STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI-600 086

DEPARTMENT OF HISTORY

PROGRAMME DESCRIPTION

The programme offers a range of courses that provide an overview of Indian history, world history as well as interdisciplinary courses on tourism and hospitality. The programme also has courses such as Indian Constitution, Gender Studies, Performing Arts, Art and Architecture, Entrepreneurship, Global Cuisines and Airport Customer Services. Students graduating from the programme move on to careers as teachers, lawyers, researchers, bankers, civil servants, travel and tourism professionals, managers and entrepreneurs.

The programme offers value-added, skill-oriented and extra credit optional certificate courses such as Tour Leaders and Travel Consultancy, Introduction to Archaeology, Airport Management, Event Management, and foreign language courses on Spanish, German and Mandarin and coaching for the UPSC examinations.

The students are provided an opportunity to take up internships during their course of study. The Department has its own Heritage Club to instil in students the need to appreciate and preserve India's tangible and intangible heritage.

Regular field trips and study tours are organised to provide students an experiential learning of India's tourism resources. The Department publishes an annual journal called "Parivartana" which provides the students with a forum to express their ideas and creativity.

VISION OF THE DEPARTMENT

To build a community of empowered women - students, teachers, and alumnae - who are responsible citizens and have the knowledge, skills, and sensitivity to value and protect India's diversity, heritage, and culture, and who practice the values of inclusiveness, compassion and humaneness.

MISSION OF THE DEPARTMENT

To create in our students an understanding of the fundamental facets and the methods of scholarship in the fields of history and tourism; expose them to rigorous academic standards; and to create a lively educational environment enriched by collaboration with industry and hands-on learning.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086
PROGRAMME SPECIFIC OUTCOMES (PSOs)

**On successful completion of the B.A. History and Tourism Programme,
the students will be able to**

PSO1	demonstrate a grounding in the facts and methods of the academic disciplines of history and tourism; the ability to apply critical thinking and analyse them.
PSO2	enhance their communication, teamwork and leadership skills.
PSO3	apply their knowledge to understand and appreciate the heritage of India leading to its conservation and promotion.
PSO4	display openness to diversity in points of view, creativity, and the ability to see opportunities and manage businesses in tourism, culture, and heritage
PSO5	display understanding of and sensitivity to political, socio-economic, cultural and environmental issues

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE: 23HS/GC/ES12

CREDITS: 2

L T P : 2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3

(6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23HS/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23HS/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A - 30 words	K1 (10)	$5 \times 2 = 10$ marks	5 K1 questions	5 K1 questions
B - 150 words	K2 (10)	$2 \times 5 = 10$ marks	2 K2 questions	3 K2 questions
	K3 (10)	$2 \times 5 = 10$ marks	2 K3 questions	3 K3 questions
C – 1000 words	K4 (10)	$1 \times 10 = 10$ marks	1 K4 question	2 K4 questions
	K5 (10)	$1 \times 10 = 10$ marks	1 K5 question	2 K5 questions
	Total	50	11	15

Other Components:

Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion

Two to three components will be prescribed

End Semester Examination:

Total Marks: 100

Duration: 3 Hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No. of Questions to be answered	No. of Questions to be set
A - 30 words	K1 (20)	$10 \times 2 = 20$ marks	10 K1 questions	10 K1 questions
B – 150 words	K2 (20)	$4 \times 5 = 20$ marks	4 K2 questions	5 K2 questions
	K3 (20)	$4 \times 5 = 20$ marks	4 K3 questions	5 K3 questions
C – 1000 words	K4 (20)	$1 \times 20 = 20$ marks	1 K4 question	2 K4 questions
	K5 (20)	$1 \times 20 = 20$ marks	1 K5 question	2 K5 questions
	Total	100	20	24

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600086

B.A. DEGREE: BRANCH I A -- HISTORY AND TOURISM

SYLLABUS

(Effective from the academic year 2023-2024)

PROJECT

CODE: 23HS/ME/PR45

CREDITS: 5

OBJECTIVES OF THE COURSE

- To enable students to develop research capabilities.
- To make students develop an interest in minor and major research projects.
- To help students gain knowledge of career opportunities through projects.
- To enable students have a better understanding of the process of research.
- To help students learn the techniques of research writing.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe the process of research.	K1, K2
CO2	paraphrase and summarize knowledge gained from sources.	K3
CO3	collect, collate and synthesise data.	K4
CO4	assess the techniques needed for different kinds of research and use them in project writing.	K5
CO5	write a brief dissertation using accepted research methodology.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 - Create		

Project Guidelines

- A small-scale research project which can be completed in the amount of time one would spend in and out of class for a regular 6-credit module
- Organised into chapters and with a contents page, references and bibliography.
- Preferable link made between theory and practise.
- There should be empirical research, though may be modest in scale but first-hand research is essential to enhance the overall quality of the project

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1. Introduction : a general introduction to the topical area 1.2. Statement of the problem: very specific statement of the problem to be studied. 1.3. Purpose of the Project: in this section a description about the overall purpose of the project should be made known	K1-K3 K4-K5 K1-K6	15	CO1-5

UNIT	CONTENT	CL	HRS	CO
2	Project Overview 2.1 Definition of Terms 2.2. Significance of the project 2.3 Review of literature	K1-K3 K1-K4 K1-K4	15	CO1-5
3	Methodology 3.1 Explain the methods used for collecting data 3.2 Descriptive writing approach must be utilized 3.3 Collection of Data – Primary and Secondary	K1-K4 K3-K5 K3-K5	15	CO1-5
4	Summary and Recommendations 4.1 Introduction – an overview of the project should be provided in the section 4.2 Summary and Recommendations 4.3 References and Appendices	K1-K3 K1-K6 K3-K5	10	CO1-5
5	Emerging Trends in Research 5.1 Authenticity of References and Citations 5.2 Use of AI tools 5.3 Plagiarism	K1-K3 K3-K5 K1-K4	10	CO1-5

Contents of the Project Report

- Cover page
- Title page
- Acknowledgements
- Contents page
- List of figures or illustrations
- Main body – Introduction
- Main body – Review of Literature
- Main body – Methodology
- Main body – Summary
- Main body – Recommendations
- Main body – Conclusion
- Reference List/Bibliography
- Appendices
- **Avoid Plagiarism**

PATTERN OF EVALUATION

Rubrics	Marks	Cognitive Level
Documentation/sources	10	K1
Formulating topic statement	15	K2
Explaining the conceptual framework	15	K3
Primary source analysis	20	K4
Research arguments	20	K5
Research conclusions	10	K6
Presentation/Viva	10	K6

OBJECTIVES OF THE COURSE

- To become familiar with Japan's and China's encounters with western imperialism.
- To understand the rise and growth of Japan as a modern nation.
- To study the history of China and its rise to its present position.
- To enable students to comprehend the impact of communism on Chinese history.
- To understand India's relations with both these nations.

Unit 1

The West and East Asia in the early 20th Century

- 1.1 The Anglo-Japanese Alliance
- 1.2 Russo-Japanese War
- 1.3 Chinese Revolution of 1911

Unit 2

Rise of Nationalism in China

- 2.1 Yuan Shih-kai - Warlordism
- 2.2 Dr. Sun Yat-sen and Kuomintang
- 2.3 Nationalist Government

Unit 3

Imperialism and Militarism in Japan

- 3.1 Japan in World War I - Washington Conference
- 3.2 Manchurian Crises and the Second Sino-Japanese War
- 3.3 Japan in World War II

Unit 4

Post War China

- 4.1 Mao Zedong and the Rise of Red China
- 4.2 China after Mao: Deng Xiaoping
- 4.3 Post-war Japan – Social, Economic and Political Transformation

Unit 5

Japan after the Second World War

- 5.1 SCAP and the Constitution of 1947; Demilitarization and Democratization.
- 5.2 San Francisco Conference - Social and Economic Transformations
- 5.3 Relations between China, Japan, and India

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600 086

DEPARTMENT OF SOCIOLOGY

PROGRAMME DESCRIPTION

Sociology Programme aims to develop sociological imagination among students. This involves the ability to understand how individuals and group behaviour is influenced by society's past and present developments. The so called personal issues are predominantly in fact connected to societal structure and problems and Sociological perspective provides an objective view of these issues. This imaginative ability will promote critical thinking for effective participation in professional and personal affairs and progress towards inclusive society.

VISION OF THE DEPARTMENT

The vision of the department is to acquire higher reputation through providing a stimulating and inclusive environment for an enhancing experience and to create responsible citizens.

MISSION OF THE DEPARTMENT

- To provide educational experience that will encourage students to become aware of the significance of social structures and processes.
- Through a range of major core papers the department intends to provide our students with academic programmes and practical experiences that enhance their understanding and application of sociology and sociological imagination.
- To encourage the development of critical thinking, effective communication and responsibilities of community membership.
- To encourage students towards advanced academic pursuits and instil in them an entrepreneurial spirit.
- Develop intercultural competence and cultivate a spirit of inclusion

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086
PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.A. Sociology Programme, the students will be able to

PSO 1	develop sociological knowledge and skills that will enable them to think critically and imaginatively about society and social issues.
PSO 2	demonstrate effective and convincing application of sociological perspective through written and /or oral arguments
PSO 3	validate the ability to use major classical and/or contemporary perspectives in social theory to real life situations.
PSO 4	develop understanding and ability to effectively utilise several of the major social science research methodologies and techniques to navigate local and global realities/issues.
PSO 5	sensitively engage in understanding of gender concerns to empower and be empowered.

ENVIRONMENTAL STUDIES

CODE:23SC/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23SC/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

SOCIAL ANTHROPOLOGY

CODE: 23SC/AC/SA25

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the students to the basic concepts in Social Anthropology
- To familiarize students with the social cultural evolution of society
- To detail the interconnectedness of the social, historic, economic, political, and cultural aspects of society
- To make the students comprehend the primitive practices and beliefs.
- To appreciate multi-cultural traditions, practices and their differences and similarities

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define concepts related to Social Anthropology	K1
CO2	understand the premises of society and its evolution	K2
CO3	identify the differences between primitive and modern society	K3
CO4	examine critical perspectives of primitive beliefs, practices and traditions.	K4
CO5	evaluate the interconnectedness between Anthropology and Sociology	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Definition and Scope 1.2 Social and Cultural Anthropology 1.3 Anthropology and its subfields 1.4 Social Anthropology and Other Social Sciences 1.5 Culture Traits - Culture Area - Processes of Cultural Change - Civilization.	K1- K5	14	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Marriage and Family 2.1 Monogamy, Polygamy, Polygyny, Polyandry 2.2 Kinship Terms, Classificatory and Descriptive System of Kinship 2.2.1 Kinship Usages 2.3 Family - Types, functions, changing patterns of family. 2.4 Patterns of residence, patterns of descent and authority 2.5 Patterns of inheritance	K1-K5	14	1-5
3	Anthropology of Religion 3.1 Definition of Primitive Religion 3.2 Difference between Magic, Religion and Science 3.3 Totem and Taboo, Sacred and Profane 3.4 Theories: Animism, Naturalism and Manaism	K1-K5	12	1-5
4	Economic Anthropology 4.1 Modes of production 4.2 Exchange System and Barter system 4.2.1 Ceremonial Exchange 4.2.2 Reciprocity and Redistribution 4.3 Market, Money and Trade	K1-K5	13	1-5
5	Political Anthropology 5.1 Meaning and Concept – Nature and Forms of Political Organisation 5.2 Structure in Primitive Government in Tribal Societies 5.3 Primitive Law- Distinction between customs and laws- Social Sanctions in primitive law 5.4 Justice and Punishment in Primitive Societies- Ideas of Solidarity	K1-K5	12	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / B.V.A. / Degree Programme**

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23SC/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

Continuous Assessment:

Total Marks: 50

Two to three Task based components

Task based classroom activities

Case studies

Group discussions

Group presentation

Role play

No End Semester Examination

No CA test

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.A. DEGREE: BRANCH III – SOCIOLOGY

SYLLABUS

(Effective from the academic year 2023-2024)

SOCIOLOGICAL THEORY

CODE:23SC/MC/ST44

CREDITS: 4

L T P:4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To familiarise students to the place of theory in Sociology
- To understand fundamental principles of schools of sociological theory
- To enable a theoretical orientation towards the discipline
- To develop understanding and critical assessment of sociological theory
- To enable students to understand issues through applications of theoretical framework.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	define and understand basic concepts and theoretical perspectives in sociology and how they are used in sociological explanations of social behavior	K1
CO2	apply sociological concepts and theories to understand contemporary social issues and debates about these issues	K2, K3
CO 3	identify and explain major sociological theories and apply them to everyday life	K4,K5
CO4	examine understand the ways in which sociological theories and methods are used outside of academic settings in the practice of sociology and the production of positive social change	K5,K6
CO5	evaluate theory with relevance to reality	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Meaning of Sociological Theory 1.2 Types of Theories 1.3 Functions of theories 1.4 Elements of theories	K1- K5	11	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Part I: Sociology Section	Cognitive Level and Allocation of Marks	Marks per Section	Number of Questions to be answered	Number of Questions to be set
A (Answer all Questions) Objective type	K1 (3 marks)	3 x 1 =3	3 K1 questions	3 K1 questions
B (Answer all Questions) (Distinguish/ Differentiate between, Illustrate, Relate, Identify, Comment on, etc.)	K2 (4 marks)	2 x 2 =4	2 K2 questions	2 K2 questions
C (Answer any one question) Essay (400 words)	K3 (8 marks)	1 x 8 = 8	1 K3 questions	2 K3 questions
D (Answer any one question) Paragraph (200 words)	K4 (5 marks)	1 x 5 = 5	1 K4 question	2 K4 questions
E (Answer any one question) Paragraph (200 words)	K5 (5 marks)	1 x 5 = 5	1 K5 question	2 K5 questions

Part II: Zoology Section	Cognitive Level and Allocation of Marks	Marks per Section	Number of Questions to be answered	Number of Questions to be set
A (Answer all Questions) Objective type	K1 (3 marks)	3 x 1 =3	3 K1 questions	3 K1 questions
B (Answer all Questions) (Distinguish/ Differentiate between, Illustrate, Relate, Identify, Comment on, etc.)	K2 (4 marks)	2 x 2 =4	2 K2 questions	2 K2 questions
C (Answer any one question) Essay (400 words)	K3 (8 marks)	1 x 8 = 8	1 K3 questions	2 K3 questions
D (Answer any one question) Paragraph (200 words)	K4 (5 marks)	1 x 5 = 5	1 K4 question	2 K4 questions
E (Answer any one question) Paragraph (200 words)	K5 (5 marks)	1 x 5 = 5	1 K5 question	2 K5 questions
Total		50	16	22

Other Components:

Total Marks: 50

Observation, documentation and compilation of field report/Case study Analysis/
Assignment/Report Submission/Presentation

Two to three components will be prescribed.

End- Semester Examination:**Total Marks: 100****Duration: 3 hours**

Part I: Sociology Section	Cognitive Level and Allocation of Marks	Marks per Section	Number of Questions to be answered	Number of Questions to be set
A (Answer all Questions) Objective type	K1 (6 marks)	6 x 1 =6	6 K1 questions	6 K1 questions
B (Answer all Questions) (Distinguish/ Differentiate between, Illustrate, Relate, Identify, Comment on, etc.)	K2 (8 marks)	4 x 2 =8	4 K2 questions	4 K2 questions
C (Answer any two questions) Essay (400 words)	K3 (16 marks)	2 x 8 = 16	2 K3 questions	3 K3 questions
D (Answer any two questions) Paragraph (200 words)	K4 (10 marks)	2 x 5 = 10	2 K4 questions	3 K4 questions
E (Answer any two questions) Paragraph (200 words)	K5 (10 marks)	2 x 5 = 10	2 K5 question	3 K5 questions
Part II: Zoology Section	Cognitive Level and Allocation of Marks	Marks per Section	Number of Questions to be answered	Number of Questions to be set
A (Answer all Questions) Objective type	K1 (6 marks)	6 x 1 =6	6 K1 questions	6 K1 questions
B (Answer all Questions) (Distinguish/ Differentiate between, Illustrate, Relate, Identify, Comment on, etc.)	K2 (8 marks)	4 x 2 =8	4 K2 questions	4 K2 questions
C (Answer any two questions) Essay (400 words)	K3 (16 marks)	2 x 8 = 16	2 K3 questions	3 K3 questions
D (Answer any two questions) Paragraph (200 words)	K4 (10 marks)	2 x 5 = 10	2 K4 questions	3 K4 questions
E (Answer any two questions) Paragraph (200 words)	K5 (10 marks)	2 x 5 = 10	2 K5 question	3 K5 questions

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

NON-GOVERNMENTAL ORGANIZATIONS

CODE:23SC/ME/NG45

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To explain the basic functioning and approaches of NGOs
- To identify the changes brought by the NGOs at the grassroots level.
- To gain knowledge on the linkage of NGO with government and other Organisations
- To analyse the role of NGOs as a change maker
- To outline the problems faced by NGOs

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	explain NGOs as a development organization	K1
CO2	compare and contrast approaches in analysing the functioning of the NGOs	K2
CO3	develop basic skills of setting up NGOs.	K3,K6
CO4	analyze the challenges and implications that NGOs face in terms of their multiple and varied relationship with Government, communities, and other organisations.	K4
CO5	assess the contributions of NGOs for the development of the nation.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Non-Governmental Organisations 1.1 Definition 1.2 Objectives of NGO 1.3 Types of NGO 1.4 History of NGOs in India 1.5 Role of NGOs in Social Change 1.6 The Present Status of NGOs in India	K1	11	1

LOGIC AND SCIENTIFIC METHODS

CODE:23SC/ME/LS45

CREDITS: 5

L T P:5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint the students to the significance of Logic in methodology of science
- To initiate inductive and deductive methods of reasoning
- To enumerate and elaborate various methods to reason better logically
- To interpret different arguments so as to design stronger and better logical arguments.
- To apply the concepts of logical thinking to identify fallacies in arguments and language of the opponent.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to :

COs	DESCRIPTION	CL
CO1	identify and indicate fallacies in arguments in articles, news, advertisements etc.	K1-K5
CO2	develop comprehensive knowledge and understanding of their subject area, the ability to engage with different traditions of thought, and the ability to apply their knowledge in practice	K1-K5
CO 3	represent the structure of statements and arguments in symbols.	K1-K5
CO4	evaluate both deductive and inductive arguments, and identify fallacies in argumentative discourse	K6
CO5	critically analyze data to evaluate evidence, construct reasoned arguments, and communicate inferences and conclusions.	K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 The Subject Matter of Logic 1.2 Terms and Distribution of Terms 1.3 Logical Form of Sentences 1.4 Principle of Division and Definition 1.5 Fallacies of Language and Arguments	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Propositions 2.1 Traditional and Modern Classification of logic 2.2 Immediate Inference: 2.2.1 Opposition of Proposition 2.2.2 Deductions 2.3 Rules and Fallacies of Categorical Syllogism: Figures and Moods-validity 2.4 Mixed syllogism: 2.4.1 Hypothetical 2.4.2 Disjunctive 2.5 Dilemma: Types	K1-K5	13	1-5
3	Symbolic Logic and Logic Gates 3.1 Symbolic Logic and Logical Basis of Automatic Computation 3.2 Value of Special Symbols 3.3 Truth Tables for Conjunction, Alternation and Implication. 3.4 Statement, Statement Forms, Argument, Argument Forms. 3.5 Truth Tables for Determining Validity /Invalidity of Arguments 3.6 Logical Basis of Automatic Computation 3.6.1(Prerequisite) The Definition of AND, OR, NOT NAND,NOR, XOR & XNOR operations 3.6.2 Formulation of Truth Tables and their Use	K1-K6	15	1-5
4	Inductive Reasoning 4.1 The Methods of Scientific Enquiry: Mill's Methods:- 4.1.1 The Experimental Method 4.1.2 The Method of Agreement 4.1.3 The Method of Difference 4.1.4 The Joint Method of Agreement and Difference 4.1.5 The Method of Concomitant Variation 4.1.6 The Method of Residues	K1-K6	13	1-5

OBJECTIVES OF THE COURSE

- To enable students to develop research capabilities
- To encourage students to develop analytical skills.
- To help students understand research concepts.
- To provide real time exposure for undertaking research
- To promote the development of creative and academic writing capabilities

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the steps and process of conducting the research	K1
CO2	understand concepts and apply methods appropriately for the social research	K2
CO3	identify issues and capabilities required for undertaking research	K3
CO4	examine and critically evaluate social situations and realities	K4
CO5	develop solutions and suggestions for social issues and problems	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	CO
1	Introduction 1.1 Introduction : a general introduction to the topical area 1.2 Statement of the Problem: very specific statement of the problem to be studied. 1.3 Purpose of the Project: in this section a description about the overall purpose of the project should be made known. 1.4 Definition of Terms: important terms and concepts used in the project should be adequately analyzed and defined. 1.5 Significance of the Project: this section should provide answers as to what the project will contribute.	K1- K6	1-5
2	Review of the literature 2.1 The review is a careful examination of a body of literature pointing toward the answer to the need for the study or project.	K1-K6	1-5
3	Methodology 3.1 Explain the methods used for collecting data. 3.2 Descriptive writing approach must be utilised. 3.3 Collection of data 3.4 Analyse and Interpret data	K1-K6	1-5

UNIT	CONTENT	CL	CO
4	Summary, Conclusions and Recommendations 4.1 Introduction - an overview of the project should be provided in this section. Conclusions - describe the results. 4.2 Recommendations -these should be based on the conclusions. 4.3 References 4.4 Appendices	K1-K6	1-5

What sections go into the Research Report?

- Cover page
- Title page

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF ECONOMICS

B.A DEGREE: BRANCH IV – ECONOMICS

PROGRAMME DESCRIPTION

The programme provides a solid foundation in economic theory, statistics and econometrics so as to develop a thorough understanding of both theoretical and empirical approaches to economics. It provides a strong grounding in critical thinking and analytical skills that will facilitate students to carry out applied economics research. Students will be able to evaluate economic issues and formulate informed opinions on policy issues and recognise the validity of opposing viewpoint.

The programme will promote Co-Curricular activities like research, internships, certificate courses etc. It will focus on achieving high academic standards so as to strengthen student's competitiveness.

VISION OF THE DEPARTMENT

- Uphold high standards of academic excellence in teaching and research
- Interact with academic, research, government and nongovernment institutions in order to promote academic activities like research, internships, training etc.,
- To grow to gain wide spread recognition for Postgraduate and Ph.D. programmes

MISSION OF THE DEPARTMENT

- To provide a strong theoretical foundation in Economics
- To train and equip students with requisite skills to carry out applied economics research.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.A. Economics Programme, the students will be able to

PSO1	exhibit the ability to evaluate arguments and analyse policies/theories and practices leading to employability and entrepreneurship
PSO2	display proficiency in communication skills and the ability to express thoughts and ideas creatively and effectively
PSO3	be equipped to use their knowledge and skills to critically and creatively respond to real-life situations
PSO4	to understand, respect and respond to multiple points of view and subject positions
PSO5	sensitively engage with environmental/cultural/socio-economic, and political concerns

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.A. DEGREE: BRANCH IV - ECONOMICS

SYLLABUS

(Effective from the academic year 2023-2024)

MICROECONOMICS - I

CODE:23EC/MC/ME14

CREDITS:4

L T P: 4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To understand the concepts related to resource allocation.
- To apply consumer behaviour in relation to demand for products
- To analyse cost function within firms and industries
- To demonstrate the equilibrium of the firm
- To evaluate the behaviour of firms in perfect and in monopoly market.

COURSE LEARNING OUTCOMES

On Successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	interpret different definitions/concepts and experiment with it	K1
CO2	construct simple models through surveys to study the household behaviour	K2
CO3	examine the behaviour of production – consumption relationship and apply it in decision making process,	K3
CO4	critically evaluate the market situations	K4
CO5	discuss the relevance of microeconomic principles to contemporary needs	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1	12	1-5
	1.1 Basic Economic Issue- Resource Allocation			
	1.2 The Simple theory of demand of households –the demand function –Elasticity of Demand and its significance	K1		
	1.3 The Simple Theory of supply of firms –the supply function –Elasticity of supply – Marshall’s classification of time and elasticity of supply	K1-K2		
	1.4 The elementary theory of price determination –Static, Comparative static and dynamic explanations, Lagged Adjustment of supply and demand to price changes	K1-K3		
	1.5 Application: Analysis of allocating scarce resource at the house hold level	K1-K5		

UNIT	CONTENT	CL	HRS	CO
2	Theory of Consumer Behaviour	K1-K2	13	1-5
	2.1 Cardinal Utility Approach –Conceptual Framework	K1-K2		
	2.2 Ordinal Utility Approach –Assumptions, Properties	K1-K2		
	2.3 Budget Constraint and consumer equilibrium	K1-K3		
	2.4 Income, Substitution and Price Effects – Slutsky’s Theorem, Derivation of demand curve	K1-K5		
	2.5 Application: study how consumers unmet needs are identified and fulfilled in the market.	K4-K5		
3	Production and Cost	K1-K2	16	1-5
	3.1 Production function –meaning and kinds			
	3.2 The law of variable proportions	K1-K3		
	3.3 Cobb-Douglas Production function	K3-K4		
	3.4 Isoquants and Iso-cost lines	K1-K4		
	3.5 Laws of Returns	K3-K4		
	3.6 Producers choice of least cost combination of inputs	K3-K5		
	3.7 Production function and cost function –Interrelationship	K1-K5		
	3.8 The theory of costs- cost concepts, long run and short run cost curves	K1-K5		
	3.9 Application: Analyse how business firms decide the quantity of outputs to produce in response to demand	K5		
4	Equilibrium of the Firm	K1-K2	8	1-5
	4.1 TR and TC functions			
	4.2 Conditions for equilibrium of a profit maximising firm	K1-K3		
	4.3 Revenue functions and their relation to demand and elasticity	K1-K4		
	4.4 Application –Calculation of cost using Industrial data	K5		
5	Market Structure and Competitive Strategy	K1-K2	16	1 -5
	5.1 Classification of markets –Meaning of perfect and imperfect competition			
	5.2 Price and Output determination in Perfect competition	K1-K3		
	5.3 Short Run equilibrium of firm and industry	K1-K4		
	5.4 Long run equilibrium of firm and industry –Concepts of normal price and normal profit	K1-K4		
	5.5 Equilibrium of the monopolist	K1-K3		
	5.6 Price discrimination –Equilibrium of a discriminating monopolist	K1-K5		
	5.7 Application: Study the market structure for different products in perfect and/or monopoly market	K5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide a solid foundation in statistics alongside economic applications.
- To demonstrate application of a range of statistical tools to existing economic theories.
- To provide an understanding of statistical tools and statistical inference.
- To enable students to analyse survey data and draw conclusions based on empirical evidence.
- To encourage rational decision making, analysing risks and evaluating alternatives in the presence of uncertainty.

COURSE LEARNING OUTCOMES

On Successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	describe and analyse data appropriately, interpret the results accurately and draw conclusions.	K1
CO2	apply statistical methods to verify simple economic laws / theories.	K2
CO3	critically evaluate and interpret statistical information published by governmental and non-governmental sources.	K3
CO4	awareness of ethical considerations and limitations associated with statistical analysis and address issues pertaining to data bias and privacy.	K4
CO5	develop the ability to use scientific methods of research and create models for solving socio-economic issues.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENTS	CL	HRS	CO
1	Summary Statistics		10	1- 4
	1.1 Levels of Data-nominal, ordinal, interval and ratio			
	1.2 Measures of Central Tendency	K1 - K5		
	1.3 Measures of Dispersion	K1 - K5		
	1.4 Measures of deviation from normality Skewness and Kurtosis	K1 - K5		
	1.5 Frequency distributions - Exploring data with graphs	K1 – K5		

UNIT	CONTENTS	CL	HRS	CO
2	Simple Linear Correlation and Regression Analysis		15	1- 5
	2.1 Introduction to correlation analysis	K1 - K4		
	2.2 Types of correlation	K1 - K4		
	2.3 Methods to estimate correlation	K3 – K5		
	2.4 Testing the significance of correlation coefficient	K3 - K5		
	2.5 Introduction to regression analysis	K1 - K4		
	2.6 Methods of least squares estimation	K3 – K5		
	2.7 Goodness of fit measures	K1 – K5		
	2.8 Testing overall significance of the model ANOVA	K3 – K5		
3	Theory of Probability		15	1 - 4
	3.1 Introductory concepts	K1 - K3		
	3.2 Additive and Multiplicative theorems, Conditional Probability, Bayes theorem	K1 - K4		
	3.3 Random variables and Probability distribution – Concepts	K1 - K4		
	3.4 Theoretical probability distribution Binomial, Poisson and Normal Distribution	K1 - K4		
4	Testing of Hypothesis		15	1- 5
	4.1 Introduction to statistical hypothesis testing	K1 - K3		
	4.2 Comparing two means	K2 - K5		
	4.3 Comparing several means one-way ANOVA	K2 - K5		
	4.4 Large sample test Standard Error	K1 - K5		
5	Time Series Analysis		10	1- 5
	5.1 Concepts and Components of time series data	K1 - K5		
	5.2 Measurement of trends Graphical, Moving Average Method, Least Square Method, Fitting of Linear Trend Curves	K1 – K5

PATTERN OF ASSESSMENT

Continuous Assessment Test:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	10	5 x 2 = 10 (50 words each) concept & definition – all compulsory
	K2	10	5 x 2 = 10 (50 words each) 5 out of 6 questions
B	K3	10	2 x 5 = 10 (250 words each) 2 out of 3 questions
	K4	10	2 x 5 = 10 (250 words each) 2 out of 3 questions
C	K5	10	1 x 10 = 10 (600 words each) 1 out of 2 questions

Other Components:

Total Marks: 50

Quiz/Group Discussion/Presentation/Case Studies

End-Semester Examination:

Total Marks: 100

Duration: 3 Hours

Section	Cognitive Level	Marks	Pattern
A	K1	20	10 x 2 = 20 (50 words each) concept & definition – all compulsory
	K2	20	10 x 2 = 20 (50 words each) 10 out of 12 questions – short answers
B	K3	20	4x 5 =20 (250 words each) 4 out of 6 questions
	K4	20	4 x 5 = 20 (250 words) 4 out of 6 questions
C	K5	20	2 x 10 =20 (600 words each) 2 out of 4 questions

UNIT 1 – Not to be tested for Continuous Assessment and End semester examination. A minor project will be given to students in this unit as third component which will be tested.

(Effective from the academic year 2023-2024)

BUSINESS ECONOMICS

CODE: 23EC/AC/BE15

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce students to the fundamental concepts, principles, and theories of economics.
- To enable students to analyse and evaluate supply decisions in various business contexts.
- To equip students with the skills to calculate and analyse cost and revenue data for business decision-making.
- To enable students to analyse the behavior of firms and the market outcomes under various market structures.
- To explore the role of government policies in influencing business cycles and promoting macroeconomic stability.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and describe concepts in economics that relate to business decisions making	K1
CO2	identify and illustrate how various micro and macroeconomic factors affect the business environment	K2
CO3	apply the standard analytical tools of applied economic analysis to business situations	K3
CO4	examine the role of consumer and producer behavior and market structures in business decision making	K4
CO5	evaluate the impact and related policy solutions of microeconomic and macroeconomic factors.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1 - K4	18	1-5
	1.1 Basic Economic problems-Role of price Mechanism	K1 – K4		
	1.2 Tools for Economic Analysis-Indifference Curves, Isoquants, Budget Line and Production Possibility Frontier	K1 – K4		
	1.3 Law of demand, determinants of demand, change in demand and amount demanded	K1 – K4		
	1.4 Elasticity of demand –Types – Price elasticity – factors influencing elasticity of demand, importance of price elasticity of demand, Income and Cross elasticity. Applications of elasticity of demand	K1 - K5		
	1.5 Estimating demand –Importance and Scope of demand forecasting –Techniques of demand forecasting -complete enumeration survey, sample survey, Delphi Technique, Statistical methods – trend analysis, regression	K1 – K5		
2	Supply and Production	K1 - K4	10	1-5
	2.1 Law of Supply and its determinants	K1 – K3		
	2.2 Elasticity of supply	K1 – K3		
	2.3 Short and Long run Production Functions- Law of diminishing returns- Returns to scale	K1 – K4		
	2.4 Producers Equilibrium-Least cost combination of factors	K1 – K4		
3	Cost and Revenue	K1 – K4	12	1-5
	3.1 Concepts of Cost and Revenue	K1 – K4		
	3.2 Relation between average and marginal cost curves	K1 – K4		
	3.3 Long run Average Cost Curves and Marginal Cost Curves	K1 – K4		
	3.4 Economies of scale (internal and external economies and diseconomies)	K1 - K4		
	3.5 Break-Even Analysis –An Overview	K1 – K4		
4	Objectives of the Firm and Market Structure	K1- K2	12	1-5
	4.1 Profit, Growth, Sales, Utility Maximization (Brief Knowledge)	K1- K5		
	4.2 Perfect Competition, Monopoly, Monopolistic Competition ,Oligopoly- Features	K1 – K4		
	4.3 Equilibrium and price determination under Oligopoly-Kinked Demand, Price Leadership, Cartels	K1 – K4		
	4.4 Importance of advertising and selling costs	K1 – K4		
5	Unit 5 Business Cycles and Policies	K1 – K4	13	1 -5
	5.1 Business Cycles-Meaning, Characteristics, Types, Causes	K1 - K4		
	5.2 Inflation-Types of Inflation	K1 – K4		
	5.3 Causes and Effects of Inflation	K1 – K4		
	5.4 Measures to Correct Economic Fluctuations- Monetary and Fiscal Policy	K1 – K5

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23EC/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23EC/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

- Two to three Task based components
- Task based classroom activities
- Case studies
- Group discussions
- Group presentation
- Role play

No End Semester Examination

No CA test

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.A. DEGREE: BRANCH IV - ECONOMICS

SYLLABUS

(Effective from the academic year 2023-2024)

MICROECONOMICS - II

CODE: 23EC/MC/ME24

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To understand the concepts related to resource allocation.
- To apply consumer behaviour in relation to demand for products
- To analyse cost function within firms and industries
- To demonstrate the equilibrium of the firm
- To evaluate the behaviour of firms in perfect and in monopoly market.

