K1-K6 K1-K6 K1-K5	15	1-5
3	Organizing the event 3.1 Purpose, venue, timing, Guest of Honor guest list and invitations 3.2 Food and Beverages - Venue arrangements and decorations 3.3 Amenities – Microphones and Speakers - Media - Photographers - Podium	K1-K6 K1-K4 K1-K4	15	1-5
4	Media and Promotional Tools 4.1 Media invitations- photos - calls - press releases – Television and radio broadcasts 4.2 Flyers, posters, invitations, website, newsletters, blogs, tweets 4.3 PR and advertising- Media Coverage	K1-K4 K1-K5 K1-K5	10	1-5
5	Finance Planning 5.1 Budget and planning- packages, offers and discounts 5.2 Return on Investment 5.3 Attendance and Feedback	K1-K6 K1-K5 K1-K5	10	1-5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable students to understand the principles of eco-tourism.
- To help them understand the scope of ecotourism in the modern world.
- To discuss the various impacts of eco-tourism activities.
- To explain the need to conserve ecology at global and national level.
- To promote sustainable eco-tourism.

COURSE LEARNING OUTCOMES

On completion of this course students will be able to

COs	DESCRIPTION	CL
CO1	define the concept of eco-tourism.	K1
CO2	identify the different types of eco-tourism resources.	K2
CO3	apply their knowledge to promote sustainable ecotourism activities.	K3
CO4	assess the effectiveness of national and international guidelines and policies in conserving ecology.	K4
CO5	evaluate the impacts of eco-tourism.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Eco tourism 1.1 Defining Eco-tourism - Components of Eco tourism – Green Tourism 1.2 Principles and types of eco-tourism 1.3 Global growth and magnitude of eco-tourism	K1-K4 K1-K5 K1-K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Ecology and its branches 2.1 Eco system – Food Chain – Food Web – Sustainability - Carrying Capacity- Absorbing Capacity – Climate – Topography 2.2 Eco Tourism Resources - Hill stations – Forests - Coastal Areas – Coastal Restricted Zones 2.3 Eco Tourism Venues- Private Protected Areas- Public Protected Areas- Modified Spaces - Indigenous territories - Sustainable Tourism	K1-K4 K1-K5 K1-K5	15	1-5
3	Impacts of Ecotourism 3.1 Environmental Impacts of Eco tourism – Pollution and types – Global warming – Ozone depletion – Climate change – Formulating methods of conservation 3.2 Socio-Cultural Impact of Eco tourism – Positive and negative impacts 3.3 Economic Impact of Eco tourism – Foreign exchange earnings – Government revenue – Employment and income	K1-K5 K1-K4 K1-K4	15	1-5
4	Planning in Ecotourism 4.1 United Nations Environmental Programme (UNEP) - Earth Summits – Kyoto Protocol – Climate change Conventions 4.2 National Policy on Ecology 4.3 Eco Labelling and Eco Certification	K1-K4 K1-K5 K1-K5	10	1-5
5	The Business of Ecotourism 5.1 Eco-Bridge - Eco Lodges - Eco Resorts – Eco Parks 5.2 Development Strategies for Eco tourist Accommodations – Promotional offers and packages 5.3 Marketing and promotion of Eco-tourist destinations – Responsible tourism Sustainable development	K1-K5 K1-K5 K1-K5	10	1-5

TECHNOLOGY IN TOURISM

CODE: 23TT/ME/TT45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable students to develop an understanding of technology in the context of tourism.
- To make them utilise free technological resources in the tourism and hospitality sectors.
- To aid them in creating tourist maps using open-source software.
- To learn the growth of the global distribution system.
- To evaluate the role of Information Communication Technology (ICT) in the tourism industry.

COURSE LEARNING OUTCOMES

On completion of this course students will be able to

COs	DESCRIPTION	CL
CO1	list of open-source software applicable to the tourism sector.	K1, K2
CO2	explain the emerging technology trends in the tourism sector.	K3
CO3	examine factors influencing the future of tourism businesses based on ICT.	K4
CO4	estimate the effectiveness of a central reservation system.	K5
CO5	create tourist maps using open-source software.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

AIRPORT CUSTOMER RELATIONS

CODE: 23TT/ME/AR45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide students with an overview of airline operations.
- To familiarise them with airport formalities and basic airline operations.
- To help the students to learn about the different types of passengers.
- To enable students to understand customer handling.
- To help them have a better understanding of baggage handling.

COURSE LEARNING OUTCOMES:

On completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	describe airport operations.	K1
CO2	explain arrival and departure formalities at the airport.	K2
CO3	identify different types of airport customer services.	K3
CO4	distinguish between the categories of air passengers and classes of service.	K4
CO5	assess the effectiveness of passenger and baggage handling.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Overview of Aircraft Operations 1.1 Types of Aircrafts - Terminals and Runways 1.2 Flight operations - Crew and Cargo Administration 1.3 Catering – In-flight and Ground Catering	K1-K3 K4-K5 K1-K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Arrival and Departure Formalities 2.1 Arrival and Departure Procedures - Check-in - Passenger tickets - Tickets – Miscellaneous Charges Order 2.2 Transportation Documents – Travel Insurance – Health Documents 2.3 Baggage Check-in - Boarding pass – Passport and Visa - Security Screening - Immigration – Customs Clearance – Embarkation and Disembarkation	K1-K3 K1-K4 K1-K5	15	1-5
3	Categories of Passengers 3.1 Very Important Person (VIPs) - Commercially Important Passengers (CIPs) 3.2 Frequent Flyers - Unaccompanied Minor (UMNR) - Families with Infants – Children 3.3 Passengers with Reduced Mobility (PRMs) and Unruly Passengers	K1-K4 K3-K5 K3-K5	10	1-5
4	Passenger handling 4.1 Handling Difficult Passenger situations at Airport and In-flight 4.2 Delay on Departure of flight – Transit flights – Cross Connection Flights – Cancellation of Flights – Diversion of Flights 4.3 Handling Overbooking	K1-K3 K1-K4 K3-K5	10	1-5
5	Baggage Handling 5.1 Checked Baggage – Unchecked Baggage – Pets/animals in - Cabin and in-hold - Dangerous goods in baggage 5.2 Crew Baggage - Lost Baggage - Expedite Baggage - Unclaimed Found Baggage, Lost and Found - Damaged Personal Property 5.3 Damage of Checked Baggage and Pilfered Property - Central Baggage Tracing Systems	K1-K5 K3-K5 K1-K5	15	1-5

B. A. DEGREE – TOURISM AND TRAVEL MANAGEMENT

SYLLABUS

(Effective from the academic year 2023-2024)

PROJECT

CODE: 23TT/ME/PR45

CREDITS: 5

OBJECTIVES OF THE COURSE

- To enable students to develop research capabilities.
- To make students develop an interest in minor and major research projects.
- To help students gain knowledge of career opportunities through projects.
- To help students have a better understanding of the process of research.
- To help students learn the techniques of research writing.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the process of research.	K1, K2
CO2	paraphrase and summarize knowledge gained from sources.	K3
CO3	collect, collate and synthesise data.	K4
CO4	assess the techniques needed for different kinds of research and use them in project writing.	K5
CO5	write a brief dissertation using accepted research methodology.	K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

Project Guidelines

- A small-scale research which can be completed in the amount of time one would spend in and out of class for a regular 6-credit module
- Organised into chapters and with a contents page, references and bibliography
- Preferable link made between theory and practise
- There should be empirical research, though may be modest in scale but first hand research is essential to enhance the overall quality of the project

Unit 1

Introduction

- 1.1. Introduction: a general introduction to the topical area
- 1.2. Statement of the problem: very specific statement of the problem to be studied.
- 1.3. Purpose of the Project: in this section a description about the overall purpose of the project should be made known.
- 1.4. Definition of Terms: important terms and concepts used in the project should be adequately analysed and defined.

- 1.5. Significance of the project: this section should provide answers as to what the project will contribute.

Unit 2

Review of Literature

- 2.1. The review is a careful examination of a body of literature pointing toward the answer to the need for the study or project

Unit 3

Methodology

- 3.1. Explain the methods used for collecting data
3.2. Descriptive writing approach must be utilized
3.3. Collection of Data – Primary and Secondary

Unit 4

Summary and Recommendations

- 4.1. Introduction – an overview of the project should be provided in the section
4.2. Summary and Recommendations
4.3. References
4.4. Appendices

Contents of the Project Report

- Cover page
- Title page
- Acknowledgements
- Contents page
- List of figures or illustrations
- Main body – Introduction
- Main body – Review of Literature
- Main body – Methodology
- Main body – Summary
- Main body – Recommendations
- Main body – Conclusion
- Reference List/Bibliography
- Appendices

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

B.Voc FOOD PROCESSING AND QUALITY CONTROL

PROGRAMME DESCRIPTION

The college was selected by UGC in August 2015 to offer Bachelor of Vocational Degree (B.Voc. Degree) programme in discipline namely Food Processing & Quality Control. The aim is to enhance Skill training and employability of graduates. The University of Madras communicated on 16 September 2015, granting permission to start the B.Voc. Degree Programmes from the academic year 2016-2017 and the programme was started in 2016. The focus of the programmes is on skill development and quality education with hands - on - training to meet the needs of students and the industry. The B.Voc programme is supported by the UGC (for a period of three years) under the aegis of National Skill Development Corporation (NSDC) and the respective Sector Skill Councils. The UGC under the aegis of NSQF has also awarded an extension to continue the three year B.Voc. Degree programme in 2018. The programme affiliated to the University of Madras offers the degree as "Bachelor of Vocational in Food Processing and Quality Control". The Sector Skill Council for the programme FPQC is Food Industry Capacity and Skill Initiative This programme is competency based and the curriculum is organised such that it includes the content of the Qualification Packs graded by NSQF at levels 4 to 7. The industry is actively involved in both curriculum design and imparting the skill sets. The uniqueness of the program is that it has multiple exit points after the successful completion of: at the end of first Year: Diploma (59 Credits), at the end of Second Year: Advanced Diploma (117 Credits), on successful completion of Third Year: B.Voc. Degree (180 Credits). Besides the University examination, the students are also assessed by FICSI and the certification awarded by NSDC for the respective Qualification Packs.

VISION OF THE DEPARTMENT

The vision of the department is to empower women to be strong, independent and professionally capable. The department also aims to provide values to be socially committed in building a strong community health by utilising the knowledge and skills acquired for the betterment of self and the society.

MISSION OF THE DEPARTMENT

- To facilitate skills training for employability and entrepreneurship to meet the challenges of a competitive world.
- To inspire other women to realise their potential and shape their innovative ideas into action to become financially independent, competent in the Food Processing Sector.

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the B.Voc. in Food Processing and Quality Programme, the students will be able to

PSO 1	gain skills to find job opportunities in food processing industries.
PSO 2	acquire skills that can be utilized for self-employment in food sector.
PSO 3	enhance their skills for preparation of fruit and vegetable preserves, customized baking, and dairy products, thereby initiating entrepreneurial ventures.
PSO 4	acquire knowledge and skills for food analysis, quality assessment, food safety and auditing enabling them to find opportunities for employment in these sectors.
PSO 5	suggest remedial measures to combat nutritional problems by developing nutritious food products.

PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

B.Voc FOOD PROCESSING AND QUALITY CONTROL

PROGRAMME DESCRIPTION

The college was selected by UGC in August 2015 to offer Bachelor of Vocational Degree (B.Voc. Degree) programme in discipline namely Food Processing & Quality Control. The aim is to enhance Skill training and employability of graduates. The University of Madras communicated on 16 September 2015, granting permission to start the B.Voc. Degree Programmes from the academic year 2016-2017 and the programme was started in 2016. The focus of the programmes is on skill development and quality education with hands - on - training to meet the needs of students and the industry. The B.Voc programme is supported by the UGC (for a period of three years) under the aegis of National Skill Development Corporation (NSDC) and the respective Sector Skill Councils. The UGC under the aegis of NSQF has also awarded an extension to continue the three year B.Voc. Degree programme in 2018. The programme affiliated to the University of Madras offers the degree as "Bachelor of Vocational in Food Processing and Quality Control". The Sector Skill Council for the programme FPQC is Food Industry Capacity and Skill Initiative This programme is competency based and the curriculum is organised such that it includes the content of the Qualification Packs graded by NSQF at levels 4 to 7. The industry is actively involved in both curriculum design and imparting the skill sets. The uniqueness of the program is that it has multiple exit points after the successful completion of: at the end of first Year: Diploma (59 Credits), at the end of Second Year: Advanced Diploma (117 Credits), on successful completion of Third Year: B.Voc. Degree (180 Credits). Besides the University examination, the students are also assessed by FICSI and the certification awarded by NSDC for the respective Qualification Packs.

VISION OF THE DEPARTMENT

The vision of the department is to empower women to be strong, independent and professionally capable. The department also aims to provide values to be socially committed in building a strong community health by utilising the knowledge and skills acquired for the betterment of self and the society.

MISSION OF THE DEPARTMENT

- To facilitate skills training for employability and entrepreneurship to meet the challenges of a competitive world.
- To inspire other women to realise their potential and shape their innovative ideas into action to become financially independent, competent in the Food Processing Sector.

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the B.Voc. in Food Processing and Quality Programme, the students will be able to

PSO 1	gain skills to find job opportunities in food processing industries.
PSO 2	acquire skills that can be utilized for self-employment in food sector.
PSO 3	enhance their skills for preparation of fruit and vegetable preserves, customized baking, and dairy products, thereby initiating entrepreneurial ventures.
PSO 4	acquire knowledge and skills for food analysis, quality assessment, food safety and auditing enabling them to find opportunities for employment in these sectors.
PSO 5	suggest remedial measures to combat nutritional problems by developing nutritious food products.

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
FOOD PROCESSING AND QUALITY CONTROL**

SYLLABUS

(Effective from the academic year 2023 – 2024)

FOOD MICROBIOLOGY WITH LABORATORY WORK

CODE: 23VF/VM/FM16

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To train the students on the general principles of Food Microbiology.
- To familiarize the factors that determines the growth and survival of microorganisms in food.
- To provide the knowledge of microorganisms (probiotic, pathogens, spoilage) associated with foods and their origin and role.
- To become aware of the Microorganism in Food and Environment.
- To acquire knowledge about the association between microorganism and health and their role in food processing

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	gain knowledge to identify about different microorganism and their classification, sources and the factors influencing their growth conditions for the viability of microorganisms.	K1
CO2	describe the methods for detection and controlling of microorganisms in food and recognize the limit to ascertain the safety of food products.	K2
CO3	explain the characteristics of pathogenic and spoilage microorganisms that will enable efficient isolation, detection and identification	K3
CO4	comprehend the current scenario of food microbiology in food processing industry for product development and by product utilization.	K4
CO5	establish knowledge on application of fermentation in food production and how it influences the microbiological quality and the status of the food product.	K5, K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Introduction to Microbiology 1.2 General Characters of Bacteria, Fungi, Virus, Protozoa and Algae	K1-K2 K1	5	1-3
2	Microbial Growth 2.1 Growth curve of Bacteria 2.2 Effect of Environmental Factors on Growth of Microorganism: pH, Water activity, Oxygen availability and Temperature 2.3 Perishable, Semi-Perishable Food, Shelf life and Stable Food	K1-K4 K5-K6 K4	9	1-5
3	Microbial Food Spoilage 3.1 Spoilage Microorganism in Cereals (Rice, Maize, Wheat, Millet), Pulses, Milk, Meat, Fish and Egg 3.2 Physical and Chemical Changes caused by Microorganism during Spoilage	K3-K5 K5-K6	9	1-5
4	Food Borne Diseases 4.1 Types: Food borne infections, Food borne Intoxication and Toxic Infections 4.2 Origin, Symptoms and Prevention of Food Borne Diseases 4.3 Site of Food Borne Illness – The Alimentary Tract its function and Microflora 4.4 Emerging Pathogens of concern and Risk factors associated with food borne illness (case study)	K1-K3 K1-K3 K2-K3 K5-K6	9	1-5
5	Role of microbes in Food Processing 5.1 Principles of Fermentation 5.2 Lactic acid Bacteria (LAB) in Food 5.3 Health promoting microorganisms – Probiotics and Prebiotics	K1-K3 K4-K5 K5	7	1-5
	Laboratory Work 1. Introduction to Basic Microbiological Equipment Autoclave, Inoculation Chamber, Laminar Air Flow, Hot air Oven, Water Bath, Incubator, Colony Counter, Microscope. 2. Culture Techniques Preparation of media – serial dilution – Pour plate, Streak plate, slant, loop, stab and spread plate 3. Staining Techniques Gram staining for Bacteria- Lacto phenol staining Technique for fungi- staining technique for yeast 4. Identification of Microorganisms Basic steps in detecting food pathogens- identification of important food borne fungi and bacteria-morphological study of bacteria and fungi Motility (Hanging Drop Method) 5. Microbial Analysis in Water Coliform Test-Presumptive Test- Confirmatory Test- Completed Test-Filter Technique	K1-K6	39	1-5

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To provide an understanding on composition of fruits and vegetables.
- To familiarize with the changes occurring in various fruits and vegetable as a result of processing and cooking.
- To acquaint students with principles and methods of preservation and processing of fruits and vegetables into various products.
- To provide detailed information about drying process, nutritional quality and packing of fruits and vegetable products.
- To get hands on experience on processing of fruit and vegetables.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the nature of fruits and vegetables and the basics of processing and storage technologies for fruits and vegetables.	K1, K2
CO2	inspect raw material quality to interpret fruit and vegetable processing.	K3
CO3	apply various techniques of chilling and drying in fruit and vegetable processing.	K4
CO4	demonstrate the domestic and industrial scale preparation of fruit and vegetable based products like Jam, Jelly, Marmalade, Ketchup, Canned products etc.	K5
CO5	utilize their skills to develop a fruit and vegetable start- up firm.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Classification and composition of Fruits and Vegetables 1.2 Indian and global scenario on production and processing of fruits and vegetables. 1.3 Quality requirements of raw materials for processing; sourcing and receiving processing plants; grading, sorting, cleaning, washing, peeling, slicing and blanching: minimal processing.	K1-K2 K2 K1-K5	7	1-5
2	Fruit and Vegetable Processing - I 2.1 Processing for Pulp puree and concentrate, especially from Mango, Tomato, Guava, Papaya, Apple, Pineapple, Pomegranate, Grapes, using aseptic packaging 2.2 Frozen Fruits and Vegetables, Individual Quick Freezing (I.Q.F.)	K1- K6 K1-K6	8	1-5
3	Fruit and Vegetable Processing – II 3.1 Store management, inventory management, safety measures – fire extinguisher, first aid kit 3.2 Execution and post production processes 3.3 Principle and process of Canning.	K1-K2 K1-K3 K3-K6	8	1-5
4	Fruit and Vegetable Processing – III 4.1 Dehydration of Fruits and Vegetables using various drying technologies like sun drying, solar drying (natural and forced convection), osmotic, tunnel drying, fluidized bed drying, freeze drying, convectional and adiabatic drying 4.2 Applications to raisins, dried figs, vegetables, intermediate moisture Fruits and Vegetables 4.3 Drying of Fruits and Vegetables	K2-K6 K3-K4 K3-K5	8	1-5
5	Fermented Fruit Beverages 5.1 Principles of fermentation 5.2 Preparation of Grape wine and Vinegar 5.3 Principle, Chemistry and Preparation of Pectin	K1-K3 K3-K6 K1-K6	8	1-5
	Laboratory work 1. Preparation of Jam, Jelly and Marmalade Mixed Fruit Jam-Guava Jelly-Orange Marmalade 2 Preparation of Syrups, Crushes and Squashes Lime Syrup-Grape Crush-Mango Squash (Optional)-Pineapple Syrup 3 Preparation of Preserves and Candies Ginger Preserve-Tutti-frutti-Raisin 4 Preparation of Ketchup and Pickle Tomato ketchup, Lime Pickle-Mixed Vegetable Pickle-Cider 5 Drying and Canning Drying of Fruits and Vegetables-Banana-Peas Canning-Pineapple-Beans and Carrot	K1-K6	39	2-5

FOOD HYGIENE AND SANITATION

CODE: 23VF/VA/HS15

CREDITS:5

L T P: 4 0 1

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE:

- To introduce the various hygiene and sanitation techniques involved in food industries.
- To demonstrate the hygiene practices for a food handler.
- To illustrate the storage structures, pest control measures and waste disposal techniques.
- To provide knowledge on sanitation training and safety measures in food establishment.
- To summarize the protective measures for display of foods at food service outlets.