COURSE LEARNING OUTCOMES

On Successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	infer different definitions/concepts	K1
CO2	construct simple models through surveys to study the household behaviour	K2
CO3	examine the behaviour of production – consumption relationship and apply it in decision making process,	K3
CO4	critically evaluate the market situations	K4
CO5	discuss the relevance of microeconomic principles to contemporary needs	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Product Pricing under Imperfect Competition	K1 - K2	11	1-5
	1.1 A critique of perfect completion –Meaning of Imperfect Competition			
	1.2 Monopolistic Competition –Meaning and Features	K1 - K2		
	1.3 Price and Output Determination in the short run and in the long run	K1 - K4		
	1.4 Selling Costs, Product Differentiation and their impact on demand curves	K1 – K4		
	1.5 Excess Capacity of Monopolistic Competition	K4		
	1.6 Application: Applying the Market Model to the current Indian Market situation through market survey	K5		

UNIT	CONTENT	CL	HRS	CO
2	Oligopoly	K1 – K2	14	1-5
	2.1 Features of Oligopoly			
	2.2 Price determination under non-collusive Oligopoly: Cournot, Edgeworth	K2 – K5		
	2.3 Kinked Demand Curve	K3 – K5		
	2.4 Price determination under collusive Oligopoly: Cartels and Price Leadership	K3 – K5		
	2.5 Game Theory: An elementary concept exposition – Nash, Dominant, Maximum strategies	K4 – K5		
	2.6 Application: Applying the different market models to the current Indian Market Situation through market survey	K5		
3	The Factor Market and the Theory of Factor Pricing	K1 - K2	13	1-5
	3.1 Four fold classification of factors			
	3.2 The demand for factors – Marginal Productivity Theory	K2 - K4		
	3.3 The supply of factors	K2 – K4		
	3.4 Determination of factor pricing under Perfect and Imperfect Competition in Factor and Product Markets	K3 – K5		
	3.5 Adding-up problem	K3 -K5		
4	Wages, Rent, Interest and Profits		15	1-5
	4.1 Wage determination under perfect competition	K1 – K3		
	4.2 Wage determination with Trade unions –role of collective bargaining	K1 – K4		
	4.3 Wage differentials	K2 – K5		
	4.4 Economic rent, scarcity and differential rent	K1 – K5		
	4.6 Interest rate	K1 – K5		
	4.7 Profits – innovation, dynamic changes, uncertainty and risk theories	K1 – K5		
	4.8 Application: study of the Indian government's intervention in the betterment of Labour in India through wage legislations and policies	K1 – K5		
5	Information, Market failure and role of Government		12	1 -5
	5.1 General Equilibrium and economic efficiency	K3 – K4		
	5.2 Markets with Asymmetric information	K3 – K4		
	5.3 Market failure – Externalities	K3 – K5		
	5.4 Application: Analysis of the Indian Markets	K3 – K5

REGIONAL ECONOMICS – TAMIL NADU

CODE: 23EC/MC/RT24

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To familiarize the students with the concept of urbanization and regional economic development in India with a special emphasis on Tamil Nadu
- To understand local economic and social problems
- To acclimatize the theories of regional and interregional economic growth concept
- To examine how urban and regional development focus initially on economic forces to generate cities and economic ties within a region.
- To equip students with skills required to analyze the regional economic issues with respect to India and special emphasis on Tamil Nadu.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the difference between urban and regional economies	K1
CO2	compare and contrast the economic characteristics of different regions	K2
CO3	identify main factors affecting regional development	K3
CO4	analyze the causes and consequences of regional imbalances	K4
CO5	evaluate alternative regional economic development policies	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Urban and Regional Economics 1.1 Concept, meaning and significance of Regional Development Nature and scope of urban and regional economics – spatial urbanisation	K1 – K3	11	1–5
	1.2 Need for a separate study on regional economics	K1 – K3		
	1.3 Concept and types of Regions - Administrative, Planning, Agro – climatic, Economic and Functional regions	K1 – K3		

UNIT	CONTENT	CL	HRS	CO
2	Economics of Urbanization 2.1 Process of Urbanization – Nature and factors initiating and perpetuating urbanization – Characteristics of an economy passing through different stages of urbanization – Urban sprawling	K1-K3	14	1-5
	2.2 Classification of urban areas by demographic, geographical and economic criteria – Process of sub-urbanization – Theory of agglomeration	K1 – K3		
	2.3 Urban Bias in Development – Urban Explosion – Remedial Measures– Urban population in Tamil Nadu – Pull and push factors of migration	K1 – K5		
3	Regional and Economic Development 3.1 Regional economic development - fundamental issues of regional economics	K1-K3	14	1-5
	3.2 Definition and measure of State Income (GSDP) – Rural and urban - GDP Difference in estimation of national income (GDP) and State Income (GSDP)	K1 – K5		
	3.3 Inter- state economic disparities - Tamil Nadu in comparison with other states	K1 – K5		
4	Infrastructural and Regional Development 4.1 Importance of social infrastructure- as a determinant of regional economic growth and development	K1- K5	13	1-5
	4.2 Inter-state disparity in Health, Housing, energy, transport and telecommunication infrastructure	K1- K5		
	4.3 Indices - Export preparedness index, multidimensional poverty index, state energy index, state health index	K1 – K5		
	4.4 Case study of Tamil Nadu	K1 – K5		
5	Regional imbalances 5.1 Causes and consequences of regional imbalances	K1 – K5	13	1 -5
	5.2 Rural- Urban inequality	K1 – K5		
	5.3 Inter-state and fiscal devaluation India – Trends in regional disparities in income and consumption	K1-K6		
	5.4 Regional imbalances in Tamil Nadu	K1 – K6

B.A. DEGREE: BRANCH IV - ECONOMICS

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICAL METHODS FOR ECONOMICS

CODE: 23EC/AC/MM25

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To impart various Linear algebraic methods in the field of graphical solutions.
- To familiarize the use of mathematical techniques in the branch of Economics
- To train the students in basic mathematical tools of Calculus
- To provide an overview of optimization techniques and apply this knowledge to problems relating to economic theory
- To acquaint the students with an in-depth mathematical tool for calculating and interpreting descriptive and other quantitative economics.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the concepts of linear algebra and apply basic set of equations in economics	K1
CO2	demonstrate the use of solving of system of simultaneous equations using matrix in economics	K2
CO3	apply matrix and calculus in calculating the interrelationship between various economic variables	K3
CO4	analyse the marginal productivity and cost theory using calculus	K4
CO5	evaluate using in-depth mathematical methods to infer the nature various tools in economics	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Analytical Geometry 1.1 Definition of the Cartesian system of coordinates, distance formula, coordinates of the point dividing the line joining two points in a given ratio, coordinates of the mid-point.	K1-K3	15	1-5
	1.2 Equations of straight lines in slope intercept form, slope and a given point form, X and Y intercept form, two-point form.	K1-K4		
	1.3 Angle between straight lines and conditions for parallelism and perpendicularism point of intersection of two straight lines	K1-K4		
	1.4 Economic applications to lines and angles- demand and supply equations, Application to Linear equations in Basic Macro Economic model- National Income – IS-LM model	K1-K5		
2	Matrix and Determinants 2.1 Various types of matrices. Matrix operations- addition, subtraction, and multiplication	K1-K3	10	1-5
	2.2 Determinants, properties of determinants, solving equations using Cramer's Rule.	K1-K3		
	2.3 Matrix inversion and solving equations using inverse of a matrix	K1-K3		
	2.4 Structure of input-output table, Static Leontief system	K1-K4		
	2.5 Solving open input output models and Hawkin-Simon Condition	K1-K5		
3	Differential Calculus 3.1 Variables, constants, and functions	K1-K2	15	1-5
	3.2 Concept of limits, Continuous and Discontinuous functions (Basic concepts -no derivation)	K1-K2		
	3.3 Definition of derivatives and rules of differentiation. Derivatives of $y=x^n$, $y=e^x$, $y=\log x$ (No derivation)	K1-K3		
	3.4 Function of a function rule, logarithmic, parametric, and implicit differentiation	K1-K4		
	3.5 Derivatives of three variable model	K1-K4		
	3.6 Partial and Total derivative – Young's Theorem	K1-K4		

UNIT	CONTENT	CL	HRS	CO
	3.7 Application to cross partial elasticity – Nature of good – Elasticity	K1-K4		
4	Calculus – Economics Application	K1-K5	15	1 -5
	4.1 Application to elasticity of demand and supply			
	4.2 Relationship between total, marginal and average revenue functions- Derivation and sums	K1-K5		
	4.3 Relationship between AC and MC- Derivation and sums	K1-K5		
	4.4 Application to AC, MC, MR, MP with two inputs factors.	K1-K5		
5	Maxima and Minima	K1-K5	10	1-5
	5.1 Increasing and Decreasing functions, interpretation of slope as the first derivative			
	5.2 Concave – Convex functions – interpretation of second order derivative – Nature of the curve	K1-K5		
	5.3 Unconstrained maxima and minima with single explanatory variable	K1-K5		
	5.4 Application to cost minimization, revenue maximization	K1-K5		
	5.5 Profit Maximization – Perfect Competition only	K1-K5

ECONOMIC ENVIRONMENT OF BUSINESS

CODE: 23EC/AC/EB25

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the basic concepts of Economics
- To enable the application of the concepts taught to the business world
- To examine the current business scenario in the context of India
- To give an overview of the macroeconomic policies which impact businesses
- To equip with micro level decision making within the firm

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the key concepts introduced	K1
CO2	comprehend the operation of the concepts	K2
CO3	apply the theoretical knowledge to varied real-life business situations	K3
CO4	analyse the impact of business decisions in the Indian context	K4
CO5	evaluate the effectiveness of the decisions implemented	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Economic Systems	K1-K2	9	1-5
	1.1 A brief overview of the concept of economic systems – Capitalism, Socialism, Mixed			
	1.2 The trend in economic ideologies over the years: free market laissez faire – capitalism to planned development – role of the government – to liberalisation and globalisation	K1-K3		
	1.3 India as a mixed economy – problems of development	K1-K5		
2	Market Structures	K1-K3	15	1-5
	2.1 Concepts of Cost and Revenue – Total Cost, Average Cost, Marginal Cost, Total Revenue, Average Revenue and Marginal Revenue			
	2.2 Breakeven analysis – concept and uses	K1-K5		
	2.2 Perfect competition and Monopoly – Features, Equilibrium and Price determination, Price discrimination	K1-K5		
	2.3 Monopolistic Competition – Features, importance of selling and advertising costs	K1-K5		

UNIT	CONTENT	CL	Hrs	CO
	2.4 Oligopoly – Features, Concept of ‘Kinky Demand’ Curve, Price leadership and Cartels	K1-K5		
3	Political Economy and Role of the Government	K1-K5	13	1-5
	3.1 Market Failure and Need for Government – Public versus private goods – Externalities and Asymmetric information – failure arising out of government intervention			
	3.2 Budgetary concepts – Budget – revenue and capital budget - balanced, surplus, deficit; revenue deficit, capital deficit, primary deficit, fiscal deficit	K1-K2		
	3.3 Fiscal Policy – Fiscal budgetary developments – Preparation, Enactment, Execution and Parliamentary control over finance	K1-K2		
	3.3 An analysis of the recent Union Budget of India	K1-K4		
4	International Trends and Issues	K1-K4	13	1-5
	4.1 Free trade versus protection – tariffs and non-tariff barriers			
	4.2 Globalisation and the Indian economy	K1-K5		
	4.3 A brief overview of GATT and WTO – TRIPS, TRIMS, AOA, Sanitary and Phytosanitary measures	K1-K2		
5	Business Cycles and Policies	K1-K4	15	1-5
	5.1 Business cycles – types, phases, causes and effects			
	5.2 Inflation – causes and effects	K1-K5		
	5.2 Methods to control inflation – Monetary policy – objectives and Instruments	K1-K4		
	5.3 Application – choose a country and study the major issue which impacts the economic growth	K1-K2

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To make students aware of their strengths and weaknesses
- To help them hone their communication skills
- To equip them with skills required to raise self-esteem and confidence levels
- To help them acquire competencies to achieve personal and academic excellence
- To enable students to become effective team players

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify strengths and weaknesses in themselves and others.	K1
CO2	relate with others through effective communication and body language.	K2
CO3	make use of interpersonal skills in team work, and organise their activities.	K3
CO4	survey the opportunities for learning and growth.	K4
CO5	evaluate their strengths, weaknesses, opportunities and threats, and develop their personality.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

(Effective from the academic year 2023–2024)

ENVIRONMENTAL ECONOMICS

CODE: 23EC/MC/EE33

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To demonstrate a deep understanding of the fundamental economic concepts and theories and apply them to environmental issues
- To assess and quantify the economic value of environmental resources.
- To develop skills to evaluate environmental policies and regulations and make informed recommendations for policy improvements
- To explore strategies for sustainable resource management and apply optimization methods to address issues like overexploitation and depletion
- To apply environmental economics to finding solutions to serious national and international environmental problems

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	demonstrate an understanding of the basic concepts and theories in environmental economics	K1
CO2	identify, analyse and evaluate the basic environmental economic valuation practices	K2
CO3	illustrate a detailed understanding of the value of environment	K3
CO4	explain the problems faced by environmental damage	K4
CO5	critically analyze environmental issues at the national and international levels	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Fundamental of Environmental Economics	K1 – K2	10	1-5
	1.1 Definition, Scope, and Significance			
	1.2 Environment – Economy Linkage – Material Balance Approach	K1 – K4		
	1.3 Environmental Kuznets Curve	K1 – K4		
2	1.4 Sustainable Development - Weak and Strong Sustainability Criteria	K1 - K5	11	1-5
	Market Failure			
	2.1 Characteristics of Public good	K1-K5		
	2.2 Externalities	K1 – K3		
	2.3 Pigouvian fee and Coase Theorem on Property Rights	K1 – K5		

UNIT	CONTENT	CL	HRS	CO
3	Valuing Environment	K1- K3	11	1-5
	3.1 Concept of environmental value - Total Economic Value			
	3.2 Direct Method of valuation - Stated Preference Method: Contingent Valuation Method	K1- K5		
	3.3 Revealed Preference – Hedonic Pricing and Travel Cost Model	K1-K4		
4	Economics of Pollution Control	K1-K4	10	1 -5

SYLLABUS

(Effective from the academic year 2023 -2024)

BEHAVIOURAL ECONOMICS

CODE: 23EC/MC/BE34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide students with an introduction to the principles and methods of Behavioural Economics
- To identify and evaluate evidences for systematic departures of economic behavior from the predictions of the standard economic models
- To enable students to examine evidences that shows some departure from assumptions made in the mainstream economic model
- To enable students to analyze how people make economic decisions under various constraints and influence.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the limitations of the economic approach to modelling behaviour	K1
CO2	reflect empirically established behaviour of economic subjects against the backdrop of mainstream economic theoretical approaches	K2
CO3	apply existing behavioural models to better understand economic phenomena.	K3
CO4	examine the contribution of behavioural economics for a better appreciation of consumer behaviour, individual decision making under uncertainty and inter temporal choices.	K4
CO5	ability to evaluate the effectiveness of behavioural interventions in addressing economic issues and improving decision making	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1-K4	18	1 - 5
	1.1 Neoclassical Concept and Criteria for Economic Rationality			
	1.2 Causes of irrationality	K1-K4		
	1.3 Bounded Rationality – Herbert Simon	K1-K5		
	1.4 Broadening Rationality – Happiness is a three-act tragedy, Endowment Effect, Framing Effect & Decoy Effect – Types of Utility	K1-K3		
	1.5 History and Evolution of Behavioural Economics	K1-K5		
2	Heuristics & Biases	K1-K4	11	1-5
	2.1 Advantages and Disadvantages of Heuristics			
	2.2 The Availability heuristic	K1-K5		
	2.3 The Anchoring heuristic	K1-K5		
	2.4 The Representative heuristic	K1-K5		
	2.5 Self Evaluation Biases and Projection Bias	K1-K4		
3	Animal Spirits and its impact on Economic Decisions	K1-K2	15	1-5
	3.1 Confidence – its feedback mechanism that amplifies disturbances			
	3.2 Fairness – Its influence in setting wages and prices	K1-K4		
	3.3 Corruption and Antisocial behaviour	K1-K6		
	3.4 Money Illusion – Improper interpretation of inflation and deflation	K1-K5		
4	Prospect Theory and Mental Accounting	K1- K2	17	1-5
	4.1 Conventional approaches to modifying Expected Utility theory			
	4.2 Prospect theory and Shape of the utility function	K1-K5		
	4.3 Decision weighting	K1-K3		
	4.4 Nature and components of mental accounting	K1-K5		
	4.5 Framing and Editing, Budgeting and Fungibility	K1-K5		
5	Intertemporal Choice Models and Nudge	K1-K4	10	1 -5
	5.1 Features and anomaly of the Discounted Utility Model			
	5.2 Time Inconsistent Preferences and Limited Self-Control	K1-K4		
	5.3 Exponential Discounting Versus Hyperbolic discounting and the Beta Delta model.	K1-K2		
	5.4 Behavioural Economics and Libertarian Paternalism	K1- K5

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23EC/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

- 3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant
- 3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

- 3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing
- 3.2.2 **Configuring Email**
Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails
- 3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

FUNDAMENTALS OF CONSUMER BEHAVIOUR

CODE: 23PY/AC/FC35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE:

- To introduce the concepts and models associated with consumer behavior
- To interpret key psychological processes underlying consumer behavior
- To acquaint students with the implications of sociocultural contexts on consumer's behaviors
- To discuss the impact of media and reference groups on consumer psychology
- To explain the factors underlying the consumer decision making process

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	identify the internal and external influences that drive individuals to consumerism	K1
CO2	describe the models and theories associated with consumer psychology	K2
CO3	apply their knowledge of psychological processes in consumer behavior	K3
CO4	distinguish the motives behind diverse consumer behaviors based on the underlying factors	K4
CO5	evaluate the effectiveness of strategies used to influence consumer psychology	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Consumer Behaviour 1.1 Definition and meaning of Consumer Behaviour 1.2 Nature and Importance of Consumer Behaviour 1.3 Overview of Consumer Behaviour Models – psychological model, general model of consumer behaviour, economic model.	K1- K5	12	1-5
2	Consumer Motivation 2.1 Meaning of Motivation, Types of Motives, Dynamic Nature of Motives-Needs and Goals of Consumers Consumer Personality 2.2 Meaning of Personality, Facets of Personality, Personality Traits and Consumer Behaviour	K1- K5	15	1-5
3	Consumer in the Social and Cultural Settings 3.1 Family and Consumer Related Roles 3.2 Social Standing and Consumer Behaviour	K1- K5	12	1-5

UNIT	CONTENT	CL	HRS	CO
	3.3 Culture's Influence on Consumer Behaviour 3.4 Cross cultural consumer behaviour- global marketing opportunities			
4	Consumer Communication Process 4.1 Definition of Communication 4.2 Communication Process-Traditional Media and New Media 4.3 Opinion Leadership- Characteristics, measuring opinion leadership 4.4 Reference Groups	K1- K5	14	1-5
5	Consumer Decision-Making Process 5.1 Stages of Decision Making 5.2 Types of Decision Making 5.3 Consumer Decision Making Model- EKB Model 5.4 Consumer Insights	K1- K5	12	1-5

MONETARY ECONOMICS

CODE: 23EC/MC/MO44

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide a comprehensive picture of the evolution of money and development of monetary theories
- To trace the evolution of the monetary theories from the classical to the Post-Keynesian schools.
- To apply the theories to a given monetary conditions.
- To enable students, understand the critical role of money in the development of an economy.
- To give an insight into the integration between Monetary Theory and Practice.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the basic concepts of money, its role, types and functions.	K1
CO2	trace the history of monetary standard from commodity standard to plastic currency standard.	K2
CO3	analyze the theories of demand and supply of money to the monetary economy	K3
CO4	critically analyse the monetary equilibrium in an economy	K4
CO5	create an ability to understand the monetary policy and its tools in the functioning of the monetary system.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1 – K4	12	1 – 5
	1.1 Evolution of Money- Definition, Classification and Functions-Role of Money			
	1.2 Monetary Standards: Metallic standard- Gold standard- types	K1 – K5		
	1.3 Paper standard: Definition, Features, Merits and Demerits.	K1 – K4		
	1.4 Note Issue System-Principles and Methods of Note Issue	K1 -K4		
2	Demand for Money	K1-K4	15	1-5
	2.1 Value of Money: Relationship between Value of Money and General Price level			
	2.2 Demand for Money: - Determinants of Demand for Money	K1 – K4		
	2.3 Classical Approach: Quantity Theory of Money- Transactions approach-Fisher Cambridge approach (Marshall, Pigou and Robertson)	K1 – K5		
	2.4 Keynesian Theory: Liquidity Preference Theory	K1-K5		
3	Post Keynesian Theories of Demand for Money	K1 – K5	13	1-5
	3.1 Baumol's Inventory Theoretic Approach			
	3.2 Tobin's Portfolio Balance Approach	K1 – K5		
	3.3 Friedman's Restatement of the Quantity Theory of Money	K1 – K5		
4	Supply of Money	K1- K4	13	1-5
	4.1 Money Supply: Definition, Determinants of Money Supply			
	4.2 Monetary Aggregates – Measurement of Money Stock in India: First, Second and Third Working Group of RBI	K1- K4		
	4.3 High-powered money and the money multiplier	K1-K5		
	4.4 Credit Creation	K1 – K5		
5	Monetary Policy	K1-K5	12	1 -5
	5.1 Monetary Policy – Objectives, Targets, instruments.			
	5.2 Monetary Policy – Transmission mechanisms – interest rate channel, Asset price channel, Credit channel, exchange rate and expectation channel	K1 – K5		
	5.3 Credit control – qualitative and quantitative	K1 – K5		
	5.4 Monetary Policy in India- An Overview	K1 – K5

(Effective from the academic year 2023-2024)

INTRODUCTORY ECONOMETRICS

CODE: 23EC/AC/EM45

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To provide with a rigorous introduction to univariate and multivariate regression and its uses in economics
- To provide an elementary but comprehensive introduction to the subject
- To introduce students to the basics of applied econometrics
- To enable students, understand the amalgamation of Mathematics, Statistics and Econometrics
- To equip with necessary estimation techniques for scientific decision-making process.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify and understand the concepts of econometrics	K1
CO2	infer theoretical background for the standard methods used in empirical analysis and integrate in theory building	K2
CO3	apply econometric methods like properties of least square estimators and statistical testing to real time economic problem	K3
CO4	examine problem-oriented research using the most appropriate and relevant econometric techniques.	K4
CO5	appraise statistical tools and interpret linear regression, nonlinear regression and simultaneous equation model.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Econometrics – Definition	K1-K2	5	1-5
	1.2 Classical Econometric Methodology – Analysis of an economic problem	K1-K3		

UNIT	CONTENT	CL	HRS	CO
2	Two Variable Linear Regression Model	K1-K3	22	1-5
	2.1 PRF and SRF			
	2.2 Methods of OLS, Assumptions	K1-K3		
	2.3 Derivation of OLS estimator and its properties	K1-K3		
	2.4 Standard Error	K1-K4		
	2.5 Gauss Markov Theorem- Derivation	K1-K5		
	2.6 Coefficient of determination	K1-K5		
	2.7 Hypothesis testing	K1-K5		
	2.8 Estimation of a two variable by model	K1-K5		
3	Three Variable Linear Regression Model	K1-K2	15	1-5
	3.1 Introduction to the model			
	3.2 Estimation of the model by OLS method	K1-K5		
	3.3 Hypothesis testing	K1-K5		
	3.4 Coefficient of determination	K1-K5		
	3.5 Functional form of regression models: Double Log, Semi Log, Reciprocal models	K1-K5		
4	Econometric with Qualitative/Quantitative Independent variables	K1-K4	15	1-5
	4.1 Introduction to dummy variables			
	4.2 Regression using Dummy Variables	K1-K5		
	4.3 Testing for structural stability of regression models	K1-K5		
	4.4 Interaction Effects	K1-K5		
	4.5 Seasonal Analysis	K1-K5		
5	Simultaneous Equation Models	K1-k3	8	1-5
	5.1 Introduction to simultaneous equation models			
	5.2 Simultaneous equation bias- Simple Keynesian model of income determination	K1-K4

MACROECONOMICS - I

CODE: 23EC/MC/MA54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To develop a solid understanding of macroeconomic theories and concepts
- To provide a firm theoretical understanding of the functioning of the economy
- To introduce and exemplify the fundamental principles governing economic systems
- To employ macroeconomic principles in analyzing contemporary issues within the Indian economy
- To grasp the practical implications and contemporary relevance of macroeconomic principles

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire fundamental knowledge of the basic principles of macroeconomics	K1
CO2	identify the issues relating to measurement of macroeconomic variables	K2
CO3	evaluate the relevance of the existing theoretical models of income determination	K3
CO4	identify and demonstrate the tools required to solve the macro economic issues in an economy	K4
CO5	critically assess macroeconomic issues specifically pertaining to income determination, consumption, savings and investment	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Macroeconomics 1.1 Definition, nature, scope of macroeconomics, Distinction between micro and macroeconomics	K1, K2	12	1 - 5
	1.2 National Income - Concept, real and nominal income	K1- K4		
	1.3 Measuring the value of economic activity: Measuring GDP, Measuring Cost of Living –The Consumer Price Index and Measuring Unemployment Rate	K1- K5		
	1.4 Circular Flow of Income	K1- K4		
2	Classical Theory 2.1 Classical Theory of Output and Employment: Production Employment	K1 -K4	13	1 - 5
	2.2 Demand and Supply of Labour Equilibrium: Output and Employment	K1 -K5		
	2.3 Policy implication of Classical Equilibrium Model	K2-K5		
3	Keynesian Theory 3.1 Keynesian model of income and employment determination: aggregate demand and supply	K1- K4	12	1 - 5
	3.2 Concept of Effective Demand	K1- K4		
	3.3 Under employment equilibrium	K1- K5		
	3.4 Classical vs. Keynesian	K2- K5		
	3.5 Relevance of Keynesian Economics to India	K1- K5		
4	Consumption and Saving Function 4.1 Meaning, attributes, factors affecting consumption	K2- K4	16	1 - 5
	4.2 Theories of consumption - Absolute, Relative, Permanent, and Life cycle hypothesis.	K2-K5		
	4.3 Saving Function – its attributes	K2- K4		
5	Investment Function, Multiplier and Accelerator 5.1 Investment function- Nature of investment, factors affecting invest- MEC, MEI, and rate of interest	K1 -K5	12	1 - 5
	5.2 Multiplier – definition, types, operation	K1- K5		
	5.3 Acceleration Principle	K3-K5		
	5.4 Interaction between multiplier and accelerator	K3 – K5

PUBLIC POLICY

CODE: 23EC/MC/PP53

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To introduce the students to the field of public policy making
- To familiarize with key concepts, issues and processes
- To equip with judgment skills in evaluating policies
- To give an overview of institutions involved in the policy making process
- To aid in framing of policy memo

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the key concepts of public policy making	K1
CO2	comprehend the factors which influence policy making	K2
CO3	apply to varied real-life situations the theoretical knowledge and acumen	K3
CO4	analyse the Indian public policies	K4
CO5	evaluate the effectiveness of the policies adopted	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Nature of Public Policy	K1-K2	12	1-4
	1.1 Public Policy – definition, nature and scope			
	1.2 Origin of Public Policy – Policy orientation in Lasswell's context	K1-K3		
	1.3 Brief overview of the official and unofficial actors and their roles in public policy – legislature, Government and Bureaucracy, Judiciary, individual, interest group, political parties and media	K1-K3		
	1.4 Brief introduction to the types of policies – Distributive policies, Regulatory policies and Re-distributive policies	K1-K3		
2	Policy Decision Making	K1-K5	10	1-5
	2.1 Rational Choice Theory			

UNIT	CONTENT	CL	Hrs	CO
	2.2 Simon's Bounded Rationality and Public Policy processes, Principle of Intended Rationality, Principle of Adaptation, Principle of Uncertainty and Principle of Trade-offs	K1-K5		
3	Policy Design and Techniques	K1-K2	12	1-5
	3.1 Elements of Policy Design			
	3.2 Quantitative Techniques – Cost Benefit Analysis, Economic Forecasting, Operations Research and Systems Analysis	K1-K5		
	3.3 Qualitative Techniques – Nature of Qualitative Research, Interpretive Methods – Ethnography, Action Research, Case Study, Grounded Research, Strengths and Weakness of Qualitative Research	K1-K5		
	3.4 Impact Assessment – Environment, Social and Technological	K1-K4		
4	Implementation	K1-K3	8	1-5
	4.1 Approaches to implementation – Top Down, bottom up and synthesis – A third generation of implementation research			
	4.2 Policy failure and learning from it – Conceptual, Political and Administrative problems	K1-K5		
	4.3 Conditions for Successful Implementation	K1-K4		
5	Policy Evaluation and Memo-Writing	K1-K3	10	1-5
	5.1 Criteria for Policy Evaluation			
	5.2 Approaches to Policy Evaluation	K1-K4		
	5.3 Memo - Guidelines to memo-writing	K1-K5		
	5.4 Application: Students to evaluate any one current public policy and frame three short policy memos	K1-K5

(Effective from the academic year 2023-2024)

DEVELOPMENT ECONOMICS

CODE: 23EC/MC/DE54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To gain an understanding of the evolution and growth of development models and how to apply to a wide range of real world issues.
- To provide conceptual tools to improve student's analytical ability.
- To apply the theoretical underpinnings of Development Economics
- To analyze the major economic problems of development in particular to Indian Economy.
- To critically and analytically examine the theoretical foundations of economic development and to evaluate the theories from contemporary perspective.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the dynamics of various developmental problems such as poverty, inequality, unemployment, migration, human development, sustainability et.	K1
CO2	apply development theories and concepts to formulate and analyse development policies.	K2
CO3	analyse the causality of various developmental issues and their interconnectedness.	K3
CO4	acquire concrete skills to carry out research and work directly in these areas with government agencies, ngos, policy making teams leading to their professional development	K4
CO5	critically articulate the theories of economic development.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Economics of Development - Introduction	K1 – K5	11	1-5
	1.1 Definition of Development – Difference between Growth and Development – Core values of Development – Denis Goulet , Sen			
	1.2 Evolution of Economic Development- Historical perspective	K1 – K5		
	1.1 Characteristics of Developing Economics- India	K1 - K5		
	1.4 Factors affecting Economic Development - Economic and Non-Economic	K1 - K5		
	1.5 Measures of Development – GDP, Per Capita Income, Welfare, Basic Need – Development as Freedom	K1 – K5		
2	Process of Development – Theoretical Perspective		14	1-5
	2.1 Theories of Transition - Rostow’s stages of economic growth.	K1-K5		
	2.2 Theories of Structural Change - Clark and Fisher, Kuznet .	K1-K5		
	2.2 Big Push Theory	K1-K5		
	2.4 Theory of Critical Minimum Effort			
3	Surplus Labour and Dualistic Development,	K1-K5	14	1-5
	3.1 Dualistic Economy- Meaning, characteristics, types			
	3.2 Inter-sectoral Relationship in a Dual Economy- Forward and backward linkages	K1 – K5		
	3.3 Utilisation of Surplus Manpower – Lewis theory, Fei and Ranis Theory	K1 – K5		
	3.4. Rural- Urban Migration – Todaro	K1 – K5		
	3.5 Policy Option	K1-K5		
4	Issues of Economic Development- Poverty, Inequality and Unemployment	K1- K5	13	1-5
	4.1 Poverty and Inequality- Meaning, Definition, Concepts			
	4.2 Nurkse’s Poverty Trap, Kuznets’ Inverted –U Hypothesis and Sen’s View	K1- K5		
	4.3. Measures of Poverty and Inequality – Head Count Ratio, Poverty Gap, Lorenz Curve, Human Poverty Index, Multidimensional Poverty Index	K1 – K5		
	4.4 Unemployment_ Disguised Unemployment- Nurkse Theory, A.K.Sens view	K1 – K5		
	4.5 Policy options – Areas of Intervention	K1 – K5		
5	Measures for Economic Development – Domestic and International.		13	1-5
	5.1 Capital Formation – Meaning, Importance Factors determining capital formation			
	5.2 Domestic Savings – Meaning, Sources and Mobilisation of savings.	K1 – K5		

	5.3 Foreign Trade and Economic Development – Effects of International trade, Aid or Trade	K1 – K5		
	5.4 Foreign Capital and Economic Development	K1 –K5

INTERNATIONAL ECONOMICS

CODE: 23EC/MC/IN54

CREDITS: 4

LTP: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the theoretical underpinnings of International Trade
- To provide a thorough grounding in the evolution and growth of trade theories
- To enable students to comprehend the critical role played by foreign trade in economic development
- To interpret the working of international institutions in promoting trade
- To discuss different types of trade policies and barriers to trade

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define key concepts and theories in international trade	K1
CO2	understand the principal theoretical models in international trade	K2
CO3	apply the theoretical models to a given economic scenario	K3
CO4	analyse the problems and challenges of international trade and international institutions in promoting world trade	K4
CO5	evaluate the relevance of exiting theoretical knowledge	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction 1.1 Basis of trade –Mercantilist argument: Zero Sum Game –a critique: Positive Sum Game- David Hume	K1 – K4	10	1-5
	1.2 Classical theories of International Trade: Adam Smith, David Ricardo, J.S Mill	K1 – K5		
	1.3 Terms of Trade-Offer Curves-Factors which affect Terms of Trade	K1 – K5		
2	The Endowment Theory 2.1 Heckscher-Ohlin Theory	K1-K5	16	1-5
	2.2 Factor Prices and Factor Reversal Test	K1 – K5		
	2.3 Samuelson -Stolper Theory	K1 – K4		
	2.4 Leontief Paradox Secular Deterioration in Terms of Trade- A critique of Heckscher-Ohlin Theory	K1-K5		

3	Economic Growth and Trade Policy	K1 – K5	12	1-5
	3.1 Johnson's Model			
	3.2 Bhagwati's Immiserising Growth	K1 – K5		
	3.3 Economic Integration: Meaning, Forms, Problems	K1-K3		
4	3.4 Regional Groupings: BRICS, ASEAN, G7, G 20, EU – Brexit and SCO**	K1-K4	15	1-5
	Balance of Payments and Foreign Exchange Markets	K1- K5		
	4.1 Concepts – equilibrium and disequilibrium. Factors that affect BOP – Adjustment mechanism – Devaluation- Depreciation			
	4.2 Foreign Exchange Market – Concept, Types and Instruments, Determination of the Foreign Exchange Rate: Demand and Supply Theory	K1- K5		
5	4.3 Classification of Exchange Rates and Exchange Control	K1 – K4	12	1-5
	4.4 Application –Country specific study of trade policy and the relevance of regional groupings	K1-K5		
	International Interdependence Institutions and Policy	K1-K5		
	5.1 IMF- Objective, Functions, India and the IMF			
	5.2 The World Bank-Objectives, Functions, India and World Bank	K1 – K5		
	5.3 UNCTAD and GATT-A Brief Overview	K1 – K4		
	5.4 WTO – Objectives, Functions and Impact on trade, India and the WTO	K1-K5

RENEWABLE ENERGY AND ENERGY ECONOMICS

CODE: 23ID/IC/RE55

CREDITS:5

L T P:5 1 0

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of Renewable energy resources.
- To create in students an awareness of current environmental issues and energy policies.
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude.
- To provide an awareness of the importance of energy-sensitive initiatives at the regional, national and international levels.
- To explore the role of various national and international organizations in energy development.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	gain sound knowledge in Energy development and the need for Energy transition in a Developing country like India.	K1
CO2	explain the technological advancements and innovations in renewable energy systems and their impact on energy generation.	K2
CO3	appraise key energy issues to build their ability to emerge as an entrepreneur in the field of Renewable energy	K3
CO4	analyze national and international policies and regulations governing the deployment of renewable energy.	K4
CO5	extend their critical thinking to bring out policies and solutions to key energy issues across the Globe.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Energy Resources 1.1 Energy routes for non-renewable energy resources – Age renewables and alternatives – Moving towards renewable energy sources - Energy conservation practices. 1.2 Types of energy sources - Renewable and non-renewable sources. 1.3 Energy consumption - Energy calculation. 1.4 Evolution of energy economics – Energy Development - Energy – economy linkage – Energy transition 1.5 Current energy issues - Energy intensity – growth of renewable resources.	K1 – K5	17	1-5
2	Solar Energy 2.1 Fundamentals of solar radiation – Nature of solar radiation – Radiation on earth’s surface – Sun path chart. 2.2 Photovoltaics – Principles – Physics and operation of solar cells – Solar panels- Solar power plants - On and Off-grid photovoltaics application - Photovoltaics: country perspective - Visible challenges - Production pattern of solar cells and modules in India 104.	K1 – K5	17	1-5
3	Wind energy 3.1 Introduction – Basic principles of wind energy conversion. 3.2 Nature of wind – Power in the wind -forces on the blades and wind energy conversion – Site selection. 3.3 Classification of wind energy conversion systems – Advantages and limitations.	K1 – K5	16	1-5
4	Micro Foundation 4.1 Demand - Energy demand - Primary and global - Factors affecting energy demand 4.2 Supply- Factors affecting Energy supply 4.3 Market equilibrium - Energy market structure - Non-renewable (Oil) vs renewable energy 4.4 Energy as a public good - Market failure - Externalities.	K1- K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	Energy and Environment 5.1 Mechanism to correct imperfection in energy market -Command and Control - Taxes and cap trade mechanism for internalization of environmental externalities. 5.2 Energy and climate change - Energy security - Organizations - UNFCCC (Paris Agreement) , Bureau of Energy Efficiency (India), UNDP. 5.3 Energy efficiency policies- Recent renewable energy policies in India.	K1- K5	13	1-5