COURSE OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	explain the need for implementation of hygiene and sanitation procedures for premises, food handlers, and pest management practices.	K1,K2
CO2	explain training programme for food handler and food hygiene audits in food business operations to ensure food safety.	K3
CO3	evaluate critically the design and layout of a processing unit, supervise and implement storage and sanitation practices to prevent food losses.	K4
CO4	grade the FBO's on regulatory compliances to report the hygiene conformities.	K5
CO5	design a suitable layout, hygiene and pest control programme required for maintaining hygiene in FBO's .	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Cleaning Procedures 1.1 Introduction to hygiene – Food Production cycle 1.2 Cleaning and Sanitization- Cleaning of premises and surroundings- importance, recording of hygiene data. 1.3 Guidelines and Types of Cleaning Equipment 1.4 Location Layout and Construction of Premises	K1-K2 K1-K5 K1-K4 K1-K6	8	1-5
2	Personal Hygiene 2.1 Importance of Personal Hygiene of Food handler – habits – clothes, illness 2.2 Education for Food handler – practical approach	K1-K3 K2- K5	8	1-5
3.	Pest Control and Disposal of Waste 3.1 Importance of Pest Control 3.2 Classification of Pests, 3.3 Use of Pesticide, Pest repellents 3.4 Waste Product handling (Solid and Liquid Waste) 3.5 Storage of grain and its importance 3.6 Storage structure, tradition modern and underground 3.7 Role of PDS, FCI, IGSI, SGC in controlling food losses	K1-K2 K1-K2 K1-K3 K1-K4 K1-K3 K1-K3	12	1-3
4.	Safety at the Work Place 4.1 Sanitation Training and Education 4.2 Steps in Planning and implementing a Training Programme 4.3 Types of Accidents and their Effect 4.4 Safety instruction in food industry 4.5 Process flow design	K1-K4 K2-K6 K3-K6 K1-K5 K1-K3	12	1-5
5.	Food Service Hygiene 5.1 Rules of food service 5.2 Protective display of foods 5.3 Hygiene in Street foods, restaurants and Quick Serve Restaurants, fast foods	K1-K4 K3-K6 K4-K6	12	1-5
	Group project	K1-K5	13	1-5

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment:

Marks: 50

Duration: 2 hours

THEORY:

Marks: 35

Duration: 1 hour 15 minutes

Section	Knowledge Level	Marks	Pattern
A	K1	7	7×1=7 (All questions to be answered)
B	K2/K2	6	2×3=6 (2 out of 4 questions internal choice)
	K3/K3	6	2×3=6 (2 out of 4 questions internal choice)
C	K4/ K4	6	2×3=6 (2 out of 4 questions internal choice)
D	K5/K5	5	1×5=5 (1 out of 2 questions)
	K6/K6	5	1×5=5 (1 out of 2 questions)

PRACTICALS

Marks: 15

Duration: 45 minutes

Knowledge Level	Marks
K1	2
K2	3
K3	5
K4	3
K5	2

Other Components: All K1 to K6 levels should be assessed

Total Marks: 50

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

END SEMESTER EXAMINATION

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

THEORY

Marks: 75

Duration: 2 hours

Section	Knowledge Level	Marks	Pattern
A	K1	20	10×2=20 (All questions to be answered)
B	K2/K2	10	2× 5=10 (2 out of 4 questions internal choice)
	K3/K3	10	2× 5=10(2 out of 4 questions internal choice)
C	K4/ K4	15	3×5=15 (3 out of 5 questions)
D	K5/K5	10	1×10=10 (1 out of 2 questions)
	K6/K6	10	1×10=10 (1 out of 2 questions)

PRACTICALS

Marks: 25

Duration: 1 hour

Knowledge Level	Marks
K1	5
K2	3
K3	10
K4	5
K5	2

DISEASES AND MANAGEMENT

CODE: 23ZL/UE/DM12

CREDITS: 2

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To study the causation, symptoms and diagnosis of important communicable and non-communicable diseases
- To learn the prevention and management of important communicable and lifestyle diseases

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Gain knowledge about the various diseases that affect humans.	K1
CO2	Identify the causes of occurrences of communicable and non communicable diseases.	K2
CO3	Illustrate preventive measures and techniques to manage the disease condition to prevent further advancement of the disease condition.	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	DISEASES 1.1 Introduction – Classification. 1.2 Principles of Epidemiology - Disease Cycle – Disease Progression. 1.3 Normal Microbiota of The Human Body. 1.4 Vaccines: Types – Immunization Schedule	K1-K2 K1-K2 K1- K3 K1- K3	6	CO 1-3

UNIT	CONTENT	CL	HRS	CO
2	COMMUNICABLE DISEASES AND MANAGEMENT 2.1 Nosocomial and Fomite-Borne Infections. 2.2 Air Borne Diseases: Tuberculosis, Swine Flu and Measles. 2.3 Food and Water Borne Diseases: Hepatitis A, Typhoid and Cholera. 2.4 Sexually Transmitted Diseases: Syphilis, Gonorrhoea and AIDS. 2.5 Zoonotic: Leptospirosis, Dengue Fever and Chikangunya	K1- K3 K1- K3 K1- K3 K1- K3 K1- K3	10	CO 1-3
3	NON-COMMUNICABLE DISEASES AND MANAGEMENT 3.1 Breast Cancer – Cervical Cancer. 3.2 Thyroid Disorders. 3.3 Myocardial Infarction (MI) – Chronic Obstructive Pulmonary Disorder (COPD). 3.4 Diabetes - Gastrointestinal Ulcers (Peptic and Duodenal) Parkinson's Disease.	K2-K3 K2-K3 K2-K3 K2-K3	10	CO 1-3

SYLLABUS

(Effective from the academic year 2023 – 2024)

BAKING TECHNOLOGY

CODE: 23VF/VM/BT26

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To make aware of the scope of the baking industry.
- To develop skills in various baking procedures
- To educate with basic operation and working of various equipment involved in bakery processing.
- To develop with the knowledge and understanding of the raw material used for preparation of various bakery products.
- To perceive knowledge on quality and hygiene standards in a bakery unit.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the science of baking ingredients in improving the quality of bakery products.	K1
CO2	learn the manufacturing techniques of bread, cakes, biscuits, cookies and pastries.	K2
CO3	gain innovative skills in cake decoration and presentation.	K3
CO4	acquire the ability to prepare different types of baked products.	K4
CO5	develop their own bakery unit.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	INTRODUCTION TO BAKING 1.1 Bakery terms, Scope of bakery and confectionary 1.2 Organization chart of Bakery. Art of Baking 1.3 Equipments used in Baking – Ovens, Beater.	K1-K2 K1-K2	6	CO 1-3

UNIT	CONTENT	CL	Hrs	CO
2	ROLE OF DIFFERENT INGREDIENTS IN BAKING 2.1 Flour – Types of flour used in baking, role of flour in bakery. Gluten – Properties of gluten and its function in bakery. 2.2 Shortening / Fat – Types of shortenings / fat used in bakery. Egg – Role of egg in bakery. 2.3 Sugar – Types of sugar, role of sugar in bakery. 2.4 Leavening agent, Gelling agent and Stabilizers – Types their role in bakery.	K1- K4 K1- K4 K1- K4	10	CO 1-5
3	BREADS, CAKES AND PASTRIES 3.1 Bread – Types of breads, method of bread making – straight dough method, delayed salt method, no time dough method, sponge and dough method. Characteristics of good bread – External characteristics – volume, symmetry of shape, Internal characteristics – colour, texture, aroma, clarity and elasticity. 3.2 Cakes – Ingredients used in cake making, cake making method – sugar butter process, flour butter process, genoise method, blending and rubbing method. 3.3 Pastry – Short crust pastry, Jam tart, Lemon curd tart. Choux pastry, chocolate eclairs, profit role cream puff. Puff pastry and flaky pastry.	K2-K5 K2-K5 K2-K5	12	CO 1-5
4	ICINGS, BISCUITS AND COOKIES 4.1 Icings and Topping – Fondant, American frosting, butter cream icing, royal icing, gum paste, marzipan, marsh mallow, lemon meringue, fudge, almond paste, glaze icing. 4.2 Biscuits and Cookies – Plain biscuits, piping biscuits, cherry knobs, langue – de – chats, salted biscuits, nut biscuits, coconut biscuits, melting moment, macroons, chocolate biscuits, marble biscuits, nan – khatai, short bread biscuits, ginger biscuits, cheese biscuits, cream fingers.	K3-K5 K3-K5	12	CO 1-5
5	LAYOUT OF A BAKING UNIT 5.1 Bakery layout – Required liaison for setting up of a bakery – government procedure and bye – laws – selection of site, selection of equipment, layout design and electricity. 5.2 Quality control - Raw material and finished products.	K5-K6 K5-K6	16	CO 1-5

Laboratory Work 1. Preparation of Breads. 1.1 Straight dough method 1.2 Delayed salt method 1.3 No time dough method 1.4 Sponge and dough method. 2. Preparation of Cakes. 2.1 Sugar butter process 2.2 Flour butter process, 2.3 Genoise method 2.4 Blending and rubbing method. 3. Preparation of Pastry. 3.1 Short crust pastry. 3.2 Jam tart. 3.3 Lemon Curd tart. 3.4 Choux pastry. 3.5 Chocolate éclairs. 3.6 Puff pastry 3.7 flaky pastry. 4. Icing and Topping. 4.1 Fondant. 4.2 American frosting. 4.3 Marzipan 4.4 Fudge. 4.5 Glace icing. 5. Preparation of Biscuits 5.1 Plain biscuits. 5.2 Piping biscuits. 5.3 Salted biscuits. 5.4 Coconut biscuits. 5.5 Chocolate biscuits. 5.6 Marble biscuits. 6. Preparation of Cookies 6.1 Nan – Khatai 6.2 Short bread biscuits. 6.3 Ginger biscuits. 7. Cake Decoration. 9. Fondant Preparation. (Demonstration) 10. Preparation of Brownies	K4-K6	22	CO 1-5

PRINCIPLES OF FOOD PROCESSING AND PRESERVATION

CODE: 23VF/VM/PP26

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To provide an understanding of the principles and scope of food processing
- To study about different thermal processes, and their impact on food quality.
- To gain knowledge about the different processing techniques applicable for different foods.
- To know and understand the advanced techniques used in food processing and preservation.
- To gain knowledge about the application of radiation techniques and use of anti-microbial agents in extending the shelf life of the food products.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the scope of food processing and preservation in reducing food spoilage.	K1
CO2	Understand and apply the different principles of food processing.	K2/K3
CO3	Select and examine appropriate methods of preprocessing and processing to improve nutritional quality of the food products	K3/K4
CO4	Apply modern techniques and develop food products with extended shelf life	K3/K6
CO5	Choose or suggest use of environmentally friendly techniques required for processing and preservation of fresh and processed foods	K5/K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction	K1-K2	6	CO1-C02
	1.1 Scope and Importance of Food Processing, Historical Development in Food Processing. Merits and Demerits. 1.2 Basic equipment used for food processing bucket elevators, pulverizes, rotary peelers, conveyers, mixers and types and applications.	K1-K3		
2	Principles of Food Preservation – High and Low temperature (Theory and Practical)		9	CO1-CO5
	2.1 Effect on heat on food components – Gelatinization, Denaturation and coagulation, enzyme inactivation, water removal.	K1-K4		
	2.2 Thermal methods- Sterilization, Pasteurization, Drying-Advantages, Effect of heat on Microorganisms, Thermal death time -concept.	K1-K4		
	2.3 Preservation and processing by low temperature- concept of chilling, air circulation and humidity -importance, Modified and controlled Atmosphere.	K1-K4		
3.	Processing Techniques for different foods (Theory and Practical)		12	CO3-CO5
	3.1 Cereal and Millets: Milling of cereals and millet- wheat products, Structure of gluten, effect of different methods of dough making on gluten, methods to improve nutrient availability in millets.	K1-K6		CO2-CO4
	3.2 Pulses – Decortication and effect of fermentation on pulses, Fermented products of Soya bean – Soya sauce	K1-K4		
	3.3 Nuts –Effect of roasting of nuts and oil seeds, processing of edible oils.	K1-K6		
	3.4 Eggs– Structure and composition, egg quality, egg processing, Application of eggs in food processing.	K1-K5		
	3.5 Meat, fish and poultry processing- Structure and Composition, poultry products, fermented meat products, fish quality and processing.			

UNIT	CONTENT	CL	Hrs	CO
4.	Modern Techniques for processing and preservation 4.1 Extruded food – Principle and Process- hot extrusion and cold extrusion, Advantages 4.2 Application of extrusion for pasta products manufacture. 4.3 Texturized Vegetable Protein, Extracted Soya bean Protein	K1-K3 K1-K4 K1-K3	7	CO4-CO5
5.	Methods of Preservation using radiation, antimicrobial agents 5.1 Kinds of radiation- Microwave, U.V, Solar, Ionizing- principle and their application in food processing, Safety aspects. 5.2 Use of anti-microbial agents in enhancing preservation- natural and synthetic. LABORATORY WORK 1. Effect of moist heat and dry heat on starches and sugars. 2. Denaturation and coagulation of egg protein. 4. Role of eggs – Foaming, emulsifying. 3. Structure of gluten – effect of dough making methods. 4. To study the gluten content in flours 5. Effect of fermentation on cereal and Pulses. 6. Effect of Roasting on nuts 7. Impact of heat in inactivation of enzymes 8. Effect of drying techniques. 9. Method to reduce antinutritional factors in millets.	K1-K2 K1-K5 K2-K6	5 39	CO1-CO5 CO1-CO5

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
FOOD PROCESSING AND QUALITY CONTROL**

SYLLABUS

(Effective from the academic year 2023 – 2024)

BASIC NUTRITION

CODE: 23VF/VA/BN25

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the study on food groups, nutrition & its interrelationship with health.
- To provide knowledge on nutrient utilization in the body.
- To give an understanding of macronutrients, equip students on the usage of food guide to calculate nutritional value of foods.
- To help students understand the role of minerals in health and disease.
- To help gain knowledge on vitamins their role in disease prevention and understand the effect of processing.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Explain with clarity the basic concepts of Nutrition, Nutrients, Food Groups and their relationship to health and disease.	K1
CO2	Describe the role and importance of nutrients in human health	K2
CO3	Apply the knowledge on nutrients and energy for management of nutritional deficiencies.	K3
CO4	Examine and Identify food sources of nutrients and calculate nutritional composition for food products to include in pre packed food labels.	K4
CO5	Critically evaluate a meal/product for its wholesomeness in nutrition and suggest ways to balance nutrients while formulating healthy food products.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Nutrition 1.1 Introduction to Nutrition – Definition of Nutrition and Nutrients, interrelationship between Nutrition and Health 1.2 Basic food groups (4,5 &7) and use, Classification/functions of foods – Energy Yielding, Body building, Protection and Regulation, and Maintenance foods 1.3 Indian Food Composition Table (IFCT) – Use & Calculation of macronutrient content for meal/menu labeling 1.4 Role of Water in Nutrition, water balance, effect of deficiency	K1- K3 K1- K5 K2-K5 K1- K4	12	1-5
2	Macro nutrients -1 2.1 Uptake of food in the body – Digestion, factors affecting Absorption, Metabolism, & Storage 2.2 Energy – Unit, Sources, Energy value of food, RDA, Calculation of energy input, output and Balance, BMR and factors affecting BMR 2.3 Carbohydrates –Sources, Functions, RDA,Digestion, & metabolismStorage. Fibre, Types & Importance of Fibre	K1- K3 K3 – K5 K1 – K2	15	1-5
3	Macronutrients – 2 3.1 Proteins –Sources (including uncommon sources), Nutritional Importance, Protein Quality, RDA, Digestion 3.2 Fats Sources, Daily Requirement, Functions, RDA, Digestion	K1-K4 K1-K3	15	1-5
4	Micronutrients – Minerals 4.1 Sources, Functions, bio-availability of Macrominerals- Calcium, Iron, Micro minerals- Iodine, Fluorine, Sodium, Potassium 4.2 Effect of Deficiencies of the above minerals, their symptoms and remedial measures	K1-K3 K1 – K4	12	1-5
5	Vitamins 5.1 Fat soluble vitamins-A, D, E & K – Sources, Functions, Deficiency, effect of cooking 5.2 Water soluble vitamins - Ascorbic Acid, Thiamine, Riboflavin, Niacin – Sources, Functions, Deficiency, effect of cooking	K1- K5 K1-K5	11	1-5

BANKING PRACTICES

CODE: 23CM/UE/BP22

CREDITS: 2

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To educate the students on the banking services
- To provide an opportunity to understand the significance of E-banking services.
- To acquire knowledge on negotiable instruments

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	To understand the opening and closing of bank accounts	K1
CO2	Identify the various E-banking services	K2
CO3	Comprehend knowledge on negotiable instruments	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	CUSTOMERS' ACCOUNTS WITH THE BANK 1.1 Opening of Bank Accounts. 1.2 Different Types of Bank Accounts. 1.3 Documents Relating to Transactions with Bank. 1.4 Closing of Bank Accounts	K1-K3	6	CO 1-3
2	E- BANKING 2.1 Meaning and Importance. 2.2 Credit Card, Debit Card, Smart Card. 2.3 Internet Banking – Services and Major Issues. 2.4 ATM – Concept, Features and Importance. 2.5 Mobile Banking and Telebanking	K1-K3	10	CO 1-3
3	NEGOTIABLE INSTRUMENTS 3.1 Meaning, Characteristics. 3.2 Types of Negotiable Instruments 3.2.1 Cheque – Requirement of a Cheque. 3.2.2 Post-dated Cheque, Stale Cheque, Ante-dated Cheque. 3.2.3 Crossing- Meaning, Types and Significance. 3.2.4 Endorsement- Types and Significance	K1-K3	10	CO 1-3

CREDITS: 2

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To equip students with competencies to achieve personal and academic excellence
- To raise confidence levels

Unit 1

Self Awareness

(5hrs.)

- 1.1. Knowing One's Strengths and Weaknesses
- 1.2. Self-esteem and Self-worth

Unit 2

Work place Behavioural Training

(6hrs.)

- 2.1 Listening Skills
- 2.2 Interpersonal Skills
- 2.3 Team Work and Group dynamics
- 2.4 Personal Effectiveness
- 2.5 Creative Thinking

Unit 3

Planning Ahead

(5hrs.)

- 3.1 Time Management
- 3.2 Goal Setting

Unit 4

Career Mapping

(5hrs.)

- 4.1 Concept of Career
- 4.2 Career Options
- 4.3 Choice of Right Career

Unit 5

Adaptability Skills

(5hrs.)