MACROECONOMICS - II

CODE: 23EC/MC/MA64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide comprehensive understanding of how economies function at a macro level and the mechanisms that drive economic activities
- To apply macroeconomic concepts and principles to real- world economic issues and events, fostering a deeper understanding of current economic conditions
- To develop critical thinking skills and enable students to evaluate economic policies
- To explore the policy tools and strategies to achieve macroeconomic goals of stability, full employment and economic growth
- To provide an insight into the global aspects of macroeconomics including international trade, exchange rates and their impact on domestic economies

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	gain theoretical knowledge of fundamental macroeconomic theories and models	K1
CO2	overall understanding of major economic issues like economic growth, inflation, unemployment and business cyclesx	K2
CO3	apply macroeconomic principles to interpret current economic events and trends	K3
CO4	assess the effectiveness of policies in achieving macro economic goals	K4
CO5	utilise quantitative tools to analyse economic data and connect macroeconomic theory to real world policy debates and decisions	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Neo- Classical Keynesian Synthesis 1.1 Hicks-Hansen IS-LM functions	K1- K5	15	1 -5
	1.2 General Equilibrium	K1- K4		
	1.3 Effectiveness of Monetary and Fiscal policy	K1- K5		
	1.4 IS-LM in open economy	K1- K5		
2	Economic Growth 2.1. Economic growth and development :factors affecting economic growth- capital, labour and technology.	K1- K4	14	1 - 5
	2.2 Growth Models : Harrod – Domar, instability equilibrium	K1- K5		
	2.3 Neo-classical growth model – Solow	K1- K5		
	2.4 Policies to promote growth	K1- K5		
3	Business Cycles 3.1 Definitions, characteristics, Types of business cycle and Phases of business cycle	K1- K4	14	1 - 5
	3.2 Theories of Business cycle: Hobson, Hawtrey, Keynes, Samuelson, Hicks	K1- K4		
	3.3 Real Business Cycle	K1- K4		
	3.4 Measures of Stabilization	K1- K5		
4	Inflation 4.1 Definition, Types, Causes and Effects.	K1- K4	10	1 -5
	4.2 Excess DD –Inflationary gap Cost push – Wage Push , Profit Push	K1- K5		
	4.3 Control of Inflation- Monetary, Fiscal and General Measures	K1- K5		
	4.4 Stagflation	K1- K5

DATA ANALYTICS AND ECONOMIC ANALYSIS PRACTICAL

CODE: 23EC/MC/DA65

CREDITS:5

L T P:0 0 6

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To introduce some of the statistical and econometric techniques that are widely used in empirical studies in economics
- To teach students how to apply relevant econometric methods using economic data
- To enable students extract data from data sources
- To understand the economic implications and relevance of these tools required to formulate simple econometric models
- To emphasis on skill-based learning and focus on how to use Excel software to conduct statistical analysis of data

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	provide skills to describe, define and explore data and its types	K1
CO2	demonstrate relevant econometric methods to analyze data and interpret the results from such analysis	K2
CO3	apply and use economic data to formulate simple econometric models	K3
CO4	analyse data using computer proficiency	K4
CO5	estimate economic model using relevant data	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Importance of data 1.1 Types of Data	K1	10	1-5
	1.2 Data sources: Government, social media, Private, etc.	K1-K2		
	1.3 Data as a public good; personal data and the right to privacy; Awareness about sharing the data	K1-K3		

	1.4 Data collection agencies - Government and private sources	K1-K3		
	1.5 Levels of data- Micro and macro data - Global, Regional and Country specific data; Methodologies of data collection: Surveys, official records, etc	K1-K3		
	1.6 Big data – An introduction – Definition - Data evolution – essentials of big data in Industry 4.0	K1 -K4		
2	Data collection 2.1 Introduction to Indian Economy Data sources and extraction - Census Data Office, Ministry of (Mo)Home Affairs - Mo Statistics and Programme Implementation - National Family Health Survey reports, -NFHS Series, Mo Health & Family Welfare- Mo Education DISE data - Directorate of Economics & Statistics, Department of Agriculture and Farmers Welfare - RBI - Mo Finance - Labour Bureau, MoSPI - Annual Survey of Industries, NSSO- Niti Aayog.	K1-K5	10	1-5
	2.2 Introduction to Global data sources - International Monetary Fund, World Economic Outlook, Food and Agricultural Organization, World Bank, World Trade Organization, United Nations, etc.	K1-K5		
3	Descriptive Statistics 3.1 Summary statistics – Mean, median, mode, standard deviation, variance, Skewness	K1-K5	10	1 - 5
	3.2 Grouping data: Frequency distributions	K1-K5		
	3.3 Diagrammatic presentation of data.	K1-K5		
4	Correlation and Regression analysis 4.1 Estimating correlation and regression coefficients	K1-K5	20	1-5
	4.2 Testing the significance of correlation and regression coefficients: Test of significance and confidence interval approach	K1-K5		
	4.3 Estimating non-linear regression models: Double-log, Semi-log, Reciprocal	K1-K5		
	4.4 Simple regression models using dummy variables	K1-K5		
5	Inferential Statistics 5.1 Introduction to hypothesis-testing	K1-K5	15	1-5
	5.2 Large sample tests	K1-K5		
	5.3 Small sample tests	K1-K5

HISTORY OF ECONOMIC THOUGHT

CODE:23EC/MC/ET64

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To explore the origins of modern economic thought by examining key schools of thought such as Mercantilism and Physiocracy and their historical context.
- To trace the evolution of economic science and evaluate the contributions of various thinkers and schools of thought
- To analyse the impact of prevailing circumstances on the evolution of economic thought.
- To develop critical thinking skills by evaluating the intellectual contributions of early economic thinkers and understanding the intellectual transitions that led to the development of modern economic thought.
- To place economic thought in its historical context to provide students with a deeper appreciation of the evolution of economic ideas and their impact on economic systems.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	students will be able to recall and remember key economic thinkers and their contributions from various historical periods.	K1
CO2	students will demonstrate a clear understanding of the fundamental concepts of economic thought.	K2
CO3	students will apply economic theories and principles to analyze contemporary economic issues.	K3
CO4	students will analyze and evaluate the strengths and weaknesses of various economic theories and schools of thought, enabling them to identify the underlying assumptions, implications, and impacts of these theories on economic systems.	K4
CO5	students will critically evaluate the role of institutions and other factors discussed in economic development, assess the reasons for weak institutions in certain countries, and analyze real-world instances of market failures, drawing on the historical and theoretical knowledge acquired during the course.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction			
	1.1 Economic Thought – Meaning, Need for study of Economic Thought	K1-K3	10	1-5
	1.2 Origin of Modern Economic Thought – Mercantilism and Physiocracy	K1-K5		
	1.3 Application –Relevance of mercantilism in the globalised world	K1-K5		
2	The Classical Political Economy	K1- K4	14	1-5
	2.1 Adam Smith			
	2.2 David Ricardo	K1-K5		
	2.3 Thomas Robert Malthus	K1-K5		
	2.4 J.S.Mill	K1-K3		
	2.5 Application –Comparison of current capitalism with 18th century capitalism	K1-K5		
3	Alternative Schools of Thought	K1-K5	14	1-5
	3.1 Marxian Socialism – The theory of History & The law of motion of Capitalism			
	3.2 German Historical School –Critical and Positive ideas	K1-K3		
	3.3 Marginal Revolution –William Stanley Jevons , Carl Menger , Leon Walras	K1-K4		
	3.4 Keynesian Economics- Main Features of Keynesian Revolution –Contributions of Lord Keynes to Macro Economics	K1-K5		
	3.5 Indian Economic Thought – Dadabhai Naoroji , MK Gandhi	K1-K4		
	3.6 Application –Collapse of the communist regime in the 90's	K1-K5		
4	Neo Classical Economics and Welfare Economics	K1-K5	13	1-5
	4.1 Neo Classical Economics –Main Features –Alfred Marshall –Critique of Neoclassical School			
	4.2 Welfare Economics – Old Welfare Economics -A.C. Pigou: Externalities meet the market	K1-K5		
	4.3 New Welfare School –Vilfred Pareto : Pareto Efficiency	K1-K5		
	4.4 Welfare and Social Choice Theory - Kenneth K Arrow, Rawls and Amartya Sen	K1-K4		
	4.5 Application –Market Failure	K1-K5		
5	Institutional school	K1-K4	14	1-5
	5.1 Role of Institutions in Economics			
	5.2 Old Institutional School –Thorstein Bunde Veblen: Theory of the Leisure Class	K1-K5		
	5.3 New Institutional School - New Framework for understanding the New Institutional Economics	K1- K4		
	5.4 Transaction Costs: Robert Coase	K1-K3		
	5.5 Property Rights : Douglass North	K1-K3		
	5.6 Application : Role of institutions in development – Why some countries have weak institutions ?	K1-K5

INTRODUCTION TO GENDER ECONOMICS

CODE: 23EC/MC/GE62

CREDITS: 2

LTP: 2 0 0

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To understand gender as a socially constructed concept and how it shapes economic behaviour, opportunities and outcomes
- To understand the factors contributing to gender wage gaps, occupational segregation and disparities in employment opportunities.
- To cite gender relations and power dynamics behind individuals access to and distribution of resources.

COURSE LEARNING OUTCOMES

On Successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	recall concepts pertaining to gender	K1
CO 2	compare the economic implications borne by women and marginalized sections and men	K2
CO 3	apply theory to real life scenario	K3
CO 4	critically assess gender relations and power dynamics underlying individuals access to and distribution of resources in various socio-economic contexts	K3
CO5	analyze the effective of policy interventions	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Patriarchy	K1, K2	2	1-5
	1.1 Meaning -Definition of Patriarchy			
	1.2 Impact of patriarchy people	K2		
2	Introduction to Gender	K1, K2	4	1-5
	2.1 Meaning – Gender – Social construct			
	2.2 Differences between Gender and Biological Sex- Gender Bias	K2		
3	Gender and Development Issues	K3	4	1-5
	2.3 Impact of Gender on People – Sexism – Sex Stereotypes- Gendered Division of Labour	K1		
	3.1 Feminization of Poverty	K1		
4	3.2 Gender disparities – Education, Health and access to finance.		6	1-5
	Gender , Globalization and the Environment	K1-K3		
	4.1 Impact of globalization on Women – Impoverishment of the Environment – Women and Environment			

5	Women and work	K1	10	1-5
	5.1 Women in the organized and unorganized sector			
	5.2 Unpaid Care work - Labour for Love – Invisible worker, Visible Work	K2		
	5.3 Valuation of productive and unproductive work – paid and unpaid work	K2		
	5.4 Wage discrimination – Gender wage gap, Glass Ceiling, Glass Cliff, and Sticky floor	K3

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Canticle of creatures Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and

- responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

(Effective from the academic year 2023–2024)

FINANCIAL MARKETS

CODE: 23EC/ME/MF45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the basic concepts in financial markets
- To give students an overview of the financial markets and financial institutions
- To help students to understand and analysis interest rates and its role in investment decision.
- To help students in analyzing the risk and returns of the various financial instruments.
- To help students comprehend the working of monetary policy

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the basics of financial market and the financial products.	K1
CO2	understand the role of financial institutions and the Indian Financial system in the context of the financial instruments.	K2
CO3	application of theories to decision making process of investing in financial assets.	K3
CO4	analyze functioning of Stock Exchange and the currency market and evaluation various financial products in the primary and secondary markets	K4
CO5	create an ability to understand the monetary policy ant its tools in the functioning of the monetary system.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	INTRODUCTION	K1-K3	10	1-5
	1.1 Overview of the Financial Markets- Money market, Capital Market, Derivative security market and Foreign exchange market	K1-K3		
	1.2 Overview of Financial Institutions – Organized and unorganised institutions, Banks and non-banks	K1-K3		
	1.3 Structure of the Indian Financial Market	K1-K5		

UNIT	CONTENT	CL	Hrs	CO
2	Theories and Determination of Interest Rates	K1- K4	13	1-5
	2.1 Loanable Fund Theory			
	2.2 Term Structure of Interest rate- Unbiased expectation theory, Liquidity Premium theory, Market segmentation theory	K1-K5		
	2.3 Determination of interest rates for individual securities- inflation, real risk-free rates, default of credit risk, liquidity risk, term of maturity	K1-K5		
	2.4 Time value of money and interest rate- Time value of money, lump sum valuation and Annuity valuation	K1-K4		
	2.5 Forecasting interest rates	K1-K5		
3	Theoretical Framework	K1-K5	13	1-5
	3.1 Risk and Return, Portfolio Diversification, A risk-free asset, Market Portfolio and Capital Market Line			
	3.2 Capital Asset Pricing Model (CAPM) – Systematic risk, CAPM assumptions and expression, Security Market Line and Asset Valuation	K1-K5		
	3.3 Market Efficiency- Efficient Market Hypothesis, Beating the market, weak, semi-strong and strong form market analysis_	K1-K5		
4	Financial Institutions	K1 -K5	13	1-5
	4.1 Banking Institution- Commercial banks -Role and functions			
	4.2 Non-Banking Financial Companies (NBFC's)	K1 -K5		
	4.3 Development Financial Institutions (DFI)	K1 -K5		
	4.4 Insurance Companies- Life and non-life insurance companies	K1 -K5		
	4.5 Mutual funds – Types and role	K1 -K5		
5	Financial Markets	K1 -K5	16	1-5
	5.1 Money Market - Definition, Types, Yields on Money market securities, Money market participants, international aspects of money market.			
	5.2 Bond Market – Definition, Bond market securities, Bond market participants, International aspects of bond market	K1 -K5		
	5.3 Stock Market- Stock market securities, Primary and Secondary stock market, Stock market participants, issues pertaining to stock market (economic indicators, market efficiency, stock market regulations)	K1 -K5		
	5.4 Derivative Security Market: Forward and Futures, Options, Swaps, Caps, Floors and Collars, International aspects of derivate security market	K1 -K5		
	5.5 Foreign Exchange Market: Foreign Exchange Rates and Transactions (Foreign Exchange Rates, Foreign Exchange Transactions, Return and Risk of Foreign Exchange Transactions, Role of Financial Institutions in Foreign	K1 -K5		

UNIT	CONTENT	CL	Hrs	CO
	Exchange Transactions) Interaction of inflation, interest rates and exchange rates: purchasing power parity and interest rate parity

ECONOMIC RESEARCH AND ANALYSIS

CODE:23EC/ME/RA45

CREDITS:5

L T P: 2 0 3

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To introduce students to empirical research analysis.
- To critically assess the existing literature and develop appropriate research design considering their strengths, weaknesses and limitations.
- Apply analytical skills to identify logical flaws and biases.
- To gain familiarity with qualitative techniques in data analysis.
- To comprehend the application of statistical and econometric techniques in analysing economic data

COURSE LEARNING OUTCOMES

On Successful completion of the course, students will be able to

CO	DESCRIPTION	CL
CO 1	gain familiarity with the process involved in economic research.	K1 - K2
CO 2	apply the tools of statistics, econometrics and research methods in economic research.	K1 - K4
CO 3	develop critical thinking ability and sharp analytical skills to assess the logical validity of arguments.	K1 - K3
CO 4	ability to design qualitative research methods in economic analysis.	K1 - K5
CO 5	demonstrate proficiency in using statistical software packages in data analysis.	K1 - K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction	K1, K2	10	1
	1.1 Meaning, Objectives & Significance of research			
	1.2 Meaning, Objectives & Significance of social science research, Significance and Problems of scientific social research	K1 - K4		
	1.3 Research Types	K1 - K4		

UNIT	CONTENT	CL	HRS	CO
2	Research Process			
	2.1 Research Problem – Meaning, Statement of a research problem	K1 - K4	20	1, 2
	2.2 Literature Review – Meaning, Purpose of literature review, Kinds of sources, Documenting sources, Writing Literature review			
	2.3 Hypothesis testing – Introduction, Procedure and Approaches	K1 - K5		
	2.4 Research Design –Meaning and types	K1 - K5		
	2.5 Sampling techniques	K1 - K5		
	2.6 Data - Types, Sources of Data, Data Collection Techniques	K1 - K5		
3	Logic			
	3.1 Logic of Reasoning	K1 - K5	10	3
	3.2 Propositions, Arguments, Premises	K1 - K5		
	3.3 Deduction and Induction	K1 - K5		
	3.4 Validity and Truth, Fallacies Syllogism	K1 - K5		
4	Qualitative Methods			
	4.1 Defining Qualitative Methods – Meaning of Knowledge – Epistemology Modern (Cartesian) – A Critique – Standpoint Epistemology – Ontology – Ontological Assumptions	K1 - K5	10	4
	4.2 Four major Qualitative Approaches – Ethnography, Phenomenology, Field Research, Grounded Theory	K1 - K5		
	4.3 Methods of Qualitative measurements – Participant Observation, Direct Observation, Interview method, Case Studies, Vignettes	K1 - K5		
5	Data Analysis - Practical Session	K1 - K5	15	1 - 5
	5.1 Descriptive Statistics - Measures of Central Tendency, Dispersion and Deviation from normality			
	5.2 Exploring data with graphs and Frequency Distribution	K1 - K5		
	5.3 Measures of deviation from normality –Skewness and Kurtosis	K1 - K5		
	5.3 Correlation and Regression –Simple, Partial, Multiple	K1 - K6		
	5.4 Non-Linear relationships –Alternate Functional form specifications	K1 - K6		
	5.5 Regression using Dummy Variable Techniques	K1 - K6		
	5.6 Comparing two means –‘t’ Test	K1 - K6		
	5.7 Comparing several means -ANOVA: One way and Two way	K1 - K6		
	5.8 Report Writing - Significance - Steps - Layout of the research report.	K1 - K6

PATTERN OF ASSESSMENT

NO CONTINUOUS ASSESSMENT

Other Components:

Total Marks: 50

Quiz, Problem solving, Presentation of Article Summaries: -

Article Summary to answer the following questions:

1. What is the central economic issue in the article?
2. What hypothesis/ objective were tested?
3. Discussion of the conceptual model
4. Empirical Model
5. DESCRIPTION of the variables, functional form, summary of findings
6. How to improve the study or follow up this study

NO End-Semester Examination:

Students are expected to submit a Minor research Project. Total Marks: 50

An external examiner along with the respective internal examiners will conduct the Viva Voce exam for the students who register for this course.

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To define the fundamental concepts and principles of agricultural economics.
- To enhance critical thinking by evaluating complex agricultural economic challenges and propose practical solutions.
- To understand the need for agricultural finance.
- To give an overview of the trends in agricultural production of the major crops in India.
- To appraise the agricultural marketing system in India.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the key concepts in agricultural economics	K1
CO2	comprehend the operation of the fundamental concepts	K2
CO3	apply to varied real-life situations in the Indian context	K3
CO4	analyse the Indian agricultural prospects	K4
CO5	evaluate the effectiveness of the policies with respect to Indian agriculture	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Nature and Scope of Agricultural Economics	K1-K2	10	1-4
	1.1 Definition, scope, and nature of agricultural economics			
	1.2 Role of Agriculture in economic Development –Developed vs Developing Economy	K1-K4		
	1.3 Agricultural Linkages with other sectors – Changing nature of linkage	K1-K4		
	1.4 Types and systems of farming	K1-K4		
2	Agricultural Production and Productivity	K1-K2	13	1-5
	2.1 Production Function in Agriculture – resource use efficiency			
	2.2 Input- output and production relationship in farm Production – Issues related to agricultural labour	K1-K3		
	2.3 Growth and productivity trends in Indian Agriculture for major crops	K1-K5		

UNIT	CONTENT	CL	Hrs	CO
3	Agricultural Credit	K1-K2	14	1-5
	3.1 Importance of agricultural credit			
	3.2 Need for government intervention – price and agricultural commodities	K1-K5		
	3.3 Agricultural credit system in India – organised and unorganised credit	K1-K5		
	3.4 Role of NABARD in agricultural credit	K1-K5		
	3.5 Problems of Small and Medium farmers in getting agricultural finance	K1-K5		
4	Agricultural Price Policy	K1-K4	14	1-5
	4.1 Need, Objectives and Instruments of agricultural price policy			
	4.2 Shortcomings of price policy – suggestions for improvement	K1-K5		
	4.3 Agricultural Price Policy in India	K1-K5		
	4.4 Terms of trade between agricultural and non-agricultural price policy	K1-K4		
5	Agricultural Marketing	K1-K4	14	1-5
	5.1 Agricultural marketing – definition, importance and problems			
	5.2 Markets and marketing function – channels of distribution	K1-K5		
	5.3 Current agricultural marketing system – APMC and E-NAM	K1-K5

OBJECTIVES OF THE COURSE.

- To familiarize students with quantitative analysis of the theory of firm to gain interest for research in markets using optimization techniques.
- To appraise the ability to devise mathematical modelling for economic theories using difference and differential equations.
- To develop competency on analytical skills for model building and policy making.
- To apply quantitative techniques to respond to economic issues at regional, national and in the Global scenario
- To upgrade the acquired mathematical skills to an advanced level in order to emerge as a highly equipped corporate and an analyst.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	use quantitative tools to investigate real time economic variables	K1
CO2	exemplify applied quantitative techniques to solve key economic issues and problems	K2
CO3	broaden student's horizons and enable them to apply optimisation techniques to devise mathematical models for the current economic issues	K3
CO4	appraise market analysis by quantitatively examining the working of the firm and the functions of different market structure	K4
CO5	develop critical thinking to evaluate and construct quantitative economic models	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Optimization techniques and its economic application 1.1 Constrained Maxima - Minima	K1-K4	10	1-5
	1.2 Economic application to constrained optimization – Cost Minimization, Output Maximization, Utility Maximization	K1-K5		
	1.3 Application to equations with parameters – Production function- Homogenous production function – Solving production function	K1-K5		
	1.4 Cobb- Douglas production function – CES - Eulers theorem	K1-K5		
2	Theory of Firm – Optimization techniques 2.1 Market equilibrium – Perfect Competition	K1-K5	15	1-5
	2.2 Market equilibrium – Imperfect competition – Monopoly, Price discrimination	K1-K5		
	2.3 Oligopoly Market - Game theory – Concept, types of games	K1-K5		
	2.4 Pay-off tables- Types, Pure, Mixed, and optimum strategies	K1-K5		
	2.5 Max- Min principle- saddle point - Value of Game – Dominant theories	K1-K5		
3	Linear Programming 3.1 Introduction to Linear Programming – Assumptions, Theorems, Formulation of Linear Programming – Economic application	K1-K3	10	1-5
	3.2 Graphical Solution of the Diet and Production Problems	K1-K3		
	3.3 Formulation of the Dual Programme –Statement of Duality Theorems	K1-K4		
4	Integration 4.1 Introduction to Integration	K1-K3	15	1-5
	4.2 Basic Integration sums - Methods of Integration – Parts, Substitution, and Partial fractions (Basic arithmetic sums only)	K1-K3		
	4.3 Definite Integrals (Basic sums only)	K1-K3		
	4.4 Consumer and Producer surplus	K1-K4		
5	Dynamic Analysis 5.1 Difference Equations – First and Second Order	K1-K3	15	1-5
	5.2 Difference Equations and Economic models - Cobweb Model, Samuelson's Multiplier Accelerator	K1-K5		
	5.3 Differential Equations – First and Second Order	K1-K3		
	5.4 Differential Equations and Economic models - Harrod-Domar and Solow Model	K1-K5

B.A. DEGREE: BRANCH IV- ECONOMICS

SYLLABUS

(Effective from the academic year 2023-2024)

HEALTH ECONOMICS

CODE: 23EC/ME/HE45

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To understand the importance of health sector in economic development
- To evaluate the components of demand and supply of health care
- To Understand the importance of Health Indicators.
- To evaluate the components of Demand of Healthcare.
- To examine the review the existing Health Infrastructure.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the importance of Health Indicators.	K1
CO2	evaluate the components of Demand of Healthcare.	K2
CO3	analyze the importance of Supply of Healthcare Services.	K3
CO4	review the Existing Health Infrastructure and Budget Allocation.	K4
CO5	trace the growth of Medical Tourism in India and understand the need for Health Insurance.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HRS	CO
1	Introduction to Health Economics	K1-K2	10	1-5
	1.1 Health and Economic Development - Determinants of Health)	K1-K5		
	1.2 Health Indicators – Birth Rate – Fertility – Morbidity – Mortality – IMR – CMR – MMR – Disability Adjusted Life Year (DALY) – Sex Ratio- Quality Adjusted Life Year (QALY			
	1.3 Amartya Sen’s Capability Approach.	K1-K3		

UNIT	CONTENT	CL	HRS	CO
2	Demand for Health Care		15	1-5
	2.1 Demand for Health Care Services	K1-K3		
	2.2 Preference for Health Care using Indifference Curves – Budget Constraints	K1-K4		
	2.3 Income and Price Effects for Health Care	K1-K4		
	2.4 Elasticity of Demand for Medical Care	K1-K5		
3	Supply of Health Care		15	1-5
	3.1 Supply of Health Care Services	K1-K4		
	3.2 Physicians and Medical Personnel as Health Care Providers	K1-K5		
	3.3 Non-Labor Inputs – Hospitals	K1-K3		
	3.4 Interaction of Demand and Supply of Health Care	K1-K5		
4	Health Infrastructure	K1-K5	15	1-5
	4.1 Health Infrastructure – Rural – Urban – Government Programmes			
	4.2 Preventive, Promotive and Curative Health Care Services	K1-K5		
	4.3 Health Allocation in Budget	K1-K5		
5	Health Services and Medical Insurance	K1-K4	10	1-5
	5.1 Health Insurance -Types of Insurance Policies in India			
	5.2 Medical Ethics -Medical Tourism.	K1-K5

B.A. DEGREE: BRANCH IV - ECONOMICS

SYLLABUS

(Effective from the academic year 2023-2024)

MANAGERIAL ECONOMICS

CODE:23EC/UI/MG23

CREDITS:3

OBJECTIVES OF THE COURSE

- To understand the basic concepts and equip them with tools to analyze economic quantities
- To impart the use of evaluative and forecasting techniques

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Understand the economic goals of the firms and optimal decision making
- To understand the challenges faced by managers
- To understand the critical role played by managers in decision making
- Enable students to apply theory to solve issues related to decision making of the firm with the help of analytical/statistical tools
- Knowledge of evaluated and forecasting techniques

Unit 1

Introduction and Demand Analysis

- 1.1 Nature, meaning and scope of managerial economics
- 1.2 Decision making and the role of a managerial economist
- 1.3 Demand Distinctions
- 1.4 Demand Forecasting
- 1.5 Problems and case studies

Unit 2

Cost Decisions and Profit Planning

- 2.1 Cost Concepts
- 2.2 Cost output relationship
- 2.3 Cost control and cost reduction
- 2.4 Profit planning and Break even analysis
- 2.5 Problems and case study

Unit 3

Pricing and Market Promotion

- 3.1 Objectives of pricing
- 3.2 Pricing Practices – Cost Oriented pricing. Competition oriented pricing and Pricing based on other economic consideration
- 3.3 Peak load pricing and Pricing over the life cycle of a product

Unit 4

Linear Programming

- 4.1 Linear programming: Applications and Assumptions
- 4.2 Constrained Profit Maximization and Constrained Cost minimization – Structuring the problem, the feasible region, graphic and algebraic solution
- 4.3 Special problems in Linear Programming – Multiple Solutions, redundant constraints with no feasible solution
- 4.4 The Dual Problem – Structuring the Dual problem, solving the dual problem
- 4.5 Problems and case study

Unit 5

Capital Budgeting

- 5.1 Cost of Capital
- 5.2 Investment evaluation – Project Appraisal methods
- 5.3 Capital Rationing
- 5.4 Problems and Case Study

NOBEL LAUREATES IN ECONOMICS

CODE:23EC/UI/NL23

CREDITS:3

OBJECTIVES OF THE COURSE

- To provide a deeper understanding of the contributions made by select Economists in the field of economic theory and policy
- To facilitate a better comprehension of the relevance of the contributions of select Nobel Laureates, Women Economists and Indian Economists to the current economic issues

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Will enable the students to survey the discipline of economics through the lens of these eminent scholar's contributions and their applications
- explore the building blocks on which today's economics stands
- learn a great deal of intellectual history
- Provide knowledge about the contribution made by the following noble laureates
- Appreciate the relevance of their contribution in the context of the current scenario

Unit 1

Amartya Sen

- 1.1 Work for which Nobel Prize was awarded
- 1.2 Analysis
- 1.3 Relevance of the work to the current economic scenario

Unit 2

George Akerlof

- 2.1 Work for which Nobel Prize was awarded
- 2.2 Analysis
- 2.3 Relevance of the work to the current economic scenario

Unit 3

John Nash

- 3.1 Work for which Nobel Prize was awarded
- 3.2 Analysis
- 3.3 Relevance of the work to the current economic scenario

Unit 4

Paul Krugman

- 4.1 Work for which Nobel Prize was awarded
- 4.2 Analysis
- 4.3 Relevance of the work to the current economic scenario

Unit 5

Ronald Coase

5.1 Work for which Nobel Prize was awarded

5.2 Analysis

5.3 Relevance of the work to the current economic scenario

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF ENGLISH

PROGRAMME DESCRIPTION

The Bachelor's Programme in English is designed to acquaint students with a range of literatures written in, or translated into, English from across the world. The first two semesters of study train students to identify and appreciate the genres and subgenres of literature. These introductory courses also equip students to analyse and interpret texts with reference to the features, devices and techniques unique to each genre/subgenre. The programme then moves on to courses aimed at introducing students to various schools of thought and critical/theoretical movements. These give students a conceptual grounding and equip them with tools for analysis and interpretation. These courses are also designed to sensitise students to issues pertaining to marginalisation and plurality through an engagement with literary texts and to encourage them to question dominant narratives. They also prepare students to engage with literatures from various regions of the world: the focus of the courses in the last three semesters of the programme. The courses in the last three semesters build, in students, an awareness of social, cultural, economic and political conditions, specific to the regions, that are intertwined with the process of literary production. The programme is also designed with the twin objectives of nurturing creativity and imparting skills leading to employability in areas such as education and journalism.

VISION OF THE DEPARTMENT

To encourage students to evolve into sensitive, independent individuals and agents of social change through the study of literatures from across different regions.

MISSION OF THE DEPARTMENT

- To impart language and communication skills through participatory learning in order to aid employability
- To encourage problem solving and critical thinking in students
- To explore newer areas of research across regions in English Studies
- To equip students with knowledge and critical thinking skills which will aid them in questioning dominant narratives in English Studies so that they become agents of social change and help
- To continually update our programme to be contemporaneous and inclusive
- To respond sensitively to marginalised discourses in literature and culture

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.A. English Programme, the students will be able to

PSO 1	identify and explain generic features of different texts from around the world and demonstrate an understanding of reading/ writing methods.
PSO 2	engage critically with texts/ contexts/ theories/ concepts from around the world.
PSO 3	use the skills acquired to respond to real-life situations.
PSO 4	understand and respond to the relationships between texts/ concepts and different subject positions.
PSO 5	sensitively engage with interactions between language/ literature, and socio-political/ economic/ ecological/ cultural/ ethnic/ linguistic contexts.

INTRODUCTION TO LINGUISTICS

CODE:23EL/AC/LG15

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce students to the fundamental concepts of linguistics
- To inculcate in students a scientific approach to language
- To equip them with tools to analyse linguistic units
- To acquaint them with different schools of linguistics
- To introduce them to the relationship between language, culture and society

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and label phonemes, morphemes and sentence patterns.	K1
CO2	understand and illustrate the issues related to the structure and functioning of language.	K2
CO3	apply concepts related to the structure of words and sentences.	K3
CO4	analyse sounds and identify their patterns in the English language; examine language, society and culture, and language variations such as social, regional and historical dialects.	K4
CO5	compare and contrast Language in terms of systematic differences in phonetics, phonology, morphology, syntax and semantics; discuss the socio-cultural variables that impact the production of the varieties of English.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

ENVIRONMENTAL STUDIES

CODE:23EL/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies; Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-energy resources: renewable and non-renewable sources, impact of over-exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and *ex-situ* conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects and control measures -Impact of over-population on pollution and health – carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations Sustainable Development Goals of the 2030 Agenda
- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3**(6 Hours)**

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23EL/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2

(13 Hours)

Food and energy balance

2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food

2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food

2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 (13 Hours)

3.1 Energy conservation

- 3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation -Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant
- 3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

- 3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing
- 3.2.2 **Configuring Email**
Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails
- 3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

SUBALTERN WRITING

CODE: 23EL/AC/SW25

CREDITS: 5

LTP: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable students to understand the concept of subalternity
- To help them position subaltern identities in texts
- To sensitise students to experiences of marginalisation
- To enable students to critically analyse literary texts with reference to subalternity
- To extend their understanding of the issues discussed through the texts to the real world

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define subalternity and concepts related to marginalisation.	K1
CO2	interpret the causes and consequences of oppression.	K2
CO3	identify and organise literary texts into the categories of subalternity.	K3
CO4	analyse texts using concepts and theories of subalternity.	K 4
CO5	evaluate real world experiences using the framework of subalternity and develop a sensitive approach towards the marginalised sections of the society.	K5, K6
CL – Cognitive Level K1–Remember K2–Understand K3–Apply K4–Analyse K5–Evaluate K6–Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Subalternity: Definition and Concepts</u> 1.1 Paulo Freire: Preface (from <i>Pedagogy of the Oppressed</i>) 1.2 Frantz Fanon: On Violence (from <i>The Wretched of the Earth</i> , pp 1-13)	K1-K6	20	1-5
2	<u>Film Script</u> 2.1 Saeed Akhtar Mirza: The First Lady and the Terrorist: A Film Script in Five Acts (from <i>Ammi: Letter to a Democratic Mother</i> pp. 50-307)	K1-K6	15	1-5
3	<u>Fiction</u> 3.1 Maheswata Devi: Kunti and the Nishadin (from <i>After Kurukshetra</i>)	K1-K6	10	1-5
4	<u>Poetry</u> 4.1 Nellie Wong: When I was Growing Up 4.2 Cherrie Moraga: The Welder 4.3 S. Sukirtharani: A Faint Smell of Meat	K1-K6	15	1-5

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE: 23EL/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

LITERATURE AND GENDER

CODE: 23EL/AC/GD45

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To enable students to trace and understand the history of women's movements
- To enable students to explore literary texts with reference to gender relations and gendered ways of thinking
- To help students understand construction and perpetuation of gender in society
- To enable students to use critical concepts and theoretical frameworks to analyse literary texts and extend this understanding to real life contexts
- To help students to adapt tools to formulate critical responses to representation of gender in texts, media and real life contexts

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	recall significant contributions in the history of women's movements	K1
CO2	explain the intersectionality of race, class, caste, ethnicity, religion, sexuality, ability and gender	K2
CO3	apply appropriate concepts and critical frameworks for a gendered reading of canonical texts and contemporary literature	K3
CO4	examine the construction of gender in other media and real life contexts sensitively	K4
CO5	adapt tools to formulate critical responses to textual and real life contexts	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

LITERATURES OF EAST AND SOUTH ASIA

CODE:23EL/MC/ES55

CREDITS:5

L T P: 5 1 0

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To introduce students to a selection of literatures from the East Asian and South Asian region
- To train students to explore the similarities and differences across literatures and cultures in this region
- To equip students with the analytical tools to deconstruct the geo-political contexts of the region through literature
- To help them engage with issues related to the interplay of gender, caste, class, religion and politics
- To sensitise students to the writing that emerges from conflict zones

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	locate literatures of the East and South Asian region in their historical, socio-political and cultural contexts.	K1
CO2	relate literary texts to social realities of the regions.	K2
CO3	articulate a critical understanding of representative texts from these regions.	K3
CO4	compare representative texts from these regions addressing the universal and unique factors of social reality and cultural traditions exemplified in other media of representation as well.	K4
CO5	interpret and propose new ways of dialogue across cultures with sensitivity and critical appreciation.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

**Interdisciplinary Core Course Offered by the Departments of English and Fine Arts
to the students of Bachelor of Visual Arts Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

COLONIAL ART AND LITERATURE

CODE: 23ID/IC/CA55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce students to painting and architecture of colonial India
- To familiarize them with writing from and about colonial India
- To train them to critically analyse colonial literature using the framework of postcolonialism
- To highlight the significance of change in artistic styles effected by patronage in the colonial context
- To train them to examine literary and artistic productions of the colonial ethos

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define concepts related to colonialism and post colonialism with reference to literary studies and art	K1
CO2	highlight how British colonialism impacted painting, architecture and literature from India and demonstrate how Indian artists and writers engaged with issues thrown up by British colonialism	K2
CO3	demonstrate an understanding of the colonial context in the production of art and apply concepts related to colonialism and post colonialism in reading texts written by the British on India	K3
CO4	analyse art of the colonial period and texts written by the British on India	K4
CO5	justify the changes in artistic style through critiquing the colonial context; and explain the engagement between colonial/postcolonial ideology and literary texts	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

(Effective from the academic year 2023–2024)

LITERATURES OF AUSTRALIA, CANADA AND NEW ZEALAND

CODE:23EL/MC/CA65

CREDITS:5

L T P:5 1 0

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To help develop an awareness of issues—social, economic, political, and cultural—of Canada, Australia and New Zealand
- To explore modes of writing and reading that interrogate the histories and the presence of colonial influence in these postcolonial locations
- To acquaint students with discourses of racial and ethnic differences and encourage dialogue on conditions of marginality and plurality
- To examine the representation of the environment and its significance in Canadian, Australian, and New Zealand literature, exploring how authors engage with landscapes, ecologies, and the relationship between humans and nature
- To analyse the role of indigenous voices and the intersections of gender and literature in Canada, Australia, and New Zealand

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	find relevant information related to Australian, Canadian and New Zealand history and society and connect them to issues of gender, religion, race, the environment and postcoloniality.	K1
CO2	relate politically and aesthetically to literatures of indigenous communities from these regions.	K2
CO3	identify how literature shapes our ideas about society and social identities in interaction with other discourses.	K3
CO4	examine the significant presence of nature in the writing from these regions and dissect the colonial and postcolonial histories of Australia, Canada and New Zealand.	K4
CO5	interpret and elaborate on the texts that emerge from these locations and their connection to the social, political and cultural issues.	K5, K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To introduce students to writing from the West Asian region
- To analyse major themes, motifs, and narrative techniques found in West Asian literature
- To acquaint them with the socio-political contexts that inform the content and the form of texts from the region
- To help them engage with issues related to the interplay of gender, religion and politics
- To sensitise students to the writing that emerges from conflict zones

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	find relevant information related to West Asian history, society, and geopolitics and relate it to issues of gender, religion, and the environment	K1
CO2	interpret writing from conflict zones across the region	K2
CO3	identify the geo-political dynamics of the region and apply it to the prescribed texts	K3
CO4	analyse texts using their knowledge of the politics of the region and correlate the experiences from different countries in the region	K 4
CO5	evaluate the experiences of the people from West Asia and develop a sensitive approach to the realities of the region	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Canticle of creatures Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic

- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion’s vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one’s past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

SYLLABUS

(Effective from the academic year 2023–2024)

INTRODUCTION TO CHILDREN'S LITERATURE

CODE:23EL/ME/CW45

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To introduce students to theoretical concepts in the field of children's literature
- To help students appreciate the diversity of children's literature
- To introduce students to the features of some of the sub-genres of children's literature
- To enable students to deconstruct the use of word choice, dialogue, narration, story structure, and other elements of storytelling in contemporary children's books
- To train students to create stories for children in the prescribed sub-genres

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define children's literature and concepts related to childhood	K1
CO2	compare and contrast children's literature and literature for adults and understand the techniques and strategies used by writers and illustrators of children's books	K2
CO3	identify key features of the sub-genres of children's literature and organise texts into the respective categories	K3
CO4	analyse texts using critical vocabulary pertaining to various sub-genres such as the Picturebook, the Comic Book and the Journal	K 4
CO5	evaluate the role of the adult in the creation of books meant for children and the relevance of such books, and create stories for children based on the knowledge of the features of the prescribed sub-genres	K5, K6
CL – Cognitive Level

Duration: 90 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	5	1x5=5 (1 out of 2 questions, 100 words)
B	K2	10	1x10=10 (1 out of 2 questions, 200 words)
C	K3	10	1x10=10 (1 out of 2 questions, 200 words)
D	K4	10	1x10=10 (1 out of 2 questions, 200 words)
E	K5	15	1x15=15 (Passage Analysis from prescribed texts, 250 words)

Other Components:

Total Marks: 50

One oral presentation (Critical Analysis) - 25 marks

One written assignment (Creative Writing) - 25 marks

Cognitive Level	Marks
K1	5
K2	5
K3	5
K4	5
K5	10
K6	20

End Semester Evaluation:**Total Marks: 100**

Term Paper of 2500 words (Critical Analysis / Creative)

Cognitive Level	Marks	Rubrics for Evaluation
K1	10	Documentation/Reflection of the knowledge of concepts related to the child and childhood
K2	10	Formulating and explaining topic statement/Awareness of the features of the sub-genre of the creative work
K3	10	Explaining the conceptual framework/Application of the knowledge of strategies in writing narratives for children
K4	30	Textual analysis/Narrative content
K5	20	Research arguments, relevance, coherence, appropriate use of academic language/Coherence and creativity
K6	20	Stating the conclusions/Execution of the creative work

No End-Semester Examination.