- 5.1 Working independently
- 5.2 Working as a team
- 5.3 Multi-tasking
- 5.4 Innovation
- 5.5. Adapting to Change and Criticism

PATTERN OF EVALUATION

DAIRY PROCESSING

CODE: 23VF/VM/DP36

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To acquire the skills for processing different dairy products in an industry
- To understand the technology of dairy products.
- To be able to handle dairy equipment and machineries during production
- To observe food safety , quality and hygiene standards as dairy product processor

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand basic properties, processing, storage and sanitization techniques to be carried out during the production of milk and milk based products.	K1, K2
CO2	Apply the acquired knowledge to supervise the manufacturing of milk and other dairy products	K3
CO3	Assist in conducting quality and safety inspection in a dairy plant	K4
CO4	Analyze physical, chemical and biological constituents to evaluate quality of dairy products.	K5
CO5	Pursue entrepreneurial skills to manufacture indigenous products and develop new dairy based products.	K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

UNIT	CONTENT	CL	Hrs	CO
1	Milk 1.1 Composition: Milk constituents - Composition of milk from different species, colostrum, factors affecting physico chemical properties , composition and nutritive value 1.2 Milk fat , milk protein, whey protein, milk sugar, milk ash, cream, butter, cheese, ice cream, skim milk, condensed milk 1.3 Quality of milk: Grading, sensory evaluation, common milk-borne diseases, spoilage, causes and prevention, adulterants and their detection	K1-K4 K2-K5 K1-K5	6	1-4
2	Production of direct Milk products (Theory and Practicals) 2.1 Chilling methods in the production of Milk and different types of milk: Condensed milk, standardized milk, Toned milk, homogenized milk and Evaporated milk, definition and properties 2.2 Cream separation: objective, principle, method, equipment and efficiency testing 2.3 Pasteurization and Sterilization: HTST pasteurization, objective, principle, method, equipment and efficiency testing. Homogenisation and Clarification	K1-K6 K2-K5 K1-K5	10	1-2
3	Production of Dairy products (Theory and Practicals) 3.1 Traditional Dairy Products: Khoa, Kulfi, Paneer, Ghee and Butter 3.2 Fermented dairy products- probiotics: Yogurt, Cheese 3.3 Ice cream, Milk powder, Whey, Casein, chocolates and Frozen desserts	K1-K6 K1-K6 K3-K6	6	1-5
4	Maintenance of Dairy Plants 4.1 Cleaning and Sanitization structure and layout of Dairy industry 4.2 Types of dairies: Single product dairy and Composite dairy plant 4.3 Design, layout and location of dairy plant. Observation of a of model dairy plants	K1-K6 K1-K3 K2-K6	8	1-5
5	Post production processes 5.1 Packaging of milk products, By-products of dairy industry 5.2 Effluent treatment and waste disposal in dairy industry 5.3 Documentation in a dairy plant.	K2-K3 K1-K2 K1-K2	9	1-4

	LABORATORY WORK 1. Quality testing for raw milk- Sensory, specific gravity, acidity, COB, MBRT. 2. Testing of Raw milk for presence of adulterants- starch, water, added sugar 3. Standardization of milk. 4. Preparation of indigenous milk products and evaluation of products i) Khoa and types ii) Paneer iii) Kulfi iv) Shrikhand 5. Preparation and evaluation of sweetened condensed milk and evaporated milk. 6. Preparation and evaluation of cheese 7. Preparation of butter using traditional method. 8. Preparation and evaluation of Ice cream. 9. Preparation and evaluation of Milk Chocolate.	K2-K6	39	1-5

SENSORY EVALUATION WITH LABORATORY WORK

CODE: 23VF/VM/SE36

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To gain knowledge about sensory evaluation
- To understand the importance of sensory evaluation in food quality.
- To be able to apply the different sensory methods for product evaluation
- To analyze the sensory data and apply the outcomes for product enhancement.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Know about sensory characteristics of different food products and importance of sensory evaluation.	K1
CO2	Understand the concepts related to new product development and the role of sensory analysis to enhance the product quality.	K2
CO3	Apply the different subjective and objective methods of sensory evaluation to existing food products and new formulations.	K3
CO4	Evaluate the products using sensory test and analyze the obtained data.	K4
CO5	Design a sensory lab protocol suitable for the product evaluation and develop new products with scientific product prototype description.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	SENSORY PERCEPTIONS 1.1 Definition and importance of sensory evaluation, perceptions of taste, smell, visual and texture of foods, interactions between these perceptions. Recognition test for the four basic tastes, taste modifiers 1.2 Interactions between colour, flavour and texture, Flavors- Classification of food flavours, Off flavours -presence and development. 1.3 Sensory threshold- concept and types- detection, difference, terminal threshold. 1.4. Basic requisites for conducting sensory analysis – objectives, types of panels, recruitment and training of panel, testing environment, testing time and laboratory features for sensory analysis.	K1-K2 K1-K3 K1-K3	9	1,2
2	NEW PRODUCT DEVELOPMENT 2.1 Need for new food products, idea generation- basis., product development cycle. 2.2 Market research- concept and requirement, methods to perform market survey. 2.3 : Standardization of product, method validation, reliability. Scaling up of the product- methods. Downscaling- concept and requirement. 2.3.1 Product improvements – existing, need for improvement, methods, case studies. 2.3.2 Cost calculation, marketing strategies.	K1-K6 K1-K6 K1-K6 K1-K5 K1-K4	8	1-5
3	SUBJECTIVE AND OBJECTIVE METHODS OF EVALUATION 3.1 Objective methods and sensory methods of evaluation- concept, differences. 3.2 Objective methods of measuring sensory characteristics of food – colour, flavor and texture 3.3 Classification of textural characteristics, glossary of textural terms, concept of rheology and its importance in texture studies. 3.4 Flavour and aroma, definition of flavour, Glossary of flavour terms. Colour and Visual perception of foods.	K1-K3 K1-K3 K1-K3 K1-K3	9	1-4
4	SENSORY TESTING OF FOODS 4.1 Consumer surveys, acceptance testing , Sensitivity – Threshold tests 4.2 Difference tests – Paired comparison, Duo-trio test, Triangle test 4.3 Ranking tests – Two sample difference test, Multiple sample difference tests 4.4 Scoring tests – Numerical and composite scoring	K3-K6	6	1-5

NUTRITION THROUGH LIFE CYCLE

CODE: 23VF/VA/NL35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To learn about the nutritional needs of various age groups.
- To provide an understanding of the basics of menu planning.
- To enable them to plan a menu.
- To acquire knowledge on physiological changes in various stages of life cycle.
- To equip the students to formulate diets based on dietary guidelines.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Identify national nutritional guidelines for various life stages.	K1
CO2	Describe physiological changes in various stages of life cycle.	K2
CO3	Articulate nutritional care plan for all age groups	K3
CO4	Correlate nutritional strategies to combat the nutritional problems.	K4
CO5	Plan menu according to nutritional requirements of different age group.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	INTRODUCTION TO BALANCED DIET AND MENU PLANNING: 1.1 Introduction to balanced diet and basic food groups 1.2 Nutritional food guide – Food Pyramid, My Plate, Food exchange list 1.3 Menu planning- steps and factors affecting menu planning. 1.4 Recommended dietary allowance – reference man and reference women	K1-K3 K2-K3 K2-K3 K2-K3	10	CO 1-5
2	NORMAL DIET AND DIET IN SPECIAL NEEDS: 2.1 Normal Diet – Diet for different age groups. 2.2 Nutrition in special needs – Pregnancy and lactation. 2.3 Planning of diets for pregnant and lactating women.	K1-K4 K1-K4 K2-K6	15	CO 1-5
3	NUTRITIONAL REQUIREMENTS IN INFANCY, CHILDREN AND ADOLESCENTS: 3.1 Requirements and sources of food for infants. 3.2 Changing needs for growing children and adolescents. 3.3 Nutritional problems associated with adolescents –Anemia, Bulimia and Obesity. 3.4 Relevance of packed lunch for children and adolescents.	K2-K5 K2-K5 K2-K5 K2-K5	15	CO 2-5
4	NUTRITIONAL REQUIREMENTS IN ADULTHOOD AND OLD AGE: 4.1 Nutritional requirements during adulthood. 4.2 Health complications associated with Geriatrics. 4.3 Nutritional needs and dietary modifications in old age.	K2-K5 K2-K5 K2-K6	12	CO 2-5

ENVIRONMENTAL STUDIES

CODE: 23VF/UC/ES32

CREDITS : 2

L T P : 2 0 0

TOTAL TEACHING HOURS : 26

OBJECTIVES OF THE COURSE

- To create an awareness about current environmental issues
- To educate students on conservation and management of natural resources
- To encourage students to be ecosensitive and ecofriendly

Unit 1

Introduction

6hrs.)

- 1.1 Components of the Environment – Classification and Characteristics of Resources – Renewable and Non – Renewable Resources
- 1.2 Need for Public Awareness in Conservation of Natural Resources
- 1.3 Energy Flow in Ecosystems – Aquatic and Terrestrial – Food Chain and Food Web

Unit 2

Pollution and Socio Economic Aspects of the Environment

(10hrs.)

- 2.1 Types of Pollution – Air, Water, Solid Waste, Noise
- 2.2 Problems - Green House Effect – Depletion of the Ozone Layer – Climate Change
- 2.3 Bio Diversity - Definition - Loss of Bio Diversity – Threats to Biodiversity and Conservation of Biodiversity
- 2.4 Human Behaviour: - Population – Urbanization – Poverty (As Cause and Result of Pollution and Degradation)
- 2.5 Technology: Agriculture and Industry – Deforestation. Misuse and Abuse of the Resources
- 2.6 Effects and Consequences of Environmental Problems

Unit 3

Sustainable Development, Remedies and Policy Implications

(10 hrs.)

- 3.1 Environmental Disasters Natural and Human Made – Bhopal Gas Tragedy – Chernobyl Accident – Fukushima Nuclear Crisis - Gulf War – Love Canal Episode – Tsunami – Volcanic Eruptions
- 3.2 Methods Evolved to Measure and Check Environmental Degradation and Pollution – Carbon Footprint, Carbon Credit, Ecological Footprint, and Ecological Shadow
- 3.3 Environmental Movements in India – Chipko Movement, Narmada Bachao Andolan, Sethu Samudram Project
- 3.4 Environmental Acts – Policy Measures with respect to India
- 3.5 International Environmental Agreement – Stockholm Conference – Montreal Protocol – Rio Meet – Kyoto Conference – UN Conference on Climate Change (Copenhagen)

Field visit

Eco initiatives at the campus: Garbage Segregation and Vermicomposting – Greywater Recycling – Rainwater Harvesting – Solar Powered Lights – Biodiversity

Continuous Assessment: (Totally internal)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
FOOD PROCESSING AND QUALITY CONTROL**

SYLLABUS

(Effective from the academic year 2023 – 2024)

FOOD ANALYSIS AND INSTRUMENTATION - I

CODE: 23VF/VM/FI46

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To provide an understanding of the chemical function and properties of major food components.
- To provide an understanding of the chemical interactions of food components, nutritional quality, functional properties and safety of foods.
- To familiarize with the preparation and sampling of food products and conventional methods of food analysis.
- To give an understanding on the laboratory chemical methods used in the analysis of food with a focus on dairy products.
- To be able to evaluate and explain how the highly complex nature of food may result in a multitude of desired and undesired reactions which are controlled by variety of foods.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Gain knowledge regarding different method of analysis would make them skillful for analytical work in research and food industry.	K1
CO2	Comprehend fundamentals of qualitative and quantitative analysis.	K2
CO3	Analyse techniques of various food component.	K3
CO4	Examine the applications of different analytical tools which are used in food industry.	K4
CO5	Make their career in quality control labs in food industry.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	PH AND BUFFERS (THEORY AND PRACTICALS) 1.1 Water activity and its significance in food quality. 1.2 Preparation of solutions, percentage by weight, volume, strength, normality, molarity, ppm, ppb, serial dilution and buffers. 1.3 pH meter – Principle, parts, procedure, types, uses and examples.	K1-K3 K2-K5 K1-K4	6	CO 1-5
2	DETERMINATION OF CARBOHYDRATES AND PROTEINS (THEORY AND PRACTICALS) 2.1 Simple classification of carbohydrates – monosaccharides, disaccharides and polysaccharides. 2.2 Physico – chemical properties and reactions of monosaccharides, disaccharides and polysaccharides. Non – enzymic browning. Modified food starch. 2.3 Simple classification of proteins, Protein Denaturation - Theory of denaturation. 2.4 Amino acids – Physico – Chemical properties of amino acids, Classification of amino acids, Chemical reactivity of amino acids – Reaction with ninhydrin and other reactions.	K1-K4 K1-K5 K1-K4 K1-K5	6	CO 1-5
3	CHARACTERIZATION OF OILS AND FATS (THEORY AND PRACTICALS) 3.1 Simple classification of lipids – Simple, Compound and Derived. 3.2 Fats and Oils – Saturated, Unsaturated and Essential fatty acids. 3.3 Characterization of fats and oils – Water content, Density, Refractive index, Melting point, Solid – Liquid ratio, Titre, Colour, Iodine value, Acetyl value, Acid value, Saponification value, Reichert – meissl value..	K2-K5 K1-K4 K1-K4	10	CO 1-5
4	VITAMIN ANALYSIS (THEORY AND PRACTICALS) 4.1 Estimation of vitamin C in lime/gooseberry/sweet lime. 4.2 Extraction and estimation of Vitamin E in curry leaves. 4.3 Extraction and estimation of carotenes in carrot / papaya	K2-K5 K6 K2-K5	9	CO 1-5

UNIT	CONTENT	CL	Hrs	CO
5	ANALYSIS OF MILK AND MILK PRODUCTS (THEORY AND PRACTICALS) 5.1 Analysis of milk: specific gravity, fat content (Gerber's method), lactose content (volumetric). 5.2 Analysis of condensed milk: Total solids, sucrose, lactose / fructose. 5.3 Analysis of cheese: water content, fat content, ash content, salt content. 5.4 Analysis of butter and curd.	K2-K5 K5 –K6 K5 –K6 K5 –K6	8	CO 1-5
	LABORTAORY WORK 1. Estimation of pH in beverages. 2. Estimation of acetic acid in vinegar. 3. Reactions of carbohydrates – monosaccharides. 4. Reactions of carbohydrates – disaccharides. 5. Reactions of amino acids. 6. Quantitative analysis of carbohydrates – Estimation of glucose by Benedict's Method. 7. Qualitative analysis of proteins (casein and egg albumin). 8. Extraction and estimation of starch. 9. Extraction and estimation of casein. 10. Extraction and estimation of egg albumin. 11. Estimation of acid number in oils/ butter. 12. Determination of saponification value in oils and fats. (Demonstration) 13. Determination of iodine value in oils and fats. 14. Determination of peroxide value in oils and fats. 15. Estimation of vitamin C in lime/gooseberry/sweet lime. 16. Extraction and estimation of Vitamin E in curry leaves. 17. Extraction and estimation of carotenes in carrot / papaya. 18. Specific gravity, fat content and lactose content of milk. 19. Analysis of condensed milk: Total solids, sucrose, lactose / fructose. (Demonstration). 20. Analysis of cheese: water content, fat content, ash content, salt content. (Demonstration). 21. Analysis of butter and curd. (Demonstration).	K2-K6	39	CO 1-5

FOOD LAWS AND FOOD SAFETY

CODE: 23VF/VM/FF46

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE:

- To give them a clear understanding about the concepts and components of food safety
- To provide a deep understanding of the FSS Act and a few salient regulations governing food safety
- To introduce to the students different laws and regulations impacting food safety
- To highlight the concept and prevalence of food adulteration and teach them skills to identify adulterants
- To acquaint students to the various additives used for specific purposes in food products

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Remember and recall various food laws and regulations applicable for food safety	K1
CO2	Identify specific regulations and laws to be followed and apply it for different purposes pertaining to food safety rights	K2,K3
CO3	Conduct home scale and lab scale tests to examine foods for detection of adulterants, additives	K4
CO4	Evaluate the compliance of foods to standards and report on the safety of the food produced.	K5
CO5	Design the process flow for drafting Sanitation standard operating procedures, HACCP plan, suggest the use of suitable additives while formulating new products.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Food Safety 1.1 Meaning & Concept of food safety – Physical, Microbial, Chemical, Nutritional 1.2 Awareness about pesticide residues and heavy metals in food 1.3 Origin of Food laws in India	K1- K2 K1-K2 K1- K2	7	1-2
2	Food additives 2.1 Definitions of Food Additives, Classification and Functions 2.2 Legitimate uses of Additives in foods, Intentional and Non Intentional additives 2.3 Additives such as preservatives (Class I and Class II preservatives as per FSSAI, antioxidants, emulsifiers, sequesterants, humectants, stabilizers enzymes as food processing aids 2.4 Health effects of food additives	K1-K5 K1- K5 K1-K6 K1-K6	7	1- 5
3	Food Adulteration 3.1 Definition, causes and effects of adulteration 3.2 Common Adulterants in food - Chicory and starch in Coffee Powder, Non permitted Colours in Tea and Dhalsm, Jams, Jellies, Juices, Metanil yellow in Turmeric powder and Kesari Powder, Papaya seeds and rotten pepper in Pepper, Brick powder in Chilli Powder, Washing soda in Jaggery, Vanaspathi in Ghee, Chalk Powder in Salt and Saccharin in Supari 3.3 Rapid detection tools – Detect adulteration with Rapid test (DART)	K1-K3 K1-K6 K1-K6	8	2-4
4	Food Safety Regulation Food Laws – FSS Act 4.1 Food Safety and Standards Act (FSS) 2006 – History (PFA, FPO Acts etc), Principles, Responsibility enforcement, offences & penalties 4.2 FSSAI – laws & Regulation – Licensing & Registration (2011), Additives 4.3 FSSAI- Nutraceuticals/functional food (2016), Food Recall (2017), Packaging and Labelling (2011) 4.4 FSSAI – Import export regulations, Quarantine procedures	K1- K3 K1- K3 K1- K5 K1- K4	8	1-4
5	Food Laws and Regulatory bodies 5.1 BIS Act, Essential Commodities Act, Consumer Protection Act, Agricultural Produce Act (AGMARK) 5.2 Basic Prerequisites – GHPs, GMPs, SSOPs 5.3 HACCP – Concept and importance in food industry, Principles, Implementation of HACCP in Fruit/Vegetable, fermented food, Dairy, Bakery & meat processing industry	K1- K4 K1 – K6 K1-K6	9	1- 5

UNIT	CONTENT	CL	Hrs	CO
	LABORATORY WORK <ol style="list-style-type: none"> 1. Study of sampling techniques from food processing establishments. 2. Estimation of Physical Impurities in Foods 3. Detection of adulterants in Turmeric powder & Chili powder 4. Detection of sodium carbonate in Flours, Sugar, Jaggery 5. Detection of adulterants in milk and milk products 6. Detection of adulterants in ghee, oils 7. Rancidity tests in Fats – Peroxide value 8. Determination of Iodine value in oils 9. Determination of moisture content of packed foods 10. Determination of titratable acidity of packaged foods 11. Report of Project on food safety evaluation in foods sold in the locality 12. Detection of synthetic colours in colored foods 13. Calculation of additive concentration in foods Demonstration/ Optional <ol style="list-style-type: none"> 14. Estimation of Sodium benzoate in processed foods 15. Demonstration of Household methods of detecting adulterants 16. IMVic Test 17. Visit to food analysis lab 	K1-K5	39	1-5

FLAVOUR CHEMISTRY AND TECHNOLOGY

CODE: 23VF/VE/FL45

CREDITS: 5

L T P: 5 0 5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the science behind the art of flavouring foods, their analysis and the problem of off-flavours
- To obtain knowledge of flavours for specific applications and legal aspects on use of flavours in food products
- Differentiate different classes of flavor compounds, their flavors, sources and interactions in foods.
- Classify different methods of flavor trapping, isolation and application.
- Communicate different methods of analysis for identification of flavor compounds and compare their applications, advantages and disadvantages.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Know about the types of flavours and their sources.	K1, K2
CO2	Understand the methods of flavour production, extraction, flavour formulation and identification of presence of off flavours.	K2
CO3	Apply flavour formulations to different processed food product.	K3
CO4	Analyse flavour formulations to their purity using subjective, objective and sensory methods of evaluation.	K4
CO5	Select a flavour formulation suitable for a particular products and create new flavour combinations.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	INTRODUCTION 1.1 Sources of flavours (natural, processed and added) 1.2 Flavour composites (natural, semi-synthetic and synthetic) 1.3 Biogenesis of flavours in food – natural and processed foods (Maillard reaction and Lipid Oxidation) 1.4 Chemicals in flavours	K1-K2 K1-K2 K1-K3 K1-K3	10	1 -3
2	FLAVOUR TECHNOLOGY 2.1 Types of flavours, 2.2 Flavours generated during processing – reaction flavours, flavour composites, 2.3 Stability of flavours during food processing 2.4 Spices and spice-based products as flavours	K1-K3 K1-K4 K1-K4 K1-K4	14	1-3
3	FORMULATIONS 3.1 Formulations of flavours, adulteration, Flavour emulsions 3.2 Flavours production in fermented foods, Off-flavours in foods 3.3 Extraction techniques of flavours, flavour emulsions; essential oils and oleoresins	K1-K4 K1-K4 K1-K4	12	1-4
4	ANALYSIS 4.1 Analysis of flavours – subjective and objective 4.2 Analysis of different types of flavours such as whole and powdered spices and essential oils 4.3 Plantation crops as flavours tea, coffee, cocoa and vanilla	K1-K4 K1-K4 K1-K4	17	2-4
5	EVALUATION 5.1 Sensory evaluation of flavours, flavours and legal issues 5.2 Monitoring flavours during food processing 5.3 Authentication of flavours Industrial visit to flavour industry	K1-K5 K1-K5 K1-K5	12	1-5