JOURNALISTIC WRITING

CODE:23EL/ME/JW45

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To introduce students to different kinds of writing for the print media
- To enable students to identify news and enhance their research skills for news writing
- To familiarise students with the conventions and nuances of news writing
- To train students to write different kinds of news reports and feature stories
- To facilitate students to review and edit newsletters

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define terms and concepts in journalism	K1
CO2	compare and contrast different kinds of journalistic writings	K2
CO3	identify newsworthy stories and credible information from varied sources	K3
CO4	analyse data gathered through research, field notes and interviews for journalistic writing	K4
CO5	review drafts and create a portfolio of well-organized news reports, features and other kinds of journalistic writing	K5 - K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Introduction</u> 1.1 Identifying News 1.1.1 News Determinants 1.2 Kinds of News 1.2.1 Hard News 1.2.2 Soft News	K1, K2	5	1-2
2	<u>Basics of Writing</u> 2.1 Gathering information- Library Sources, Surveys, Interviews 2.2 Developing the Story 2.2.1 Writing Headlines 2.2.2 Writing Leads 2.2.3 Quotation and Attribution 2.2.4 Writing captions for pictures	K1-K6	20	1-5
3	<u>Writing News Reports</u> 3.1 The Inverted Pyramid Format 3.2 Writing the Lead 3.3 Developing the Story	K1-K6	10	1-5
4	<u>Writing Features</u> 4.1 The Hourglass format 4.2 Writing the Lead 4.3 Kinds of Features	K1-K6	10	1-5
5	<u>Other kinds of Journalistic Writing</u> 5.1 Personality Profile 5.2 Reviews- Movies, Books, Food, Travel 5.3 Interviews- Q & A	K1-K6	20	1-5

TRAVEL WRITING

CODE:23EL/ME/TW45

CREDITS:5

L T P:5 0 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To introduce students to travel writing, different types of travel literature
- To acquaint students with the prominent tropes of the genre
- To train them to analyse travel texts and issues from multiple perspectives, with special concern for how cultural assumptions inform literatures of travel
- To sensitise them to the issues that arise in different contexts
- To equip students to debate the nuances of ethical travel writing

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define the characteristics of different kinds of travel literature	K1
CO2	illustrate the cultural and socio-political aspects of travel literature	K2
CO3	identify the different strategies used by travel writers to deal with difference	K3
CO4	analyse travel writing texts from different perspectives	K4
CO5	evaluate travel narratives and develop strategies to respond empathetically to narratives that record difference and conflict	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create

SYLLABUS

(Effective from the academic year 2023–2024)

PROJECT

CODE:23EL/ME/PR45

CREDITS:5

OBJECTIVES OF THE COURSE

- To provide students with the skills to undertake independent research on an area of their interest
- To enable students to identify a research gap
- To train students to formulate a clear research question
- To inculcate in students the skillset required to carry out structured, ethical research
- To train students in writing a well-organised and well-documented short research paper.

COURSE LEARNING OUTCOMES

On successful completion of the course, the student will be able to

COs	DESCRIPTION	CL
CO1	define a research area.	K1
CO2	identify the research gap in the area.	K2
CO3	construct a research framework, cogent arguments to fill in the research gap.	K3
CO4	examine and make ethical and optimal use of resources .	K4
CO5	interpret and evaluate the ideas, and develop an argument to compose a well-organised and well-documented research paper.	K5,K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

Description: Analysis/argument in the form of an extended research paper on a topic or aspect of a topic following the MLA (Eighth Edition) documentation and citation style.

Length : Around 3000-4000 words/10-20 pages, organised in 2 to 3 chapters

Scope : Students could work on

- a) an author/authors
- b) a particular theme or issue in the context of a literary work
- c) use a given theoretical approach to a particular text/group of texts

The above entails extensive reading of primary and secondary texts.
(to be done in consultation with the supervisor)

- Requirement:** An abstract of 150-200 words
1. A clear thesis statement
 2. Works Cited
 3. Documentation and Bibliography using MLA (Eighth Edition) format
 4. Drafting and revising process to be followed – with a percentage of the marks to be allotted to drafts as given below

PATTERN OF ASSESSMENT:

THE GRAPHIC NOVEL

CODE:23EL/GE/GN22

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To encourage students to view graphic novels as a composite medium, like film, by examining both visual and textual elements
- To train students to appreciate the unique textures and 'language' of narration in graphic novels
- To introduce students to the complexities of storyboarding and sequential art

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define the characteristics and elements of graphic novels	K1
CO2	classify different genres and themes found in graphic novels and compare the narrative approaches and artistic styles in the novels prescribed	K2
CO3	apply literary and visual analysis skills to identify socio-cultural and political themes	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Introduction to Graphic Novels</u> 1.1 Interaction between textual and visual elements of graphic novels 1.2 Narrative: Storyboarding, Dialogue, Setting, Characterisation 1.3 Genres: Humour, Politics, Memoir, Manga 1.4 Representation: Gender, Race, Sexuality	K1-K3	6	1-3
2	<u>Fiction</u> 2.1 Frank Miller, John Romita Jr.: <i>Daredevil: The Man Without Fear</i>	K1-K3	10	1-3
3	<u>Non-Fiction</u> 3.1 Malik Sajad: <i>Munnu: A Boy from Kashmir</i>	K1-K3	10	1-3

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF FINE ARTS

PROGRAMME DESCRIPTION

In keeping with the commitment of Stella Maris College towards nurturing academic excellence, the Department of Fine Arts offers a teaching-learning-evaluation system that assures optimal educational benefits. The four year B.V.A. programme employs multiple teaching-learning methodologies with specialisation streams in art or design. The first four semesters are devoted to foundation courses in both disciplines. Core courses on drawing have been increased to strengthen skills required in both art and design practice. Specialisation courses are offered from the fifth semester onwards, culminating in an art/design project that is displayed at an annual exhibition.

While studio-based practical courses on art and design nurture the creativity of students, the study of art history provides a strong theoretical framework for their artistic expression. Art history courses are offered in all four years to build a comprehensive knowledge of theory.

Additionally, an interdisciplinary course has been framed in collaboration with the Department of English. The combination of art theory and practice has remained unique to the curriculum and forms the strength of the department's pedagogy. Research is integral to the curriculum and several courses are dependent on critical enquiry.

The four years of study brings the B.V.A. Degree on par with similar programmes offered by other art institutions in India, thereby allowing students to pursue M.F.A. programmes. The fourth year of study in the B.V.A. programme also provides the extra credits required for admission into postgraduate programmes in several foreign universities.

Various curricular and co-curricular activities such as study tours, guest lectures, workshops, field visits, visits to galleries and museums, certificate courses, conferences, seminars, and collaborative projects with reputed institutions are organised or undertaken on a regular basis to enhance and complement the curriculum.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

DEPARTMENT OF FINE ARTS

VISION OF THE DEPARTMENT

To empower individuals through art education to be skilled, creative, ethical, and socially responsible.

MISSION OF THE DEPARTMENT

To provide individuals with relevant art education with emphasis on creativity, vocational training, social responsibility and ethical research.

PROGRAMME SPECIFIC OUTCOMES

On successful completion of the B.V.A. Programme, the students will be able to

PSO 1	demonstrate a comprehensive understanding of art history and competency in art/design practice
PSO 2	acquire career/entrepreneurial capacity in their chosen fields of art/design to become empowered individuals
PSO 3	be equipped to use their art/design knowledge and skills critically and creatively to respond to situations
PSO 4	be able to understand, respect and respond to diverse art and cultural practices
PSO 5	apply art/design learning to sensitively and ethically engage with environmental/ cultural/ socio-economic/ political concerns

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.V.A. DEGREE: BRANCH X – VISUAL ARTS

SYLLABUS

(Effective from the academic year 2023-2024)

FUNDAMENTALS OF ART HISTORY

CODE: 23FA/MC/FA14

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide an orientation to art history as an academic discipline
- To introduce the fundamental methods of art history
- To inculcate the use of appropriate vocabulary and critical tools in discussing and writing about works of art
- To introduce the study of art history through formal and contextual analyses

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define key terms used in art history and its methods	K1
CO2	explain the characteristics of media, elements and principles of art	K2
CO3	relate the use of elements and principles of art to select works from art history	K3
CO4	analyse works of art with reference to context, style and meaning	K4
CO5	critique and compare works of art using formal and contextual analyses	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Art History 1.1 Vocabulary of art history – art, artist, aesthetics, subject, form, content 1.2 Art history and related disciplines 1.3 Methods of art history – formal analysis and contextual analysis	K1 – K2	10	1 - 2
2	Formal Analysis - Elements and Principles of Art 2.1 Elements of art – form, line, shape, value, texture, colour, space 2.2 Principles of organisation – contrast, emphasis, balance, scale, variety, harmony, rhythm	K1 – K5	15	1 - 5

UNIT	CONTENT	CL	Hrs	CO
3	Mediums and Forms of Art		(15)	
	3.1 Two-dimensional art - painting, graphic arts, photography, digital art	K1 – K5	9	1 – 5
	3.2 Three-dimensional art - sculpture, assemblage, installation art			
	3.3 Architecture	K1 – K2	6	1 – 2
	3.4 New media-video and film, performance 3.5 Textiles and decorative film			
4	Contextual Analysis	K1 – K5	10	1 - 5
	4.1 Art in context – artist, patron, viewer			
	4.2 Style and meaning – period style, regional style, personal style			
5	Comparative writing		(15)	
	5.1 Organising a comparison – splitting, lumping	K1, K2	3	1 - 2
	5.2 Writing a comparison	K5	12	5

DRAWING I PRACTICAL

CODE: 23FA/MC/P113

CREDITS: 3

L T P: 0 0 4

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To enable an understanding of freehand drawing through observation
- To enable an understanding of line and contour
- To enable comprehension of form and space
- To impart skills in using drawing media to render tone, texture, and surfaces

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	draw contours and forms using expressive, modeling, and calligraphic lines	K1
CO2	demonstrate skills in using drawing media and gesture drawing	K2
CO3	draw and render simple still-life compositions and out-door studies	K3
CO4	depict two-dimensional and three-dimensional forms with light and shade	K4
CO5	render still-life compositions using a suitable drawing media to capture different textures	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	The Drawing Process	K1	3	1
	1.1 Seeing, visualizing, expressing			
	1.2 Drawing media	K1-K2	7	1 - 2
	1.3 Qualities of line: expressive lines, modeling lines, calligraphic lines			

UNIT	CONTENT	CL	Hrs	CO
2	Contour Drawing 2.1 Gesture drawing 2.2 Imitational drawing 2.3 Cross-contour drawing	K3 – K6	10	3 - 5
3	Form and Space 3.1 Form 3.2 Positive and negative space 3.3 Thumbnails, grids, and composition	K3 – K6	10	3 - 5
4	Tone and Value 4.1 Basics of Light and Shadow 4.2 Rendering Techniques-shading, hatching, squiggles, stippling 4.3 Tonal value scale 4.4 High key, medium key, low key	K3 – K6	12	3 - 5
5	Texture and Surface 5.1 Visual texture 5.2 Transparent, translucent, reflective surfaces	K3 – K6	10	3 - 5

PERSPECTIVE DRAWING PRACTICAL

CODE: 23FA/AC/P115

CREDITS: 5

LTP: 0 0 6

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To provide an understanding of the visual elements of form
- To enable awareness of pictorial drawing
- To provide an in-depth knowledge of projections and linear perspective
- To enable the drawing of compositions with spatial relationships

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	sketch forms using visual elements	K1
CO2	draw using linear perspective	K2
CO3	draw orthographic and isometric projections of simple objects	K3
CO4	demonstrate skills in drawing rectilinear and curvilinear forms from any viewpoint	K4
CO5	establish depth and relationships in drawn forms	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Visual Elements of Form 1.1 Point, line, plane, shape	K1	2	1
	1.2 Volume: space, depth, distance	K1, K2	3	1
2	Linear Perspective – Rectilinear & Curvilinear forms 2.1 Vanishing points, Horizons 2.2 One-point perspective 2.3 Two-point perspective 2.4 Three-point perspective	K1 – K5	20	1 - 5
3	Approaches to Pictorial Drawing 3.1 Projections: perpendicular, parallel, orthographic, isometric	K1 – K6	18	1 - 5
	3.2 True sizes and shapes	K2 – K6	5	

UNIT	CONTENT	CL	Hrs	CO
4	Drawing View Points 4.1 Plan, elevation and section views 4.2 Dimensional views using crating	K1 – K6	15	2 - 5
5	Visual Depth Cues 5.1 Proportions and scale 5.2 Overlapping 5.3 Aerial perspective 5.4 Fore-shortening	K2 – K6	15	2- 5

ENVIRONMENTAL STUDIES

CODE:23FA/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23FA/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

B.V.A. DEGREE: BRANCH X – VISUAL ARTS

SYLLABUS

(Effective from the academic year 2023-2024)

ANCIENT TO MEDIEVAL ART IN THE WEST

CODE: 23FA/MC/AM24

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable a critical appreciation of art and architecture from the Ancient world and the Classical and Medieval periods of the west
- To provide a historical survey of Western art from the Ancient, Classical and Medieval periods with regard to artistic styles, structures and time periods
- To provide a general overview of the history and development of western visual art from the ancient through to the medieval period, and its historical, social, cultural, religious, and political contexts
- To inculcate an understanding and appreciation of the art forms, iconography, styles, and techniques of western visual art as expressed in painting, sculpture, and architecture

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define terms / list artworks and styles of the Ancient, Classical and Medieval periods in Europe	K1
CO2	explain the styles of artworks	K2
CO3	apply formal analysis to artworks	K3
CO4	analyse artworks from ideology and social contexts	K4
CO5	critique and compare artworks	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Mesopotamian Art and Egyptian Art 1.1 Mesopotamian Art 1.1.1 Sumerian – Warka Vase, Uruk; Standard of Ur; Ziggurat at Ur; Seated Gudea, Babylonian – Stele of Hammurabi, Ishtar Gate, Babylon 1.1.2 Assyrian – Lamassu, Ashurbanipal Hunting Lions 1.2 Egyptian art 1.2.1 Architecture: mastaba; Stepped Pyramid of Djoser, Saqqara; Great Pyramids, Gizeh; Pylon Temple of Amen-Re, Karnak 1.2.2 Sculpture: Palette of King Narmer, Hierakonpolis; Khafre Enthroned, Gizeh; Seated Scribe, Saqqara; Akhenaton, Karnak; Nefertiti, Amarna 1.2.3 Painting: Tomb of Nebamun – Fowling Scene, Musicians and Dancers	K1- K5	12	1-5
2	Aegean and Greek Art 2.1 Aegean art 2.1.1 Cycladic – Woman from Syros, Lyre Player from Keros 2.1.2 Minoan – Palace at Knossos, Bull Leaping fresco, Harvester's vase 2.1.3 Mycenaean – Corbelled gallery, Tiryns; Lion Gate, Mycenae; Treasury of Atreus 2.2 Greek art 2.2.1 Vase painting: Geometric Krater, Dipylon Cemetery, Athens; Exekias – Achilles and Ajax Playing a Dice Game; Euphronios – Herakles wrestling Antaios 2.2.2 Sculpture: Mantiklos Apollo, Thebes; Kouros, Metropolitan Museum; Kroisos, Anavysos; Peplos Kore; Kritios Boy; Charioteer, Sanctuary of Apollo, Delphi; Myron – Diskobolos; Polykleitos – Doryphoros; Parthenon sculptures; Praxiteles – Hermes and the Infant Dionysos, Aphrodite of Knidos; Lysippos – Apoxyomenos, Weary Herakles; Nike of Samothrace; Laocoön and his Sons 2.2.3 Architecture: Doric, Ionic and Corinthian orders; temple plans; Parthenon	K1- K5	20	1-5

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23FA/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

(Effective from the academic year 2023-2024)

FIGURE DRAWING PRACTICAL

CODE: 23FA/MC/P245

CREDITS: 5

L T P: 0 0 7

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To introduce figure drawing through the study of human structure and form
- To enable an understanding of the figure through simplification into three dimensional forms and gesture studies
- To provide an understanding of the structure of the head and facial expression
- To enable the drawing of human figures in proportion and different posture

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	demonstrate an understanding of building the human figure using mannequinisation	K1
CO2	understand human anatomy and draw human figures in proportion	K2
CO3	draw portraits from different angles	K3
CO4	draw full figures in different poses and angles and in motion	K4, K5
CO5	create figure compositions	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Structure and Form 1.1 Bones, muscles	K1 – K4	2	1-4
2	Mannequinisation 2.1 Landmarks, gesture and bean drawings	K1 – K6	19	1-5
3	Principles of Drawing the Head 3.1 Proportions 3.2 Planes of the head 3.3 Facial features 3.4 Extreme angles of the head 3.5 Facial expressions	K1 - K6	20	1-5

UNIT	CONTENT	CL	Hrs	CO
4	Principles of Drawing the Full Figure 4.1 Proportions 4.2 Postures 4.3 Perspective of figure	K1 - K6	25	1-5
5	Figuration and tone 5.1 Mass drawing	K1 - K6	25	1-5

GUIDELINES

- The prescribed media are graphite, charcoal, colour pencil, oil pastel, dry pastel, pen and marker pen

DIGITAL PHOTOGRAPHY PRACTICAL

CODE: 23FA/AC/P445

CREDITS: 5

L T P: 0 0 6

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To provide training in the technical and aesthetic aspects of photography
- To enable the exploration of various genres of photography
- To provide an understanding of ambient and artificial lighting and shooting in outdoor and indoor settings
- To provide an awareness of image processing on Photoshop for select applications in art and design

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify the science behind a DSLR camera and grasp the history of photography and its genres	K1
CO2	understand and apply the elements of digital photography	K2
CO3	use photography skills to analyse and frame subjects	K3
CO4	develop narrative frames with natural and artificial light	K4
CO5	creatively explore the scope and medium of photography in art and design	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Photography 1.1 History of photography: an overview 1.2 Genres of photography 1.3 Understanding the equipment: Cameras and Lenses	K1	8	1

UNIT	CONTENT	CL	Hrs	CO
2	Elements of Digital Photography 2.1 Exposure, Aperture, Shutter speed, ISO 2.2 Principles of mise-en-scène: golden ratio, rule of thirds, perspective, view-point, emphasis 2.3 Study of natural light and its qualities 2.4 Colour theory: hue, value, saturation, temperature, interactions 2.5 Appreciation of artificial lights	K1 - K3	25	1-3
3	Narrative Photography 3.1 Documentary 3.2 Photojournalism	K1 - K6	15	1-5
4	Appreciation of Commercial Photography 4.1 Product 4.2 Food 4.3 Architecture	K1 - K6	20	1-5
5	Application of Photography 5.1 Art: constructed images, montage, photographic installation 5.2 Design: posters, book wrappers, packaging	K1 - K6	10	1-5

INDIAN PAINTING

CODE: 23FA/MC/IP55

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide an overview of traditional painting in India from prehistory to the nineteenth century
- To provide an understanding of the materials and techniques in painting murals and miniatures
- To trace the stylistic development and variances in painting as related to historical, religious, political and social contexts
- To develop visual analysis skills that will help in identifying key paintings from various regions and time periods

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	list/spell out the materials and techniques used in mural and miniature painting	K1
CO2	understand the contexts of creation of Indian murals and miniatures	K2
CO3	identify the styles of traditional painting with reference to representation and expression	K3
CO4	analyse regional and period styles with reference to historical, religious, political and social contexts	K4
CO5	evaluate traditional Indian painting using contextual and comparative modes	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate

DRAWING III PRACTICAL

CODE: 23FA/MC/P455

CREDITS: 5

L T P: 0 0 5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To initiate the development of exploratory and creative drawings
- To develop ideation, research and concept-based approaches in artistic expression
- To enable a shift from academic realism towards simplification and abstraction
- To enable the visualising and execution of drawings on three-dimensional forms

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	visualise and draw from experiences and observations	K1
CO2	explore drawing as a process leading to simplification and abstraction	K2
CO3	derive ideas and express concepts through creative compositions	K3
CO4	develop drawn forms from varied inspirations into designs and icons	K4
CO5	explore drawing as a means of artistic expression on surfaces of three-dimensional forms	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Expressive Drawing	K1 - K6	10	1-5
2	Abstraction	K1 - K6	15	1-5
3	Conceptual drawing	K1 - K6	20	1-5
4	Drawing for Design	K1 - K6	10	1-5
5	Drawings on three-dimensional surfaces	K1 - K6	10	1-5

PAINTING I PRACTICAL

CODE: 23FA/ME/A155

CREDITS: 5

L T P: 0 0 7

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To enhance skills in academic painting of still life, landscape, figures and portraits
- To enable the rendering of realistic colour, light and texture in observed forms
- To strengthen skills in creating compositions

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify painting media and techniques in rendering forms	K1
CO2	discuss the dynamics between colour and light by observing and painting forms	K2
CO3	render forms to create an understanding of realistic surface qualities	K3
CO4	analyse and execute compositions in western academic and traditional Indian style	K4
CO5	create and organise original compositions based on varied themes	K5, K6

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate | K6 – Create

UNIT	CONTENT	CL	Hrs	CO
1	Exploring Colour, Light, Textures	K1 - K2	11	1-2
2	Indian Traditional Painting	K1 - K3	10	1-3
3	Academic Realism - Still Life	K1 - K6	25	1-5
4	Academic Realism - Landscape	K1 - K6	20	1-5
5	Academic Realism - Portraits and Figures	K1 - K6	25	1-5

GUIDELINES

- Students are required to work in the academic style. For Units 2, 3, 4 and 5, students will paint two works, one being a copy of a masterwork and the other, an original composition.
- Peer review is to be conducted periodically.

COLONIAL ART AND LITERATURE

CODE: 23ID/IC/CA55

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce students to painting and architecture of colonial India
- To familiarize them with writing from and about colonial India
- To train them to critically analyse colonial literature using the framework of postcolonialism
- To highlight the significance of change in artistic styles effected by patronage in the colonial context
- To train them to examine literary and artistic productions of the colonial ethos

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define concepts related to colonialism and postcolonialism with reference to literary studies and art.	K1
CO2	highlight how British colonialism impacted painting, architecture and literature from India and demonstrate how Indian artists and writers engaged with issues thrown up by British colonialism.	K2
CO3	demonstrate an understanding of the colonial context in the production of art and apply concepts related to colonialism and postcolonialism in reading texts written by the British on India .	K3
CO4	analyse art of the colonial period and texts written by the British on India.	K4
CO5	justify the changes in artistic style through critiquing the colonial context; and explain the engagement between colonial/postcolonial ideology and literary texts.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Marks	Rubrics for Evaluation
A	K1	10	2x5 (two out of four questions, with internal choice, to answer one question each from Colonial Art and Colonial Literature,)
B	K2	10	1x10 (one out of two from Units 1.2, 4 and 5)
C	K3	10	1x10 (one out of two from Units 1.1, 2 and 3)
D	K4	10	1x10 (one out of two from Units 1.2, 4 and 5)
E	K5	10	1x10 one out of two from Units 1.1, 2 and 3)

Other Components:**Total Marks: 50**

Assignment/Seminar/Presentation/Take Home Test/Open Book Test/Scheduled Class Work –
 Passage Analysis /Quiz/Panel Discussion/Group Presentation

Cognitive Level	Marks
K1	5
K2	5
K3	10
K4	15
K5	15

No End Semester Examination

A case study/ term paper on a topic combining colonial art and literature; maximum of 2000 to 2500 words (introduction to conclusion, excluding images) **100 marks**

Marks	Cognitive Level	Rubrics for Evaluation
20	K1 – K2	Introduction, methodology and presentation
40	K3 – K4	Documentation - text and images
40	K5	Research findings and analysis

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086
Interdisciplinary Core Course Offered by the Departments of English and Fine Arts to
the students of B.A. English Degree Programme

SYLLABUS
(Effective from the academic year 2023-2024)

WRITING AND ART FOR PICTURE BOOKS

CODE: 23ID/IC/WA55

CREDITS: 5

L T P: 3 0 3

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce the students to theoretical concepts in the production of Picturebooks
- To help students appreciate the diversity of themes and presentation in Picturebooks
- To visualise and develop illustrations for Picturebooks
- To develop illustration skills using varied media
- To train them to produce a picture book using appropriate word choice, dialogue, narration, story structure, layout, images and colours

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	DESCRIPTION	CL
CO1	define and list the various kinds of Picture Books and recall the history of Picture Book illustration.	K1
CO2	classify the kinds of Picturebooks and styles of illustration using varied media and understand the dynamics of Picturebook building.	K2
CO3	identify the narrative strategies and illustration techniques involved in Picturebooks and make use of them in the ideation of a Picturebook.	K3
CO4	examine the impact of various writing and art techniques in select Picturebooks such as Wordless Picturebooks, Picturebooks for the differently abled and Postmodern Picturebooks.	K 4
CO5	appraise and critique Picturebooks; choose and develop a strategy using effective language and art for a Picturebook; and build a Picturebook integrating illustrations and text.	K5, K6
CL – Cognitive Level K1–Remember K2– Understand K3– Apply K4 –Analyse K5– Evaluate K6 – Create

PATTERN OF ASSESSMENT

Continuous Assessment: Total Marks: 50

Continuous Assessment: Total Marks: 50 Duration: 1½ Hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A – 100 words	K1 (5)	1 X 5 = 5	1 K1 question	2 K1 questions
B – 100 words	K2 (5)	1 X 5 = 5	1 K2 question	2 K2 questions
C – 300 words	K3 (10)	1 X 10 = 10	1 K3 question	2 K3 questions
D – 300 words	K4 (10)	1 X 10 = 10	1 K4 question	2 K4 questions
E – 600 words	K5 (20)	1 X 20 = 20	1 K5 question	2 K5 questions
	Total	50	5	10

Other Components: Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion

Two to three components will be prescribed

End Semester Examination: Total Marks: 100 Duration: 3 Hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A – 100 words	K1 (10)	2 X 5 = 10	2 K1 questions	3 K1 questions
B – 100 words	K2 (10)	2 X 5 = 10	2 K2 questions	3 K2 questions
C – 300 words	K3 (30)	2 X 15 = 30	2 K3 questions	3 K3 questions
D – 300 words	K4 (30)	2 X 15 = 30	2 K4 questions	3 K4 questions
E – 600 words	K5 (20)	1 X 20 = 20	1 K5 question	2 K5 questions
	Total	100	9	14

(Effective from the academic year 2023-2024)

DESIGN FOR TEXTILES PRACTICAL

CODE: 23FA/ME/D265

CREDITS: 5

L T P: 0 0 7

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To enable an understanding of the synergy between ideation, research and design development
- To introduce the process of design development for textile printing
- To provide an awareness of textile dyeing
- To develop skills in pattern derivation and repeat construction
- To enable the creation of original design solutions for block, screen and digitally printed textiles

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand and apply design development methodology for textile print design	K1, K2
CO2	develop patterns from observed and inspired sources	K3
CO3	construct repeats for print design	K4
CO4	develop designs in different layouts	K5
CO5	create designs suitable for varied textile applications	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Design ideation 1.1 Problem analysis, research and consumer profiling 1.2 Design approaches: historical, conceptual, trend-based, market and client oriented 1.3 Mood board, colour story, Pantone fashion and home palette	K1 - K3	4	1-2
2	Design derivation and rendering 2.1 Motifs and patterns 2.2 Design rendering in different media	K1 - K6	22	1-5

UNIT	CONTENT	CL	Hrs	CO
3	Layout and repeat construction 3.1 Layouts – allover, border and engineered 3.2 Tailored repeat structures and seamless repeats	K1- K6	20	1-5
4	Textile dyeing and printing 4.1 Dyeing at yarn and fabric stages - resist and piece dyeing techniques 4.2 Printing styles - direct, mordant, resist and discharge 4.3 Stencil printed product 4.4 Designs for wood block and hand screen printing	K1 - K6	25	1-5
5	Digital printing and product development	K1 - K6	20	1-5

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Cantic of creatures Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and Democratic

- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion’s vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one’s past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 1½ Hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A – 100 words	K1 (5)	1 X 5 = 5	1 K1 question	2 K1 questions
B – 100 words	K2 (5)	1 X 5 = 5	1 K2 question	2 K2 questions
C – 300 words	K3 (10)	1 X 10 = 10	1 K3 question	2 K3 questions
D – 300 words	K4 (10)	1 X 10 = 10	1 K4 question	2 K4 questions
E – 600 words	K5 (20)	1 X 20 = 20	1 K5 question	2 K5 questions
	Total	50	5	10

Other Components:

Total Marks: 50

Assignment, seminar, quiz, open book test, group discussion

Two to three components will be prescribed

End Semester Examination: Total Marks: 100 Duration: 3 Hours

Section	Cognitive Level and Allocation of Marks	Marks per Section	No of Questions to be answered	No. of Questions to be set
A – 100 words	K1 (10)	2 X 5 = 10	2 K1 questions	3 K1 questions
B – 100 words	K2 (10)	2 X 5 = 10	2 K2 questions	3 K2 questions
C – 300 words	K3 (30)	2 X 15 = 30	2 K3 questions	3 K3 questions
D – 300 words	K4 (30)	2 X 15 = 30	2 K4 questions	3 K4 questions
E – 600 words	K5 (20)	1 X 20 = 20	1 K5 question	2 K5 questions
	Total	100	9	14

PRINTMAKING - PRACTICAL

CODE: 23FA/MC/P575

CREDITS: 5

L T P: 0 0 7

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To provide fundamentals of printmaking
- To create an awareness of the varied printmaking medium and techniques
- To explore varied application of print-making

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	learn the basic process and understand the usage of printmaking materials and tools	K1
CO2	apply printmaking principles and experiment with mediums	K2
CO3	explore techniques of printmaking	K3
CO4	develop prints for various themes	K4
CO5	create original compositions for varied applications	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Creative Printmaking 1.1 Collography 1.2 Cyanotype	K1 - K6	25	1-5
2	Gel	K1 - K6	15	1-5
3	Drypoint	K1 - K6	15	1-5
4	Linoleum	K1 - K6	21	1-5
5	Woodcut	K1 - K6	15	1-5

TEXTILE PRODUCT DESIGN PRACTICAL

CODE: 23FA/ME/D475

CREDITS: 5

L T P: 0 0 7

TOTAL TEACHING HOURS: 91

OBJECTIVES OF THE COURSE

- To provide an awareness of textile constructions and applications
- To enable an understanding of textile product development
- To develop skills in designing for stitched embellishments
- To facilitate developing of textile products
- To enable creative design solutions for varied textile applications

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand textiles and their use in fashion and home	K1, K2
CO2	assimilate the process of textile product development	K3
CO3	develop designs for stitched embellishment	K4
CO4	develop designs for different textile products	K5
CO5	conceptualise and create textile products	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Textiles and product development 1.1 Fibres, yarns and fabrics 1.2 Textile construction techniques 1.3 Basic weaves and the weaving process 1.4 Textiles in home and fashion 1.5 Product development – research, ideation, design, selection of materials, specifications, sampling, costing and pricing	K1 - K3	10	1-4
2	Stitched embellishments 2.1 Freestyle embroidery 2.2 Appliqué	K1 - K3	15	1-4
3	Design for home textiles Design and product development	K1 - K6	22	1-5
4	Design for accessories Design and product development	K1 - K6	22	1-5
5	Surface patterning for garment Designing stitched embellishment or print pattern for a garment	K1 - K6	22	1-5

OBJECTIVES OF THE COURSE

- To provide an exposure to new media /digital media, thereby widening the scope for personal expression
- To enable an exploration of the dynamics between art, science and technology
- To stimulate an exploration of video art
- To enable an understanding of kinetic and interactive art
- To encourage students to experience and present art as performance

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the potential and scope of non-traditional art	K1, K2
CO2	engage with art through performance	K3
CO3	investigate and incorporate digital media and technology in art	K4
CO4	conceptualise and create non-traditional art	K5
CO5	develop a personal style that foregrounds contemporary media and technology	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Digital Art	K1 – K6	12	1-5
2	Exploring Sound and Light	K1 - K6	20	1-5
3	Video Art	K1 - K6	17	1-5
4	Kinetic and Interactive Art	K1 - K6	20	1-5
5	Performance Art	K1 - K6	22	1-5

PATTERN OF ASSESSMENT

Continuous Assessment: Total Marks: 50

Classwork 40 marks
Assignment 10 marks

Rubrics for evaluation of classworks and assignment	Marks	Cognitive Level
Research and process	10	K1 - K2
Execution – use of media, techniques	20	K3 - K4
Personal style and originality	20	K5 - K6

End Semester Submission: Total Marks: 50

A set of works will be prescribed for end semester assessment. These works should not have been part of the continuous assessment.