FOOD PACKAGING

CODE:23VF/VE/FP45

CREDITS: 5

L T P: 5 0 5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint the students with packaging methods,
- To be aware of the types of packaging materials and packaging machineries and techniques
- To be acquainted with the quality tests required for the packaging material
- To develop environment friendly packaging materials.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Know about the importance of food packaging responsible for extending shelf life.	K1, K2
CO2	Understand the types of packaging material utilized for food packaging	K2, K3
CO3	Select appropriate packaging material required for different types of foods.	K4
CO4	Evaluate the packaging material for quality parameters.	K5
CO5	To develop environmentally friendly food packaging material using natural materials, and edible in nature.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Packaging 1.1 Definition, Need and History of food packaging. 1.2 Objectives and functions of packaging and packaging materials 1.3 Types of packaging- Primary, Secondary and Tertiary, packaging requirements	K1-K2 K1-K2 K1-K3	10	CO1 - CO3
2	Packaging Materials 2.1 Paper: corrugated fiber board, flexible laminates; Glass containers, types of closures, Metals: Tin plate containers, Tin Free Steel (TFS), types of Cans, Aluminum Containers 2.2 Plastics: types of plastic films, laminated plastic materials, edible films, biodegradable plastics BPA in plastics	K1-K3 K1-K3	14	CO1- CO3
3	Properties of packaging materials 3.1 Tensile strength, bursting strength, tearing resistance, puncture resistance, 3.2 Impact strength, tear strength; migration test, Barrier properties – factors affecting permeability, permeability coefficient, gas transmission rate (GTR) and its measurement, water vapour transmission rate (WVTR) and its measurement; 3.3 Prediction of Shelf life of foods, selection and design of packaging material for different foods	K1-K4 K1-K4 K1-K4	12	CO1- CO4
4	Packaging of food products 4.1 Food packaging systems: Different forms of Packaging such as rigid, semi rigid, flexible forms 4.2 Packaging system for dehydrated foods, frozen foods, dairy products, fresh fruits and vegetables. 4.3 Packaging of Meat, Poultry and Sea Foods.	K1-K2 K1-K3 K1-K3	17	CO2- CO4
5	Packaging equipment 5.1 Packaging equipment Vacuum, CA and MA packaging equipment; gas packaging equipment 5.2 Seal and shrink-packaging; form and fill sealing; Aseptic packaging systems; bottling; carton making 5.3 Recent trends in Packaging-Packaging material from plant sources-Nano particles in food packaging, edible films, biodegradable packaging.	K1-K2 K1-K2 K1-K6	12	CO1- CO5

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
FOOD PROCESSING AND QUALITY CONTROL**

SYLLABUS

(Effective from the academic year 2023–2024)

INTRODUCTION TO COMPUTER SKILLS

CODE: 23CS/US/IC44

CREDITS: 4

L T P: 2 0 2

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To introduce word processing.
- To provide the students understanding of spreadsheets.
- To equip the students with skills and knowledge necessary to create a presentation.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the tools and techniques in word, spreadsheet and presentation	K1
CO2	explain the options available in word processing, spreadsheet and presentation	K2
CO3	apply the techniques in creating a document, spreadsheet and presentation	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	Word Processing Text Editing, Text tools, Character and paragraph formatting, Tabs and lists, Using Tables, Mail Merge, Working with objects – Word Art, Clip Art, Pictures, Built-in and custom styles, Table of contents, Templates, Securing documents. Tool: MS-Word	K1-K3	10	CO1-3
2	Spreadsheet Data entry, Using formulae and functions, Formatting data, Creating charts, Lists, Sorting, filtering, Working with forms, Grouping, Linking and Protecting sheets, Data Validation, Printing spreadsheets. Tool: MS-Excel	K1-K3	8	CO1-3

UNIT	CONTENT	CL	HRS	CO
3	Presentation Creating slides, Using bullets, Formatting slides, Including word art, Slide templates, Drawing tools, Selecting and grouping objects, Viewing slides and handouts, Transitions, Spell check, Master Slide, Rehearse timings, Adding sound. Tool: MS-PowerPoint	K1-K3	8	CO1-3
4	Word Processing and Spreadsheet – Practicals 4.1 Create an Application with different formatting styles.. 4.2 Create Tables, using different formatting styles. 4.3 Create word documents implementing Clip art, Word art and Auto shapes. 4.4 Create Spreadsheets with various formatting styles. 4.5 Create Spreadsheet to include formula and implement the same using different graphs and charts. 4.6 Create a spreadsheet that incorporates data validation.	K1-K3	16	CO1-3
5	Presentation 5.1 Create a presentation that displays a clear, logical sequence. 5.2 Create a presentation that incorporates animations. 5.3 Create bulleted slides and slides that incorporate word art. 5.4 Create a presentation that incorporates drawing tools	K1-K3	10	CO1-3

(Effective from the academic year 2023 – 2024)

COMMUNITY NUTRITION

CODE: 23VF/VM/CN56

CREDITS: 6

L T P: 6 0 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To enable students to understand community nutrition status in India.
- Gain knowledge on fortification of foods and National effort in ensuring nutrition for all.
- Understand the process of fortification.
- To provide awareness on the National Nutritional Programme to combat nutritional disorders.
- To provide better understanding of public health nutrition with a focus placed on the importance of building a sustainable, nutritious and healthy food supply for all.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Understand the significance and scope of public nutrition.	K1
CO2	Identify the needs of the community and develop programmes.	K2
CO3	Conduct household food security assessments using food security scales.	K3
CO4	Apply nutrition intervention programmes to overcome epidemic of communicable and non-communicable diseases.	K4
CO5	Analyze and apply research findings for the use of societal needs and contribute to nation building strategies.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	COMMUNITY HEALTH 1.1 Definition and brief study of community, family, village and block Demography, Core functions and scope of community nutrition. 1.2 Malnutrition – Causes, Ecological factors, Effects of malnutrition – Effects of under and over nutrition. 1.3 Protein deficiency disorders – PEM, Kwashiorkor, Marasmus – incidence, prevalence and epidemiology	K1-K3 K1-K3 K1-K3	15	1-5
2	ASSESSMENT OF NUTRITIONAL STATUS 2.1 Indirect methods – Indicators of Health and Nutrition (<i>Infant Mortality Rate</i> - IMR, <i>Total Mortality Rate</i> - TMR, <i>Maternal Mortality Rate</i> - MMR). 2.2 Direct methods – a) Anthropometry, b) Biochemical and c) Clinical methods. 2.3 d) Dietary methods - nutrient intake analysis, dietary assessment in special populations and specific situations, dietary reference intakes, associations with nutrient deficiencies	K1-K4 K1-K4 K1-K4	15	1-5
3	ASSESSING FOOD AND NUTRITION SECURITY 3.1 Definition and assessment schedules, National and Household Food Security. 3.2 Factors affecting Food Security System. 3.3 National and International systems to improve food security FAO, CARE, NIPCCD, NIN, CFTRI, FCI, Their roles and functions ICDS, NNACP, National IDD control Program, Mid Day meal schemes.	K2-K5 K2-K5	17	1-5
4	FOOD FORTIFICATION 4.1 Food fortification – Needs, objective, characteristics of Fortificants and method of fortification. 4.2 Fortification of bread, noodles, biscuits, breakfast cereals, snacks and beverages. 4.3 Fortification with Iron, Vitamin A, Vitamin D and Iodine.	K2-K5 K2-K5 K2-K5	18	1-5
5	FORMULATION OF FORTIFIED FOODS 5.1 Preparation of nutritious health mixes. 5.2 Preparation of Iron rich diet, high protein diet. 5.3 Preparation of dehydrated processed foods using indigenous food. 5.4 Preparation of Low cost weaning foods. 5.5 Identification of vulnerable women and children – Using direct nutritional assessment methods.	K4 –K5 K4 –K5 K4 –K5	13	1-5

FOOD ANALYSIS AND INSTRUMENTATION - II

CODE: 23VF/VM/FI56

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To familiarize with detail principle, instrumentation, operation and applications of molecular spectroscopic techniques (Colorimeter, UV – VIS and IR).
- To categorize and understand the principle behind various separation techniques (Chromatography) and their instrumentation.
- To differentiate between principle, instrumentation and operation of flame photometer, refractrometer and viscometer.
- To familiarize with the conventional analysis of food products for quality control in food industry, their role on nutritional labeling.
- To understand fundamentals of qualitative and quantitative analysis concept.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recognize the importance of wavelength / emission spectrum in spectro – analytical instruments.	K1
CO2	Carry out comparative analysis of given sample with standard sample using chromatographic instruments.	K2
CO3	Examine and determine the properties and concentration of a given sample using flame photometer, refractrometer and viscometer.	K3
CO4	Describe the testing and calibration method for various analytical instruments.	K4
CO5	Acquire analytical instrumentation knowledge on collection and analysis of data for implementing small in – house projects.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	SPECTROSCOPIC TECHNIQUES (THEORY AND PRACTICALS) 1.1 Principles of colorimetry and spectrophotometry. Instrumentation / working of UV/Vis Spectrophotometer (block diagram). 1.2 Estimation of iron, Estimation of Vitamin A 1.3 Estimation of Cholesterol 1.4 Determination of Total Carbohydrates in Foods Colorimetrically – Anthrone and DNS method.	K1-K3 K1-K3 K1-K3 K1-K4	6	CO 1-5
2	CHROMATOGRAPHY (THEORY AND PRACTICALS) 2.1 Principle, theory and applications of Chromatographic techniques, application in food industry. 2.2 Separation and identification of amino acids / sugars by paper chromatography Separation of carotenoids by Thin layer chromatography / column chromatography 2.3 Principle, instrumentation and applications of GC, HPLC.	K1-K4 K1-K4 K1-K4	6	CO 1-5
3	TECHNIQUES FOR ESTIMATION OF MINERALS (THEORY AND PRACTICALS) 3.1 Principle and instrumentation of Flame photometry. 3.2 Estimation of calcium, sodium and phosphorus by Flame photometry. 3.3 Refractometry and Viscometry –Determination of refractive index using Abbe's refractometer.	K2-K5 K2-K5	10	CO 1-5
4	MISCELLANEOUS METHODS (THEORY AND PRACTICALS) 4.1 Thermal methods in Food analysis 4.2 Principle and instrumentation of Fluorimetry - Estimation of Thiamine /riboflavin. 4.3 Determination of Moisture/ash/fibre content. 4.4 Nutrient analysis of food.	K2-K5 K6 K2-K5 K6	9	CO 1-5
5	WATER ANALYSIS (THEORY AND PRACTICALS) 5.1 Importance of water in food processing. 5.2 Water quality monitoring – impact on food safety. 5.3 Determination of salt content in brine (Mohr method) used in canned products. 5.4 Isolation and Identification of synthetic food colours in sweets, confectionery and beverages.	K2-K5 K5 –K6 K5 –K6 K5 –K6	8	CO 1-5

UNIT	CONTENT	CL	Hrs	CO
	LABORTAORY WORK 1. Estimation of Vitamin – A using colorimeter. 2. Estimation of cholesterol using colorimeter. 3. Estimation of Iron using spectrophotometer. 4. Determination of Total Carbohydrates in Foods Colorimetrically – Anthrone and DNS method. 5. Separation and identification of amino acids by paper chromatography (Demo). 6. Estimation of calcium by flame photometer. 7. Estimation of potassium by flame photometer. 8. Estimation of sodium by flame photometer. 9. Determination of refractive index using refractometry. 10. Estimation of thiamine using fluorimetry. 11. Estimation of riboflavin using fluorimetry. 12. Determination of moisture in food samples. 13. Determination of ash content in food samples. 14. Determination of fibre content in food samples (Demo). 15. Nutritional profile of food samples. 16. Determination of salt content in brine (Mohr method) used in canned products. 17. Isolation and Identification of synthetic food colours in sweets, confectionery and beverages.	K2-K6	39	CO 1-5

ENTREPRENEURIAL INITIATIVES

CODE: 23VF/VM/EI56

CREDITS: 6

L T P: 6 0 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To instill the spirit of entrepreneurship among youth and develop entrepreneurial initiatives
- To identify challenges, issues and different factors that affect entrepreneurial development.
- To enhance self-employment opportunities.
- To gain awareness on innovation and giving different dimensions to food products
- To train in the preparation of business project proposal

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	To understand the concepts, principles and significance of management and entrepreneurship.	K1
CO2	Acquire the knowledge to conduct project – planning activities that accurately forecast project costs, timelines & quality.	K2
CO3	Develop strong working knowledge of ethics and professional responsibility.	K3
CO4	Proficiently recognize and seize diverse opportunities for financial gain.	K4
CO5	Create entrepreneurship skills to form their own business.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	INTRODUCTION TO ENTREPRENEURSHIP 1.1 Need for Entrepreneurship Education- Entrepreneurship and Entrepreneur: Definition and Concept. 1.2 Characteristics and importance of Entrepreneurship and Entrepreneur 1.3 Classification and Functions of Entrepreneurs. 1.4 Studies on Indian Entrepreneurship Model.	K1-K3 K1-K4 K1-K4 K2-K5	13	CO 1-5
2	ENTREPRENEURIAL MOTIVATION 2.1 Innovation and Initiation of Entrepreneurial Venture – Desire, Decision and Formulation. 2.2 Study of Entry Barriers to Entrepreneurship – Steps to overcome the barriers. 2.3 Case Studies	K1-K4 K2-K5 K4 –K6	13	CO 1-5
3	WOMEN ENTREPRENEURSHIP 3.1 Empowerment of Women through enterprise. 3.2 Factors governing Women Entrepreneurship. 3.3 Schemes for Women Entrepreneurs and Biotech park for women.	K2-K5 K2-K5 K2-K6	17	CO 1-5
4	SELECTION OF PRODUCTS AND BUSINESS PLANNING 4.1 Identification and evaluation of products based on idea, market demand, competition, availability of raw material and production feasibility. 4.2 Financial and Business Collaboration – Business Project Proposal – Steps involved in Planning and Processing, structure of the Project report. 4.3 Food Business Management: Business idea generation, Challenges, Sales promotion techniques, Scaling up from pilot plant/ incubator stage. 4.4 Preparation of Business Project Proposal.	K2-K5 K2-K5 K2-K5 K6	22	CO 1-5
5	INDUSTRIAL VISIT AND INTERACTION 5.1 Case studies on Indian Entrepreneurs. 5.2 Case studies of Women Entrepreneurs. 5.3 Visit to food sector enterprises and interaction with entrepreneurs.	K4 –K6 K4 –K6 K4 –K6	13	CO 1-5

POST HARVEST TECHNOLOGY

CODE: 23VF/VM /PH56

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To give an understanding of the importance and need of post-harvest technology in Indian agriculture industry.
- To introduce the factors causing post -harvest losses.
- To provide knowledge on the physiological changes seen in horticultural produce before and after harvest.
- To acquaint students to maturity indices and harvesting techniques of produce.
- To highlight the technologies for storage and processing of horticultural produce.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Explain the advantages and technologies for the post-harvest assessment and management of horticulture produce.	K1
CO2	Understand and apply the concepts and technologies required for effective processing, storage and packaging for preventing losses and extension of shelf life.	K2/K3
CO3	Assess and differentiate the produce based on their nature and quality characteristics and recommend suitable measures for effective post-harvest management.	K4
CO4	Evaluate and judge the maturity of and suggest ways to minimize losses during and after harvesting.	K5
CO5	Device ways to retain the quality of produce and extend its shelf - life using the right modern technology.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Post Harvest Technology 1.1 Definition, need for Post-Harvest Technology, Importance for PHT and scope, Objectives of PHT 1.2 Post harvesting Food Pipeline 1.3 Stages of losses in the Food Pipeline of different food types 1.4 Factors Causing Harvest Losses – Biological, environmental, Pre-harvest	K1- K2 K1- K2 K1- K4 K1– K4	8	1-3
2	Physiological changes in produce 2.1 Respiration – Classification - climacteric and non-climacteric 2.2 Ripening – Effect of ethylene- changes 2.3 Artificial ripening- guidelines 2.4 Controlled ripening - Ripening rooms	K1- K2 K1 –K5 K1- K3 K1- K4	8	1-5
3	Harvesting and Quality Requirements 3.1 Maturity Indices for harvesting – Evaluation and Judging harvest readiness and quality 3.2 Harvesting- advantages and disadvantages of Mechanical and Hand Harvesting 3.3 On-farm primary processing technologies for grains – threshing, pounding, dehulling,, fruits and vegetables - curing, degreening, waxing	K1- K6 K1-K4 K1-K3	5	1-5
4	Post-Harvest Technology Procedures 4.1 Precooling – Advantages-Factors-Types 4.2 Storage Technologies – Traditional-Modern low temperature (Chilling and Freezing) – optimum storage conditions 4.3 Sprouting during storage – Suppressants and its application 4.4 Study of small and medium size machineries used for post-harvest processing	K1-K4 K1- K6 K1-K4 K1- K6	8	1-5
5	Introduction to Modern Post Harvesting Technologies 5.1 Modern technologies in Irradiation, Canning and Thermal processing 5.2 Trends in Food packaging and ecofriendly considerations of Food Packaging and Presentation 5.3 Role of supply chain management in reducing post-harvest losses	K1-K6 K1-K6 K1- K3	10	1-5

UNIT	CONTENT	CL	Hrs	CO
	LABORATORY WORK <ol style="list-style-type: none"> 1. Effect of pretreatments on preservation of fruits and vegetables 2. Effect of environmental conditions on post-harvest sprouting of grains 3. Enzymatic Browning in fruits and vegetables 4. Evaluation of juice content and brix acid ratio of citrus fruits 5. Determination of starch content in foods using starch iodide test 6. Measurement of the physical characteristics of fruits and vegetables 7. Determination of specific gravity of produce using weighment method 8. Physiological losses during storage 9. Determination of Tannins in fruits 10. Field visit 	K1- K6	39	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**Soft Skills offered by the Department of Psychology to students of
B.Voc Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

FUNDAMENTALS OF HUMAN BEHAVIOUR

CODE: 23PY/US/HB52

CREDITS: 2

LTP: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE:

- To help students understand basic principles of psychology
- To create self-awareness and understanding of various aspects of human behaviour
- To acquaint the learner with the complexities of individual differences

COURSE LEARNING OUTCOMES:

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	identify and recall important notions in psychology	K1
CO2	elaborate on the understanding of human behavior from a scientific perspective	K2
CO3	apply psychological principles to understanding self and others	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Definition of psychology and ABCs of human behaviour 1.2 Factors affecting human behaviour 1.3 Methods of studying human behaviour- introspection, observation, interview, case study, questionnaire, experimental method 1.4 Psychological professions and areas of specializations	K1- K3	10	CO 1-3
2	Self 2.1 Definition and understanding the self: William James 2.2 Self-awareness, self-introspection 2.3 Enhancing the self or self-regulation	K1- K3	8	CO 1-3
3	Individual differences in human behaviour 3.1 Biological factors: temperaments 3.2 Psychological factors: personality (big 5 model), intelligence 3.3 Socio-cultural factors: individualist vs collectivist cultures	K1- K3	8	CO 1-3

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 25

Duration: 60 minutes

Section	Cognitive Level	Mark Allocation	No. of Questions	No. of Words
A	K1	5 marks (1 x 5 marks)	2 (Answer any 1)	200 words
B	K2	10 marks (2 x 5 marks)	4 (Answer any 2)	200 words
C	K3	10 marks (1 x 10 marks)	2 (Answer any 1)	500 words

2 to 3 ‘Other Components’ will be assessed for 25 marks, with the same range and weightage of K Levels prescribed for the course.