Rubrics for evaluation	Marks	Cognitive Level
Research and process	10	K1 - K2
Execution – use of media, techniques	20	K3 - K4
Personal style and originality	20	K5 - K6

INDIAN CRAFT AND FOLK ART TRADITIONS

CODE: 23FA/MC/CF85

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce craft and folk art traditions of India
- To provide an understanding of indigenous art used in performance and practiced as ritual
- To enable an appreciation of select textile, metal, wood, and other crafts
- To foster an appreciation of the visual aspects of craft and folk art and thereby expand the scope of design seeing and artistic expression

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define key terms; list crafts and folk art traditions	K1
CO2	explain characteristics of crafts and folk art traditions	K2
CO3	describe techniques and processes used in craft making	K3
CO4	compare the form and visual identity of crafts and folk art	K4
CO5	evaluate craft and folk-art traditions in the context of regional, social and cultural practices	K5
CL Cognitive Level K1 – Knowledge, K2 - Understand, K3 – Apply, K4 – Analyse, K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Pictorial Traditions 1.1 Art used in performance: phad, patta paintings of Bengal, leather puppets of Andhra, kaavad 1.2 Ritual and Religious art: Warli, Madhubani, Gond, Pithora, kolam, kalamezhuthu, pattachitra of Orissa, Tanjore Painting	K1 - K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Textile and Fibre Traditions 2.1 Woven traditions: Benaras, baluchari, jamdani, kota doria, Paithani, Chanderi and Kancheepuram, Kani shawls 2.2 Dyed, printed and painted traditions: Madurai sungadi, ikkat and patola, ajrakh, bandhani and lehreiya, block printing of Rajasthan, kalamkari, pichwai 2.3 Embroidery and applique: Kashmiri kashida, phulkari, chikankari, zardosi, kutchi, kantha, sujani, khatwa, kasuti, Toda	K1- K5	20	1-5
3	Metal Crafts 3.1 Metal ware: bidri, lamps of Tamil Nadu 3.2 Images and reliefs: dhokra, iron craft of Bastar, Tanjore art plate 3.3 Jewellery: thewa, meenakari, Cuttacki tarkashi	K1- K5	10	1-5
4	Wood Crafts 4.1 Carving: wood-inlay of Karnataka, wood carving of Kashmir, toys of kondapalli 4.2 Lacquer ware: Channapatna toys	K1- K5	10	1-5
5	Crafts from Other Materials 5.1 Stone and clay: pacchikari of Agra, Jaipur blue pottery, longpi of Manipur, ayyanar horses of Tamil Nadu and Bankura horses of Bengal 5.2 Fibre crafts: kottan of Chettinad, mats of Pattamadai 5.3 Paper: sanjhi of Mathura, papier mache of Kashmir	K1- K5	10	1-5

SYLLABUS

(Effective from the academic year 2023-2024)

ART AND ITS HISTORIES

CODE: 23FA/MC/AH85

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To consider art using varied perspectives through case studies addressing two different genres, namely colonialism and gender
- To understand how European colonizers interpreted precolonial art
- To discuss the position of art and artists in colonial and postcolonial cultures
- To examine works by 16th and 17th-century Italian women artists, focusing on the conventions of feminine portraiture of the time
- To investigate the role of gender difference in the production, consumption, and interpretation of works of art and to contemplate the notion of the other art history by considering non-western women of feminist art

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

CO	DESCRIPTION	CL
CO1	define key terms of ‘seeing’; list key writers on pre-colonial art; and name pioneering women artists	K1
CO2	explain how art can be interpreted in various ways creating multiple histories	K2
CO3	demonstrate an understanding of ways of seeing visuals; analyse the impact of colonialism on the appreciation of art of the colonised; examine authorship and representation of/by women artists	K3
CO4	compare writings on pre-colonial art; evaluate the role of the artist in the colonial and post-colonial periods; examine gender and art	K4
CO5	discuss writing about pre-colonial Indian art from colonial and postcolonial viewpoints; investigate the role of gender difference in the production, consumption, and interpretation of works of art	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Ways of Seeing Art, aura and authenticity	K1 - K5	5	1-5
2	Art in Pre-colonial India 2.1 Coloniser's viewpoint – James Fergusson 2.2 Revising colonialist viewpoints – A K Coomaraswamy 2.3 Reversing the direction of the colonial gaze – Partha Mitter	K1 - K5	20	1-5
3	Art and Artists in Colonial and Post-colonial Cultures 3.1 Artist as colonial subject – internationalist approach before independence 3.2 Artist as post-colonial subject – from the periphery to the centre	K1 - K5	10	1-5
4	Gender and Art: 16th-18th centuries 4.1 Portrait of the artist as a woman 4.2 Gendering the genres 4.3 Gender, genres and academic art	K1 - K5	15	1-5
5	Gender and Art: 20th century onwards 5.1 Parisian avant-garde and 'feminine' art 5.2 The Other Art History - Non-Western Women of Feminist Art – Postcolonial feminism: Shirin Neshat, Mithu Sen, Juane Quick-to-See Smith, Pushpamala N, Alex Mawimbi, Anida Yoeu Ali	K1 - K5	15	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.V.A. DEGREE: BRANCH X – VISUAL ARTS

SYLLABUS

(Effective from the academic year 2023-2024)

PROJECT – DESIGN

CODE: 23FA/ME/D689

CREDITS: 9

L T P: 0 0 15

TOTAL TEACHING HOURS: 195

OBJECTIVES OF THE COURSE

- To enable students to build on experiences gained in previous courses and undertake a major project
- To give students the option to choose a practice or theory-based project
- To facilitate creative design ideas that are executed to professional standards
- To facilitate critical thinking

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	propose and plan a research-led body of work	K1, K2
CO2	explore materials, techniques, styles; develop mockups/samples	K3
CO3	develop designs; document the design process	K4
CO4	conceptualise design solutions for varied applications	K5
CO5	create an original line of work	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

APPROVAL OF PROJECT PROPOSAL (Practical and Theory Projects)

- Students will present **two** proposals for a design or theory-based project at the end of the seventh semester
- The proposals should be presented in the format given by the Department
- The proposals will be approved and project guides assigned at the end of the seventh semester
- Students who are unable to complete the project within the scheduled time will have to re-register in the forthcoming semester

GUIDELINES FOR PRACTICAL OPTION

- The project can be based in any design related area
- The student should maintain a work book with references, sketches, samples etc. on a regular basis as proof of work in progress

- **Review by project guide**

Student work will be reviewed every week by the project guide during the semester. Works completed and presented without approval will not be allowed for final submission.

- **Review by faculty panel**

A faculty panel will conduct 3 reviews of ongoing work at scheduled dates. Students should be present at all reviews. Workbook and ongoing work will be presented and assessed at the panel reviews. In case of work being outsourced, a clear idea of the work in progress should be presented in the form of samples, photos, etc.

ASSESSMENT OF PRACTICAL PROJECTS

Continuous assessment : 50 marks

Assessment by project guide : 35 marks

Assessment by faculty panel : 15 marks

End semester evaluation : 50 marks

Evaluation by project guide : 25 marks

Evaluation by external examiner : 25 marks

GUIDELINES FOR THEORY OPTION

- The project can be based in any design related area

- **Review by project guide**

Research, data collection and writing will be reviewed every week by the project guide during the semester.

- **Review by faculty panel**

A faculty panel will conduct 3 reviews of ongoing work at scheduled dates. Students should be present at all reviews.

Drafts and ongoing work will be presented and assessed at the panel reviews.

- The emphasis of the theory project will be on primary data collection, analysis and consolidation, supported by field visits, interviews and research. The main body of writing – introduction, chapters and conclusion – should comprise 40 to 45 pages.
- The text should be double-spaced, with the exception of indented block quotes, which can be single-spaced. Bibliographies, endnotes, and itemized lists should also be single spaced.
- The text should be set in Times New Roman, of 12-point size.
- The documentation should be presented in a format given below. It should be hardbound.
- A soft copy of the documentation should be submitted to the department.

**General Elective Courses offered by Department of Fine Arts to students of
B.A. / B.Sc. / B Com. Degree Programmes**

SYLLABUS

(Effective from the academic year 2023–2024)

RECYCLED ART PRACTICAL

CODE: 23FA/GE/RA22

CREDITS: 2

L T P: 0 0 2

TOTAL TEACHING HOURS: 26

OBJECTIVES OF THE COURSE

- To provide an awareness of recycling junk material into art forms
- To enable upcycling of waste materials creatively.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	understand the relevance of recycling and demonstrate an eco-friendly approach	K 1
CO2	explore diverse waste materials	K 2
CO3	make use of recycled / junk material to create compositions	K 3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Materials	K1	2	1-3
2	Textiles and Paper	K 1 – 3	12	1-3
3	Plastic, Metals and other Materials	K 1 – 3	12	1-3

BOOKS FOR REFERENCE

Bawden, Juliet. *The Art and Craft of Applique*. London: Mitchell Beazley, 1991.

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI–600 086

DEPARTMENT OF COMMERCE

PROGRAMME DESCRIPTION

B.Com. (GENERAL)

The B.Com. (General) degree programme equip students with the knowledge and technical skills necessary to understand and participate in the modern business world. The programme allows the students' to critically evaluate and improve decision making skills.

It provides foundation for students who aspire to pursue professional courses such as CA, ICWA, CMA, ACCA, CFA and MBA. It enables the students to equip themselves for careers. It enables them to develop entrepreneurial skills and thus manage their own business effectively. To strengthen their skills and knowledge, workshops, seminars, guest lectures, business quizzes and mock interviews are conducted during the course of study. Apart from the academics, multiple cultural and social activities such as intra-departmental, intercollegiate cultural and social and environmental awareness programmes are conducted for holistic development and to create a sense of community.

VISION OF THE DEPARTMENT

The Department shares the vision of the College and aims at academic excellence integrating ethical, professional and personal skills that promote women to be well equipped to meet the global challenges in the business world.

MISSION OF THE DEPARTMENT

- ❖ To kindle in the students the curiosity to explore and acquire business knowledge pertaining to Commerce.
- ❖ To sensitize students about economic, social and ethical issues prevalent in the business environment.
- ❖ To work towards the integration of quality, creativity and emotional stability of the students.
- ❖ To contribute to the transformation of the less privileged students by making them employable and financially independent.

PROGRAMME SPECIFIC OUTCOMES (PSOS)

B.COM (GENERAL)

On successful completion of the B.Com. Programme, the students will be able to

PSO 1	acquire Fundamental knowledge in the arena of Business Management, Marketing, Accounting and to understand the web based business models and its applications
PSO 2	develop leadership qualities and managerial skills to be globally competent and spearhead entrepreneurial ventures.
PSO 3	be acquainted with principles of various laws relating to formation and conduct of business.
PSO 4	demonstrate interpersonal communication, business etiquette and relationship building skills.
PSO 5	understand the importance of Ethics in Business, Social Responsibility, Corporate sustainability and impact of globalization

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

COST ACCOUNTING

CODE: 23CM/MC/CT24

CREDITS: 4

L T P : 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide students an understanding of the basic concepts of cost accounting
- To classify the elements of cost and to determine the various estimates of cost.
- To expose students to the practical application of Costing
- To enable students to ascertain product and service cost through various methods
- To apply various costing techniques in the preparation of tenders and quotations.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	explain the basic concepts of cost accounting	K1
CO2	solve problems relating to Process and Operating Costing	K2
CO3	analyse Material, Labour and Overhead Cost of production	K3
CO4	estimate the cost price, selling price and the profit margin	K4
CO5	prepare Cost Sheets, Tenders and Quotations	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Meaning, Objectives and Scope of Cost Accounting 1.2 Introduction to cost Audit and Records and Cost Standards 1.3 Advantages and Limitations of Cost Accounting, Difference Between Financial accounting and Cost Accounting 1.4 Unit Costing - Cost Center and Cost Units- Methods of Costing, Elements of Cost, Cost Concepts and Classification of Cost 1.4.1 Preparation of Cost Sheet, Quotations or Tender	K1, K2 K1, K2 K1, K2	15	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	2.1 Material Cost and Material Control 2.1.1 Computation of Material Cost and Accounting Treatment for Normal, Abnormal Loss 2.2 Essentials of Material Control, Purchase Control – Purchase Procedure 2.2.1 Store Control :Techniques of Inventory Control – Economic Order Quantity, Level Setting 2.2.2 Issue Control: Methods of Material Issue – First In First Out, Last In First Out, Average Cost - Simple and Weighted Average Cost.	K1 –K2 K1 –K4 K1 –K2 K1 – K3 K2 – K5	13	CO1-5
3	Labour Cost, Remuneration and Incentives 3.1 Computation of Labour Cost with Overtime and Idle Time and Computation of Labour Turnover 3.2 Methods of Remuneration- Time Rate System, Piece Rate System, Taylor’s Differential Piece Rate System. 3.3 Incentive Plans -Halsey Premium Plan, Rowan Premium Plan	K1 – K3 K3 – K4 K3 – K4	13	CO1-4
4	Overheads 4.1 Importance and Classification of Overhead Costs 4.2 Apportionment and Allocation of Overheads 4.2.1 Primary Distribution of Overheads 4.2.2 Secondary Distribution of Overheads- Direct Distribution, Reciprocal and Non Reciprocal Methods 4.3 Methods of Absorption of Overheads 4.3.1 Direct Labour Hour Rate 4.3.2 Machine Hour Rate 4.3.3 Activity Based Absorption	K1, K2 K3 – K5 K3 – K5	11	CO1-5
5	Process and Operating Costing 5.1 Process Costing 5.1.1 Meaning and Features of Process Costing 5.1.2 Process Losses and Gains – Accounting Treatment of Normal and Abnormal Wastage 5.1.3 Inter-Process Profit 5.2 Operating Costing - Transport Costing only 5.3 Activity Based Costing (Theory only)	K1 – K5 K1 – K5 K1 - K2	13	CO1-5

BUSINESS STATISTICS

CODE: 23CM/AC/BS25

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To give a practical exposure to the students on the various statistical methods
- To enable students to understand, analyse and interpret the data using various statistical tools and techniques
- To equip the students to apply the various forecasting techniques
- To facilitate rational decision making through systematic analysis and interpretation
- To educate the students on the effective and efficient application of various statistical tools associated with research in business fields

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	demonstrate knowledge on various statistical techniques	K1
CO2	compute the statistical parameters to forecast business trends	K2
CO3	apply parametric and non-parametric tests in hypothesis testing	K3
CO4	analyse the statistical tools and techniques to arrive at rational decisions	K4
CO5	undertake research in various business fields	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Analysis of Time Series 1.1 Utility and Component of Time Series 1.2 Methods of Measuring Trend – Graphic method, Semi Average method, Moving Average method, method of Least Squares, Second Degree Parabola and Exponential trends	K1 – K2 K2 – K5 K2 – K5	14	CO 1-3 CO1-5

UNIT	CONTENT	CL	Hrs	CO
	1.2.1 Shifting the trend origin 1.2.2 Conversion of annual trend values to monthly values 1.3 Measurement of Seasonal Variation- Method of Simple Averages, Ratio-to-Trend method, Ratio-to-Moving Average method, Link Relative method.			
2	Correlation and Regression 2.1 Simple Linear Correlation Analysis – Karl Pearson’s Co- Efficient and Spearman’s Rank Correlation, Bi-variate Analysis 2.2 Partial and Multiple Correlations 2.3 Regression Analysis and Regression Equations and Estimation, Bi-variate Analysis	K1 – K5 K1 – K4 K2 – K5	15	CO1-5
3	Test of Hypothesis 3.1 Procedure for Testing Hypothesis 3.2 Test of Significance for Large Sample 3.3 Test of Significance for Small Sample	K1 – K2 K1 – K4 K2 – K5	12	CO1-5

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23CM/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23CM/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

MANAGEMENT ACCOUNTING

CODE: 23CM/MC/MA34

CREDITS: 4

L T P : 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enable the students to analyse the financial data for effective managerial decision making
- To familiarise the students with the various budgeting techniques
- To expose the students to the practical applications of cost control concepts.
- To outline the techniques for effective planning and forecasting
- To facilitate the students to perform the analysis of variance, between actual cost and the predetermined standard cost.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	interpret the data for financial statement analysis	K1
CO2	apply the relevant tools and techniques for cost control and effective planning	K2
CO3	analyse the variance between actual cost and standard cost.	K3
CO4	estimate the projections based on budgetary analysis	K4
CO5	devise strategies for effective managerial decision making	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Management Accounting – Meaning, Definition, Nature and Scope	K1 – K2	10	CO1-5
	1.2 The difference and relationship between Management Accounting, Financial Accounting and Cost Accounting	K1 – K3		
	1.3 Tools and Techniques of Management Accounting 1.4 Advantages and Limitations of Management Accounting 1.5 Duties and functions of Management Accountant, Organization for Management Accounting	K1 – K4 K1 – K3 K1 – K4		
2	Financial Statement Analysis and Interpretation 2.1 Meaning and Process of Financial Statement Analysis 2.2 Objectives, Types and Procedure for Analysis and Interpretation of Financial Statements 2.3 Tools of Financial Statement Analysis - Comparative Statement Analysis, Common Size Statement Analysis and Trend Analysis 2.4 Ratio Analysis – Profitability Ratios, Turnover Ratios, Short Term and Long Term Solvency Ratios, Construction of the Balance Sheet using Ratios	K1 – K2 K1 – K2 K2 – K4 K2 – K5	15	CO1-5
3	Marginal Costing and its Application 3.1 Definition, Meaning and features of Marginal Costing 3.2 Marginal Costing and Absorption Costing 3.3 Cost-Volume-Profit Analysis: Break Even analysis, Margin of safety. 3.4 Application of Marginal Costing - Decision Making: Key factor, Make or Buy, Product Mix, Operate or Shut, Fixation of Selling Price	K1 – K2 K1 – K2 K1 – K5 K1 – K5	15	CO1-5

**Allied Core Course offered by the Department of Mathematics for
B.Com (General) Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICS FOR COMMERCE

CODE: 23MT/AC/MT45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the fundamental mathematical concepts pertaining to the discipline of commerce
- To employ different techniques to solve problems pertaining to matrices, equations and LPP
- To appreciate the concept of numerical differentiation and integration as an alternate tool to solve problems on differentiation and integration
- To promote problem solving skills and quantitative analysis
- To model and solve real time problem using linear programming method

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall and define the basic mathematical concepts on matrices, equations, differentiation, integration and linear programming problem	K1
CO2	understand and compare the concepts relating to matrices, polynomials, numerical methods and linear programming problem	K2
CO3	utilize suitable mathematical concepts and skills to solve problems including those in real life contexts	K3
CO4	analyse and examine the problem relating to the applications of matrices, differentiation, integration and optimization	K4
CO5	evaluate solutions to the problems related to matrices, equations, differentiation, integration and linear programming problem	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyze K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Matrices 1.1 Types of Matrices 1.2 Characteristic Equation of a Matrix 1.3 Cayley - Hamilton Theorem (without proof) 1.4 Eigen Values and Eigen Vectors 1.5 Diagonalization of 3×3 Matrices with Distinct Eigen Values	K1- K5	13	CO1-5
2	Theory of Equations 2.1 Formation and Solution of Equation with Imaginary and Irrational Roots 2.2 Relation between Roots and Coefficients 2.3 Solution of Equations under given Conditions 2.4 Symmetric Functions of the Roots of an Equation in terms of its Coefficients 2.5 Reciprocal Equations	K1-K5	14	CO1-5
3	Numerical Methods Algebraic and Transcendental Equations 3.1 The Bisection Method 3.2 Newton - Raphson Method Simultaneous Equations 3.3 Gaussian Elimination Method 3.4 Gauss Jordan Elimination Method 3.5 Gauss Jacobi Iteration Method 3.6 Gauss Seidal Iteration Method	K1-K5	13	CO1-5
4	Numerical Differentiation and Numerical Integration 4.1 Derivatives using Newton's forward difference Formula 4.2 Derivatives using Newton's backward difference Formula 4.3 Trapezoidal Rule 4.4 Simpson's One Third Rule 4.5 Simpson's Three Right Rule	K1-K5	12	CO1-5
5	Linear Programming Problem 5.1 General L.P.P. 5.2 Canonical and Standard Forms of L.P.P. 5.3 The Simplex Algorithm 5.4 The Big-M method	K1-K5	13	CO1-5

BUSINESS RESEARCH

CODE: 23CM/MC/BR54

CREDITS:4

L T P: 5 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the fundamentals of business research.
- To identify the research gap through proper analysis of past studies.
- To familiarize research design and sampling techniques.
- To use appropriate data collection methods and apply statistical tools for justifying the study.
- To prepare and present the research report.

COURSE LEARNING OUTCOMES

On successful completion of the course the students will be able to

COs	DESCRIPTION	CL
CO1	comprehend and use the fundamentals of Research Methodology in their research and project work.	K1
CO2	identifying the research problem and write reviews based on the study.	K2
CO3	determine appropriate research design and sampling techniques.	K3
CO4	gather data, process the data, and analyze it appropriately.	K4
CO5	develop and test hypothesis and create a Business Research Report	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Unit	Content	CL	Hours	CO
1	Introduction to Research 1.1 Meaning, Objectives and Significance of research 1.2 Types of research, Approaches and Scientific Research 1.3 Research process and Criteria for good research 1.4 Challenges and Problems in Research	K1 - K2 K1 – K5 K1 - K4 K1 - K2	15	CO1 – CO 5
2	Defining Research Problems and Evaluating the Reviews 2.1 Selecting and defining the problem 2.2 Techniques involved in defining a problem 2.3 Significance of Review of Literature 2.4 Review of Literature - Sources	K1 - K3 K1 – K4 K1 – K4 K1 - K3	10	CO1 – CO 5
3	Research Design and Sampling Techniques 3.1 Meaning, Need, Features and Importance of research design 3.2 Research Design - Types 3.3 Sampling Designs – Steps, Criteria, Characteristics and types 3.4 Scaling – Meaning and Importance 3.5 Scaling Techniques – Likert’s Scale	K1 – K2 K1 – K2 K1 – K2 K1 – K2	15	CO1 – CO 5
4	Data Collection and Analysis of Data 4.1 Data Collection – Primary data and Secondary data 4.2 Processing Operations in Analyzing data - Coding of data 4.3 Tools and techniques in Data Analysis using Excel	K1 – K2 K1 – K2 K1 – K2	15	CO1 – CO 5
5	Testing of Hypothesis, Interpretation and Report writing 5.1 Basic concepts and Procedure for testing Hypothesis 5.2 Interpretation – Meaning and Techniques 5.3 Report writing – Significance, Steps, Layout and Types 5.5 Mechanics of writing a report 5.6 Reference Styles – MLA, APA	K1-K6	10	CO1 – CO 5

INCOME TAX LAW AND PRACTICE

CODE: 23CM/MC/IT 54

CREDITS: 4

L T P : 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To acquaint the students with the Provisions of the Income Tax Act
- To understand the significance of residential status of an individual in Income Tax Assessment
- To enable the students to compute the income under different heads of income
- To educate the students on the computation of taxable income and tax liability
- To familiarise the students with various deductions available under Sec. 80 for tax planning of an individual

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to:

COs	DESCRIPTION	CL
CO1	remember the Provisions of the Income Tax Act relevant to an Individual Assessee	K1
CO2	elaborate the scope of total income and categorise them under each head of income	K2
CO3	compute the income under each Head for an individual	K3
CO4	analyse the various options available for deductions	K4
CO5	assess the total taxable income and tax liability	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Taxation 1.1 Importance and Relevance of Taxation 1.2 An overview of the Income Tax Act 1961 1.3 Types of Tax - Direct and Indirect Taxation 1.4 Important Definitions under The Income Tax Act 1961- Assessee, Persons, Assessment Year - Previous Year, Total Income 1.5 Residential Status and Scope of Total Income	K1, K2 K1, K2 K1, K2 K1 – K3 K1 – K5	12	CO1-5

2	Computation of Salary Income and Income from House property 2.1 Computation of Income under the Head Salary 2.1.1 Allowances - Perquisites - Profit in Lieu of Salary, Treatment of Provident Fund 2.1.2 Deductions, Computation of Salary Income 2.2 Computation of Income under the Head House Property 2.2.1 Basis of Charge 2.2.2 Computation of Self-occupied and Let-out House 2.2.3 Deductions	K1 – K5 K1 – K5 K1 – K5 K1 – K5 K1 – K5 K1 – K5	15	CO1-5
3	Computation of Profits and Gains of Business or Profession 3.1 Income chargeable under the Head Profits and Gains of Business and Profession 3.2 Income and Expenditure - allowed and disallowed 3.3 Depreciation	K1 – K5 K1 – K5 K1 – K5	12	CO1-5
4	Computation of Capital Gains and Income from other sources 4.1 Meaning and Types of Capital Gains 4.1.1 Computation of Short Term and Long Term Capital Gains 4.1.2 Exempted Capital Gains 4.2 Income from Other Sources 4.2.1 Basis of Charge, Casual and Other Income 4.2.2 Computation of Taxable Income from Other Sources	K1 – K5 K1 – K5	13	CO1-5
5	Computation of Total Income and Tax Liability 5.1 Set off and carry forward of losses 5.2 Computation of Gross total income 5.3 Deductions allowed under Section 80 for an Individual 5.4 Computation of Taxable Income and Tax Liability. 5.4.1 Old and New Tax Regime – An Overview	K1 – K5 K1 – K5 K1 – K5 K3 – K5 K1-K3	13	CO1-5

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi- Canticle of creatures
Seeking the Divine through meditation, prayer and worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation
- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and Democratic

- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion’s vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one’s past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

CODE: 23CM/ME/SP45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide conceptual knowledge on investment and securities analysis
- To develop an understanding on wealth maximization and risk minimization using securities and portfolio analysis techniques.
- To provide computational knowledge on investment alternatives that maximize the returns and minimize the risk.
- To familiarize the concept of intrinsic value of a security through fundamental analysis.
- To study the movements and fluctuations through technical charts and patterns.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

CO'S	DESCRIPTION	CL
CO1	Build conceptual knowledge and understanding on investment and securities analysis	K1
CO2	Undertake portfolio analysis to determine risk and return for portfolio construction	K2
CO3	Study the movements and fluctuation through technical charts and patterns	K3
CO4	Apply EIC approaches for investment decisions and portfolio construction	K4
CO5	Estimate the value of bonds and equities for investment decisions	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	HOURS	CO
1	Introduction 1.1 Investment – Meaning, Definition and Objectives 1.2 Investment Alternatives 1.3 Difference between Investment, Speculation and Gambling 1.4 Security Analysis and Portfolio Management - Definition and Meaning 1.5 Principles and procedures of Portfolio Management	K1 – K2 K1 – K4 K1 – K2 K1 - K2 K1 – K5	10	CO1 – CO5
2	Risk and Return Analysis - Security 2.1 Risk – Meaning and types 2.2 Return – Meaning and components 2.3 Risk-return Trade off 2.4 Computation of Risk and return of an individual security	K1 – K5 K1 – K3 K1 - K2 K1 – K5	15	CO1 – CO5
3	Portfolio Analysis 3.1 Computation of Risk and return of Portfolio - Modern Portfolio Theory – Markowitz Model and Single Index Model (SIM), CAPM – Capital Asset Pricing Model 3.2 Portfolio Performance Evaluation – Sharpe’s Measure, Treynor’s Measure and Jensen’s Measure	K1-K5 K1-K5	15	CO1 – CO5
4	Equity Valuation and Bond Valuation 4.1 Equity Valuation Based on Dividend 4.2 Equity Valuation Based on Earnings – Gordon Model, Walter’s Model, PE Ratio and ERP (Explicit Resale Price Methods) 4.3 Bond Valuation – Bond Pricing, Yield to Maturity (YTM), Yield to Call (YTC)	K1 - K5 K1 – K5 K1 – K5	15	CO1 – CO5

NEW AGE MARKETING

CODE: 23CM/UI/NM23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To Gain a deep understanding of how marketing has evolved in the digital age and recognize the fundamental changes that have shaped modern marketing strategies.
- To Acquire the skills to analyze marketing campaigns, evaluate their performance, and make data-driven decisions for optimization and improvement.
- To Learn how to create and implement holistic marketing strategies that integrate multiple digital channels for maximum impact.

COURSE LEARNING OUTCOMES

On successful completion of the course, the students will be able to

COs	Description	CL
CO1	Recognize the importance of adaptation and innovation in contemporary marketing strategies.	K1,K2
CO2	Assess the role of artificial intelligence (AI) and machine learning (ML) in marketing.	K3
CO3	Measure and evaluate the performance of marketing campaigns and initiatives.	K4
CO4	Present a final marketing campaign project that applies the knowledge and skills acquired throughout the course.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT
1	Introduction to new age marketing 1.1 Evolution of marketing in the digital age 1.2 Importance of adaptation and innovation 1.3 Key Concepts in New Age Marketing Customer-Centric Approach, Data-Driven Decision Making
2	Digital marketing channels 2.1 Content Marketing in the Digital Era, Social Media Marketing and Influencer Marketing 2.2 Search Engine Marketing (SEM) and SEO, Mobile Marketing and App Marketing 2.3 Email Marketing and Marketing Automation, E-commerce and Online Marketplaces
3	Analytics and Insights 3.1 Introduction to Marketing Analytics 3.2 Customer Data and Segmentation, Measuring Campaign Performance 3.3 Data-Driven Decision Making, Ethics and Privacy in Data Usage
4	Emerging Technologies 4.1 Artificial Intelligence (AI) and Machine Learning (ML) in Marketing 4.2 Chatbots and Virtual Assistants, Augmented Reality (AR) and Virtual Reality (VR) 4.3 Voice Search and Smart Devices
5	Marketing Strategy and Future Trends 5.1 Omnichannel Marketing and Integration, Preparing for the Future of Marketing

CONSUMER RIGHTS

CODE: 23CM/UI/CR23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To provide knowledge about consumerism and related laws
- To enable an understanding of the importance of consumer rights
- To educate students on the rights and responsibilities of a consumer

COURSE LEARNING OUTCOMES

On successful completion of this course students will be able to

- Identify the need for consumer protection and the areas covered by consumer protection law
- Learn and evaluate the various forms of consumer exploitation
- Analyse and evaluate the rights of the consumer
- Understand the business malpractices and legislative regulations to protect consumers.

Unit 1

Consumers

- 1.1 Meaning of Consumers-Customers
 - 1.1.1 Consumer Movements – Historical Perspectives
 - 1.1.2 Concept of Consumerism – Need and Importance

Unit 2

Consumer Exploitation

- 2.1 Meaning, Causes of Consumer Exploitation
- 2.2 Forms of Consumer Exploitation – Underweight Measures, High Prices, Substandard Quality, Poor or Inadequate After Sales Services
- 2.3 Challenges of Consumer Exploitation

Unit 3

Consumer Rights and Duties

- 3.1 Consumer Rights – John F Kennedy's Consumer Bill of Rights
- 3.2 Types of Consumer Rights – (Right to Safety, Right to Information (RTI), Right to Redressal, Right to Consumer Education)
- 3.3 Duties of Consumers

Unit 4

Copra Act 1986

- 4.1 Introduction to COPRA Act
- 4.2 Consumer Protection Council – Central, State, Districts Consumer Protection Councils
- 4.3 Consumer Dispute Redressal Procedure

Unit 5

Consumerism in India

- 5.1 Reasons for the Growth of Consumerism in India
- 5.2 Recent Trends in Consumerism
- 5.3 Problems Faced by Consumers in India – Case Studies

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CEHNNAI – 600 086

DEPARTMENT OF MATHEMATICS

PROGRAMME DESCRIPTION

The B.Sc. Mathematics Degree programme lays equal emphasis on motivating and training students towards higher education in the discipline and employability. While the courses cover a wide spectrum of skills for specific corporate and creative sectors, the logic inbuilt in the courses helps in improved analytical skills. Computational techniques introduced through the courses in the first and second years trains students to solve problems with creative and critical thinking. The theoretical inputs to develop interest in Mathematical Communication.

VISION OF THE DEPARTMENT

- To inculcate in the students logical and analytical thinking, to increase their intellectual curiosity enabling them to become lifelong learners
- To continue to grow in their chosen professions and to function as dynamic citizens
- To establish an international reputation as a centre for excellence in teaching and research of Mathematics

MISSION OF THE DEPARTMENT

- To develop in students logical thinking, analytical reasoning and problem solving skills
- To equip the students with more technical and technological skills and scientific computing techniques based on Mathematical methods to meet the growing demand in the industrial, marketing, communication sectors, etc.
- To offer at all levels a wide array of mathematical approaches in a scientific computing environment to cater to the needs of teaching, research & industrial applications
- To equip them with enhanced employable skills
- To widen their horizon of knowledge with a focus on research

PROGRAMME SPECIFIC OUTCOMES (PSO)

On successful completion of the B.Sc. Mathematics Programme, the students will be able to

PSO1	acquire sound knowledge and understanding in the varied fields of Mathematics and in its allied field of Statistics enabling them to think in a critical manner
PSO2	develop the rational and logical reasoning of students and instill in them a range of generic skills helpful for employment, internships and social activities
PSO3	communicate mathematical ideas, solutions, and proofs clearly and effectively through oral and written presentations
PSO4	impart students with sufficient knowledge and skills enabling them to undertake further studies in Mathematics and its allied areas on multiple disciplines concerned with Mathematics
PSO5	employ their knowledge, problem solving skills and analytical thinking to translate information into mathematical form and to use appropriate mathematical formulae, modeling techniques to process the information and draw relevant conclusions

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH I – MATHEMATICS

SYLLABUS

(Effective from the academic year 2023-2024)

DIFFERENTIAL CALCULUS

CODE: 23MT/MC/DC14

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the concepts of differential calculus in depth
- To access the various methods to determine the radius of curvature, evolutes and envelopes of curves
- To discover the extreme values of differentiable functions and comprehend the implications of higher derivatives
- To interpret the concept of derivatives and their applications geometrically
- To analyze the behavior of various curves

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and recall the basic concepts of differential calculus	K1
CO2	interpret various techniques in finding derivatives	K2
CO3	identify appropriate methods to find the solution of problems on differential calculus	K3
CO4	analyze and examine the results of calculus through illustrations with examples.	K4
CO5	evaluate higher order derivatives and determine the properties of well-known curves	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Successive Differentiation 1.1 The nth derivatives of some special functions 1.2 The nth derivatives of rational algebraic functions 1.3 Leibnitz's Theorem for the nth derivative of the product of two functions	K1-K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Curvature 2.1 Formulae for radius of curvature 2.2 A theorem on curvature 2.3 Curvature at the origin 2.4 Chord of curvature through the origin (pole) 2.5 Centre of curvature 2.6 Property of the centre of curvature 2.7 Evolute and Involute 2.8 Properties of the evolute	K1-K5	13	1-5
3	Envelopes 3.1 Definition of envelope 3.2 Envelope of straight lines 3.3 Envelope of the curves 3.4 Envelope of a special family 3.5 Envelope of two-parameter family	K1-K5	14	1-5
4	Extrema of functions of two variables 4.1 Extrema with two variables 4.2 Necessary conditions for maximum and minimum of extrema with two variables 4.3 Determination of maxima and minima of extrema with two variables 4.4 Lagrange's method of undetermined multipliers	K1-K5	13	1-5
5	Characteristics of some special curves 5.1 Cycloid 5.2 Catenary 5.3 Evolutes of parabola and ellipse 5.4 Logarithmic (or Equiangular) spiral 5.5 Spiral of Archimedes 5.6 Witch of Agnesi 5.7 Cardioid 5.8 Limacon 5.9 Lemniscate Singular Points 5.10 Double Points 5.11 Classification of Double Points 5.12 Conditions for existence of double points on an algebraic curve	K1-K5	13	1-5

BOOK FOR STUDY

Das, B.C., and B.N. Mukherjee. *Differential Calculus*. 52nd ed., Kolkata, U.N. Dhur and Sons Pvt. Ltd., 2012.

Chapter 8: 8.1- 8.5, 8.7 and 8.8

Chapter 13: 13.1-13.6

Chapter 15: 15.1 – 15.12

Chapter 17: 17.1-17.9

Chapter 20: 20.2, 20.3, 20.7, 20.13 - 20.18

Chapter 21: 21.1, 21.2, 21.6

B.Sc. DEGREE: BRANCH I –MATHEMATICS

SYLLABUS

(Effective from the academic year 2023-2024)

ALGEBRA AND TRIGONOMETRY

CODE: 23MT/MC/AT13

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To impart knowledge of solving algebraic, transcendental and trigonometric equations
- To gain understanding of the different expansions of circular functions and relation between circular and hyperbolic functions
- To identify diagonalizable matrices, apply Cayley Hamilton theorem in solving higher order matrix equations and to compute inverses
- Use the concepts of trigonometry to solve applications
- Using the various series expansions to compute the sum of infinite series and to find limits

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamental notions of Algebra, Trigonometry and the various series expansions	K1
CO2	interpret the acquired knowledge and use it for expressing algebraic equations, categorizing trigonometric problems and to estimate the roots of the equations	K2
CO3	apply the concepts of equations, series categorization and the relation between trigonometric functions to solve relevant problems	K3
CO4	analyze the types of Eigenvectors and its applications, to estimate the sum of infinite series and to illustrate the occurrence of roots and approximation of limits	K4
CO5	evaluate higher order equations to predict their roots and to experiment on similar matrices for the diagonalization process, validate the trigonometric formulas using suitable examples	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Theory of Equations 1.1 Relations between the Roots and Coefficients of Equations involving Cubic and Higher Order 1.2 Symmetric Function of Roots 1.3 Transformation of Equations 1.4 Increase or Decrease the Roots of a Given Equation by a Given Quantity 1.5 Removal of Terms	K1- K5	11	CO1-5
2	Series Expansions 2.1 Exponential Series 2.2 Logarithmic Series 2.3 Application of Exponential and Logarithmic Series	K1- K5	12	CO1-5
3	Properties of Matrices 3.1 Eigenvalues and Eigenvectors 3.2 Cayley - Hamilton Theorem 3.3 Similar Matrices 3.4 Diagonalization of a Matrix	K1- K5	9	CO1-5
4	Trigonometry - I 4.1 Expansions of $\cos n\theta$, $\sin n\theta$ and $\tan n\theta$ 4.2 Expansions of $\cos^n \theta$ and $\sin^n \theta$ in a Series of Sines and Cosines of Multiples of θ . 4.3 Expansions of $\cos \theta$ and $\sin \theta$ in Powers of θ	K1- K5	10	CO1-5
5	Trigonometry - II 5.1 Euler's Formula for $e^{i\theta}$ 5.2 Hyperbolic Functions 5.3 Relations between Circular and Hyperbolic Functions 5.4 Inverse Hyperbolic Functions in Terms of Logarithmic Functions	K1- K5	10	CO1-5

OBJECTIVES OF THE COURSE

- Using the acquired knowledge on matrices to determine diagonalizable matrices, form similar matrices and use Cayley Hamilton theorem to find inverses
- To impart knowledge in differential and integral calculus for solving Mathematical problems in Physics
- To understand and solve various types of first order differential equations
- To appreciate the concept of Fourier series in expressing some functions as an infinite series
- To introduce the concept of Operations Research for solving Linear Programming Problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall basic mathematical concepts required for students pursuing Physics	K1
CO2	understand basic mathematical tools used for computations	K2
CO3	apply various techniques of calculus, matrices, differential equations, Fourier series and operation research to formulate and solve problems that are applied in physics	K3
CO4	analyze appropriate areas of applying mathematical tools in real life situations	K4
CO5	assess the techniques in Fourier Series, differential equations, calculus, matrices and Linear Programming for solving real life problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE : 23MT/GC/ES12

CREDITS :2

L T P : 2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies; Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-energy resources: renewable and non-renewable sources, impact of over-exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and *ex-situ* conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects and control measures -Impact of over-population on pollution and health – carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations Sustainable Development Goals of the 2030 Agenda
- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster

2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan
International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences

2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3

(6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 25 Duration: 60 minutes

Section A-10 x 1 = 10 Marks (All questions to be answered) Multiple Choice Questions

Section B - 3 x 5 = 15 Marks (3 out of 6 to be answered in 150 words each)

Other Component: Total Marks: 25

Any **one** of the following for 25 marks

Quiz/Scrap Book/Assignment / Poster Making/Case Study/Project/Survey/Model-Making

No End Semester Examination

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23MT/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1

(13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2

(13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

Allied Core Offered to students of Mathematics by Department of Physics

SYLLABUS

(Effective from the academic year 2023–2024)

PHYSICS FOR MATHEMATICS I

CODE: 23PH/AC/PM13

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To impart fundamental knowledge in the concepts and laws of physics.
- To train the students in visualizing the Physics behind the characteristics of solids and liquids at different conditions.
- To inculcate practical knowledge related to the dynamic theories evolved in mechanics, viscosity and theory of relativity.
- To engage the students in cultivating physics-based problem-solving abilities in different scientific scenarios
- To encourage the students to apply acquired theoretical knowledge to solve realistic problems

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	acquire knowledge on elasticity, bending of beams and theories of surface tension and viscosity of liquids, mechanics, and the basic concepts of relativity.	K1
CO2	describe the elastic behaviour of solids, the physical properties of liquids that impact fluid motion, and explain the concepts of mechanics and relativity.	K2
CO3	apply the mathematical tools to solve simple and complex problems in physics	K3
CO 4	examine the behaviour of rigid bodies and liquids utilizing theoretical concepts.	K4
CO 5	formulate the knowledge gained in theory for real life and practical applications.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNITS	COURSE DETAILS	CL	Hrs	CO
1	Mechanics I 1.1 Impulse-Impact-Conservation of linear momentum: Internal forces and momentum conservation – center of mass- examples- General elastic collision of particles of different masses. 1.2 Significance of conservation laws- law of conservation of Energy- concepts of work- power – energy – potential energy.	K1-K5	6	1-5

UNITS	COURSE DETAILS	CL	Hrs	CO
2	Mechanics II 2.1 Simple Harmonic Motion: Periodic and Harmonic Motion- Formula for acceleration, velocity and displacement - Energy of a Harmonic Oscillator- oscillation in spring mass-springs in series and parallel. 2.2 Classical mechanics: Degrees of freedom and constraints - Generalized Coordinates - principle of virtual work - De Alembert's principle -Explanation of Lagrangian equation (No derivation) Application of Lagrangian equation in Atwood's machine and Simple pendulum.	K1-K5	7	1-5
3	Elasticity 3.1 Elastic properties: Hooke's law - Elastic limit moduli of Elasticity Poisson's ratio 3.2 Expression for Bending Moment - Depression at the loaded end of the cantilever – depression and elevation at the midpoint of a loaded beam (non-uniform and uniform bending) – Torsion in a wire – Torque per unit twist – torsional oscillations – Expression for period	K1-K5	6	1-5
4	Viscosity and Surface Tension 4.1 Viscosity: Coefficient of viscosity - Stream Line Flow and Turbulent Flow – Critical Velocity – Euler's Equation for unidirectional flow 4.2 Surface Tension: molecular theory of surface tension - Determination of Surface Tension by Drop Weight Method- Interfacial Surface Tension	K1-K5	7	1-5
5	Relativity 5.1 Inertial Frames of Reference – Newtonian Relativity – Galilean Transformation Equations 5.2 Postulates of Special Theory of Relativity- Lorentz Transformation Equations- Length Contraction - Time Dilation - Twin Paradox and Meson Paradox 5.3 Relativistic Momentum (no derivation) – Mass Energy Relation- Physical Significance.	K1-K5	13	1-5

PHYSICS PRACTICAL I

CODE: 23PH/AC/P112

CREDITS : 2

L T P : 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Experiments	CL	Hrs	CO
1. Determination of 'g'- Compound Pendulum. 2. Young's Modulus 'E' by Non-Uniform Bending- Pin and Microscope 3. Young's Modulus 'E' by Uniform Bending- Scale and Telescope 4. Rigidity Modulus 'G' - Torsional pendulum 5. Surface Tension and Interfacial Surface Tension – Drop Weight Method. 6. Determination of the Refractive Index of the material of a prism - Spectrometer. 7. Verification of Series and Parallel connections of resistance and Determination of Specific Resistance - Post Office Box 8. Characteristics of a Zener Diode 9. Verification of Newton's Law of Cooling for two liquids	K1-K5	39	1-5

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To evaluate integration of irrational functions and improper integrals
- To extend the idea of definite integral to double and triple integrals of functions of two or three variables
- Apply multiple integrals to compute volume and surface area of general regions
- To apply the change of variable technique in both double and triple integrals to simplify the integration process and solve practical problems
- To study the Beta and Gamma integrals and the relationship between them

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and reproduce various integration techniques	K1
CO2	understand the concept of multiple and improper integrals	K2
CO3	employ various techniques in evaluating multiple integrals	K3
CO4	analyse and explain the results of multiple integral through illustrations with examples	K4
CO5	predict appropriate methods to find the solution of problems on integral calculus	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Methods of Integration 1.1 Integration of Irrational Functions of the Type: $\frac{1}{(x-k)\sqrt{ax^2+bx+c}}$, $\frac{1}{(Ax^2+B)\sqrt{Cx^2+D}}$, $\frac{1}{(ax^2+bx+c)\sqrt{Ax^2+Bx+C}}$, $\sqrt{(x-\alpha)(\beta-x)}$, $\frac{1}{\sqrt{(x-\alpha)(\beta-x)}}$, $\sqrt{\frac{x-\alpha}{\beta-x}}$	K1-K5	11	CO1-5

UNIT	CONTENT	CL	Hrs.	CO

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the concepts of two-dimensional and three-dimensional coordinate geometry in depth
- To recognize the type of conic sections and understand its properties
- To study the conjugate diameters and properties of ellipse and hyperbola
- To describe the various forms of equations of a plane, straight lines, sphere and cone
- To solve problems related to geometry of two dimensions and three dimensions

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify the nature of a given general second degree equation and define the basics of plane, straight line, sphere and cone in 3D	K1
CO2	understand the different types of conics in 2D and 3D	K2
CO3	apply the formula for finding the centre, lengths and axes of a central conic and find the properties of ellipse and hyperbola as well as to describe the various forms of plane, straight line, sphere and cone	K3
CO4	analyse the different parameters of conics in 2D & 3D	K4
CO5	evaluate the problems related to the geometry of two-dimension and three-dimensions	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	General Second Degree Equation 1.1 Condition for a General Second Degree Equation to Represent a Conic 1.2 Centre of the Conic given by the General Second Degree Equation (Concept Only) 1.3 Lengths And Positions of the Axes of the Central Conic $Ax^2 + 2hxy + By^2 = 1$ (Concept Only)	K1- K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Ellipse 2.1 Conjugate Diameters of Ellipse 2.2 Properties of Conjugate Diameters of Ellipse Hyperbola 2.3 The Asymptotes 2.4 Angle Between the Asymptotes 2.5 Properties of the Asymptotes 2.6 The Conjugate Hyperbola 2.7 Conjugate Diameters of Hyperbola 2.8 Properties of Conjugate Diameters of Hyperbola 2.9 Rectangular Hyperbola	K1- K5	13	CO1-5
3	Plane 3.1 General Equation 3.2 Intercept Form 3.3 Normal Form 3.4 Angle Between Two Planes 3.5 Equation of Plane through the Line of Intersection of Two Given Planes 3.6 Length of Perpendicular from a given Point to a Plane	K1- K5	13	CO1-5
4	Straight Line 4.1 Symmetrical Form 4.2 Line Through Two Points 4.3 Reduction of the Unsymmetrical Form to the Symmetrical Form 4.4 Condition for a Line to Lie on a Plane 4.5 Plane through a Given Line 4.6 Condition for Two Lines to be Coplanar 4.7 Equation of the Plane Containing the Two Lines 4.8 Shortest Distance Between Two Skew Lines and Equation of the Line Containing the Shortest Distance	K1- K5	13	CO1-5

UNIT	CONTENT	CL	Hrs	CO
5	Sphere And Cone 5.1 Equation of a Sphere with Given Centre and Radius 5.2 General Form of the Equation of a Sphere 5.3 Plane Section of a Sphere 5.4 Intersection of two Spheres 5.5 Equation of a Circle on a Sphere 5.6 Equation of Sphere Passing through Given Circle 5.7 Tangent Plane to a Sphere 5.8 Right Circular Cone; Necessary Condition for a General Equation of Second Degree to Represent a Cone 5.9 Equation of a Cone with Given Vertex, Axis and Semi-Vertical Angle	K1- K5	14	CO1-5

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide basic mathematical concepts required for students pursuing Physics
- To introduce problem solving skills using numerical methods
- To interpret the concept of derivatives and their applications geometrically
- To utilize Laplace transformations for solving differential equations
- To teach statistical tools using correlation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall basic mathematical concepts required for students pursuing Physics	K1
CO2	understand the concept of Laplace, improper integrals, numerical methods and statistics	K2
CO3	apply appropriate mathematical methods and techniques in solving problems	K3
CO4	analyze the applications of calculus, transforms, finite differences and correlation parameters	K4
CO5	evaluate the solution of improper integrals, differential equations using Laplace transforms, finite differences and correlation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Laplace Transform 1.1 Definition of Laplace Transform 1.2 Transforms of $f'(t)$ & $f''(t)$ 1.3 Transformation of Function e^{-at} , $\cos at$, $\sin at$ and t^n , where 'n' is a Positive Integer 1.4 First Shifting Theorem: Laplace Transforms of $e^{-at}\cos bt$, $e^{-at}\sin bt$ and $e^{-at}t^n$	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Inverse Laplace Transform 2.1 Inverse Laplace Transforms of Functions relating to $e^{-at} \cos bt$, $e^{-at} \sin bt$ and $e^{-at} t^n$ 2.2 Applications to Solutions of Ordinary Differential Equations with Constant Coefficients	K1-K5	13	CO1-5
3	Beta, Gamma Integrals 3.1 Definitions of Beta and Gamma Integrals 3.2 Recurrence Formula for Gamma Functions 3.3 Properties of Beta Functions 3.4 Relation between Beta and Gamma Functions	K1-K5	13	CO1-5
4	Finite Difference Methods 4.1 Finite Differences 4.2 Forward Difference Table 4.3 Interpolation Methods 4.4 Newton's Forward Formula 4.5 Newton's Backward Formula 4.6 Binomial Method 4.7 Lagrange's Formula	K1-K5	13	CO1-5
5	Statistics 5.1 Correlation 5.2 Scatter Diagram and its Uses 5.3 Karl Pearson's Coefficient of Correlation 5.4 Probable Error of Correlation Coefficient 5.5 Spearman's Rank Correlation Coefficient 5.6 Merits and Demerits of Rank Correlation Coefficient	K1-K5	14	CO1-5

OBJECTIVES OF THE COURSE

- To impart knowledge in Laplace, Fourier series, Statistics for solving mathematical problems in chemistry
- To realize the application of Laplace transform to solve Differential Equations
- To appreciate the expansion of periodic functions as a Fourier series
- To teach statistical tools using correlation and regression
- To introduce the concept of group theory

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	recall basic mathematical concepts required for students pursuing Chemistry	K1
CO2	understand mathematical tools like Laplace transforms, Inverse Laplace transforms, Fourier series, Statistics to compute simple problems	K2
CO3	apply various techniques like Laplace transforms, inverse Laplace transforms, Fourier series, Statistics and Group theory to real life situations applicable in Chemistry	K3
CO4	analyse to use the appropriate tools in Chemistry	K4
CO5	evaluate the techniques learnt and to solve problems in real life situation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Laplace Transform 1.1 Definition of Laplace transform 1.2 Transforms of $f'(t)$ & $f''(t)$ 1.3 Transformation of Function e^{-at} , $\cos at$, $\sin at$ and t^n , where 'n' is a Positive Integer 1.4 First Shifting Theorem: Laplace Transforms of $e^{-at}\cos bt$, $e^{-at}\sin bt$ and $e^{-at}t^n$	K1- K5	12	CO1-5

OBJECTIVES OF THE COURSE

- To deepen understanding on the fundamental laws and principles in physics.
- To equip students to study the theoretical concepts based on charges, geometrical and physical optics and the characteristics of Operational Amplifier.
- To elucidate the students with the concepts of electricity, magnetism, optics and electronics in realistic situations.
- To guide students to deduce expressions for various theories pertaining to physics using mathematical concepts.
- To allow students to examine concepts to resolve problems across multiple scientific contexts.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	understand the fundamental principles of electricity, magnetism, optics and electronics.	K1
CO 2	describe the theory of charges in electric and magnetic field, optical aberrations, interference, diffraction, polarization and also the theory behind working of digital circuits.	K2
CO 3	illustrate the behavior of charges using Gauss's Law and Maxwell's electromagnetic equations, importance of different types of telescopes, significance of physical properties in optics and Boolean algebra.	K3
CO 4	analyze the gained knowledge to derive expression for electric field, electric potential, force on a current carrying conductor in a magnetic field, aberrations, determination of wavelength and De Morgan's Theorem.	K4
CO 5	evaluate problems in physics and in realistic situations utilizing theoretical concepts.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Electricity 1.1 Introduction – Coloumb’s law, electric flux, Gauss's law and proof – Differential form of Gauss's law - Applications of Gauss theorem- Infinite line of charge, uniformly charged solid sphere - Field due to a uniformly charged hollow cylinder. 1.2 Electric potential - Electric potential as a line integral of electric field, potential due to a point charge – Relation between electric field and electric potential – Work done in moving a charge (earthed inside and outside) – Capacitance - Capacitance of spherical capacitor.	K1 – K5	6	1-5
2	Magnetism 2.1 Magnetic induction – Force on a Charge in a Magnetic Field, in an electromagnetic Field (Lorentz Force) – Biot-Savart law – Ampere’s circuital law - Maxwell’s electromagnetic Equations (No derivation) – Physical significance of the equations. 2.2 Electromagnetism: Force on a current carrying conductor in a magnetic field – Torque on a current loop in a uniform magnetic field – Moving coil Ballistic Galvanometer – Theory, current and charge sensitivity of B.G.	K1 – K5	7	1-5
3	Geometrical Optics 3.1 Lens Aberrations: Monochromatic aberrations – Spherical aberration in lenses – Methods of minimizing spherical aberration- Coma, Astigmatism, distortion- Chromatic aberration – achromatic combination of lenses in contact and lenses separated by a distance. 3.2 Optical Instruments: Telescopes – Angular magnification of telescopes - Refractive astronomical telescope – Terrestrial telescope – Reflecting telescopes – Radio telescope – Hubble telescope.	K1 – K5	6	1-5
4	Physical Optics 4.1 Interference: Thin films - Plane parallel film – Interference due to reflected and transmitted light – Newton’s rings – Measurement of wavelength. 4.2 Diffraction: Theory of plane transmission grating - Normal incidence – Determination of wavelength - Polarization – Double refraction – Nicol prism – Optical activity – Uses of polaroids.	K1 – K5	7	1-5
5	Electronics 5.1 Introduction to amplifiers - Operational amplifier – Ideal Op-Amp - CMRR –Inverting and non-inverting Op-Amp - Summing, difference, integral and differential Op-Amp. 5.2 Boolean algebra- De Morgan’s Theorem – Verification - Algebraic simplification – Implementation of Boolean algebra into circuits - Karnaugh map up to four variables.	K1 – K5	13	1-5

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data.	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

S.No.	EXPERIMENTS	CL	Hrs	CO
1.	Rigidity Modulus 'G' by Static Torsion	K1-K5	39	1-5
2.	Determination of Radius of Curvature of a Lens - Newton's Rings			
3.	Grating – Normal Incidence - Determination of Wavelengths (λ) of Prominent lines of mercury spectrum - Spectrometer			
4.	Determination of Specific Heat of a Liquid – Joule's Calorimeter – Applying Half Time Correction			
5.	Ammeter Calibration (Low Range) - Potentiometer			
6.	OPAMP- Inverting and Non Inverting Amplifier			
7.	Specific Heat Capacity of a Solid – Method of Mixtures			
8.	Determination of Specific Resistance - Carey Foster's bridge			
9.	Coefficient of Viscosity – Poiseuille's Method			

BOOKS FOR STUDY

Ouseph, C.C., Srinivasan, V. and Balakrishnan R., *A Text Book of Practical Physics. Vol. I & II.*, S. Viswanathan, Chennai, 2009.

PATTERN OF ASSESSMENT:

Continuous Assessment Test:

Total Marks: 50

Duration: 3 hours

CRITERION	Cognitive Level	Marks
Aim & Formula Experimental Procedure	K1, K2	20
Observation & Calculation	K3, K4	20
Results, Accuracy & Error estimation	K5	10
TOTAL		50

End Semester Examination:

Total Marks: 50

Duration: 3 hours

CRITERION	Cognitive Level	Marks
Aim & Formula Experimental Procedure	K1, K2	20
Observation & Calculation	K3, K4	20
Results, Accuracy & Error estimation	K5	10
TOTAL		50

ELEMENTS OF GRAPH THEORY

CODE: 23MT/MC/EG34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand basic concepts of graph theory
- To interpret the concepts of connectedness and their nature of connectivity
- To discover the properties of trees and its characterisation
- To apply graph theory based tools in solving practical problems
- To analyze the applications of graph theory in various fields

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and list the basic concepts of graph theory	K1
CO2	summarize and outline the various graph theoretical terminologies	K2
CO3	identify and apply suitable methods to find solutions to problems related to graph theory	K3
CO4	analyse and examine the properties of various types of graphs through illustrative examples	K4
CO5	choose suitable graph theoretical concepts to estimate the various graphical parameters for any given graph	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Basic Concepts of Graph theory 1.1 Graphs-Vertices and Edges 1.2 Degrees 1.3 Subgraphs 1.4 Isomorphism 1.5 Matrices 1.6 Operations on Graphs	K1- K5	13	CO1-5

DIFFERENTIAL EQUATIONS

CODE: 23MT/MC/ DE34

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the basic types of ordinary differential equations and partial differential equations
- To gain logical skills in the formulation of differential equations
- To appreciate the use of differential equations as a powerful tool to solve real life problems
- To critically analyze the various methods in solving differential equations
- To interpret the solution obtained in solving differential equations

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic types of ordinary, partial differential equations and system of differential equations	K1
CO2	understand and illustrate the methods used for solving the problems	K2
CO3	apply differential equations to model and solve the real world problems	K3
CO4	classify and analyze various methods used in solving differential equations	K4
CO5	evaluate general solutions of ordinary and partial differential equations	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Second Order Differential Equations 1.1 Second Order Differential Equations with Constant Coefficients 1.2 Particular Integral 1.3 Special Methods of Finding Particular Integral 1.4 Particular Integral of the Form $e^{ax}, \sin ax, \cos ax, x^m$ 1.5 Second Order Differential Equations with Constant Coefficients, Particular Integral of the Form $e^{ax}V$ where V is a Function of x	K1-K5	14	CO1-5
2	Second Order Differential Equations with Variable Coefficients 2.1 Linear Equations With Variable Coefficients 2.2 Equations Reducible to the Linear Homogeneous Equation 2.3 Variation of Parameters Simultaneous Differential Equations 2.4 Simultaneous Equations of the First Order and First Degree 2.5 Simultaneous Linear Differential Equations with Constant Coefficients	K1-K5	13	CO1-5
3	Partial Differential Equations of the First Order 3.1 Introduction 3.2 Formulation of Partial Differential Equation by Eliminating Arbitrary Constants and Arbitrary Functions 3.3 Classification of Integrals 3.4 Some Particular Method – $f(p,q) = 0, z = px + qy + f(p,q), f(z,p,q) = 0, f(x,p) = F(y,q)$ 3.5 Linear Partial Differential Equation of Order One - Lagrange's Method	K1-K5	13	CO1-5

(Effective from the academic year 2023-2024)

MATHEMATICAL STATISTICS I

CODE: 23MT/AC/ST35

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVE OF THE COURSE

- To provide an understanding of random variables, cumulative distribution functions, and the properties associated with probability distributions
- To comprehend mathematical expectation, covariance, moment generating functions, and conditional expected values, and their practical applications
- To analyze and apply special discrete probability distributions, such as binomial and Poisson distributions and their relationships
- To explore the properties and characteristics of the normal distribution
- To examine the concepts of correlation and regression, and their applications in analyzing relationships between variables.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic concepts of probability distributions, expectations, correlation and regression	K1
CO2	demonstrate a comprehensive understanding of concepts related to random variables, mathematical expectation, probability distributions and relation between two variables	K2
CO3	apply the statistical principles to solve problems involving one and two-dimensional variables	K3
CO4	analyse and interpret various probability distributions, and the relational coefficients	K4
CO5	critically evaluate the appropriateness and effectiveness of statistical models and tools	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Random Variables 1.1 Cumulative Distribution Function 1.2 Properties of Cumulative Distribution Function 1.3 Two-Dimensional Random Variables 1.4 Marginal and Conditional Probability Distribution	K1-K5	12	CO1-5
2	Mathematical Expectation 2.1 Mean and Variance and their Properties 2.2 Expected Value of a Function of one and two Dimensional Random Variable 2.3 Covariance of X, Y 2.4 Conditional Expected Values 2.5 Moment and Cumulant Generating Function 2.6 Characteristic Function 2.7 Tchebycheff Inequality	K1-K5	14	CO1-5
3	Special Discrete Probability Distributions 3.1 Binomial Distribution: Characteristic Function, Mean, Mode and Variance, Recurrence Formula 3.2 Poisson Distribution: Moment Generating Function, Central Moments, Recurrence Formula, Mode and Additive property 3.3 Poisson Distribution as a Limiting Form of Binomial Distribution	K1-K5	14	CO1-5
4	Normal Distribution 4.1 Normal distribution: Mean, Variance, Median, Mode, Central Moments, Mean Deviation about the Mean, Quartile Deviation, Moment Generating Functions, Additive Property 4.2 Normal Probability Curve and its Characteristics 4.3 Normal Distribution as a Limiting Form of Binomial Distribution	K1-K5	13	CO1-5

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23MT/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the fundamentals of sets and functions on real numbers
- To understand the concept of convergence of a real sequence
- To discuss the techniques of testing the behavior of infinite series of real Numbers
- To express periodic functions as infinite series
- To determine the Fourier series expansions of certain functions and investigate its convergence

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamental concepts of sets, sequences and series	K1
CO2	understand various concepts related to sets, sequences and series	K2
CO3	apply related theorems and techniques to solve problems on real numbers, sequences and series	K3
CO4	analyze the structure and properties of real numbers, sequences and series	K4
CO5	evaluate the limits of sequences and series and test their convergence	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs.	CO
1	Sets and Functions 1.1 Functions – Real Valued Functions 1.2 Equivalence, Countability 1.3 Real Numbers 1.4 Least Upper Bounds	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Sequences of Real Numbers 2.1 Definition of Sequence and Subsequence 2.2 Limit of a Sequence 2.3 Convergent and Divergent Sequences 2.4 Bounded Sequences 2.5 Monotone Sequences 2.6 Operations on Convergent and Divergent Sequences	K1-K5	13	CO1-5
3	Supremum, Infimum and Cauchy's Sequences 3.1 Limit Superior and Limit Inferior 3.2 Cauchy Sequences Series of Real Numbers 3.3 Convergence and Divergence 3.4 Series with Non-negative Terms 3.5 Alternating Series 3.6 Conditional Convergence and Absolute Convergence	K1-K5	14	CO1-5
4	Tests for Convergence of a Series of Real Numbers 4.1 Tests for Absolute Convergence 4.2 Series whose terms form a Non-increasing Sequence 4.3 Summation by Parts	K1-K5	14	CO1-5
5	Fourier Series 5.1 Definition of Fourier Series 5.2 Expansions of Periodic Functions with Period 2π 5.3 Odd and Even Functions 5.4 Half-range Fourier Series 5.5 Development in cosine and sine Series	K1-K5	12	CO1-5

OBJECTIVES OF THE COURSE

- To motivate the students to think logically and apply the techniques in problem solving
- To introduce the concepts of ordered relation and understand the fundamental properties of lattices and Boolean algebra
- To apply the knowledge of abstract mathematical structures in computer science
- To introduce the fundamental concepts of formal languages, grammars and automata theory
- To understand deterministic and non-deterministic machines and classify machines by their power to recognize languages

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire the knowledge of logical techniques and identify their applications	K1
CO2	recognize and apply the concepts of logic, lattices, Boolean algebra and Automata in related fields	K2
CO3	demonstrate the characterization of propositional calculus, lattices, Boolean functions and automata	K3
CO4	interpret the sets under study to apply in data structures and theory of computer languages	K4
CO5	assess the emerging fields to utilize the intrinsic concepts of discrete mathematics	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Logic and Propositional Calculus 1.1 Logical Equivalence 1.2 Algebra of Propositions 1.3 Arguments 1.4 Logical Implication 1.5 Propositional Functions, Quantifiers 1.6 Negation of Quantified Statements 1.7 Normal Forms	K1- K5	12	CO1-5
2	Lattices 2.1 Lattice 2.2 Properties of Lattices 2.3 Lattices as Algebraic System 2.4 Bounded, Complemented and Distributive Lattice	K1- K5	10	CO1-5
3	Boolean Algebra 3.1 Basic Properties of Boolean Algebra 3.2 Representation Theorem 3.3 Boolean Expressions 3.4 Logic Gates and Circuits 3.5 Boolean Function	K1- K5	10	CO1-5
4	Finite State Automata 4.1 Finite State Machines 4.2 Finite State Automata 4.3 Non-deterministic Finite State Automaton 4.4 Equivalence of DFSA and NDFSA	K1- K5	10	CO1-5

MATHEMATICAL STATISTICS II

CODE: 23MT/AC/ST45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To gain a comprehensive understanding of basic concepts of sampling theory
- To understand point estimation and interval estimation concepts
- To learn the principles of ANOVA, including one-way and two-way classification and apply these techniques to analyze and compare means across multiple groups
- To acquire the skills to analyze time series data, including trend analysis, seasonal decomposition, and forecasting methods
- To select appropriate sampling methods for different types of data and research questions, and apply these methods effectively in practice

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamental definitions and techniques employed in distributions and statistical tools	K1
CO2	demonstrate a comprehend understanding on statistical principles and their applications, especially in estimation, tests of significance, time series analysis, and analysis of variance	K2
CO3	apply sampling theory, time series analysis, ANOVA, and estimation methods to the given data, addressing practical problems and making appropriate decisions	K3
CO4	analyse real world data sets, trends and patterns in time series data, and perform comprehensive hypothesis tests, confidence intervals and ANOVA experiments, including the interpretation of data given	K4
CO5	evaluate the robustness of sampling procedures, estimation theory, time series models, ANOVA experiments, and their impact on the validity of statistical conclusions	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Sampling Theory 1.1 Introduction 1.2 Types of Sampling 1.3 Method of Drawing Random Sample 1.4 Sampling Distributions of Sample Mean and Sample Proportion Distributions used in Sampling Theory 1.5 Standard Normal Distribution, Chi-Square Distribution, Student's <i>t</i> -Distribution, Snedecor's <i>F</i> -Distribution 1.6 Relations between Standard Normal, Chi-Square, <i>t</i> , <i>F</i> -Distribution	K1-K5	13	CO1-5
2	Theory of Estimation 2.1 Introduction 2.2 Point Estimation- Criteria for Good Estimators 2.3 Methods of Point Estimation Interval Estimation 2.4 Introduction 2.5 Approximate Confidence Limits (Large Samples) 2.6 Exact Confidence Limits (any Sample Size)	K1-K5	13	CO1-5
3	Tests of Significance 3.1 Statistical Hypothesis – Level of Significance, Critical Region, One-Tailed and Two-Tailed Tests, Type I & II Errors, Power of a Test 3.2 Large Sample Tests 3.3 Chi-Square Test for Goodness of Fit 3.4 Test For Independence of Attributes 3.5 Yate's Correction 3.6 Small Sample Tests	K1-K5	14	CO1-5
4	Analysis of Variance 4.1 Introduction 4.2 Different Sources of variation 4.3 Technique in One-Way Classification 4.4 Locating Unequal Pairs of Means 4.5 Technique in Two-Way Classification	K1-K5	12	CO1-5

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce the fundamental mathematical concepts pertaining to the discipline of commerce
- To employ different techniques to solve problems pertaining to matrices, equations and LPP
- To appreciate the concept of numerical differentiation and integration as an alternate tool to solve problems on differentiation and integration
- To promote problem solving skills and quantitative analysis
- To model and solve real time problem using linear programming method

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define the basic mathematical concepts on matrices, equations, differentiation, integration and linear programming problem	K1
CO2	understand and compare the concepts relating to matrices, polynomials, numerical methods and linear programming problem	K2
CO3	utilize suitable mathematical concepts and skills to solve problems including those in real life contexts	K3
CO4	analyse and examine the problem relating to the applications of matrices, differentiation, integration and optimization	K4
CO5	evaluate solutions to the problems related to matrices, equations, differentiation, integration and linear programming problem	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyze K5 – Evaluate

OBJECTIVES OF THE COURSE

- To introduce the concepts of basic algebraic structures
- To understand the development of algebraic structures
- To solve problems related to the concept of rings and fields
- To analyze various algebraic structures and their concepts
- To illustrate the importance of abstract algebra in applied mathematics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and recall the basic concepts of algebraic structures	K1
CO2	understand the concepts of groups, rings and fields	K2
CO3	apply appropriate methods to solve related problems in abstract algebra	K3
CO4	analyze and examine the concepts of groups and rings through illustrations and examples	K4
CO5	prove the concepts of groups, rings and fields and evaluate the related problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Group Theory 1.1 Elementary Properties of Groups 1.2 Finite Groups 1.3 Subgroups 1.4 Cyclic Groups – Properties, Classification of Subgroups of Cyclic Groups	K1-K5	15	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Permutation Groups 2.1 Cycle Notation 2.2 Properties of Permutations Isomorphisms 2.3 Cayley's Theorem 2.4 Properties of Isomorphisms 2.5 Automorphisms	K1-K5	15	CO1-5
3	Cosets and Lagrange's Theorem 3.1 Properties of Cosets 3.2 Lagrange's Theorem and Consequences 3.3 An Application of Cosets to Permutation Groups Normal Subgroups and Factor Groups 3.4 Normal Subgroups 3.5 Factor Groups	K1-K5	16	CO1-5
4	Group Homomorphism 4.1 Properties of Homomorphisms 4.2 The First Isomorphism Theorem Ring Theory 4.3 Properties of Rings 4.4 Subrings 4.5 Integral Domains 4.6 Fields 4.7 Characteristic of a Ring	K1-K5	16	CO1-5
5	More on Ring Theory 5.1 Ideals and Factor Rings 5.2 Prime Ideals and Maximal Ideals 5.3 Ring Homomorphisms 5.4 Properties of Ring Homomorphisms 5.5 Field of Quotients	K1-K5	16	CO1-5