No End Semester Exam

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
FOOD PROCESSING AND QUALITY CONTROL**

SYLLABUS

(Effective from the academic year 2023 – 2024)

FOOD QUALITY ASSURANCE

CODE: 23VF/VM/FQ66

CREDITS: 6

L T P: 6 0 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To familiarize students with the concept of Quality and its assurance from every level of food processing chain
- To give an understanding on the Quality Management concepts in Food Industry.
- To explain the role of standards promotion systems in assurance of quality food processes.
- To acquaint students with knowledge on some food safety and quality programs and environment Management systems in food industry.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Explain their understanding of food quality attributes, systems, regulations and certification bodies	K1
CO2	Summarize on the quality assurance certifications and regulations applicable to the food industry	K2
CO3	Differentiate procedures for assurance and control of Quality and apply principles of auditing during quality evaluations	K3
CO4	Apply preventive and control measures to minimize hazards and maintain food quality	K4
CO5	Advice and execute plans to FBO's for obtaining food quality certifications and assist consumers on Quality food purchases.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Concept of Quality and Assurance 1.1 Quality attributes – physical, chemical, nutritional, microbial, and Sensory. Importance and functions of quality control; Principles of quality control 1.2 Tips to consumers for buying safe food Evaluation techniques, Quality Control versus Quality Assurance 1.3 Quality assurance for raw material, in process and processed products, safe handling and hygiene requirements for personnel and equipment	K1- K4 K1- K3 K1 – K4	20	1-4
2	Quality Management Tools 2.1 Definition, scope, significance and objectives of Food Quality Management 2.2 TQM – concept and need for quality, components of TQM, Tools to aid in Quality Management 2.3 Proficiency testing for product quality, six sigma concept, continuous upgradation and improvement of productivity	K1- K2 K1 – K5 K1- K3	15	1-5
3	Accreditation & Auditing 3.1 Accreditation- National and International Accreditation bodies Role, Need and procedure 3.2 Auditing- Quality audit - Internal & external audit, 1 st , 2 nd , 3 rd party audit 3.3 Regulation – Audit Process, Frequency, Grading, Reporting 3.4 Roles of a Quality and Safety manager	K1-K3 K1-K4 K1 – K5 K1- K5	12	1-5
4	Quality Assurance Certifications and Regulations 4.1 Indian and International quality systems and standards – ISO 9000 (QMS), Codex Alimentarius Commission, FAO, WHO, WTO Agreement on SPS and TBT, JECFA, BRC 4.2 Other relevant National Bodies- APEDA, MPEDA, Spices Board, BIS, Intellectual Property Rights (IPR) 4.3 Voluntary product certifications – AGMARK, BIS	K1-K4 K1- K5 K1-K3	13	1-5
5	Food Safety systems and Initiatives 5.1 ISO 22000 (FSMS), FSSC-FSSAI 5.2 National Programs for promotion of safe wholesome food – Eat Right India, Clean Street food hub, RUCO, BHOG etc), FoSTAC 5.3 – Environmental monitoring - Carbon food printing of food processing industry	K1-K5 K1-K6 K1-K3	18	1-5

(Effective from the academic year 2023 – 2024)

WASTE MANAGEMENT IN FOOD INDUSTRY

CODE: 23VF/VM/WM66

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To provide knowledge of types and the management of waste from food industries.
- To gain knowledge regarding the environmental consideration and laws pertaining to these.
- To understand the methods to reduce and reuse wastes from various food industries.
- To provide skill sets for waste water testing and analysis.
- To understand and apply knowledge in effective utilization of generated by products in developing value added. products

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Gain knowledge on the type of waste generated from food industries and the regulations governing their disposal.	K1
CO2	Understand various aspects of food waste management in a food production cycle.	K2
CO3	Plan methods of segregation, recycling and disposal of food waste reducing the impact on environment, economy and community.	K3
CO4	Evaluate the physical and chemical characteristics of waste waters generated from food processing plants.	K4
CO5	Design composting systems, maintain and plan layout for effective waste disposal systems and develop value added products from industrial by products.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Impact of Waste Generation in Food Industry 1.1 Food Industry Wastes, Food Waste Treatment, necessity of food waste utilization 1.2 Types of Waste and magnitude of waste generation in different Food Processing industries 1.3 Concept, Scope and Importance of Waste Management and Effluent Treatment	K1 – K2 K1 – K2 K1 – K3	6	CO1- CO2
2	Environmental Standards and Waste characterization 2.1 ISO 14001 standards, Environmental Legislation 2.2 Treatment according to established standards and directives, environmental best – practice technologies for Waste Minimization, Environmental Protection Act and specification for effluent of different Food Industries	K1 – K2 K1 – K3	6	CO1 -CO2
3	Effluent Treatment and Testing 3.1 Treatment – Pre-treatment of waste: sedimentation, coagulation, flocculation and floatation 3.2 Secondary treatments: Biological oxidation – trickling filters, oxidation ditches, activated sludge process, rotating biological contractors, aerated lagoons 3.3 Tertiary treatments 3.4 Testing – pH, BOD, COD, fat, oil and grease content, Metal content, Phosphorus and Sulphur in waste waters, Microbiology of wastes, Insecticides, Pesticides and Fungicides residues	K2 – K3 K2 -K3 K2 – K3 K1 – K5	10	CO1 – CO4
4	Waste Utilization of Agro Industries. 4.1 Characterization and utilization of by products from Cereals, Pulses and oilseeds 4.2 Fruits and Vegetables and Plantation Crops 4.3 Vermicomposting of Wastes from Food Industries	K1 – K5 K1 – K5 K1 - K3	9	CO1 – CO5

UNIT	CONTENT	CL	Hrs	CO
5	Waste Utilization of Animal and Marine Product Industries 5.1 Characterization and utilization of by-products from dairy industries 5.2 Utilization of wastes from poultry, Meat, Fish and Marine Processing Industries. 5.3 Visit to Food industries – Effluent and Waste Treatment.	K1-K5 K1- K5	8	CO1 -CO5
	LABORTAORY WORK 1. Testing alkalinity in waste water. 2. Determination of chloride content(Argentometric method). 3. Testing hardness in waste water (EDTA method). 4. Determination of Dissolved Oxygen (Winkler Method). 5. Determination of BOD in waste water (Titrimetric). 6. Determination of Iron content (Wong's Method). 7. Estimation of turbidity (Nephelometer). 8. Estimation of sulphate content (Turbidimetric). 9. Estimation of Copper content in waste water (Iodometric). 10. Estimation of phosphorous content (ANSA). 11. Estimation of nitrates in waste water (U.V. Spectrophotometric method). 12. Estimation of Ammonia in waste water (Nesslerization method). 13. Estimation of nitrites(Colorimetric method). 14. Estimation of TDS (Gravimetric Method). 15. Vermicomposting- Visit to a field.	K2 – K6	39	CO1 -CO5

ADVANCEMENTS IN FOOD PROCESSING AND TECHNOLOGY

CODE: 23VF/VM/AT66

CREDITS: 6

L T P: 6 0 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To enable students to understand the importance of the new food processing technologies.
- To provide exposure to the students about the application low temperature techniques in food processing
- To provide knowledge about the food safety aspects related to use of these emerging techniques.
- To encourage students to develop and evaluate products using these processing techniques.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Gain knowledge to understand the novel food processing technologies.	K1,K2,K3
CO2	Understand the application of non-thermal methods in increasing the shelf life of food products.	K2,K3
CO3	Apply novel technologies for new product development and preservation.	K3
CO4	Suggest the application of an appropriate processing technology for specific foods.	K4
CO5	Assess the impact of the novel technologies in maintaining food safety.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Minimal Processing 1.1 Minimal Fresh Processing of Vegetables, Fruits and Juices 1.2 Minimal Processing of Ready Meals 1.3 Modified Atmosphere Packaging for Minimally Processed Foods	K1-K2 K1-K2 K1-K6	16	CO1-CO3
2	Pulsed Electric Fields Processing 2.1 Overview of Pulsed Electric Field Processing for Food 2.2 Pulsed Electric Field Processing of Liquid Foods and Beverages 2.3 Effect of High Intensity Electric Field Pulses on Solid Foods 2.4 Enzymatic Inactivation by Pulsed Electric Field 2.5 Food Safety Aspects of Pulsed Electric Fields	K1-K2 K3-K6 K4,K5 K3 K1-K5	16	CO1-CO5
3	Food Irradiation and High Pressure Processing 3.1 Food irradiation – advantages and applications, microwave processing – interaction with food materials 3.2 High Pressure Processing of Foods: An Overview – Principles – equipment 3.3 Microbiological Aspects of High – Pressure Processing	K1-K3 K1-K4 K1-K5	16	CO1, CO3, CO5
4	Ohmic Heating 4.1 Application of heat and ultrasound – inactivation of microorganisms and enzymes 4.2 Electrical resistance heating of food – ohmic heating models – treatment of products – high voltage pulse techniques – Elsteril process, influence on microorganism, food ingredients 4.3 Decontamination of packaging – decontamination of microorganism by surface treatment	K3-K5 K1-K3 K3-K6	15	CO1, CO3, CO5
5	Innovations in Food Refrigeration 5.1 Vacuum Cooling of Foods 5.2 Ultrasonic Assistance of Food Freezing 5.3 High-Pressure Freezing 5.4 Controlling the Freezing Process with Antifreeze Proteins	K1-K3 K1-K3 K1-K4 K1-K4	15	CO1-CO3

SYLLABUS

(Effective from the academic year 2023 – 2024)

PROJECT

CODE: 23VF/VM/PR615

CREDITS: 15

OBJECTIVES OF THE COURSE

- To enable the student to work independently.
- To apply the skill development training they have gained during the course of study.
- To enhance employability.
- To develop technical, interpersonal and communication skills.
- To know the ability to generate new ideas in food product development.

GUIDELINES FOR PROJECT:

- Project is done individually in an industry / lab
- Project requires practical work with the submission of a project report which will include the work executed.
- The project report should be submitted in the prescribed format containing a minimum of 25 pages.

GUIDELINES FOR EVALUATION:

The candidate will be evaluated by the Industrial partner/guide, based on attendance, maintenance of log book, experimental work and project report. The maximum marks will be 100.

Continuous Assessment**Total Marks: 50**

Rubrics for Evaluation	Marks	Cognitive Level
Research statement and methodology	10	K1 – K2
Documentation - text and images	25	K3 – K4
Research findings, Product Development and analysis.	15	K5 – K6

STELLA MARIS COLLEGE
(AUTONOMOUS), CHENNAI - INDIA

B.Voc. DEGREE
SUSTAINABLE ENERGY MANAGEMENT
(CHOICE BASED CREDIT SYSTEM)

OUTCOME BASED EDUCATION (OBE)
LEARNING OUTCOME BASED
CURRICULUM FRAMEWORK (LOCF)

SYLLABUS
(Effective from the academic year 2023 – 2024)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI-600086

B.Voc. SUSTAINABLE ENERGY MANAGEMENT

PROGRAMME DESCRIPTION

The college was selected by UGC in August 2015 to offer Bachelor of Vocational Degree (B.Voc. Degree) Programme in Sustainable Energy Management. The aim is to enhance skill training and employability of graduates. The University of Madras communicated on 16 September 2015, granting permission to start the B. Voc. Degree Programme from the academic year 2016-2017 and the Programme was started in 2016.. The focus of the Programme is on skill development and quality education with hands- on - training to meet the needs of students and the industry. The B. Voc Programme was supported by the UGC(for a period of three years) under the aegis of National Skill Development Corporation (NSDC) and the Sector Skill Council-Green Jobs. The UGC under the aegis of NSQF has also awarded an extension to continue the three year B. Voc. Degree Programme in 2018. The Programme affiliated to the University of Madras offers the degree as "Bachelor of Vocational in Sustainable Energy Management". This Programme is competency based and the curriculum is organised such that it includes the content of the Qualification Packs graded by NSQF at levels 4 to 7. The industry is actively involved in both curriculum design and imparting the skill sets. The uniqueness of the program is that it has multiple exit points after the successful completion of at the end of first year: Diploma (59 Credits), at the end of second year: Advanced Diploma (117 Credits), on successful completion of third year: B.Voc. Degree (180 Credits). Besides the University examination, the students are also assessed by Industrial Persons and the certification awarded by NSDC for the respective Qualification Packs.

VISION OF THE DEPARTMENT

To provide experiential learning with high impact skill training to enhance employability and foster national and global competency

MISSION OF THE DEPARTMENT

To create an ambience in which experiential learning is implemented and new ideas and creativity flourish and from which responsible citizens and innovators of tomorrow emerge for Environment Sustainability and use of renewable energy.

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the B.Voc. in Sustainable Energy Programme, the students will be able to

PSO1	impart knowledge on alternative sources of energy and their application through critical analysis of the global energy market for sustainable energy solutions
PSO2	sensitize on various challenges in the utilization of non-renewable energy sources and analyse non-conventional energy sources
PSO3	gain experimental / experiential learning on principal components and equipment in accordance with energy conversion/conservation technology
PSO4	understand and interpret the ethical and environmental issues in promoting sustainable living spaces and construct a better society
PSO5	acquisition of skill set through training to innovate eco-friendly energy products and methodologies for entrepreneurship and employment.

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

FORMS OF ENERGY AND ENERGY CRISIS

CODE: 23VS/VM/FC16

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the various forms of energy
- To get an insight of energy crisis with solution and energy conservation practices
- To know the energy crisis scenario in the global context
- To perform fundamental energy calculations required for the work place
- To get trained in the basic first aid and safety techniques during panel installation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	remember the introduction to various forms of energy, energy consumption, resources, crisis and fundamental energy units.	K1
CO2	understand the various energy, economic growth, energy routes, over consumption and energy crisis.	K2
CO3	strengthen the types of energy sources, global energy consumption, age of renewables, unexplored renewable energies, global scenario of energy crisis and basic first aid and safety at work place..	K3
CO4	explore the primary and cumulative energy demand, energy requirements, commissioning of power plants, energy calculations and energy storage.	K4
CO5	experiment the future prospects of energy, technology and strategies to meet energy requirements and study the power consumptions.	K5 & K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to the forms of energy 1.1 Introduction – various forms of energy – thermal, sound, light electrical, magnetic, chemical, nuclear, mechanical, Elastic, Gravitational energy 1.2 Types of energy sources – Renewable – Non – Renewable sources	K1-K4	10	1-4
2	Energy Consumption and Demand 2.1 Energy consumption – energy consumption (per capita) and economic growth 2.2 Global energy consumption – Energy demand – primary energy demand and cumulative energy demand	K1-K4	10	1-4
3	Energy Resources 3.1 Energy routes for non-renewable energy resources – age of renewables and alternatives 3.2 Energy requirements and future prospects of energy	K1-K6	10	1-4
4	Energy Crisis its Causes and Solutions 4.1 Introduction: Causes of energy crisis: Over consumption, over population, infrastructure Unexplored Renewable Energy Options – Commissioning of Power Plants 4.2 Moving toward renewable energy sources – energy conservation practices Technology up gradation and strategies to meet energy requirements	K1-K6	9	1-5
5	Site Analysis: Fundamental Energy Calculations and work place safety 5.1 Energy calculations: units and conversion dimensional equations – Joules, kWh/units 5.2 Energy crisis: Global scenario – Energy crisis of developing countries – Report 5.3 Energy storage – Various energy storage systems and Energy savings – Comparative study of power consumption in electrical appliances 5.4 Basic First aid & Safety at work place	K1-K6	39	1-5

PRACTICAL COMPONENTS (39 Hours)

1. Determination of resistors in series/parallel and combination.
2. Post office box- Finding the resistance of the coil.
3. Post office box- Finding the resistance of the coil and to verify the law of resistance connected in series.
4. Post office box- Finding the resistance of the coil and to verify the law of resistance connected in parallel.
5. Verification of Ohm's law.
6. Measurement of current-voltage characteristics of two solar cells connected in parallel.
7. Measurement of current-voltage characteristics of two solar cells connected in series.

SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

SOLAR ENERGY

CODE: 23VS/VM/SE16

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand various concepts in utilization of Solar energy
- To learn the merits of solar energy for variety of applications
- To study and associate the concept of semiconductors with real world applications
- To analyze about the potential of solar energy and about the harvesting them
- To apply the various properties of solar experiments to solve energy problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define fundamentals on solar radiation, introduction to semiconductors, fundamentals of solar collectors, Solar cooking, and solar photovoltaic cell for energy utilization	K1
CO2	classify nature of solar radiation, photovoltaic principles structure of collectors, solar system for process heat, solar pond and I-V characteristics of solar cell to deliver solar energy, different types of solar panels.	K2
CO3	identify radiation on earth's surface, operation of solar cell, solar concentrating collectors, solar thermos mechanical refrigeration system and solar energy spectrum to harness applications of solar energy.	K3
CO4	discover solar power plants, sun tracking mechanism, solar, solar pumping and solar cell fabrication for solar energy usage	K4
CO5	access solar mapping, solar distillation and solar panel experiment for solar energy efficiency	K5 & K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Solar Energy 1.1 Fundamentals of Solar Radiation – The Nature of Solar Radiation – Radiation on Earth’s Surface – Sun path Chart 1.2 Historical Perspective - Solar Energy; Obstacles and Outlook - Global and Indian solar energy scenario - Potential and power generation	K1-K3	10	1-3
2	Photovoltaics conversion 2.1 Introduction to semiconductors- Photovoltaics Principles- Conversion of DC power to AC power through inverters 2.2 Solar panels - Solar power plants – (CIGS panels/CSPV- Poly Crystalline-Mono Crystalline-Bifacial) 2.3 Various parameters and work safety for solar PV installation	K1-K4	10	1-4
3	Solar thermal collectors 3.1 Fundamentals of solar collectors as devices to convert solar energy to heat. Design and structure of collectors for heating liquids and air. 3.2 Solar concentrating collectors - Sun tracking mechanisms – Solar mapping	K1-K6	10	1-5
4	Applications 4.1 Solar thermo-mechanical refrigeration system-Solar systems for process heat production – Solar cooking – Performance and testing of solar cookers – Power generation - drying 4.2 Solar Pond – Solar greenhouse – Solar Pumping – Solar Distillation	K1-K6	9	1-5
5	Case Study 5.1 Solar panel experiment and study of Solar photovoltaic cells-IV characteristics. 5.2 Solar energy spectrum calculation of Rydberg’s constant. 5.3 Solar cell fabrication.(Solar Panel Manufacturing-Site Visit)	K1-K6	39	1-5

Practical Component [39 hours]

1. Studying the I-V characteristics performance of a solar panel
2. Studying the efficiency of solar cell on characteristics photovoltaic effect
3. Comparing the performance of solar cell by different light sources
4. Determining the effect of insolation effect on the solar panel
5. Studying the characteristics I-V curve of a solar panel by different light sources
6. Analyzing the fill factor of a solar panel
7. Accessing the power of a solar panel
8. Finding the effect of series connection of a solar panel
9. Finding the effect of parallel connection of a solar panel

SYLLABUS

(Effective from the academic year 2023 – 2024)

ENERGY ECONOMICS

CODE:23VS/VA/EE15

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To develop in the students an awareness of the basic issues and problems relating to the Energy Economics
- To help in analyzing the energy market in the Indian context
- To learn fundamental energy market dynamics through an economic lens
- To address energy economic challenge as an energy analyst
- To describe current energy market trends and relate current conditions to historical markets