PRINCIPLES OF REAL ANALYSIS

CODE: 23MT/MC/RA55

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To enhance the knowledge of abstract mathematics on the real line and metric spaces
- To describe the fundamental properties of the real numbers that underpin the formal development of real analysis
- To demonstrate skills in constructing rigorous mathematical arguments for proving connected, bounded, complete and compact metric spaces
- Apply the theory to solve a variety of problems at an appropriate level of difficulty
- To introduce the concepts of Riemann Integration and analyze its properties

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and recall the abstract mathematical concepts on the real line and metric spaces	K1
CO2	illustrate the theoretical concepts using relevant examples	K2
CO3	identify potential solutions to problems involving limit, continuity, uniform continuity, convergence, derivatives and integration	K3
CO4	analyse the abstract concepts and choose appropriate methods for proving the theoretical results	K4
CO5	compare the various methods in mathematical analysis that can be applied to evaluate analytical problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	Limits and Continuity on \mathbb{R}^1 1.1 Limit of a Function on the Real Line 1.2 Functions Continuous at a Point on the Real Line 1.3 Reformulation Metric Spaces 1.4 Definitions with Examples	K1- K5	12	CO1-5
2	Limits and Continuity on Metric Spaces 2.1 Limits in Metric Spaces 2.2 Functions Continuous on a Metric Space 2.3 Open Sets 2.4 Closed Sets	K1- K5	14	CO1-5
3	Connectedness and Completeness on Metric Spaces 3.1 Connected Sets 3.2 Bounded Sets and Totally Bounded Sets 3.3 Complete Metric Spaces	K1- K5	12	CO1-5

INTEGRAL TRANSFORMS

CODE: 23MT/MC/IT54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To develop an understanding of the basic types of integral transforms
- To apply the concepts of Laplace transforms in evaluating integrals and solving differential equations
- To apply Laplace transforms to solve differential equations and Z-transform to solve difference equations
- To analyze the various concepts of Laplace, Fourier and Z-transforms
- To solve difference equations using Z-transforms

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the suitable techniques of differential and integral calculus and concepts of differential equations to solve Laplace, Fourier and Z-transforms	K1
CO2	understand the concepts involved in Laplace, Fourier and Z-transforms	K2
CO3	apply the concepts of the integral transforms under study to solve problems of differential and difference equations	K3
CO4	analyse the problems based on Laplace, Fourier and Z-transforms	K4
CO5	evaluate Laplace, Fourier and Z-transforms of various functions using the appropriate methods	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Laplace Transform 1.1 Definition of Laplace Transform 1.2 Laplace Transform of e^{at} , $\cos at$, $\sin at$ and t^n , where n is a Positive Integer 1.3 Laplace Transform of Periodic Functions 1.4 Some General Theorems 1.5 Evaluation of Integrals using Laplace Equations 1.6 Inverse Laplace Transform	K1- K5	12	CO1-5
2	Application of Laplace Transform to Differential Equations 2.1 Laplace Transform to Solve System of Differential Equations with Constant Coefficient 2.2 Laplace Transform to Solve Ordinary Differential Equations with Variable Coefficients 2.3 Laplace Transform to solve Differential Equations Involving Integrals 2.4 Laplace Transform to Evaluate Certain Integrals	K1- K5	14	CO1-5
3	Fourier Transforms 3.1 Definition of Fourier Transforms, Fourier Cosine Transform & Fourier Sine Transform 3.2 Alternative Form of Fourier Complex Integral Formula 3.3 Relationship between Fourier Transform and Laplace Transform 3.4 Properties of Fourier Transforms	K1- K5	12	CO1-5
4	Z-Transforms 4.1 Definition of Z-Transforms 4.2 Properties of Z-Transforms 4.3 Z-Transforms of Some Basic Functions	K1- K5	13	CO1-5

UNIT	CONTENT	CL	Hrs	CO
5	Inverse Z–Transforms 5.1 Inverse Z–Transforms 5.2 Evaluation of Inverse Z–Transforms using Expansion Method, Long Division Method - Partial Fractions Method - by Cauchy’s Residue Theorem 5.3 Formation of Difference equations and Use of Z-Transform to Solve them	K1- K5	14	CO1-5

MATHEMATICS THROUGH SCIENTIFIC SOFTWARE

CODE: 23ID/IC/MS55

CREDITS: 5

L T P: 1 0 5

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce software tools for implementing mathematical concepts
- To acquire proficiency in using different functions of Python to compute solutions of basic mathematical and statistical problems
- To demonstrate the use of Python and Excel to solve equations along with visualizing the solutions
- To acquire skill in choosing the suitable libraries of Python to solve problems on mathematical modeling
- To develop simple functions for handling problems involving mathematics and statistics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	understand the basics of spreadsheet and Python	K1
CO2	acquire the knowledge of various built in library functions for expressing and solving mathematical problems in Excel and Python	K2
CO3	apply the software tools for implementing Mathematical concepts and obtain solutions	K3
CO4	evaluate different types of formulas and functions available in Excel and Python to determine the best one for a given set of data.	K4
CO5	build user-defined functions for simple applications using Python and Excel	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Microsoft Excel 1.1 Introduction to Excel : Navigation and Selecting - View Options - Data Entry, Data Types, Editing and Deleting - Fill Handle	K1 - K5	13	CO1-5

UNIT	CONTENT	CL	Hrs	CO
	1.2 Formulas - Functions : Autosum, Sum, Average, Max, Min, Count, CountIF, SumIF, AverageIF 1.3 Creating Named Ranges and Constants - Absolute and Cross Reference 1.4 Formatting - Borders - Alignment tools - Number Formats - Format Painter - Styles and Themes 1.5 Managing Rows & Columns - Find & Replace 1.6 Filtering - Sorting - Conditional Formatting - Data Validation			
2	Advance Excel Options 2.1 Importing Data - Data Cleaning 2.2 Database functions : dsum, daverage, dmax, dmin, dcount, VLOOKUP, HLOOKUP 2.3 Printing : Preview, Orientation, Margin and Scale, Page Break, Print Titles, Header and Footer 2.4 Charts: Chart Types, Move and Resize Chart, Changing Chart Styles and Chart Elements 2.5 Pivot Table - Freeze Panes 2.6 Form Controls 2.7 Macros - Solver - Goal Seek	K1 - K5	13	CO1-5
3	Python Basics 3.1 Variables, Reserved words, Comments, Formatting Text and Numbers 3.2 User Defined Functions 3.3 Looping and Branching 3.4 Importing Standard Mathematical Functions 3.5 Basic Mathematical Operations, Different Kinds of Numbers, Working with Fractions, Complex Numbers 3.6 Getting User Input, Fractions and Complex Numbers as Input	K1 - K5	18	CO1-5
4	Mathematics with Python using NumPy and SymPy 4.1 Creating Vectors, Lists, Arrays, Scalars and Matrices 4.2 Arithmetic Operations on Matrices, Eigen Values & Eigen Vectors 4.3 Solving System of Equations	K1 - K5	17	CO1-5

UNIT	CONTENT	CL	Hrs	CO
	4.4 Working with Expressions, Factorizing and Expanding Expressions, Substituting in Values 4.5 Converting Strings to Mathematical Expressions 4.6 Solving Quadratic Equations, Solving for One Variable in Terms of Others, Solving a System of Linear Equations. 4.7 Plotting Expressions Input by the User, Plotting Multiple Functions			
5	Statistics Using Python 5.1 Analyzing Data: Mean, Median, Mode, Frequency Table, Measuring the Dispersion, Variance, Standard Deviation, Correlation, Scatter Plot 5.2 Visualizing Data with Graphs – Understanding the Cartesian Coordinate Plane, Creating Graphs with Matplotlib, Customizing Graphs 5.3 Reading Data: Reading Data from a Text File, Reading Data from a CSV file, Creating a Grouped Frequency Table from a Data File	K1 - K5	17	CO1-5

VECTOR SPACES AND LINEAR TRANSFORMATIONS

CODE: 23MT/MC/VL64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To introduce basic concepts of vector spaces, inner product spaces and linear transformations
- To develop an understanding of linear algebraic structures
- To enable understanding of the concept of linear transformations and their matrix representation
- To illustrate the importance of linear algebra in applied mathematics
- To interpret the concepts in inner product space to solve problems in applicable areas

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define basic concepts in vector spaces and linear transformations	K1
CO2	understand the concepts pertaining to vector spaces, linear transformation and inner product spaces	K2
CO3	apply appropriate method to solve related problems in linear algebra	K3
CO4	analyse and examine the concepts of linear algebra through illustrations and examples	K4
CO5	establish the concepts of vector spaces, linear transformation and inner product spaces and evaluate the related problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Vector Spaces 1.1 General Vector Spaces and Subspaces 1.2 Linear Combinations 1.3 Linear Dependence and Independence 1.4 Properties of Bases	K1-K5	13	CO1-5
2	Rank and Orthogonalization of Vectors 2.1 Rank 2.2 Orthonormal Vectors and Projections 2.3 Gram-Schmidt Orthogonalization Process 2.4 Kernel, Range and the Rank-Nullity Theorem	K1-K5	13	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
3	Transformations 3.1 Matrix Transformations, Rotations and Dilations 3.2 One-to-one Transformations and Inverse Transformations 3.3 Transformations and Systems of Linear Equations	K1-K5	13	CO1-5
4	Coordinate Representations 4.1 Coordinate Vectors 4.2 Change of Basis 4.3 Matrix Representations of Linear Transformations 4.4 Importance of Matrix Representation 4.5 Diagonalization of Matrices 4.6 Diagonalization of Symmetric Matrices – Orthogonal Diagonalization 4.7 Diagonal Matrix Representation of a Linear Operator	K1-K5	13	CO1-5
5	Inner Product Spaces 5.1 Inner Product 5.2 Norm of a Vector 5.3 Orthogonal Vectors 5.4 Approximation of Functions and Coding Theory 5.5 Least Squares Curves	K1-K5	13	CO1-5

PRINCIPLES OF COMPLEX ANALYSIS

CODE: 23MT/MC/CA65

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To introduce the theory and properties for functions of a complex variable and its transformation for special functions.
- To realize the mapping in the complex plane through linear fractional transformations.
- To understand the concepts of analyticity and complex integration
- To apply appropriate techniques proper and definite integrals and generating power series
- To expose a fertile area of pure mathematics as a source of powerful technique that are widely applied in sciences and advanced Engineering mathematics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define basic concepts in complex valued functions	K1
CO2	demonstrate understanding of different techniques to solve basic problems in complex analysis	K2
CO3	apply the fundamental principles and theoretical concepts of complex analysis in problem solving	K3
CO4	analyze various techniques to classify analytic functions and to solve problems	K4
CO5	evaluate and interpret mathematical arguments and proofs in complex analysis	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyze K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Analytic Functions 1.1 Functions of a Complex Variable 1.2 Continuity 1.3 Derivatives 1.4 Cauchy-Riemann Equations 1.5 Sufficient Conditions for Differentiability 1.6 Polar Coordinates 1.7 Analytic Functions 1.8 Harmonic Functions 1.9 Harmonic Conjugates	K1-K5	15	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Mapping by Elementary Functions 2.1 Linear Transformations 2.2 The Transformation $w = \frac{1}{z} \sin z$ 2.3 Linear Fractional Transformations Conformal Mapping 2.4 Preservation of Angles 2.5 Scale Factors Applications of Conformal Mapping 2.6 Two-dimensional Fluid Flow 2.7 The Stream Function 2.8 Flows around a Corner and around a Cylinder	K1-K5	15	CO1-5
3	Integrals 3.1 Cauchy-Goursat Theorem 3.2 Simply Connected Domains 3.3 Multiply Connected Domains 3.4 Cauchy Integral Formula 3.5 An Extension of the Cauchy Integral Formula 3.6 Some Consequences of the Extension 3.7 Liouville's Theorem and the Fundamental Theorem of Algebra 3.8 Maximum Modulus Principle	K1-K5	16	CO1-5
4	Series 4.1 The Three Types of Isolated Singular Points 4.2 Isolated Singular Points 4.3 Residues at Poles 4.4 Zeros of Analytic Functions 4.5 Zeros and Poles 4.6 Taylor Series 4.7 Laurent Series Elementary Functions 4.8 The Logarithmic Function 4.9 Branches and Derivatives of Logarithms	K1-K5	16	CO1-5
5	Residues and Poles 5.1 Cauchy's Residue Theorem 5.2 Residue at Infinity Applications of Residues 5.3 Evaluation of Improper Integrals 5.4 Definite Integrals Involving Sines and Cosines 5.5 Argument Principle 5.6 Rouché's Theorem	K1-K5	16	CO1-5

PRINCIPLES OF MECHANICS

CODE: 23MT/MC/PM65

CREDITS: 5

L T P: 5 1 0

TOTAL TEACHING HOURS: 78

OBJECTIVES OF THE COURSE

- To understand the concept of different forces and moments and their equilibrium with reference to a coordinate system
- To deal with parallel forces, couples and equilibrium of coplanar forces
- To widen the appreciation of the variety of phenomena covered by mechanics such as friction and demonstrate its application in real life
- To determine the moment of inertia of some standard bodies and discuss the equilibrium of a uniform cable hanging freely under its own weight
- To explain and analyze the motion of a particle in a resisting medium

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and define the motion and equilibrium of objects in different frames of references	K1
CO2	understand and recognize the different concepts of statics and dynamics applied in real life	K2
CO3	apply the mathematical abstractions to solve physical problems	K3
CO4	analyse mechanical problems as mathematical models and examine their behaviours and properties	K4
CO5	formulate and construct mechanical models and demonstrate its application to cater real life problems	K5
CL – Cognitive Level

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To formulate linear programming problem for simple mathematical models
- To develop mathematical skills to analyse and solve linear programming problems and network models arising from a wide range of applications
- To identify best techniques to solve a specific problem in linear programming model of OR
- To apply CPM and PERT techniques, to plan, schedule and control project activities
- To analyse the applications of different techniques learnt and to choose the appropriate technique for industry related problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic theory and concepts of operations research	K1
CO2	understand the operations research methodology to decision making	K2
CO3	apply the various techniques to solve LP problems	K3
CO4	analyse the various techniques and identify the best technique to solve LP problems	K4
CO5	evaluate the different models and explain its importance in real life problems	K5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

B.Sc. DEGREE: BRANCH – I – MATHEMATICS

SYLLABUS

(Effective from the academic year 2023-2024)

PROJECT

CODE: 23MT/ME/PR45

CREDITS: 5

PREPARATION OF PROJECT

The project shall contain around 25 pages and shall be typed with double spacing.
The format is as follows:

1. Cover page shall contain
 - a) Title of the project
 - b) Project submitted at the elective level for the B.Sc. Degree course in the ____ semester
 - c) Name of the Candidate
Department number
 - d) Department of Mathematics
Stella Maris College (Autonomous), Chennai – 600 086
 - e) Month, Year
2. The project shall contain
 - a) Contents page
 - b) At least 2 chapters including an introductory chapter (comprising motivation, basic concepts needed / used in the project and outline of the project)
 - c) Conclusions / interpretations arrived at may be given at the end of each problem in the chapter concerned
 - d) List of figures / list of abbreviations (if needed) shall be given as an appendix
 - e) Bibliography shall be given in alphabetical order at the end in MLA format
3. Each candidate may prepare 3 copies of the project, one copy for her and submit 2 copies to the Head of the department before the commencement of the end semester examination.
4. The Controller of Examination is requested to arrange for the valuation of the Project as well as the conduct of the Viva – Voce at the college where the candidates take examinations, within two weeks of the last date of examination for B.Sc. degree. The panel of examiners will consist of an internal-external examiner and the Supervisor.

The guidelines for the Viva-Voce examiners would be that

- a) They will satisfy themselves that this is a work of the candidate as certified by the department
- b) The project is in the given format and
- c) The candidate has clear understanding of the concepts, discussed in the project.

The department should certify as follows:

This is to certify that the project in the broad area _____ titled _____ is submitted by _____ at the elective level for the degree of Bachelor of Science (Mathematics) during the year _____

*sd/
Head of the Department*

*sd/
Supervisor*

5. **PATTERN OF ASSESSMENT:** There will be double valuation for the project by the supervisor and an internal-external examiner who will conduct the viva – voce.

Project – 75 marks

Rubrics for evaluation	Marks	Cognitive Level
Key Facts, Theories, and Concepts	10	K1
Conceptual Clarity	10	K2
Methodology and Application of Knowledge	15	K3
Critical Analysis of the Data / Problem	25	K4
Assessing the Significance and Implications of the Study	10	K5
Original Contribution to the Field	5	K6

Viva Voce – 25 marks

Rubrics for evaluation	Marks	Cognitive Level
Clarity, Organization and Understanding of the Project	10	K2
Ability to Apply the Knowledge to Defend the Work	10	K3
Ability to Critically Evaluate and Demonstrate the Work and Respond to Questions	5	K5

ELEMENTS OF SPACE SCIENCE

CODE: 23MT/ME/ES45

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To explore the new vistas of the universe governed by mathematics
- To visualize application of mathematics in space science
- To comprehend the astronomical occurrences involving celestial entities.
- To grasp the creation of the cosmos conceptually.
- To classify types of stars and to illustrate star charting and gain insights into telescopes

COURSE LEARNING OUTCOMES

on successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	explain fundamental ideas in the field of astronomy	K1
CO2	acquire the knowledge of the concepts governed by mathematics to the universe	K2
CO3	showcase the principles governing the movement of celestial objects	K3
CO4	analyze and spot the celestial bodies in the sky by naked eye / binoculars / telescopes	K4
CO5	visualize the real time application of mathematics in space science	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs.	CO
1	Spherical Trigonometry 1.1 Spherical Trigonometry 1.2 Spherical Triangle- Polar Triangle -Definition 1.3 Some Properties of Spherical Triangles 1.4 Relations Between the Sides and Angles of a Spherical Triangle- Cosine, Sine, Cotangent Formula, Supplemental Cosine Formula, Five Parts Formula, Napier's Formula (Statements Only) 1.5 Napier's Analogies and Napier's Rules 1.6 Simple Problems Based on the Concepts Only	K1-K5	10	CO1-5

UNIT	CONTENT	CL	Hrs.	CO
2	Celestial Sphere, Diurnal Motion 2.1 Celestial Sphere, Diurnal Motion- Celestial Axis, Celestial Equator – Celestial Horizon, Celestial Meridian 2.2 Cardinal Points - Declination Circles – Verticals – Parallactic Angle 2.3 Annual Motion of the Sun – First Point of Aries and First Point of Libra – Equinoxes and Solstices – Colures 2.4 Celestial Co-ordinates 2.5 To Represent the Different System of Coordinates in the Same Figure 2.6 To Find the Relation between Right Ascension and Longitude of the Sun 2.7 To Find the Longitude of Sun on Any Day 2.8 Latitude of a Place 2.9 To Find the Right Ascension and Declination of a Body 2.10 To Find the Hour Angle of a Body at Rising Or Setting – Duration of Day Time 2.11 Morning and Evening Stars – Circumpolar Stars- Condition for Circumpolar Star	K1-K5	12	CO1-5

B.Sc. DEGREE: BRANCH I –MATHEMATICS

SYLLABUS

(Effective from the academic year 2023-2024)

**NUMERICAL METHODS WITH PROGRAMS IN C++
(Theory and Practical)**

CODE: 23MT/ME/NM45

CREDITS: 5

L T P: 4 0 2

TOTAL TEACHING HOURS: 78

PREREQUISITES: Knowledge of C/C++ Programming

OBJECTIVES OF THE COURSE

- To obtain numerical solutions of algebraic and transcendental equations
- To find numerical solutions of system of linear equations and check the accuracy of the solution
- To describe various interpolating and extrapolating methods
- To solve initial and boundary value problems in differential equations using numerical methods
- To apply the various numerical method solutions to real life problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define and recall the various concepts in numerical methods	K1
CO2	compare and relate the different numerical techniques available to solve real time problems	K2
CO3	apply numerical methods to obtain approximate solutions to mathematical problems and implement them in computer programming using C++ language	K3
CO4	analyse and evaluate the accuracy of numerical method solutions by interpreting the errors	K4
CO5	determine suitable numerical methods for various mathematical operations and tasks, such as interpolation, integration, the solution of linear and nonlinear equations, and the solution of differential equations	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Numerical Solutions of Algebraic and Transcendental Equation 1.1 Bolzano's Bisection Method 1.2 Newton Raphson Method Iterative Methods of Solving Simultaneous Equations 1.3 Jacobi's Method 1.4 Gauss Seidel Iteration Method Practical 1.5 C++ Program to Find the Smallest Positive Root / the Largest Negative Root of the Equation $f(x) = 0$ by using the Bisection Method and Newton Raphson Method 1.6 C++ Program to Solve a System of Linear Algebraic Equations using Gauss Jacobi's Iteration Method and Gauss Siedel Method	K1-K5	10+6	CO1-5
2	Finite Differences 2.1 Forward Differences 2.2 Backward Differences 2.3 Central Differences Interpolation with Equal Intervals 2.4 Gregory-Newton's Forward and Backward Interpolation Formulae 2.5 Central Difference Interpolation Formulae – Gauss Forward and Backward Interpolation Formulae, Stirling's Interpolation Formula Interpolation with Unequal Intervals 2.6 Lagrange's Interpolation Formula for Unequal Intervals Practical 2.7 C++ Program to Interpolate and Extrapolate using the Given Pairs of Values of x and y by Newton's Forward and Backward Interpolation Formulae 2.8 C++ Program to Interpolate y using the Given Pairs of Values of x and y by Lagrange's Interpolation Formula	K1-K5	12+6	CO1-5

UNIT	CONTENT	CL	Hrs	CO
3	Numerical Differentiation 3.1 Values of the Derivatives of y based on Newton's Forward and Backward Interpolation Formulae, Stirling's Formula 3.2 Second Order Derivatives of $f(x)$ using Newton's Formulae - Maximum and Minimum Value of $f(x)$ Practical 3.3 C++ Program to Find the Derivative at the Initial Point of a Tabulated Function by Newton Forward and Backward Interpolation Formula	K1-K5	10+4	CO1-5

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Theory Pattern

Section	Cognitive Level	Marks	Pattern
A	K1	5	$5 \times 1 = 5$ (5 MCQ to be set)
B	K2	5	$5 \times 1 = 5$ (5 MCQ to be set)
C	K4	5	$1 \times 5 = 5$ (2 questions to be set)

Practical Pattern

Section	Cognitive Level	Marks	Pattern
C	K3	15	$1 \times 15 = 15$ (2 questions to be set)
D	K5	10	$1 \times 10 = 10$ (2 questions to be set)
E	K6	10	$1 \times 10 = 10$ (2 questions to be set)

Other Components:

Total Marks: 50

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

End-Semester Examination: Total Marks: 100

Duration: 3 hours

(Question paper to be prepared jointly by one course teacher and one internal–external examiner)

Theory Pattern

Section	Cognitive Level	Marks	Pattern
A	K1	10	$10 \times 1 = 10$ (10 MCQ to be set)
B	K2	10	$10 \times 1 = 10$ (10 MCQ to be set)
C	K4	10	$2 \times 5 = 10$ (4 questions to be set)

Practical Pattern

Section	Cognitive Level	Marks	Pattern
C	K3	30	$2 \times 15 = 30$ (4 questions to be set)
D	K5	20	$2 \times 10 = 20$ (4 questions to be set)
E	K6	20	$2 \times 10 = 20$ (4 questions to be set)

SYLLABUS

(Effective from the academic year 2023-2024)

COMBINATORICS

CODE: 23MT/UI/CO23

CREDITS: 3

OBJECTIVES OF THE COURSE

- To equip students with the foundational knowledge and techniques useful for counting
- To introduce generalized permutations and combinations and the inclusion-exclusion principle
- To provide opportunities for students to apply combinatorial techniques to solve problems in computer science, statistics and operations research
- To acquaint the knowledge of generating functions as a powerful tool for solving combinatorial problems
- To foster problem-solving skills to approach combinatorial problems critically

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- recall the foundational knowledge and techniques for counting objects and events systematically
- understand the important notions of combinatorics and their applications
- apply various techniques for combinatorial mathematics to tackle complex counting problems
- analyze different combinatorial structures and implement their applications in combinatorial analysis
- examine various large and complex real world problems using clear and logical combinatorial arguments to support their solutions

Unit 1

Basic Tools

1.1 The Sum Rule and the Product Rule

1.2 Permutations and Combinations

1.3 The Pigeonhole Principle

1.4 Problems on the Sum Rule and Product Rule

1.5 Problems on Permutations and Combinations

1.6 Problems on the Pigeonhole Principle

Unit 2

Further Basic Tools

2.1 Generalized Permutations and Combinations

2.2 Sequence and Selections

2.3 The Inclusion – Exclusion Principle

Unit 3

Problems on Generalized Permutations, Combinations and the Inclusion-Exclusion Principle

- 3.1 Problems on Generalized Permutations and Combinations
- 3.2 Problems on Sequence and Selections
- 3.3 Problems on the Inclusion-Exclusion Principle
- 3.4 Problems on the Permanent of a Matrix

Unit 4

Generating Functions and Recurrence Relations

- 4.1 Ordinary Generating Functions
- 4.2 Partitions of a Positive Integer
- 4.3 Recurrence Relations

Unit 5

Problems on Generating Functions and Recurrence Relations

- 5.1 Problems on Ordinary Generating Functions
- 5.2 Problems on Partitions of a Positive Integer
- 5.3 Problems on Recurrence Relation

CURRICULUM FRAMEWORK (LOCF)

SYLLABUS
(Effective from the academic year 2023 – 2024)

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI – 600 086

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI-600 086
DEPARTMENT OF PHYSICS

PROGRAMME DESCRIPTION

The goal of the undergraduate programme in Physics is to support and encourage a basic knowledge in the discipline of Physics including phenomenology, theories and techniques, concepts and general principles. It strongly instils in students the ability to ask questions pertaining to the laws of Physics and to obtain solutions by use of qualitative and quantitative reasoning and experimental investigation. The programme trains students to develop attributes like appreciation of the discipline of Physics, curiosity, creativity, reasoned scepticism and understanding links of Physics to other disciplines and to societal issues. The course curriculum, field trips and the opportunities exposed to students to conduct individual research provides them a versatile development and promote them towards higher education and research in physics.

VISION OF THE DEPARTMENT

- To create an eagerness for lifetime learning among the students and an ability to put their learning into practice.
- To develop knowledge in the subject and to create an interest and passion towards Physics.
- To facilitate conceptual understanding of the content through experiential learning.
- To offer courses that will expose students to a broad spectrum of knowledge and enhance their scientific curiosity and thinking.

MISSION OF THE DEPARTMENT

- To enable the students to be self-reliant in order to take up challenges with confidence.
- To motivate students towards pursuing higher education and a career in Physics.
- To engage the students in quality scientific research so as to respond to the societal needs and demands.

PROGRAMME SPECIFIC LEARNING OUTCOMES

On successful completion of the B.Sc. Physics Programme, the students will be able to

PSO1	demonstrate knowledge and understanding of the core areas of Physics and utilizing mathematical concepts for investigation of data and deriving scientific conclusions.
PSO2	exhibit curiosity, reasoning, critical and creative thinking in applying appropriate physical principles and procedures to solve a varied range of complex and ambiguous real-time problems. Promote experimental learning and use of scientific equipment to observe and analyse data and handling errors in measurement
PSO3	develop skills for productive review of literature, effective communication of complex scientific information and collaboration with diverse intellectuals from academia and industry.
PSO4	obtain analytical, computational, and technical skills that would enable them to undertake higher education in Physics, research and development and successful careers in the industry.
PSO5	recognize and appreciate the importance of the discipline of Physics and its application in tackling formidable global challenges such as climate change, environmental pollution, public health, food security and sustainable energy production.

SYLLABUS

(Effective from the academic year 2023 – 2024)

PROPERTIES OF MATTER AND SOUND

CODE: 23PH/MC/PS14

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart the knowledge of basic principles and theories relating to properties of materials and sound.
- To enable the students to understand the behaviour of materials and the fundamental concepts of sound production, propagation, and its applications.
- To guide the students in applying the concepts of elasticity, surface tension, viscosity, and acoustics in real life situations.
- To equip the students to derive mathematical expressions related to material behaviour and sound wave propagation.
- To facilitate the students in solving and justifying solutions related to problems in properties of solids, fluids, behavior of waves and acoustics.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on Stress and Strain, three moduli of elasticity, bending of beams, fundamental principles and theories of surface tension and viscosity of liquids, characteristics of wave motion, and the basic concepts of acoustics and ultrasonics.	K1
CO2	describe the elastic behaviour of solids, the physical properties of liquids that impact fluid motion, and how sound travels through a medium.	K2
CO3	apply the theoretical concepts to determine bending moment, elevation and depression in a beam due to different types of loading, optimum reverberation time and illustrate real life examples for surface tension, viscosity of fluids, vibrations in strings, and Doppler effect in Sound.	K3
CO4	deduce expressions related to elasticity of solids, fluid dynamics, simple harmonic motion, acoustics and ultrasonics.	K4
CO5	evaluate and solve problems related to properties of solids and fluids, behaviour of waves, simple harmonic oscillators, and designing an acoustically good auditorium.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Elasticity 1.1 Elasticity – Stress – Strain – Hooke’s law - different moduli of elasticity – Poisson’s ratio - relation between the elastic moduli - bending of beams – expression for the bending moment – depression of the loaded end of a cantilever – depression at the midpoint of a beam loaded at the middle (non-uniform bending) - experiment to determine Young’s modulus ‘E’(using pin and microscope) - elevation at the midpoint of a beam (uniform bending) - experiment to determine Young’s modulus ‘E’ (using scale and telescope). 1.2 Torsion - expression for torque per unit twist - work done in twisting a wire - torsional oscillation of a body – expression for time period – determination of rigidity modulus ‘G’ by torsion pendulum (Dynamic torsion method).	K1 – K5	13	1-5
2	Surface tension 2.1 Surface tension - explanation of surface tension based on molecular theory - work done in increasing the surface area - work done in blowing a bubble - angle of contact - pressure difference across a liquid surface – excess pressure inside a curved liquid surface 2.2 Experimental determination of surface tension and interfacial surface tension by drop weight method – Jaeger’s method - Quincke’s method - Variation of surface tension with temperature	K1 – K5	13	1-5
3	Fluid Dynamics 3.1 Viscosity - coefficient of viscosity - Poiseuille’s formula for the flow of liquid through a capillary tube – corrections to Poiseuille’s formula - Poiseuille’s method for determining coefficient of viscosity of a liquid (variable pressure head) – Terminal velocity and Stoke’s formula – Stoke’s method for the coefficient of viscosity of highly viscous liquids – Ostwald’s viscometer - variation of viscosity with temperature and pressure 3.2 Fluid motion - Stream line flow and turbulent flow - critical velocity - Reynold’s number - Euler’s continuity equation for unidirectional flow – Bernoulli’s principle and equation	K1 – K5	13	1-5
4	Waves and Oscillations 4.1 Wave motion – Characteristics of wave motion – longitudinal and transverse wave motion – Simple Harmonic Motion - Equation of a simple harmonic wave – differential equation of wave motion – Composition of two SHM of equal periods acting at right angles – Lissajous figures and its uses	K1 – K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
	4.2 Velocity and frequency of transverse waves along stretched strings - Law of transverse vibration of strings – Harmonics – Melde's experiment – Standing waves – Beats – Doppler effect			
5	Acoustics and Ultrasonics 5.1 Acoustics – Reverberation – Sabine's reverberation formula – determination of absorption coefficient – factors affecting the acoustics of buildings – Requisites for good acoustics 5.2 Ultrasonics – production of ultrasonic waves - Piezoelectric generator - Detection and applications of Ultrasonic waves.	K1 – K5	13	1-5

BOOKS FOR STUDY

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50 Duration: 1 hour 30 minutes

Section	Knowledge Level	Marks	Pattern
A	K1	10	10 x 1 = 10 marks (Multiple-choice All questions to be answered)
B	K2	10	5 x 2 = 10 marks (All questions to be answered in BRIEF)
C	K3, K4	20	1 x 20 = 20 marks (1 out of 2 questions to be answered - only theory) Each question will have 2 sub division with one K3 level and one K4 level question of equal weightage
D	K5	10	2 x 5 = 10 marks (2 out of 4 to be answered - only problems)

Other Components:

Total Marks: 50

Seminar/Presentation/Quiz/Assignments/Problem solving

All K1 – K5 levels to be assessed

End Semester Examination: Total Marks: 100

Duration: 3 hours

Section	Knowledge Level	Marks	Pattern
A	K1	20	20 x 1 = 20 marks (Multiple-choice All questions to be answered)
B	K2	20	10 x 2 = 20 marks (All questions to be answered in BRIEF)
C	K3, K4	40	2 x 20 = 40 marks (2 out of 4 questions to be answered - only theory) Each question will have 2 sub division with one K3 level and one K4 level question of equal weightage
D	K5	20	4 x 5 = 20 marks (4 out of 6 to be answered - only problems)

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To enable the students to understand the theoretical and practical knowledge required to perform general and electronic experiments
- To enhance students learning through hands-on experience
- To guide the students to observe and measure various physical quantities through scientific approach.
- To equip the students to interpret and report the measurement to draw valid conclusions
- To facilitate the students to analyze the results of the experiment with an aim to construct or design an equipment or a device for application.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical concepts with the experiments	K1, K2
CO2	apply the theoretical knowledge in both general and electronic experiments to acquire the necessary data.	K3
CO3	analyse and interpret the quantitative results utilizing mathematical and graphical verification	K4
CO4	determine the various physical properties using scientific instruments.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. Young's Modulus - Non – uniform bending (Pin and Microscope) 2. Potentiometer – Calibration of Voltmeter (Low Range) 3. Young's Modulus - Uniform Bending (Scale and Telescope) 4. Surface Tension and Interfacial Surface Tension - Drop Weight Method. 5. Rigidity Modulus using Torsion Pendulum (Dynamic torsion method) 6. Thermal Conductivity of a Bad Conductor - Lee's Disc 7. Determination of the Refractive Index of the Material of Solid and Liquid Prism – Spectrometer 8. Figure of Merit - Ballistic Galvanometer. 9. Characteristics of Zener diode and voltage regulation	K1-K6	39	1-5

(Effective from the academic year 2023–2024)

PHYSICS FOR MATHEMATICS I

CODE: 23PH/AC/PM13

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To impart fundamental knowledge in the concepts and laws of physics.
- To train the students in visualizing the Physics behind the characteristics of solids and liquids at different conditions.
- To inculcate practical knowledge related to the dynamic theories evolved in mechanics, viscosity and theory of relativity.
- To engage the students in cultivating physics-based problem-solving abilities in different scientific scenarios
- To encourage the students to apply acquired theoretical knowledge to solve realistic problems

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on elasticity, bending of beams and theories of surface tension and viscosity of liquids, mechanics, and the basic concepts of relativity.	K1
CO2	describe the elastic behaviour of solids, the physical properties of liquids that impact fluid motion, and explain the concepts of mechanics and relativity.	K2
CO3	apply the mathematical tools to solve simple and complex problems in physics	K3
CO4	examine the behaviour of rigid bodies and liquids utilizing theoretical concepts.	K4
CO5	formulate the knowledge gained in theory for real life and practical applications.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Mechanics I 1.1 Impulse-Impact-Conservation of linear momentum: Internal forces and momentum conservation – center of mass- examples- General elastic collision of particles of different masses. 1.2 Significance of conservation laws- law of conservation of Energy- concepts of work- power – energy – potential energy.	K1-K5	6	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Mechanics II 2.1 Simple Harmonic Motion: Periodic and Harmonic Motion- Formula for acceleration, velocity and displacement - Energy of a Harmonic Oscillator- oscillation in spring mass-springs in series and parallel. 2.2 Classical mechanics: Degrees of freedom and constraints - Generalized Coordinates - principle of virtual work - De Alembert's principle -Explanation of Lagrangian equation (No derivation) Application of Lagrangian equation in Atwood's machine and Simple pendulum.	K1-K5	7	1-5
3	Elasticity 3.1 Elastic properties: Hooke's law - Elastic limit moduli of Elasticity Poisson's ratio 3.2 Expression for Bending Moment - Depression at the loaded end of the cantilever – depression and elevation at the midpoint of a loaded beam (non-uniform and uniform bending) – Torsion in a wire – Torque per unit twist – torsional oscillations – Expression for period	K1-K5	6	1-5
4	Viscosity and Surface Tension 4.1 Viscosity: Coefficient of viscosity - Stream Line Flow and Turbulent Flow – Critical Velocity – Euler's Equation for unidirectional flow 4.2 Surface Tension: molecular theory of surface tension - Determination of Surface Tension by Drop Weight Method- Interfacial Surface Tension	K1-K5	7	1-5
5	Relativity 5.1 Inertial Frames of Reference – Newtonian Relativity – Galilean Transformation Equations 5.2 Postulates of Special Theory of Relativity- Lorentz Transformation Equations- Length Contraction - Time Dilation - Twin Paradox and Meson Paradox 5.3 Relativistic Momentum (no derivation) – Mass Energy Relation- Physical Significance.	K1-K5	13	1-5