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify the basic principles of Micro Economics , Energy economics, SDG, Energy security and natural gas markets	K1
CO2	summarize the basic problems of economy, post industrialization, electricity markets, Energy triangle and energy usage at home	K2
CO3	demonstrate the role of market, energy needs in countries, goals of renewable energy and Indian environmental policies and energy calculator	K3
CO4	examine elastic demand curves, Clean energy, Solar and wind energy prospectus , International policies and energy consumption calculation	K4
CO5	evaluate the factors affecting demand supply, SDG 7, Future of renewable energy , regulations and Industry power management	K5
CL– Cognitive Level K1– Remember K2– Understand K3– Apply K4 – Analyse K5– Evaluate K6– Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Micro Economic Concepts 1.1 Definition of Economics – Scarcity 1.2 Basic problems of economy 1.3 Role of market in organizing economic activity 1.4 Demand – Demand curve, Factors affecting demand, shift of demand curve. 1.5 Supply – Supply curve, Factors affecting supply, shift of supply curve	K1-K4	13	1-4
2	Introduction to Sustainable Energy 2.1 Definition - Energy Economics 2.2 Historical Context – post industrialization- growth of the developed countries and growing energy needs of less developed countries 2.3 Overview of energy use and energy consumption 2.4 Introduction to the Sustainable Development Goal– Clean energy - SDG 7	K1-K5	13	1-5
3	Energy Markets 3.1 Natural Gas – Introduction to Natural Gas Markets - Future 3.2 Electricity and Coal Markets 3.3 Renewable Energy – Solar and Wind Energy – Prospects and Future	K1-K5	13	1-5
4	Energy Policies 4.1 Introduction to Energy Security– Energy triangle 4.2 Indian Environmental Policies – Renewable energy- policies – energy efficiency policies 4.4 International Energy policies - UNFCCC 4.4 Regulations– command and control	K1-K5	13	1-5
5	Energy Management & Case Study 5.1 Energy use by individuals and households – energy calculator–energy consumption 5.2 Industry Power management	K1-K5	13	1-5

FUNDAMENTALS OF PHOTOVOLTAICS

CODE: 23VS/VM/PV26

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To learn about basics photovoltaic principles in understanding performance of solar cells
- To locate the various components available in photovoltaic system for power generation
- To project the proper designing of cost effective solar photovoltaic systems
- To discover about the potential application of photovoltaic systems
- To access and compile the efficiency of solar panel for electric energy generation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	relate properties of photovoltaic systems, stand-alone system, system with battery, solar cell array, solar vehicles and solar energy to electric conversion	K1
CO2	extent knowledge of a homo-hetero junction, hybrid system, shadow analysis, integrated building and efficiency of solar panel	K2
CO3	identify metal semiconductor interface, net power meters, design PV system and its cost, solar cars and meters of photovoltaic system, Load Calculation	K3
CO4	examine illumination characteristics, home lighting, space solar satellites and experiment using solar panel for solar energy management, End life Management for PV Waste	K4
CO5	predict the efficiency of solar cells by using figure of merit and solar cell array performance	K5 & K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Photovoltaic Basics and Photovoltaic Cells 1.1 Properties-Theory of Photovoltaic systems - energy levels – Photo Conductivity 1.2 PN junction: homo and hetero junctions – metal semiconductor interface- Dark and illumination characteristics - figure of merit– efficiency of solar cells	K1-K6	8	1-3
2	Classification of Photovoltaic Systems 2.1 Stand-alone Systems - Systems with Battery Storage -System with Back-up - Generator Power - System Connected to the Utility Grid - Hybrid Systems 2.2 System components - PV arrays – inverters – batteries - charge controls - net power meters	K1-K3	8	1-3
3	Photovoltaic System Design 3.1 Solar cell array: System analysis and performance prediction- Shadow analysis - reliability - design concepts of solar array 3.2 Design of solar PV systems and cost estimation - Home lighting and other appliances 3.3 End life Management for Solar PV waste 3.4 Load Calculation-Load Estimation	K1-K6	8	1-4
4	Photovoltaic System Applications 4.1 Building-integrated photovoltaic units 4.2 Solar cars – aircraft - space solar power satellites 4.3 Performance of the Solar vehicles	K1-K6	8	1-5
5	Case Study 5.1 Solar energy to electric energy conversion – Experiment using Solar panel. 5.2 Efficiency of Solar panel calculation over the day with the use of meters. 5.3 Measurement of Sun’s Radiation on Earth’s Surface. SITE VISIT-To estimate Solar Requirement	K1-K5	7	1-5

Practical Component [39 hours]

1. Effect of shading on the performance of solar panel under light source and sun light.
2. Effect of colour shader on characteristics of solar panel under sunlight and light source.
3. Comparing the current - voltage characteristics of solar panel under sunlight and light source.
4. Determining the effect of distance on the solar panel.
5. Investigation of fill factor of a solar panel under sunlight and simulated light
6. Thermal studies on the performance of solar cell under light source and sun light
7. Consequences on the effect of intensity on the performance of solar panel.
8. Study on charging of battery using PV panel.

ENERGY CONVERSION TECHNIQUES

CODE: 23VS/VM/ET26

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To analyze the conventional energy conversion techniques
- To develop understanding on direct energy conversion systems
- To appreciate the need and necessity of energy storage systems and their desirable characteristics
- To explore the different types of energy systems
- To increase the use of solar energy conversion for future aspects

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	remember the introduction to energy conversion, thermoelectric converters, storage of energy, dye sensitized solar cell and chemical energy	K1
CO2	understand the renewable resources, thermoelectric refrigerators, performance of electrochemical energy storage, hydrogen production and solar water heaters	K2
CO3	develop and strengthen the convention techniques, thermionic converters, photo catalysis and of solar energy storage systems	K3
CO4	explore the ferroelectric converter, pseudo capacitor, dye sensitized solar cells, and solar water pumps	K4
CO5	experiment the necessary scientific principles on energy conversions techniques, Seebeck effect, Peltier effect, water splitting, solar water heater and pump.	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to energy conversion 1.1 Introduction – energy conversion – renewable energy 1.2 Conventional techniques- Electrical to Mechanical, Chemical to Electrical, Thermal to heat and Mechanical to Potential energy	K1-K3	7	1-3
2	Direct Conversion of Thermal to Electrical Energy 2.1 Thermoelectric Converters – thermoelectric refrigerator – thermoelectric generator-Seebeck effect-Peltier effect 2.2 Thermionic converters – Ferroelectric converter– Nernst effect generator – thermomagnetic converter	K1-K6	8	1-5
3	Energy Storage Systems 3.1 Introduction – storage of mechanical energy, electrical energy, chemical energy, thermal energy. 3.2 Electrochemical energy storage – supercapacitor-pseudo capacitor-ultracapacitor.	K1-K6	8	1-5
4	Chemical, Electrochemical Energy and Hydrogen Energy Generation 4.1 Introduction to Dye sensitized solar cells- principle and working 4.2 Photocatalysis and applications -Bio reactors- Water splitting- Hydrogen production	K1-K5	8	1-5
5	Case Study 5.1 Chemical Energy to Electrical Energy 5.2 Conversion of Solar Energy to Heat Energy- Solar Water heater 5.3 Conversion of Solar Energy to Electrical Energy- Solar Water pump	K1-K6	8	1-5

Practical Component [39 hours]

1. pn - Junction diode - Current - Voltage characterization
2. Study of Seebeck effect through thermoelectric method
3. Study of Peltier effect through thermoelectric method
4. Estimation of figures of merit of solar cooker
5. Thermal Performance of solar Desalination Device
6. Instantaneous thermal performance of Solar Collector.
7. Determination of Energy band gap of the energy materials
8. Comparing the photo catalytic effect of degradation using different dyes

(Effective from the academic year 2023 – 2024)

ENERGY MANAGEMENT AND ENERGY AUDIT

CODE:23VS/VE/EM25

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To prevent the avoidance of energy waste
- To produce goods, services with the least cost and least environmental effect
- To identify the quality and cost of various energy inputs
- To quantify energy usage according to its discrete function
- To manage usage and reduce carbon emissions

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	remember the basic need of energy management, natural gas, renewable energy policies, basic of energy audit, Indian energy scenario	K1
CO2	illustrate an insight of ecological issues, Industrial energy management, conservation acts, types of energy audit and sector wise energy consumption	K2
CO3	make use of energies, Energy Management Information Systems, labeling, economic concepts, Industry power management	K3
CO4	analyze the depletable sources, energy policies, Investment cost, long term energy scenario, load assessment	K4
CO5	evaluate the role of energy managers, load curves, sensitivity analysis, energy use by individuals	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Basic needs of energy management and ethics - Ecological issues - sustainable energy for future. 1.2 Energy scenario – Primary and Secondary Energy - Commercial and noncommercial Energy - Final energy consumption.	K1-K3	13	1-3
2	Energy Management 2.1 Natural Gas – Introduction to Natural gas markets- Future 2.2 Industrial energy management systems: Energy monitoring and targeting – Elements. 2.3 Energy consumption – production - Energy Management Information Systems (EMIS) - Economics of depletable resources	K1-K4	13	1-5
3	Energy Policy and Security 3.1 Renewable energy policies- Energy efficiency policies– Energy conservation acts – Energy Paradox 3.2 Energy Security and energy labeling - Energy pricing and impact of Global variations - Energy policy issues - Role of energy managers in industries	K1-K5	13	1-4
4	Energy Audit and Economic Analysis 4.1 Introduction-Energy Audit and its types-Introduction: Economic concepts - Measures of economic performance– Procedure for economic analysis. 4.2 Investment cost – Procedure for optimized system selection and design – Load curves - Sensitivity Analysis – Behaviour Consumption Pattern 4.3 Load Assessment – Matching Solar Production to consumption– Effect of Solar (Over Product/Under Product)	K1-K5	13	1-5
5	Energy Conservation Principles 5.1 Indian energy scenario - Sector-wise energy consumption-Energy Conservation Act 2001 5.2 Energy use by individuals and households-Energy consumption	K1-K5	13	1-5

(Effective from the academic year 2023 – 2024)

CONSERVATION OF WATER RESOURCES: WATERSHED MANAGEMENT

CODE:23VS/VE/CW25

CREDITS: 5

L T P: 4 0 1

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand different watershed behavior
- To be able to interpret runoff data and quantify erosion by using various modeling methods
- To understand land use classification and the impact on hydrological cycle parameters
- To identify suitable cropping planning for agriculture to maximize productivity
- To investigate the water flow linkage and its movement through rainwater harvesting

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	ability to remember the fundamentals of watershed behavior, meteorological parameters, erosion, crop water management and watershed development	K1
CO2	demonstrate the extent of knowledge on effect of land use, hydrological parameters, types of erosion, crop planning and co wet management, erosion, meteorological and hydrological parameters modeling and watershed development in India	K2
CO3	identify the need for wetland management, modeling, assessment of erosion, ecological zones and guidelines of watershed	K3
CO4	examine the soil conservation service, modeling erosion, drought and its management and rainwater harvesting	K4
CO5	discuss on the behavior of beach erosion, drought cause and impacts and desilting of lakes of watershed development	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Introduction - watershed behavior - effects of land use and its change on hydrological cycle components - Land capability and suitability classification 1.2 Wetland management – types - hydrologic conditions and water budget - hydrological and ecological functions - Ramsar convention	K1-K3	13	CO1-3
2	Meteorological and hydrological parameters 2.1 Measurement of meteorological (temperature, wind speed, sunshine hours, atmospheric pressure, relative humidity) and hydrological (suspended sediment and bed load) parameters 2.2 Modeling - Runoff with Soil Conservation Service(SCS) methodology - modifications suggested for Indian conditions - case study	K1-K4	13	CO1-5
3	Erosion Process and its Types 3.1 Erosion process – Factors affecting erosion - types of erosion - assessment of erosion - Modeling Erosion using USLE, RUSLE, introduction to few other models - Indian studies - case study – Beach Erosion 3.2 Control measures for soil erosion – vegetative and mechanical (including design) - for agricultural and non-agricultural lands - wind erosion and its modeling - control measures	K1-K5	13	CO1-4
4.	Crop water management and Planning 4.1 Crop water management and crop planning with special reference to different agro-ecological zones in India - inclusive development or Participatory approach - water conservation practices for deserts 4.2 Drought and its management - causes and impacts - Definition, management, objectives and strategy of short term and long term measures	K1-K5	13	CO1-5
5.	Indian scenario of watershed development 5.1 Watershed development in India, Common Guidelines, Allocation of funds. 5.2 Rain Water harvesting – linking of rivers – desilting of lakes	K1-K5	13	CO1-5

ENVIRONMENTAL STUDIES

CODE: 23VS/UC/ES22

CREDITS : 2

L T P : 2 0 0

TOTAL TEACHING HOURS : 26

OBJECTIVES OF THE COURSE

- To create an awareness about current environmental issues
- To educate students on conservation and management of natural resources
- To encourage students to be ecosensitive and ecofriendly

Unit 1

Introduction

6hrs.)

- 1.1 Components of the Environment – Classification and Characteristics of Resources – Renewable and Non – Renewable Resources
- 1.2 Need for Public Awareness in Conservation of Natural Resources
- 1.3 Energy Flow in Ecosystems – Aquatic and Terrestrial – Food Chain and Food Web

Unit 2

Pollution and Socio Economic Aspects of the Environment

(10hrs.)

- 2.1 Types of Pollution – Air, Water, Solid Waste, Noise
- 2.2 Problems - Green House Effect – Depletion of the Ozone Layer – Climate Change
- 2.3 Bio Diversity - Definition - Loss of Bio Diversity – Threats to Biodiversity and Conservation of Biodiversity
- 2.4 Human Behaviour: - Population – Urbanization – Poverty (As Cause and Result of Pollution and Degradation)
- 2.5 Technology: Agriculture and Industry – Deforestation. Misuse and Abuse of the Resources
- 2.6 Effects and Consequences of Environmental Problems

Unit 3

Sustainable Development, Remedies and Policy Implications

(10 hrs.)

- 3.1 Environmental Disasters Natural and Human Made – Bhopal Gas Tragedy – Chernobyl Accident – Fukushima Nuclear Crisis - Gulf War – Love Canal Episode – Tsunami – Volcanic Eruptions
- 3.2 Methods Evolved to Measure and Check Environmental Degradation and Pollution – Carbon Footprint, Carbon Credit, Ecological Footprint, and Ecological Shadow
- 3.3 Environmental Movements in India – Chipko Movement, Narmada Bachao Andolan, Sethu Samudram Project
- 3.4 Environmental Acts – Policy Measures with respect to India
- 3.5 International Environmental Agreement – Stockholm Conference – Montreal Protocol – Rio Meet – Kyoto Conference – UN Conference on Climate Change (Copenhagen)

Field visit

Eco initiatives at the campus: Garbage Segregation and Vermicomposting – Greywater Recycling – Rainwater Harvesting – Solar Powered Lights – Biodiversity

**General Elective Course offered by the Department of Computer Science to
B.Voc. Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

DOCUMENTATION AND PRESENTATION

CODE: 23CS/UE/DP22

CREDITS :2

L T P: 1 0 1

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To give students the knowledge and understanding to prepare formatted documents and powerful presentations
- To provide hands-on use of Microsoft Office applications
- To familiarize the basics and advanced concepts of Word and PowerPoint
- To understand the method of protecting documents

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	create a document with proper formatting	K1
CO2	create personal, academic and business documents following current industry standards	K2
CO3	create a presentation in Microsoft PowerPoint that is interactive with legible content and apply Designs to Enhance the feel of the Presentation. Protect the documents and limit the access.	K3

UNIT	CONTENT	CL	HRS	CO
1	1.1 Word Processing Introduction – The Style Advantage, Outlining, - Autocorrect – Compatibility with previous versions of word –Drawing Canvas –Styles and Character/Font Formatting – Bullets and Numbering –Character Formatting – Paragraph Formatting –Styles and paragraph Formatting, Structural Formatting, paragraph Decoration – Find, Replace and GO To – Language Tools –Auto Correct – Auto Format –Tables – Pictures and SmartArt – Headers and Footers	K1-K3	4	1-3

UNIT	CONTENT	CL	HRS	CO
2	2.1 Advanced Word Processing Symbols and Equations –Charts –Inserting Objects and Files –Blogging-Templates and Themes – Bookmarks –Tables of Contents – Footnotes and Endnotes -Citations and Bibliography –Indexing –Table of Authorities – Hyperlinks and Cross-References –Envelopes and Labels -Data Documents and Mail Merge –The Ribbon -Security, Tracking and Comments –Protection Type- Integration with other office Applications –Excel, PowerPoint	K1-K3	10	1-3
3	3.1 Presentation Tool Introduction to PowerPoint – Changing the view – Creating a good presentation- Creating and saving Presentation Files –Creating New Slides and Text Boxes – Working with Layout, Themes and Masters – Formatting Text –Formatting Paragraphs –Correcting and Improving Text –Creating and Formatting Tables- Creating SmartArt Diagrams–Importing Image Files into PowerPoint – Compressing Images –Creating a Photo Album Layout- Working with Charts – Working with External Content- Copying Content from Other Programs - Adding Sound Effects, Music and Soundtracks –Creating Animation Effects and Transitions –Creating Support Materials –Preparing for a Live Presentation – Limiting User Access to a Presentation	K1-K3	12	1-3

(Effective from the academic year 2023 – 2024)

SOFT SKILLS

CODE: 23VS/US/SS22

CREDITS: 2

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To equip students with competencies to achieve personal and academic excellence
- To raise confidence levels

Unit 1

Self Awareness

(5hrs.)

- 1.1. Knowing One's Strengths and Weaknesses
- 1.2. Self-esteem and Self-worth

Unit 2

Work place Behavioural Training

(6hrs.)

- 2.1 Listening Skills
- 2.2 Interpersonal Skills
- 2.3 Team Work and Group dynamics
- 2.4 Personal Effectiveness
- 2.5 Creative Thinking

Unit 3

Planning Ahead

(5hrs.)

- 3.1 Time Management
- 3.2 Goal Setting

Unit 4

Career Mapping

(5hrs.)

- 4.1 Concept of Career
- 4.2 Career Options
- 4.3 Choice of Right Career

Unit 5

Adaptability Skills

(5hrs.)

- 5.1 Working independently
- 5.2 Working as a team
- 5.3 Multi-tasking
- 5.4 Innovation
- 5.5. Adapting to Change and Criticism

PATTERN OF EVALUATION

Continuous Assessment: (Totally internal)

SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

BIO ENERGY

CODE:23VS/VM/BE36

CREDITS:6

L T P: 303

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To know the significance and classification of Biomass energy
- To gain a fundamental knowledge of principles for the conversion of biomass to renewable energy
- To be able to identify woody biomass properties influencing utilization
- To learn about the types and understand the various models of biogas plant
- To assess the biogas engine and future prospects of Biomass energy

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	learn the concepts of biomass, its characteristics, classification and assessment.	K1
CO2	understand the significance of biomass energy, urban waste to energy, incineration, Anaerobic fermentation.	K2
CO3	determine the composition of landfill gas, land fill collection system, Aquatic biomass and its resources.	K3
CO4	analyze the biomass conversion techniques, bio products, biogas in India.	K4
CO5	demonstrate the types of biogas plant, comparative study of different types of biogas plant, Advantages and limitations.	K5&K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Biomass energy resources and conversion processes 1.1 Definition of Biomass, significance of biomass energy. Biomass – Origin of Biomass – Biomass energy resources, identification of biomass in the environment 1.2 Characteristics-methods of determination - proximate analysis and ultimate analysis, Determination of total solids and volatile solids 1.3. Classification of the Biomass resources – agricultural residues, herbaceous biomass, woody biomass, vegetable wastes, Assessment of biomass-Primary and secondary applications	K1-K6	7	1-5
2	Biomass Energy from wood 2.1 Introduction to Incineration: Urban waste – to – energy by incineration process – Schematic process of a waste incineration energy plant – Merits and Demerits, Factors affecting biogas production 2.2 Processing of wood and wood waste for incineration plant 2.3 Raw biomass materials for conversion to biogas – Agricultural waste and agricultural energy crops 2.4 Anaerobic fermentation process used in biogas plants	K1-K6	8	1-5
3	Landfill and other sources of biofuel 3.1 Landfill gas- Applications of Landfill gas, Composition of landfill gas- Collection system for landfill Gas (Field visit and training) 3.2 Aquatic biomass – Resources of aquatic biomass – algae –water hyacinth –ocean kelp	K1-K5	8	1-5
4	Biomass conversion techniques and bio products 4.1 Biomass conversion techniques like Electrochemical, Thermochemical: Pyrolysis, Gas combustion, Liquefaction, Biochemical 4.2 Introduction to bio products along with biochar 4.3 Advantages and disadvantages of Biogas –Biogas scenario in India – future prospects.	K1-K5	8	1-3
5	Biogas Plants 5.1 Biogas plant – types of biogas plants – Floating Dome type biogas plants – KVIC model, PRAGATI model , Ferro cement model, Fibre glass reinforced model - Advantages and limitations 5.2 Fixed dome type- Janata model, Deenabandhu model – Advantages and limitations 5.3 Comparative study of various models of Biogas plants	K1-K6	8	1-5

Practical Components (39 hours)

1. Identification of different biomass sources in the environment
2. Estimation of total solid and volatile solid in different types of biomass
3. Determination of density of the given biomass
4. Estimation of percentage of moisture and ash content for different types of biomass
5. Estimation of fixed carbon of the given biomass
6. Assessment of energy output of various biomass
7. Anaerobic fermentation
8. Biogas Plant Visit

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

WASTE MANAGEMENT

CODE:23VS/VM/WM36

CREDITS:6

L T P:303

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To identify different types of waste, collect and segregate as per standard operating procedures
- To identify different processes of waste management
- To understand the need for maintaining health and safety at workplace
- To reduce the environmental hazards that arise from indiscriminate dumping of waste
- To generate energy or obtain new materials from waste

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	show different types of waste, waste treatment, processing food waste, types of hazards, resource reduction	K1
CO2	outline the properties of solid waste, incineration, categories of food waste, safety measures, Recycle	K2
CO3	articulate waste minimization, Sanitary landfills, energy generation from food processed waste, Infectious waste, waste reduction	K3
CO4	evaluate recycling municipal waste, solid waste disposal, reduction of BOD and COD in waste water, hazards from genotoxic waste, usage of slurry and vermicomposting	K4
CO5	categorize the color codes of different waste, segregate the waste, properties of waste, waste audit, waste treatment	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Solid Waste 1.1 Definitions; Sources, types, composition, Signs, symbols and color codes for different types of solid wastes 1.2 Types and properties of Solid Waste; Municipal Solid Waste. Domestic wastes, industrial wastes and hazardous wastes, Bio medical waste, construction waste, E-waste, inert material 1.3 Collection, transfer stations; Segregation at the collection centers, Waste minimization and recycling of municipal waste	K1-K6	16	1-3
2	Waste Treatment 2.1 Waste Treatment – Physical, chemical and biological treatment 2.2 Incineration: Classification – batch type, continuous type, measures to mitigate environmental effects 2.3 Sanitary landfills – classification, Types, methods & siting consideration, waste land development, leachate and its handling 2.4 Solid waste Management : Composting – Aerobic and Anaerobic - Sanitary landfills and size reduction-different approaches to waste management-urban and rural	K1-K6	20	1-5
3	Food processing Wastes 3.1 Significance of handling Food processing waste 3.2 Categories of waste from fruits and vegetable processing, sugar, starch and confectionary, grains, legumes and oilseeds 3.3 Energy generation from different types of food processing wastes- mango peel, citrus, tomatoes, pine apple, banana, reduction of BOD and COD in waste water	K1-K6	16	1-4
4	Safe management of wastes 4.1 Overview of hazards; Types of hazards, Health Safety policies 4.2 Potential impact of waste on environment and human health-judicious use of plastics 4.3 Hazards from: infectious waste and sharps, chemical and pharmaceutical waste, genotoxic waste, Hazards from radioactive waste	K1-K6	16	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Waste Management 5.1 Waste minimization techniques: Resource Reduction, Reuse and recycling of wastes- Waste minimization audit 5.2 Domestic waste management and plastic waste management-concept of zero waste 5.3 Usage of slurry from sewage treatment plant, vermicomposting	K1-K6	10	1-5

Practical Component [39 hours]

1. Design of decentralized waste management plants of different capacities (IT / Commercial building / Industry / Urban Local Bodies).
2. Segregation of dry waste (Paper / Plastics / Metals / Glass).
3. Survey and understand door to door waste collection process.
4. Bioenzyme production from the fruit peels waste.
5. Preparation of liquid fertilizer from the ripened fruit wastes.
6. Setting up of compost unit and assessment.
7. Compost analysis.
8. Water quality assessment.
9. Waste water generation and analysis.

SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

ENVIRONMENT AND ECOLOGY

CODE: 23VS/VA/EN35

CREDITS: 5

L T P: 4 0 1

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the global climatic change and the sustainable initiatives
- To know about the policies and Acts to control and prevent pollution
- To understand the role of environment in ecological context
- To perceive urbanization development and protecting environment
- To plan equitable use of resources as a community

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	relate the occurrence of global warming, pollution, basics of ecology, wood structure food security, urbanization, human health and human rights on environmental sustainability	K1
CO2	illustrate climate change, microbial degradation, energy from waste, carbon foot printing and valuing nature and culture to safeguard the environmental values	K2
CO3	identify sustainable development, impacts due to air and water pollution, water related diseases, nutrition health by implementing solutions for energy management	K3
CO4	categorize biomass accumulation, fermentation mechanic, economic policies, environment laws, environment and human health and social justice for sustainable energy	K4
CO5	develop the idea of net energy production by plants and wood, biomass conversion to energy for sustainable environment	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Global climate change 1.1 Introduction- climate change- global warming- Climate modeling 1.2 Pollution- Types, causes, consequences and control measures 1.3 Sustainable development in the context of environmental upkeep	K1-K3	14	1-3
2	Elements of Ecology and Biomass 2.1 Basics of ecology, Inter dependence of different species Basic elements of biomass accumulation, Microorganism types, growth and nutrition 2.2 Ecological aspects of microbial degradation, degradation of cellulose, net energy production by plants, wood structure and wood chemistry 2.3 Fermentation- Aerobic /Anaerobic microorganism involved mechanism	K1-K5	14	1-5
3	Environmental & Economic Impacts of Bioenergy 3.1 Principles, Production and assessment of impacts due to air and water pollution on the environment 3.2 Food security and environmental impacts of biomass conversion to energy- energy from waste 3.3 Economic policies and environmental laws in the Indian context	K1-K5	14	1-5
4	Human population and the environment 4.1 Global population growth- population explosion- Urbanisation. 4.2 Environment and human health- climate and health- infectious diseases- water related diseases- risk due to chemical in food- cancer and environment 4.3 Carbon Foot printing	K1-K4	14	1-4
5	Human rights 5.1 Nutrition health and human rights- intellectual property rights- community biodiversity registers 5.2 Ethics- environmental values – valuing nature – valuing culture- social justice – equitable use of resources	K1-K4	9	1-4

BANKING PRACTICES

CODE: 23CM/UE/BP22

CREDITS: 2

L T P: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To educate the students on the banking services
- To provide an opportunity to understand the significance of E-banking services.
- To acquire knowledge on negotiable instruments

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	to understand the opening and closing of bank accounts	K1
CO2	identify the various E-banking services	K2
CO3	comprehend knowledge on negotiable instruments	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	CUSTOMERS' ACCOUNTS WITH THE BANK 1.1 Opening of Bank Accounts. 1.2 Different Types of Bank Accounts. 1.3 Documents Relating to Transactions with Bank. 1.4 Closing of Bank Accounts	K1-K3	6	1-3
2	E- BANKING 2.1 Meaning and Importance. 2.2 Credit Card, Debit Card, Smart Card. 2.3 Internet Banking – Services and Major Issues. 2.4 ATM – Concept, Features and Importance. 2.5 Mobile Banking and Telebanking	K1-K3	10	1-3
3	NEGOTIABLE INSTRUMENTS 3.1 Meaning, Characteristics. 3.2 Types of Negotiable Instruments	K1-K3	10	1-3

UNIT	CONTENT	CL	Hrs	CO
	3.2.1 Cheque – Requirement of a Cheque. 3.2.2 Post-dated Cheque, Stale Cheque, Ante-dated Cheque. 3.2.3 Crossing- Meaning, Types and Significance. 3.2.4 Endorsement- Types and Significance

(Effective from the academic year 2023 – 2024)

ADVANCED BIO ENERGY

CODE:23VS/VM/AB46

CREDITS:6

L T P: 3 0 3

TOTALTEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To gain knowledge on the different types of raw material that can be used for bio-energy generation
- To be able to plan, and install a biogas plant
- To be able to troubleshoot and maintain a biogas plant
- To understand the health and effect of the Environment on sustainability
- To design and construct types of biogas stove

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	remember the advanced bioenergy concepts, biogas production, biogas plant, health and environment,biogas stove	K1
CO2	evaluate the bioenergy classifications, biogas phases, estimation of biogas plant capacity, sustainability on environment and use of biogas stove.	K2
CO3	refine the conceptual design of bioconversion, factors affecting biogas production, maintenance of biogas plant, public health impact and types of biogas stoves	K3
CO4	understand the importance of biobased products, feedstocks for biogas production, installation of biogas plants, bio gas cleaning systems	K4
CO5	apply principles of bio materials and conversion, organic components, safety of biogas plant and construction of biogas stove and construction of biomass gas stove	K5&K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Bioenergy Concepts 1.1 Introduction-biomass, definition, classification- Biopower, Bioheat - Solid, Liquid and Gaseous biofuels 1.2 Bioconversion-aerobic and anaerobic -anaerobic digestion for methane production - microbial activities 1.3 Biobased products - Adhesives, Construction materials and composites, Landscaping materials, Plants and vegetable sinks	K1-K6	7	1-3
2	Biomass Production 2.1 Biogas production process- phases- Hydrolysis, Acidogenesis, Acetogenesis, Methanogenesis. 2.2 Factors affecting biogas production Different feedstocks for biogas production- first second and third generation, Residue Feedstock 2.3 Agricultural waste - Forestry waste, Organic components of residential, commercial, institutional and industrial waste	K1-K6	8	1-5
3	Biogas Plant Installation 3.1 Biogas Plant- Estimation of plant capacity and construction guidelines and gas conveyance system 3.2 Operation, maintenance and safety measures of the biogas plant 3.3 Slurry handling, utilization and enrichment, Slurry analysis, Biogas purification and utilization, composting methods	K1-K6	8	1-5
4	Health & Environmental Issues of Bio energy 4.1 Understanding sustainability & Effect of Environment on sustainability 4.2 Public sensitivity, Public health impact	K1-K3	8	1-3
5	Biogas Stove 5.1 Study and use of biogas stove and dual fuel engines 5.2 Study of different types of stoves and gas cleaning systems 5.3 Construction of biomass gas stove and study	K1-K6	8	1-5

Practical Components [39 Hours]

1. Evaluation of amount of energy given off in a combustion reaction by a Biomass-Water Boiling Test (WBT)
2. Performance and evaluation of different stoves
3. Estimation of standard enthalpy of ethanol
4. Site selection and estimation of the plant capacity of a biogas plant
5. Determination of pH
6. Setting up of a biogas plant out of the given components
7. Model construction of biogas plant
8. Assessment of safety measures
9. Construction of biogas stove
10. Study of different types of stove

SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

BIOFUELS

CODE:23VS/VM/BF46

CREDITS:6

L T P: 303

TOTALTEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To develop basic understanding of renewable energy engineering and role of biofuels
- To explore the increasing role of renewable energy engineers to address growing energy needs
- To encourage the students a substantial knowledge of biofuel production technologies.
- To provide the knowledge about properties, composition, features of bio fuels and uses of biomass and their environmental impacts.
- To educate the methods of production of biodiesel

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	outline the understanding of Biofuels, principle of thermochemical conversion, chemistry of biodiesel, types and generations of biodiesel	K1
CO2	summarize the cultivation process, gasification types, characteristics of vegetable oil, oil source of the biofuel, Bioethanol production process	K2
CO3	make use of energy plantation, mini gasifier, production technology of biodiesel, by product of biodiesel, biohydrogen	K3
CO4	analyze policy issues, scrubbers, post production, storage of biodiesel, biodiesel from Algae	K4
CO5	determine the importance of vegetable oil, thermochemical conversion, testing parameters, testing gasifier and biorefinery concepts	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Biofuel Crops 1.1 Introduction and classification of Biodiesel, Different types of biofuel crops 1.2 Cultivation practices of biofuel crops, Energy plantation 1.3 Energy scenario, policy issues and importance of vegetable oil based biodiesel	K1-K3	10	1-3
2	Principles of Thermochemical Biomass Conversion Processes 2.1 Thermochemical conversion - principles and types, combustion and types 2.2 Gasification -principles--types(Fluidized, updraft, downdraft and cross draft) 2.3 Scrubbers-types, methods and selection, Biomass Densification and utilization	K1-K4	18	1-5
3	Biofuels 3.1 Processing of oil seeds, Chemistry of biodiesel- Transesterification. 3.2 Properties of Biodiesel and testing 3.3 Characteristics of vegetable oil 3.4 Storage of biodiesel- Standards and emission norms of biodiesel	K1-K6	18	1-4
4	Biodiesel plant 4.1 Fabrication of mini plant for biodiesel production-different types of biodiesel production processes 4.2 Fuel Production of biodiesel from different oil- Oil extraction-Oil Refining 4.3 By product of biodiesel production process and utilization 4.4 Laboratory analysis of Biodiesel (Cetane number, Kinematics Viscosity, Caloric Value and Flash point)	K1-K6	18	1-5
5	Other Biofuels 5.1 First, second and third generation biofuels 5.2 Bioethanol production process, Bio hydrogen production 5.3 Biodiesel from algae and other oceanic species, its merits and demerits 5.4 Biorefinery concepts and advantages	K1-K6	14	1-5

Practical Component [39 hours]

1. Characteristics of different types of feedstock
2. Determination of density of different fuel on Biofuels
3. Determination of viscosity of Biofuels
4. Sensory, Physical appearance and Identification of different Biofuels
5. Cloud point and Pour and point measurement of Biodiesel
6. Estimation of standard enthalpy of ethanol
7. Determination of effect of temperature on density of different fuels
8. Estimation of soap content in the Biodiesel - Quality Test
9. Model construction and assembling of various gasifiers
10. Estimation of acid number of different types of fuels

SYLLABUS

(Effective from the academic year 2023 – 2024)

MICROBIAL FUEL CELLS

CODE:23VS/VA/MF45

CREDITS:5

L T P: 4 0 1

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To gain fundamental knowledge in the development of fuel cell and microbial fuel cells
- To understand hydrogen energy perspectives and safety issues
- To determine various characterization techniques and computer modeling fuel cell
- To analyze different principles, working procedures of microbial fuel cells
- To create and rank the application of microbial fuel cell in power generation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Find the need, electro catalysis, safety issues, in situ and ex-situ characterization techniques of fuel cell and principle of microbial fuel cell and bioelectricity for various applications	K1
CO2	Describe microbial cell, charge and mass transport, life cycle analysis, need for characterization of fuel cell, component of microbial fuel cell, bio hydrogen production for further applications and Electrogenic Microbes	K2
CO3	Illustrate types of fuel cell, hydrogen source, cost expectation, I-V curve, comparative study of microbial fuel cell and traditional fuel cell and MFC in bio sensor for energy utility	K3
CO4	Compose fuel cell modelling, analytical solutions, working of MFC for alternative solution for energy management	K4
CO5	Create and construct MFC, waste water treatment for energy generation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Overview of fuel cells 1.1 Need of fuel cell -History of Fuel Cells 1.2 Types of fuel cells - low and high temperature fuel cells 1.3 Microbial fuel cells – Introduction	K1-K3	13	1-3
2	Charge and mass transport of conventional fuel cells 2.1 Electro catalysis – activation kinetics – hydrogen source 2.2 Fuel cell charge and mass transport – flow field, transport in electrode and electrolyte 2.3 Safety issues -cost expectation - life cycle analysis of fuel cells	K1-K3	13	1-4
3	Characterization techniques of fuel cell 3.1 Need for characterization of fuel cell 3.2 In-situ and ex-situ characterization techniques, IV curve, frequency response analysis 3.3 Fuel cell modelling and system integration: -1D model – analytical solution and CFD models	K1-K4	13	1-4
4	Microbial fuel cells 4.1 Principle and components of microbial fuel cells 4.2 Construction and working of microbial fuel cells- Electrogenic Microbes- Aerobic and Anaerobic Bacteria, Fungi and Algae 4.3 Microbial fuel cells vs Traditional fuel cells-comparative study	K1-K5	13	1-5
5	Applications of Microbial Fuel Cells 5.1 Generation of bioelectricity. 5.2 Commercial waste management, Biohydrogen production 5.3 Wastewater treatment. 5.4 Application of MFCs in biosensor	K1-K5	13	1-5

INTRODUCTION TO COMPUTER SKILLS

CODE: 23CS/US/IC44

CREDITS: 4

L T P: 2 0 2

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To introduce word processing.
- To provide the students understanding of spreadsheets.
- To equip the students with skills and knowledge necessary to create a presentation.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the tools and techniques in word, spreadsheet and presentation	K1
CO2	explain the options available in word processing, spreadsheet and presentation	K2
CO3	apply the techniques in creating a document, spreadsheet and presentation	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	Word Processing 1.1 Text Editing, Text tools, Character and paragraph formatting, Tabs and lists, Using Tables, Mail Merge 1.2 Working with objects – Word Art, Clip Art, Pictures, Built-in and custom styles, Table of contents, Templates, Securing documents. Tool: MS-Word	K1-K3	10	1-3
2	Spreadsheet 2.1 Data entry, Using formulae and functions, Formatting data, Creating charts, Lists, Sorting, Filtering 2.2 Working with forms, Grouping, Linking and Protecting sheets, Data Validation, Printing spreadsheets. Tool: MS-Excel	K1-K3	8	1-3
3	Presentation 3.1 Creating slides, Using bullets, Formatting slides, Including word art, Slide templates, Drawing tools, Selecting and grouping objects, Viewing slides and handouts, Transitions, Spell check, Master Slide, Rehearse timings, Adding sound. Tool: MS-PowerPoint	K1-K3	8	1-3

UNIT	CONTENT	CL	HRS	CO
4	Word Processing and Spreadsheet – Practicals 4.1 Create an Application with different formatting styles.. 4.2 Create Tables, using different formatting styles. 4.3 Create word documents implementing Clip art, Word art and Auto shapes. 4.4 Create Spreadsheets with various formatting styles. 4.5 Create Spreadsheet to include formula and implement the same using different graphs and charts. 4.6 Create a spreadsheet that incorporates data validation.	K1-K3	16	1-3
5	Presentation 5.1 Create a presentation that displays a clear, logical sequence. 5.2 Create a presentation that incorporates animations. 5.3 Create bulleted slides and slides that incorporate word art. 5.4 Create a presentation that incorporates drawing tools	K1-K3	10	1-3

(Effective from the academic year 2023 – 2024)

NOVEL MATERIALS FOR SUSTAINABILITY

CODE:23VS/VM/NM56

CREDITS:6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the concept of sustainability through revolutionary materials
- To apply energy production alternatives for sustainability
- To gain knowledge on the role of various materials to attain sustainable development
- To assess the properties and recent advances of thermo-electrical material
- To understand the Energy Efficiency materials and Conservation of energy