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Experiments	CL	Hrs	CO
1. Determination of 'g' - Compound Pendulum. 2. Young's Modulus 'E' by Non-Uniform Bending- Pin and Microscope 3. Young's Modulus 'E' by Uniform Bending- Scale and Telescope 4. Rigidity Modulus 'G' - Torsional pendulum 5. Surface Tension and Interfacial Surface Tension – Drop Weight Method. 6. Determination of the Refractive Index of the material of a prism - Spectrometer. 7. Verification of Series and Parallel connections of resistance and Determination of Specific Resistance - Post Office Box 8. Characteristics of a Zener Diode 9. Verification of Newton's Law of Cooling for two liquids	K1-K5	39	1-5

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23PH/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1 (13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1** Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2** Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3** Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- Using the acquired knowledge on matrices to determine diagonalizable matrices, form similar matrices and use Cayley Hamilton theorem to find inverses
- To impart knowledge in differential and integral calculus for solving Mathematical problems in Physics
- To understand and solve various types of first order differential equations
- To appreciate the concept of Fourier series in expressing some functions as an infinite series
- To introduce the concept of Operations Research for solving Linear Programming Problems

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall basic mathematical concepts required for students pursuing Physics	K1
CO2	understand basic mathematical tools used for computations	K2
CO3	apply various techniques of calculus, matrices, differential equations, Fourier series and operation research to formulate and solve problems that are applied in physics	K3
CO4	analyze appropriate areas of applying mathematical tools in real life situations	K4
CO5	assess the techniques in Fourier Series, differential equations, calculus, matrices and Linear Programming for solving real life problems	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Properties of Matrices 1.1 Eigenvalues and Eigenvectors 1.2 Cayley-Hamilton Theorem 1.3 Similar Matrices 1.4 Diagonalization of Matrices Possessing Distinct Eigenvalues 1.5 Eigenvalues for Symmetric Matrices	K1- K5	12	CO1-5
2	Differential Calculus 2.1 Higher Derivatives - n th Derivative – Standard Results 2.2 Trigonometric Transformations 2.3 Formation of Equations Involving Derivatives 2.4 Liebnitz's Formula for n th Derivative - Problems involving Liebnitz's Formula Integral Calculus 2.5 Methods of Integration of Functions of the following Types: $\frac{1}{(x+p)\sqrt{ax^2+bx+c}}$; $\frac{1}{\sqrt{(x-a)(b-x)}}$; $\frac{1}{\sqrt{(x-a)(b-x)}} \frac{(x-a)}{\sqrt{(b-x)}}$	K1- K5	15	CO1-5
3	Differential Equations 3.1 Partial Differential Equation 3.2 Formation of Equations by Elimination of Constants and an Arbitrary Function 3.3 Definition of General, Particular, Complete and Singular Integral 3.4 Solutions of First Order Equations in their Standard Forms 3.5 Lagrange's Method of Solving of Linear Equations $Pp + Qq = R$	K1- K5	13	CO1-5

THERMAL PHYSICS AND STATISTICAL MECHANICS

CODE: 23PH/MC/TS23

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To impart knowledge of heat, work and energy, basic principles and theories pertaining to thermodynamics and the fundamental postulates of statistical mechanics.
- To support the students to understand the significance of the first and second laws of thermodynamics, connection between thermodynamics and statistical mechanics, working of heat engines and refrigerators and the basic aspects of classical statistics.
- To direct the students in applying the theoretical concepts to study heat conduction and radiation in a hot body, physical thermodynamic systems and macroscopic parameters of a system using the microscopic properties.
- To analyze the different modes of heat transfer, various thermodynamic variables needed to describe the state of a system, and differentiate between various techniques of producing low temperature, and the different types of statistics and their applicability based on the nature of the particles in the system.
- To drive the students in solving and justifying solutions related to problems in real thermodynamic systems and appreciate the role of thermodynamics in our daily life.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Acquire knowledge on the various modes of heat transfer, laws of thermodynamics, entropy of a system, thermodynamic potentials, Maxwell's thermodynamical relations, basics of cryogenics and the postulates of statistical mechanics.	K1
CO2	Describe conduction and radiation, the laws of thermodynamics and their applications, the methods of producing low temperatures, the connection between statistics and thermodynamics and the real-world applications of thermodynamics.	K2
CO3	Apply radiation laws to calculate the surface temperature of a star, Maxwell's relations to express unknown thermodynamic variable in terms of measurable thermodynamic variables, microscopic properties of a system to study the macroscopic parameters of a thermodynamic system.	K3
CO4	Deduce expressions related to Entropy of a system, Maxwell's relations of thermodynamical potentials and thermodynamic probability of a system.	K4
CO5	Evaluate and solve problems related to thermodynamic systems such as heat engines and refrigerators, and classical statistics.	K5

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate

UNIT	CONTENT	CL	Hrs	CO
1	Transmission of Heat 1.1 Modes of heat transfer – Conduction – Coefficient of thermal conductivity – Thermal conductivity of a good conductor – Thermal conductivity of a bad conductor. 1.2. Thermal radiation - Blackbody - Experimental arrangement to study energy distribution in black body spectrum – Experimental results – Planck's hypothesis - Derivation of Planck's radiation law - Deduction of Wien's distribution law, Rayleigh-Jeans law, Stefan's law, and Wien's displacement law from Planck's law – Solar constant – Temperature of the sun.	K1 – K5	11	1-5
2	Laws of Thermodynamics 2.1 Thermodynamic systems - Zeroth law of thermodynamics - Thermodynamic equilibrium - Concept of temperature - Thermodynamic processes - Internal energy - First law of thermodynamics. 2.2 Second Law of Thermodynamics: Kelvin-Planck and Clausius statements and their equivalence – Heat engine - Carnot's engine and efficiency - Thermodynamics of refrigeration and coefficient of performance.	K1 – K5	11	1-5
3	Entropy 3.1 Concept of Entropy - Entropy change in reversible and irreversible processes - Principle of increase of entropy – Temperature - entropy (TS) diagram - Technical importance of T-S Diagram – Entropy of a perfect gas. 3.2 Second law of thermodynamics in terms of entropy - expression connecting first and second laws of thermodynamics - Third law of thermodynamics: Nernst heat theorem – Heat death of universe.	K1 – K5	11	1-5
4	Thermodynamical Relationships 4.1 Thermodynamic potentials (definition) - Maxwell's thermodynamical relations – Applications of Maxwell's thermodynamical relations: first and second TdS equation – $C_p - C_v = R$ equation – Clausius-Clapeyron latent heat equation.	K1 – K5	7	1-5
5	Low Temperature Physics and Statistical Mechanics 5.1 Production of very low temperature - Joule Kelvin effect – porous plug experiment - Liquefaction of gases - Liquefaction of Helium - Peculiar properties of liquid Helium II - Adiabatic demagnetization of paramagnetic salt - Theory and experiment. 5.2 Phase space - Micro and macro states - Ensembles - Definition of thermodynamic probability - Relation between entropy and thermodynamic probability - Maxwell-Boltzmann distribution.	K1 – K5	12	1-5

OBJECTIVES OF THE COURSE

- To impart basic knowledge on the principles and theories relating to Mechanics.
- To enable the students to understand the Newtonian laws of motion, various theories of gravitation, conservation laws of momentum and energy, types of motion and the concepts of Lagrangian Mechanics.
- To guide the students in applying the concepts of forces, work, power and energy in real time situations.
- To equip the students to derive mathematical expressions related to various motion of regular and rigid bodies.
- To facilitate the students in solving problems and proposing empirical solutions in mechanics.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on laws of motion, gravitation, conservation laws of linear and angular momentum and energy, dynamics of rigid bodies and Lagrangian Mechanics.	K1
CO2	understand the Newtonian laws of motion, various theories of gravitation, conservation laws of momentum and energy, types of motion and the concepts of Lagrangian Mechanics.	K2
CO3	apply the theories and principles of mechanics to determine G, gravitational potential, the velocities of particles before and after collision, moment of inertia of various geometrical bodies, time period of compound and bifilar pendulum, time period of simple pendulum and Atwood's machine.	K3
CO4	Deduce various expressions and thereby analyse the laws of motion, gravitation, conservation laws of linear and angular momentum and energy, dynamics of rigid bodies and Lagrangian Mechanics.	K4
CO5	Evaluate and solve problems related to laws of motion, gravitation, conservation laws of linear and angular momentum and energy, dynamics of rigid bodies and Lagrangian Mechanics.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Laws of motion and Gravitation 1.1 Laws of motion: Newton's Laws – Forces – Equations of motion – Frictional force – Motion of a particle in a uniform gravitational field – Types of everyday forces in Physics. 1.2 Gravitation: Classical theory of gravitation–Kepler's laws, Newton's law of gravitation – Determination of G by Cavendish's method – Earth-moon system – Weightlessness – Earth satellites – Parking orbit – Earth density – Mass of the Sun – Gravitational potential – Velocity of escape – Satellite potential and kinetic energy –Einstein's theory of gravitation – Introduction –Principle of equivalence – Experimental tests of general theory of relativity – Gravitational red shift – Bending of light – Perihelion of mercury.	K1-K5	13	1-5
2	Conservation laws of linear and angular momentum 2.1 Conservation of linear and angular momentum - Internal forces and momentum conservation – Center of mass- Examples 2.2 General elastic collision of particles of different masses – System with variable mass – Examples. 2.3 Conservation of angular momentum – Torque due to internal forces – Torque due to gravity – Angular momentum about center of mass- Proton scattering by heavy nucleus.	K1-K5	13	1-5
3	Conservation laws of energy 3.1 Introduction - Significance of conservation laws - Law of conservation of energy concepts of work - Power – Energy. 3.2 Conservative forces – Potential energy and conservation of energy in gravitational and electric field - Examples 3.3 Non-conservative forces – General law of conservation of Energy.	K1-K5	13	1-5
4	Rigid Body Dynamics 4.1 Translational and Rotational motion - Moment of inertia - Kinetic energy of a body rotating about a fixed axis – Angular momentum of a rotating body – General theorems of moment of inertia – Examples. 4.2 Rotation about fixed axis – The Compound pendulum – Centre of suspension and centre of oscillation – The Bifilar Pendulum - Body rolling along a plane surface – Body rolling down an inclined plane. 4.3 Gyroscopic Precision - Gyrostatic applications.	K1-K5	14	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Lagrangian Mechanics 5.1 Generalized coordinates - Degrees of Freedom – Constraints. 5.2 Principle of Virtual Work and D’ Alembert’s Principle. 5.3 Lagrange’s Equation From D’ Alembert’s Principle – Application- Simple Pendulum – Atwood’s Machine.	K1-K5	12	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test: Total Marks: 50 Duration: 1 hour 30 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	10	10 x 1 = 10 marks (Multiple-choice All questions to be answered)
B	K2	10	5 x 2 = 10 marks (All questions to be answered in BRIEF)
C	K3, K4	20	1 x 20 = 20 marks (1 out of 2 questions to be answered - only theory) Each question will have 2 sub division with one K3 level and one K4 level question of equal weightage
D	K5	10	2 x 5 = 10 marks (2 out of 4 to be answered - only problems)

Other Components:

Total Marks: 50

Seminar/Presentation/Quiz/Assignments/Problem solving

All K1 – K5 levels to be assessed

End Semester Examination: Total Marks: 100**Duration: 3 hours**

Section	Cognitive Level	Marks	Pattern
A	K1	20	20 x 1 = 20 marks (Multiple-choice All questions to be answered)
B	K2	20	10 x 2 = 20 marks (All questions to be answered in BRIEF)
C	K3, K4	40	2 x 20 = 40 marks (2 out of 4 questions to be answered - only theory) Each question will have 2 sub division with one K3 level and one K4 level question of equal weightage
D	K5	20	4 x 5 = 20 marks (4 out of 6 to be answered - only problems)

OBJECTIVES OF THE COURSE

- To enable the students to understand the theoretical and practical knowledge required to perform general and electronic experiments.
- To enhance students learning through hands-on experience.
- To guide the students to observe and measure various physical quantities through scientific approach.
- To equip the students to interpret and report the measurement to draw valid conclusions.
- To facilitate the students to analyze the results of the experiment with an aim to construct or design an equipment or a device for application.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical concepts with the experiments.	K1, K2
CO2	apply the theoretical knowledge in both general and electronic experiments to acquire the necessary data.	K3
CO3	analyse and interpret the quantitative results utilizing mathematical and graphical verification.	K4
CO4	determine the various physical properties using scientific instruments.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. Determination of 'g', 'k' and 'I' - Compound Pendulum 2. Verification of Laws and Determination of frequency of tuning fork – and unknown mass - Sonometer 3. Rigidity Modulus - Determination of 'G' by Static Torsion 4. Specific Heat of Solid – Method of Mixtures – Applying Barton's Correction 5. Surface Tension – Capillary Rise method 6. Ammeter Calibration (High Range and Low range)- Potentiometer 7. Charge Sensitivity - Ballistic Galvanometer 8. Grating – Normal Incidence (i) Standardization of the Grating (N) (ii) Determination of the Wavelength of the prominent lines of the Mercury Spectrum. (iii) Dispersive Power of the Grating - Spectrometer 9. Determination of Resistance and Specific Resistance - Post Office Box	K1-K6	39	1-5

OBJECTIVES OF THE COURSE

- To deepen understanding on the fundamental laws and principles in physics.
- To equip students to study the theoretical concepts based on charges, geometrical and physical optics and the characteristics of Operational Amplifier.
- To elucidate the students with the concepts of electricity, magnetism, optics and electronics in realistic situations.
- To guide students to deduce expressions for various theories pertaining to physics using mathematical concepts.
- To allow students to examine concepts to resolve problems across multiple scientific contexts.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO 1	understand the fundamental principles of electricity, magnetism, optics and electronics.	K1
CO 2	describe the theory of charges in electric and magnetic field, optical aberrations, interference, diffraction, polarization and also the theory behind working of digital circuits.	K2
CO 3	illustrate the behavior of charges using Gauss's Law and Maxwell's electromagnetic equations, importance of different types of telescopes, significance of physical properties in optics and Boolean algebra.	K3
CO 4	analyze the gained knowledge to derive expression for electric field, electric potential, force on a current carrying conductor in a magnetic field, aberrations, determination of wavelength and De Morgan's Theorem.	K4
CO 5	evaluate problems in physics and in realistic situations utilizing theoretical concepts.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Electricity 1.1 Introduction – Coloumb’s law, electric flux, Gauss's law and proof – Differential form of Gauss's law - Applications of Gauss theorem- Infinite line of charge, uniformly charged solid sphere - Field due to a uniformly charged hollow cylinder. 1.2 Electric potential - Electric potential as a line integral of electric field, potential due to a point charge – Relation between electric field and electric potential – Work done in moving a charge (earthed inside and outside) – Capacitance - Capacitance of spherical capacitor.	K1 – K5	6	1-5
2	Magnetism 2.1 Magnetic induction – Force on a Charge in a Magnetic Field, in an electromagnetic Field (Lorentz Force) – Biot-Savart law – Ampere’s circuital law - Maxwell’s electromagnetic Equations (No derivation) – Physical significance of the equations. 2.2 Electromagnetism: Force on a current carrying conductor in a magnetic field – Torque on a current loop in a uniform magnetic field – Moving coil Ballistic Galvanometer – Theory, current and charge sensitivity of B.G.	K1 – K5	7	1-5
3	Geometrical Optics 3.1 Lens Aberrations: Monochromatic aberrations – Spherical aberration in lenses – Methods of minimizing spherical aberration- Coma, Astigmatism, distortion- Chromatic aberration – achromatic combination of lenses in contact and lenses separated by a distance. 3.2 Optical Instruments: Telescopes – Angular magnification of telescopes - Refractive astronomical telescope – Terrestrial telescope – Reflecting telescopes – Radio telescope – Hubble telescope.	K1 – K5	6	1-5
4	Physical Optics 4.1 Interference: Thin films - Plane parallel film – Interference due to reflected and transmitted light – Newton’s rings – Measurement of wavelength. 4.2 Diffraction: Theory of plane transmission grating - Normal incidence – Determination of wavelength - Polarization – Double refraction – Nicol prism – Optical activity – Uses of polaroids.	K1 – K5	7	1-5
5	Electronics 5.1 Introduction to amplifiers - Operational amplifier – Ideal Op-Amp - CMRR –Inverting and non-inverting Op-Amp - Summing, difference, integral and differential Op-Amp. 5.2 Boolean algebra- De Morgan’s Theorem – Verification - Algebraic simplification – Implementation of Boolean algebra into circuits - Karnaugh map up to four variables.	K1 – K5	13	1-5

ENVIRONMENTAL STUDIES

CODE : 23PH/GC/ES12

CREDITS :2

L T P : 2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3 (6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

OBJECTIVES OF THE COURSE

- To provide basic mathematical concepts required for students pursuing Physics
- To introduce problem solving skills using numerical methods
- To interpret the concept of derivatives and their applications geometrically
- To utilize Laplace transformations for solving differential equations
- To teach statistical tools using correlation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall basic mathematical concepts required for students pursuing Physics	K1
CO2	understand the concept of Laplace, improper integrals, numerical methods and statistics	K2
CO3	apply appropriate mathematical methods and techniques in solving problems	K3
CO4	analyze the applications of calculus, transforms, finite differences and correlation parameters	K4
CO5	evaluate the solution of improper integrals, differential equations using Laplace transforms, finite differences and correlation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Laplace Transform 1.1 Definition of Laplace Transform 1.2 Transforms of $f'(t)$ & $f''(t)$ 1.3 Transformation of Function e^{-at} , $\cos at$, $\sin at$ and t^n , where 'n' is a Positive Integer 1.4 First Shifting Theorem: Laplace Transforms of $e^{-at}\cos bt$, $e^{-at}\sin bt$ and $e^{-at}t^n$	K1-K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Inverse Laplace Transform 2.1 Inverse Laplace Transforms of Functions relating to $e^{-at} \cos bt$, $e^{-at} \sin bt$ and $e^{-at} t^n$ 2.2 Applications to Solutions of Ordinary Differential Equations with Constant Coefficients	K1-K5	13	CO1-5
3	Beta, Gamma Integrals 3.1 Definitions of Beta and Gamma Integrals 3.2 Recurrence Formula for Gamma Functions 3.3 Properties of Beta Functions 3.4 Relation between Beta and Gamma Functions	K1-K5	13	CO1-5
4	Finite Difference Methods 4.1 Finite Differences 4.2 Forward Difference Table 4.3 Interpolation Methods 4.4 Newton's Forward Formula 4.5 Newton's Backward Formula 4.6 Binomial Method 4.7 Lagrange's Formula	K1-K5	13	CO1-5

PATTERN OF ASSESSMENT

No Unit should be left out.

Continuous Assessment:

Total Marks: 50

Duration: 90 minutes

Section	Cognitive Level	Marks	Pattern
A	K1	6	$3 \times 2 = 6$ (4 questions to be set)
B	K2	4	$4 \times 1 = 4$ (4 MCQ to be set)
C	K3	15	$1 \times 15 = 15$ (2 questions to be set)
D	K4	15	$1 \times 15 = 15$ (2 questions to be set)
E	K5	10	$1 \times 10 = 10$ (2 questions to be set)

Other Components:

Total Marks: 50

Seminars / Quiz / Problem Solving / Assignment / Exhibition / Case Study / Mini Project

End-Semester Examination:

Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Marks	Pattern
A	K1	10	$5 \times 2 = 10$ (6 questions to be set)
B	K2	10	$10 \times 1 = 10$ (10 MCQ to be set)
C	K3	30	$2 \times 15 = 30$ (4 questions to be set)
D	K4	30	$2 \times 15 = 30$ (4 questions to be set)
E	K5	20	$2 \times 10 = 20$ (4 questions to be set)

TOTAL TEACHING HOURS:52

OBJECTIVES OF THE COURSE

- To impart fundamental knowledge of digital principles as applied to microprocessors, computers and various digital devices.
- To enable the student to understand combinational and sequential logic circuits and their use in digital circuits.
- To Familiarize the students with the concepts of Flip Flops, registers and counters.
- To expose the students to the concept of Operational amplifier and its applications.
- To facilitate the students to design simple linear and nonlinear circuits using op-amp.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the fundamental concepts of number systems, logic gates, Boolean algebra, K map and relate them with the digital circuits.	K1
CO2	Explain the working of arithmetic circuits, Multiplexer, demultiplexer, Flip Flops and operational amplifier.	K2
CO3	Construct and demonstrate the Combinational and sequential circuits, and operational amplifier circuits.	K3
CO4	Analyze the operation of various combinational and sequential circuits including Op-Amp circuits.	K4
CO5	identify basic requirements for a design application and their role in the digital system design.	K5

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate

UNIT	CONTENT	CL	Hrs	CO
1	Number Systems, Boolean Algebra and K-map 1.1 Introduction – Analog and digital signals – Digital circuit – Decimal - Binary - Octal and Hexa number systems - Binary arithmetic – Principles of addition – Subtraction- 1s complement and 2s complement method - Multiplication and division. 1.2 De Morgan's Theorem - Implementation of Boolean algebra into circuits - Basic logic gates, NAND, NOR, EX-OR - Fundamental products – SOP and POS forms - Karnaugh Map - Simplification up to four variables (SOP Only) - Don't care conditions - Realization of logic circuits.	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Digital Circuits 2.1 Arithmetic Circuits: Half adder – Full adder – Half subtractor – Full subtractor - Parallel binary adder. 2.2 Combination Circuit: Introduction - Multiplexers (4:1) and demultiplexers (1:4), decoder (3-line-to-8-line), BCD to seven segment decoders, encoder (8-line-to-3-line). 2.3 Semiconductor memories: Introduction - ROM, PROM, RAM - Flip flop as a RAM cell.	K1- K5	11	1-5
3	Flip - Flops, Registers and Counters 3.1 Flip-Flops: Introduction- SR - Clocked SR – D- JK - JK Master Slave - T - Flip-Flops and their truth tables. 3.2 Registers and Counters: Shift registers – Shift right - Shift left registers - Ripple counter – Mod-2, Mod-8, Mod-16 counters - Binary ripple counter (4 bit up counter - 4 bit down counter) - Decade counter.	K1- K5	12	1-5
4	Operational Amplifier 4.1 Operational Amplifier - Differential Amplifier – CMRR – Virtual Ground – Non-inverting – Inverting modes of operation – Gain equation. 4.2 Operational amplifier application – Adder, subtractor - Scale and sign changer – Differentiator – Integrator – Voltage follower – Comparator - Electronic analog computation – Solution of simultaneous equations – Differential equation.	K1- K5	10	1-5
5	D/A and A/D converters 5.1 Introduction - Binary Weighted resistor D/A converter – R–2R resistive ladder D/A converter. 5.2 Analogue to Digital: Counter type A/D converter - A/D conversion using voltage to frequency converter - Parallel comparator A/D converter.	K1- K5	7	1-5

OPTICS AND SPECTROSCOPY

CODE:23PH/MC/OS34

CREDITS:4

L T P:4 1 0

TOTALTEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To expose the students with fundamental principles of light.
- To enable the students to understand various phenomena of light waves.
- To provide a clear idea about the design of various optical systems.
- To equip students to apply the principles of optics in relevant fields.
- To make the student understand spectra and few basic spectroscopic techniques.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basics of various phenomena in geometrical, wave optics and spectroscopy.	K1
CO2	understand the behavior of light in different mediums, origin of spectra and characterization techniques.	K2
CO3	examine the differences in the important phenomena namely interference, diffraction and Polarization and properties of spectra, and apply the knowledge in day-to-day life.	K3
CO4	explain the theory of optical systems and the methods to minimize aberrations and to illustrate the theory associate with IR and NMR.	K4
CO5	develop problem solving Skill in optics by selecting the appropriate equations and performing numerical or analytical calculations and to relate the principle of optics in IR and NMR spectroscopy.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Geometrical optics 1.1 Fermat's principle of least time - Rectilinear propagation of light - Reversibility of the path of the rays of light. 1.2 Thick lenses – Focal length, critical thickness, power and cardinal points of a thick lens. 1.3 Lens aberrations: Monochromatic aberrations – Spherical aberration – Coma - Astigmatism - Curvature of the field – Distortion – Chromatic aberrations - Methods of minimizing aberrations. Eyepieces: Advantage of an eyepiece over a simple lens – Huygen's eyepiece. Prism: Dispersion - Angular dispersion - Achromatic combination of prisms (deviation without dispersion) - Dispersion without deviation.	K1- K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Interference 2.1 Huygen's principle of wavefront propagation and its limitations. 2.2 Division of wave front: Fresnel's biprism – Theory- Fringes with white light - Division of amplitude : Interference in thin films due to reflected light – Colours of thin films - Newton's rings – Theory. 2.3 Interferometers: Michelson's Interferometer – Determination of the wavelength of a monochromatic source of light.	K1- K5	13	1-5
3	Diffraction 3.1 Fresnel's assumptions – Zone plate - Action of zone plate for an incident spherical wave front- Differences between a zone plate and a convex lens. 3.2 Fresnel type of diffraction: Diffraction pattern due to a straight edge – Positions of maximum and minimum intensities – Diffraction due to a narrow slit. Fraunhofer type of diffraction: Fraunhofer diffraction at a single slit- Plane diffraction grating – Theory- Experiment to determine wavelengths – Width of principal maxima. 3.3 Resolving power of optical instruments: Rayleigh's criterion for resolution –Limit of resolution for the eye-resolving power of (i) telescope (ii) grating.	K1- K5	13	1-5
4	Polarization 4.1 Double Refraction - optic axis principal plane – Huyghen's explanation of double refraction in uniaxial crystals. 4.2 Elliptically and circularly polarized light – Quarter wave plate - half wave plate - Production and detection of circularly polarized light and elliptically polarized light. Optical activity- Fresnel's explanation – Specific rotation – Laurent half shade polarimeter - Experiment to determine specific rotatory power.	K1- K5	13	1-5
5	Spectroscopy 5.1 Characteristics of electromagnetic spectrum – The quantization of energy – Regions of the spectrum – Representation of spectra – Basic elements of practical spectroscopy. 5.2 Infra-Red Spectroscopy - Properties - Origin of Infra-Red spectra - IR spectrophotometer. 5.3 Nuclear Magnetic Resonance – Introduction – Theory - Experimental arrangement - Application in inorganic chemistry - Chemical shift.	K1- K5	13	1-5

OBJECTIVES OF THE COURSE

- To enable the students to understand the theoretical and practical knowledge required to perform general and electronic experiments.
- To enhance students learning through hands-on experience.
- To guide the students to observe and measure various physical quantities through scientific approach.
- To equip the students to interpret and report the measurement to draw valid conclusions.
- To facilitate the students to analyze the results of the experiment with an aim to construct or design an equipment or a device for application.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical concepts with the experiments.	K1, K2
CO2	apply the theoretical knowledge in both general and electronic experiments to acquire the necessary data.	K3
CO3	analyse and interpret the quantitative results utilizing mathematical and graphical verification.	K4
CO4	determine the various physical properties using scientific instruments.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. Determination of the Frequency of the Tuning Fork using Transverse and Longitudinal Mode of Vibrations of the String - Melde's Apparatus 2. Determination of Absolute Capacity of a Condenser - Ballistic Galvanometer 3. Determination of Resistance and Specific Resistance - Potentiometer 4. Conversion of Low Range Ammeter to High Range Ammeter - Multimeter 5. Dispersive Power of the Prism and Cauchy's Constants - Spectrometer 6. Determination of radius of curvature and focal length of the lens - Newton's Rings 7. Verification of perpendicular axes theorem - Bifilar Pendulum 8. Absolute Determination and Comparison of Coefficient of Viscosities of Liquids – Poiseuille's Method 9. Determination of H and B - Field along the axis of the Coil	K1-K6	39	1-5

OBJECTIVES OF THE COURSE

- To impart basic knowledge on elasticity and other properties of matter.
- To train the students to acquire the basics of surface tension and viscosity.
- To enable the students to understand moment of inertia and the oscillation of a body.
- To familiarise the students on the wave nature of light.
- To illustrate the students to the concept of special theory of light.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic ideas of physical properties of different states of matter, motion of a rigid body, relativity and wave nature of light.	K1
CO2	understand the elastic nature of solids, surface tension, viscosity of liquids, oscillation of a rigid body, constant nature of velocity of light in free space and physical optics.	K2
CO3	apply the knowledge obtained to determine the bending moment, modulus of elasticity, coefficient of viscosity, surface tension, period of oscillation, transformation equation and wavelength.	K3
CO4	study the distinguishing characteristics of solid, liquid and light.	K4
CO5	impart analytical skills to solve problems related to properties of matter, liquids, relativity and wave nature of light.	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Properties of Matter 1.1 Elasticity: Moduli of elasticity – Poisson’s ratio- Young’s modulus – Bending of beams - Expression for bending moment - Depression at the loaded end of the cantilever - Depression and elevation at the mid-point of a loaded beam - Torsion in a wire – Torsional oscillations – Torque per unit twist- Expression for period.	K1-K5	6	1-5
2	Surface Tension and Viscosity 2.1 Introduction - Experimental determination of surface tension and interfacial surface tension by drop weight method – Variation of surface tension with temperature. 2.2 Viscosity - Streamline and turbulent flow – Critical velocity - Expression for critical velocity- Poiseuille’s method for determining coefficient of viscosity of a liquid (Variable Pressure Head) - Variation of viscosity with temperature.	K1-K5	7	1-5
3	Mechanics 3.1 Dynamics: Moment of Inertia – Definition - Compound pendulum - Expression for the period of oscillation - Centre of suspension and Centre of oscillation – Minimum period of oscillation of a compound pendulum - Determination of ‘G’.	K1-K5	6	1-5
4	Relativity 4.1 Newton’s laws of motion and its limitations - Inertial frames of reference – Newtonian relativity – Galilean transformation equations. 4.2 Postulates of special theory of relativity - Lorentz transformation equations - Length contraction - Time dilation - Twin paradox and Meson paradox 4.3 Relativistic Momentum (no derivation) – Mass-Energy relation- Physical significance.	K1-K5	13	1-5
5	Optics 5.1 Interference: Introduction - Interference due to reflected light – Newton’s rings – Measurements of wavelength - Air wedge – Determination of diameter of a thin wire by air wedge. Diffraction: Introduction - Fraunhofer diffraction - Transmission grating - Normal incidence – Determination of wavelength. 5.2 Polarisation: Introduction - Plane of polarization - Polarisation by refraction - Brewster’s law - Polarization by reflection - Double refraction – Nicol prism – Nicol prism as a polarizer and analyser – Polaroids - Uses of polaroids	K1-K5	7	1-5

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To impart introductory knowledge of organic compounds and concepts in organic chemistry
- To facilitate learning of the fundamentals of polymer chemistry
- To enable understanding the important structural aspects and functions of amino acids, proteins and carbohydrates
- To instil knowledge about the kinetics of zero, first and second order reactions and the effect of temperature on rates of reactions.
- To introduce the basics of acid-base theories and buffer solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify various organic functional groups, label compounds, define terms related to polymers, biomolecules, kinetics and ionic equilibrium	K1
CO2	compare types of organic intermediates and reactions, indicate the uses of polymers and study of ionic equilibria, discuss structures of biomolecules and summarise the kinetics and equilibrium conditions of reactions	K2
CO3	classify molecules and calculate various physical parameters of compounds	K3
CO4	predict functionality of different organic molecules, biomolecules and polymers, differentiate between various reactions using kinetics and analyse the strength of acids and bases	K4
CO5	evaluate and estimate physical parameters to study reaction mechanisms of various molecules	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Organic Chemistry 1.1 Identification of common functional groups in Organic compounds (alcohols, amines, alkyl halides, aldehydes, ketones, carboxylic acids, esters and amides) 1.2 Nature of bond fission- homolytic and heterolytic, types of reagents - nucleophile and electrophile (examples) 1.3 Types of intermediates - carbocations, carbanions and free radicals - definition, structure and examples 1.4 Substitution, Addition and Elimination Reactions- definition with an example each	K1-K4	6	1-4
2.	Polymer Chemistry 2.1 Classification of Polymers, types of polymerisations - addition (cationic, anionic and free radical mechanism) and condensation 2.2 Thermosetting and Thermoplastics –Definition with examples, Structure and Applications of Polyethylene, Polyvinylchloride, Nylon 66 and Bakelite, Natural and synthetic rubber, vulcanisation of rubber 2.3 Biodegradable and non-biodegradable polymers	K1-K5	10	1-5
3.	Chemistry of Biomolecules 3.1 Amino acids – Classification based on R groups, Zwitter ion and isoelectric point- definition and illustrations, chemical reactions of amino acids- Ninhydrin test 3.2 Polypeptides-Introduction and nomenclature, Proteins-Structure (primary, secondary, tertiary and quaternary) and functions, Denaturation and Renaturation of proteins 3.3 Carbohydrates- Classification, structure of Glucose and Fructose –Fischer and Haworth projections, Structure and uses of Maltose and Sucrose, Starch-structure and reaction with iodine, Uses of starch and cellulose 3.4 Analysis for carbohydrates- Molisch, Barfoed, Tollen's and Fehling's tests, preparation of Osazone derivative	K1-K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
4.	Chemical Kinetics 4.1 Rate of reaction, Order and Molecularity 4.2 Zero order, First order, Pseudo-unimolecular and Second order reactions. 4.3 Determination of order – Graphical, Half - life, Integrated rate equation and Ostwald's isolation methods 4.4 Energy of activation - Effect of temperature on reaction rates-Arrhenius equation	K1-K5	7	1-5
5.	Ionic Equilibrium 5.1 Acid-base concept - Arrhenius, Lowry Bronsted and Lewis Concepts 5.2 Strength of acids and bases- Dissociation constants of acids (K_a), bases (K_b) and water (K_w), pK_a , pK_b and pK_w 5.3 Definition of pH and pOH, significance of pH scale 5.4 Buffer solutions – Types, buffer action, Derivation and importance of Henderson- Hasselbach equation	K1-K5	6	1-5

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To enable understanding of the principles of biochemistry through laboratory techniques
- To impart the skills required to perform various chemical reactions in a laboratory
- To instill understanding of the classification of biomolecules based on their structure and property
- To introduce the principles behind the techniques involved

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the procedure for the analysis of carbohydrates, amino acids and proteins.	K1, K2
CO2	identify various carbohydrates, amino acids and proteins based on their structure and property	K3
CO3	distinguish various carbohydrates, amino acids and proteins based on the structural characteristics	K4
CO4	perform chemical reactions in a laboratory according to standard procedure and safety precautions	K5
CO5	analyse a given organic compound qualitatively and identify carbohydrates, amino acids and proteins	K6

UNIT	CONTENT	CL	Hrs	CO
1.	Qualitative Analysis of Carbohydrates 1.1 Reactions of Carbohydrates Glucose, Fructose, Maltose, Sucrose and Starch 1.2 Identification of Unknown Organic Compound	K1-K6	13	1-5
2.	Qualitative Analysis of Amino acids 2.1 Reactions of Amino Acids - Reactions of Tryptophan, Tyrosine, Arginine and Cysteine 2.2 Identification of