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall Nanoscience, catalysis, thermoelectric, smart material and insulation material	K1
CO2	explain the novel materials, supercapacitor, properties of thermoelectric materials , energy saving materials and polyurethane uses	K2
CO3	identify the application of nanomaterials, basics of polymers types, LED , thermal doors	K3
CO4	examine the various properties of nanomaterials, TiO ₂ as a catalyst, heating cooling thermoelectric applications, materials for industry waste, energy efficient materials	K4
CO5	discuss the luminous intensity, thermal conductivity of the material, advancement in thermo electricals, energy efficiency for different lighting systems, water splitting analysis and energy conservation in building	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Fundamentals of Nanoscience 1.1 Nanomaterials and Nanoscience: terminology- scales of nanosystems- nanoparticles: Introduction-Atoms to molecules- Quantumdots 1.2 Novel Materials : Metals and metal oxides - Carbon Nanotubes, Dendrimers, Fullerenes and composites 1.3 Applications of Nanomaterials	K1-K4	7	1-3
2	Functional Materials for Sustainable Energy Applications 2.1 Materials for water splitting-catalysis and photocatalysis - Use of Titanium dioxide as catalyst - Supercapacitors 2.2 Classification of polymers: Natural, Semi-synthetic, Synthetic (Basics)-Polypropylene (Basics)-Use of polymers	K1-K6	8	1-5
3	Thermoelectric materials 3.1 Properties of thermoelectric materials- Thermoelectric materials for heating and cooling applications 3.2 Recent advances in the field of thermo electricals	K1-K6	8	1-4
4	Smart Materials for Sustainability 4.1 Definition and Characteristics of smart materials 4.2 Energy saving materials - Energy efficient LED materials for lightings 4.3 Materials for industry and textile waste water treatment (To treat the heavy metals like arsenic, lead and cadmium)	K1-K6	8	1-5
5	Materials for Energy Efficient Buildings 5.1 Insulation materials: Importance of insulation- Functional uses of polyurethane- Plant based polyurethane foams from bamboo, hemp, kelp and straw bales - Thermal Doors-Cool roofings 5.2. Energy Efficiency materials and Conservation: Energy conserving windows-Low e-windows- Earth wall -Xeriscaping	K1-K6	8	1-5

Practical components [39 hours]

1. Calculating the luminous efficacy of different bulbs
2. Calculating the room indices of different rooms
3. Converting temperature difference into electricity using Peltier effect
4. Converting heat into electricity using Seebeck effect
5. Construction of models of energy efficient landscapes and buildings using energy efficient materials
6. Assessment of the usage of various agricultural by-products for waste treatment
7. Simple Water catalysis experiment
8. Measuring the IV characterization of DSSC
9. Measuring the IV characterization of LED

SOFTWARE TOOLS AND GREEN CLOUD COMPUTING

CODE: 23VS/VM/SG56

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To learn assessing the performance of energy systems through software.
- To get familiarity with software tools available through demo sessions.
- To know the information about energy simulation tool like PVSYST, RET and eQUEST
- To increase the products energy efficiency using green cloud computing
- To set up information technology with a minimal carbon footprint

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	learn various software used for renewable energy and basics of PVSYST technology, RET, eQUEST, Cloud computing	K1
CO2	design a renewable energy source through PVSYST, RET ,eQUEST(Wizards) software and Environmental impacts of Green cloud computing	K2
CO3	analyze the energy performance via PVSYST, RET, eQUEST(requirements and features) and Motivation for Green cloud computing.	K3
CO4	acquire knowledge to monitor PVSYST, RET, eQUEST and Environmental standards and policy frameworks of Green cloud computing	K4
CO5	simulate the programmes for PVSYST, RET and eQUEST	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Simulation and data analysis of the PV systems 1.1 Effective softwares for various renewable energy - Demonstration of the software to study the sizing, simulation and data analysis of the PV systems-PVSYST 1.2 Preliminary design, Project Design and economic evaluation of the PV systems. Analysis of Stand-alone systems.	K1-K6	26 (T+P)	1-5
2	Assessment and Optimisation of actual energy performance 2.1 Identification assessment and optimisation of the technical viability of potential clean energy projects-RETScreen. 2.2 Measurement and verification of actual energy performance 2.3 Evaluation of additional energy savings/production opportunities.	K1-K6	10	1-5
3	Quick Energy Simulation Tool 3.1 Evaluation of Building Technologies-eQUEST 3.2 Analysis of Building Design 3.3 Study of Energy Efficiency Measures	K1-K6	26 (T+P)	1-5
4	Introduction to Green Cloud Computing 4.1 Understanding Cloud Computing and its Environmental Impact 4.2 Motivation for Green Cloud Computing- Environmental Challenges and Concerns of Traditional Cloud Computing 4.3 Key Concepts: Energy Efficiency, Carbon Footprint, Resource Optimization	K1-K4	8	1-4
5	Cloud Governance and Sustainability 5.1 Environmental Standards and Certifications for Cloud Providers- Green Metrics and Key Performance Indicators (KPIs) 5.2 Cloud Provider Selection Criteria from a Green Perspective 5.3 Policy Frameworks for Green Cloud Adoption and Management	K1-K4	8	1-4

SYLLABUS

(Effective from the academic year 2023 – 2024)

SOLAR POWER PLANT DESIGNING

CODE: 23VS/VM/PD56

CREDITS: 6

L T P: 3 0 3

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To be able to assess the solar power plant needs
- To gain knowledge on safety measures for working in a Solar power plant
- To gain hands on experience on designing of solar power plants
- To prove safety procedures in installation solar power plant
- To fabricate protective equipment with proper mounting of solar photovoltaics structures

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall solar module mounting, design of combiner boxes, safe work procedure and earthing pits of solar PV power plants.	K1
CO2	demonstrate site survey, selection of other component, design of switch gear, personal protective equipment and lightning arrestor foundation for solar power plant energy designing.	K2
CO3	construct power transmission system, design of solar modules, batteries and inverters, safety hazards and grid transmission of solar power plant utility.	K3
CO4	inspect balance of systems, energy simulation report for the design of combiner boxes and switch gear, use of required tools and equipment and solar water pumping system for effective solar power plant.	K4
CO5	accessing the energy simulation report for the design of batteries and inverters and mounting structure of rooftop of solar power plant for various purposes.	K5, K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Structural design of solar PV power plant 1.1 Study of site survey and soil test reports. 1.2 Design and documentation: Plant Infrastructure - overall plant layout - solar module mounting and other components - switchyard and power transmission system. 1.3 Design the capacity of a solar power plant - commissioning and maintenance of solar power plants. 1.4 Design and selection of solar modules.	K1-K3	8	1-3
2	Design of ON - grid connected solar PV system 2.1 Selection of other components: Inverters, Strings, Combiner boxes, switchgear, batteries and Inverters. 2.2 Design of solar modules, combiner boxes, inverter, Balance of Systems.	K1-K4	8	1-5
3	Energy simulation of Rooftop off grid solar PV power plant 3.1 Design of combiner boxes, switchgear, batteries and Inverters. 3.2 Energy simulation report for the design of combiner boxes, switchgear. 3.3 Energy simulation report for the design of batteries and Inverters.	K1-K6	8	1-4
4	Personal health & safety at solar PV project site (Theory & Practical) 4.1 Establish and Follow safe work procedure - Use and maintain personal protective equipment. 4.2 Identify and mitigate safety hazards - Demonstrate safe and proper use of required tools and equipment. 4.3 Identify work safety procedures and instructions for working at height.	K1-K6	8	1-5
5	Design of foundation for other components (Theory & Practical) 5.1 Design plan for Earthing pits, lightning arrestor foundation- grid and grid transmission. 5.2 Design of switch yard. 5.3 Solar water pumping system-Design of mounting structures for Rooftop. 5.4 ACDB/DCDB Design –Cable calculation-losses and square meter	K1-K6	7	1-5

1. Site visit 10kW to 100kW
2. Hands on Designing
3. Fabrication of Structure-visit

Practical components [39 hours]

1. Troubleshooting fuse and circuit breaker
2. Maximum power point tracking of a solar pane.
3. Determination of angle and intensity of light
4. Analyzing solar cooker model
5. Efficiency of a solar cooker
6. Efficiency of solar water distillation unit
7. Performance evaluation of solar PV power plant
8. Calculating the power by light intensity
9. Power of the solar cooker

(Effective from the academic year 2023 – 2024)

GREEN BUILDING

CODE:23VS/VM/GB56

CREDITS:6

L T P: 5 0 1

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To increase the use of solar energy in buildings.
- To reduce the non-renewable energy demand and green house gas emissions
- To gain knowledge on green building techniques and integrated designs.
- To understand the overall impact on the orientation and construction.
- To study the eco-friendly and regionally available construction material.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	remember and learn the concept of energy efficient buildings, passive solar heating, solar cooling, integrated passive design and green buildings.	K1
CO2	understand the calculation of heating and cooling loads, heat transmission in building, cooling requirements, passive solar lab and green building features.	K2
CO3	identify the ability of internal heat sources, bioclimatic classification, absorption refrigeration, solar control and green materials.	K3
CO4	distinguish the passive heating concepts, heat pumps, passive solar buildings and indoor environment quality of green buildings.	K4
CO5	appraise the direct and indirect heat gain, importance of solar control and green building rating system.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 –Create		

UNIT	CONTENT	CL	Hrs	CO
1	Energy Transfer in Buildings 1.1 Concepts of energy efficient buildings. Calculation of heating and cooling loads of the building. Building's energy balance accounting for solar energy gain – ActiveArchitecture 1.2 Internal heat sources-Low energy and zero energy buildings	K1-K3	16	1-3
2	Passive Solar Heating Systems 2.1 Thermal comfort - Heat transmission in buildings - Bioclimatic classification 2.2 Passive heating concepts - Direct heat gain - Solar Windows - indirect heat gain- Masonry and Water Thermal StorageWall	K1-K4	16	1-5
3	Solar Cooling of Buildings 3.1 Cooling Requirements - Cooling Load Calculations 3.2 Absorption Refrigeration - Heat Pumps	K1-K4	14	1-4
4	Integrated design 4.1 Passive solar design lab – designing, building and monitoring passive solar building 4.2 Orientation for solar control- The importance of solar control for cooling, comfort and daylighting	K1-K5	16	1-5
5	Green Buildings 5.1 Green building features - Green materials – Window coating– Roof top coating – Protective coatings - integrated ecological design - indoor environment quality. 5.2 The National green building rating system GRIHA -IGBC rating systems	K1-K5	16	1-5

SYLLABUS

(Effective from the academic year 2023-2024)

HUMAN BEHAVIOUR

CODE: 23PY/US/HB52

CREDITS: 2

LTP: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE:

- To help students understand basic principles of psychology
- To create self-awareness and understanding of various aspects of human behaviour
- To acquaint the learner with the complexities of individual differences

COURSE LEARNING OUTCOMES:

On successful completion of the course, the student will be able to:

COs	DESCRIPTION	CL
CO1	identify and recall important notions in psychology	K1
CO2	elaborate on the understanding of human behavior from a scientific perspective	K2
CO3	apply psychological principles to understanding self and others	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Definition of psychology and ABCs of human behaviour 1.2 Factors affecting human behaviour 1.3 Methods of studying human behaviour- introspection, observation, interview, case study, questionnaire, experimental method 1.4 Psychological professions and areas of specializations	K1- K3	10	1-3
2	Self 2.1 Definition and understanding the self: William James 2.2 Self-awareness, self-introspection 2.3 Enhancing the self or self-regulation	K1- K3	8	1-3
3	Individual differences in human behaviour 3.1 Biological factors: temperaments 3.2 Psychological factors: personality (big 5 model), intelligence 3.3 Socio-cultural factors: individualist vs collectivist cultures	K1- K3	8	1-3

ENTREPRENEURIAL INITIATIVES FOR SUSTAINABLE DEVELOPMENT

CODE:23VS/VM/EI66

CREDITS:6

L T P: 4 0 2

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To instill the spirit of entrepreneurship among youth and develop entrepreneurial initiatives
- To enhance self-employment opportunities in energy industries.
- To gain awareness of innovation and give different dimensions to energy products
- To train in the preparation of business project proposals.
- To raise awareness on women entrepreneurship

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the need for entrepreneurship, entrepreneurial motivation, women entrepreneurship, identification of products and Indian entrepreneurs	K1
CO2	enhance the ability on the importance of entrepreneurship, decision and formulation, women empowerment, market demand and Indian entrepreneurs in renewable energy	K2
CO3	explore the various characteristics of entrepreneurship, entrepreneurial venture, selection of products and business planning and women entrepreneurs in renewable energy	K3
CO4	develop knowledge on barriers to entrepreneurship, factors governing women entrepreneurs, financial and business collaboration and entrepreneurs in renewable energy sectors	K4
CO5	discover the steps to overcome barrier, schemes for women entrepreneurs, business idea generation and Case study on Indian women entrepreneurs	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Entrepreneurship 1.1 Need for Entrepreneurship Enterprise-Entrepreneurship and Entrepreneur: Definition and Concept 1.2 Qualities, Types and Functions of Entrepreneurs. 1.3 Studies on Indian Entrepreneurship Model.	K1-K3	13	1-3
2	Entrepreneurial Motivation and Business Ideas 2.1 Stories of Successful Entrepreneurs. 2.2 Idea Generation and Screening - Sources, evaluation and selection of business ideas 2.3 Business Plan – Meaning, Contents of Business Plan process. 2.4 Entry Barriers and Steps to overcome the barriers.	K1-K5	13	1-3
3	Project Identification 3.1 Meaning and Types of Projects, Project Life cycle. 3.2 Meaning, Elements and stages of Project formulation 3.3 Project feasibility analysis and preparation of Business project proposal.	K1-K5	17	1-5
4	Women Entrepreneurship 4.1 Role and Challenges of Women Entrepreneur 4.2 Special Privileges and problems faced by Women Entrepreneur	K1-K5	22	1-5
5	Financial Planning and Case Studies 5.1 Financial Planning and sources of finance for enterprise. 5.2 Government policies and Ministry of Micro, Small & Medium Enterprises 5.3 Industrial Visit	K1-K5	13	1-5

GREEN MANAGEMENT-URBAN AND RURAL SCENARIO

CODE: 23VS/VM/GM66

CREDITS: 6

L T P: 5 0 1

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To appreciate the concept of green infrastructure
- To understand the needs of the urban and rural scenario for sustainable development
- To gain knowledge on the eco designing and role of green marketing
- To recommend green space in urban planning for healthy living
- To assemble rural area developments plans for resilient building

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define social benefits, micro climate, green marketing, urban planning, inland waters for the emerging green marketing	K1
CO2	describe green infrastructure, heat island effect, role of green finance, urban open spaces and managing rural area in order to maintain green environment	K2
CO3	apply infiltration system, local micro climate, green supply chain management, urban forest and participatory watershed development for sustainable environment	K3
CO4	discover eco designing and labelling, green space in cities for promoting healthy living and adopting to climate change	K4
CO5	access environment strategy, competitive advantage and climate resilient building	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Green infrastructure for Sustainable Development 1.1 Introduction-Background-The problem- Solution- Social benefits- 1.2 Types of green infrastructure-Infiltration system-green roofs-rainwater harvesting-downspout disconnection-Tree plantation 1.3 Microeconomic aspects of green infrastructure	K1-K3	15	1-3
2	Microclimate Regulation 2.1 Microclimate- Introduction-Heat Island- Heat Island effect- Definition- Impacts 2.2 Cooling strategies-The role of communities and public – Effects of trees on local outdoor microclimate 2.3 The properties and potential of different tree species on microclimate regulation	K1-K3	15	1-5
3	Green Marketing 3.1 Emergence of new Environmental market, Green marketing, Role of Green finance and climate finance 3.2 Environmental strategy and Competitive advantage, Green supply chain Management 3.3 Eco Designing, Eco - labelling	K1-K5	15	1-5
4	Urban Scenario 4.1 Urban planning for sustainable development 4.2 Importance of green space in cities for promoting healthy living and wellbeing. 4.3 Types of urban open spaces-Urban Forest-Drawbacks of Urban green spaces.	K1-K4	18	1-4
5	Rural scenario 5.1 Managing rural area-arable land-Forests-Inland waters 5.2 Participatory watershed development in India-Adapting to climate change 5.3 Climate resilient buildings	K1-K5	15	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**BACHELOR OF VOCATIONAL (B.Voc.) PROGRAMME
SUSTAINABLE ENERGY MANAGEMENT**

SYLLABUS

(Effective from the academic year 2023 – 2024)

ENERGY FOR SMART CITIES

CODE:23VS/VM/SC66

CREDITS:6

L T P: 5 0 1

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To understand the need for a smart city
- To know the sustainable design of the Smart Cities
- To apply the green energy technologies for the design of a smart city.
- To promote cities that provide clean and sustainable environment
- To give a decent quality of life to their citizens through the application of smart solutions

COURSE LEARNING OUTCOMES

COs	DESCRIPTION	CL
CO1	define energy demand, Green approach, city planning, smart city, global standard, Flaws in smart city	K1
CO2	summarize energy in conventional city, smart approaches, elements of smart city, 100 smart cities policy and normal accidents in technical systems	K2
CO3	apply several ways to alternative sources, Energy strategy 2040, urban energy system, Global experience, Policy and drive green in smart city	K3
CO4	inspect basic solar options, conventional vs smart city, Governance of smart cities and vulnerability of networks	K4
CO5	improve the technologies for a smart city, smart city in populated area and safety measures in smart city	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Energy demands, Challenges and Options 1.1 Energy demand, Energy scenarios of conventional cities 1.2 Alternative resources-Green approach to meet Energy demand 1.3 Energy Strategy 2040	K1-K3	15	1-3
2	Introduction to City Planning and Energy Components 2.1 City Planning-Concepts-Smart approaches to city planning, Patrick Geddes planning concept- Overview of an urban energy system 2.2 Solar options - Energizing city planning through direct and indirect solar resources, PV and thermal; Singular or hybrid	K1-K4	10	1-5
3	Understanding Smart Cities 3.1 Definition of Smart City- Essential Elements of Smart city- Global Experience of Smart Cities 3.2 Conventional vs. Smart City Introduction to Technologies for a Smart city: Smart energy 3.3 Smart transportation, Smart community infrastructure, Smart mobility, Smart IoT devices	K1-K5	10	1-4
4	Smart Cities Planning and Development 4.1 Smart Cities – Global standards and performance Benchmarks- -100 Smart Cities Policy and Mission 4.2 Governance of Smart Cities (Specific applications)- Successful Smart City Planning in Densely Populated Areas	K1-K5	30	1-5
5	The Downside of Intelligent Cities present and in Future 5.1 Flaws in smart city infrastructure - normal accidents in complex technical systems— vulnerability of cellular networks during urban crises 5.2 Drive green in Smart city, EV, HEV-Hybrid Self Charging Vehicles 5.3 Safeguarding measures for smart city planners	K1-K5	18	1-5

PATTERN OF ASSESSMENT

Continuous Assessment

Total Marks: 50

Duration: 90 minutes

Section	Knowledge Level	Marks	Pattern
A	K1	10	5×2=10 (Answer all questions)
B	K2/K2	10	2×5 = 10 (2 out of 4 questions)
	K3/K3	10	2×5 = 10 (2 out of 4 questions)
C	K4/K4	10	1×10 = 10 (1 out of 2 questions)
D	K5/K5	10	1×10 = 10 (1 out of 2 questions)

Other Components: All K1 to K6 levels should be assessed

Total Marks:50

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

END SEMESTER EXAMINATION

End-Semester Examination:

Total Marks: 100

Duration: 3hours

Section	Knowledge Level	Marks	Pattern
A	K1	20	10×2=20 (Answer all questions)
B	K2/K2	20	4×5 = 20 (4 out of 6 questions)
	K3/K3	20	4×5 = 20 (4 out of 6 questions)
C	K4/K4	20	2×10 = 20 (2 out of 4 questions)
D	K5/K5	20	2×10= 20 (2 out of 4 questions)

SYLLABUS

(Effective from the academic year 2023 – 2024)

PROJECT

CODE:23VS/MC/PR615

CREDITS: 15

OBJECTIVES OF THE COURSE

- To enable the student to work independently
- To apply the skill development training they have gained during the course of study
- To enhance employability
- To develop technical, interpersonal and communication skills
- To know the ability to generate new ideas in food product development

GUIDELINES FOR PROJECT

Project is done individually in an industry / lab

Project requires practical work with the submission of a project report which will include the work executed.

The project report should be submitted in the prescribed format containing a minimum of 25 pages.

Guidelines for Evaluation:

The candidate will be evaluated by the Industrial partner/guide, based on attendance, maintenance of log book, experimental work and project report. The maximum marks will be 100.

Rubrics for Evaluation	Marks	Cognitive Level
Documentation	10	K1
Formulating topic statement	15	K2
Explaining the conceptual framework	25	K3
Textual analysis	25	K4
Research arguments	15	K5
Research conclusions	10	K6
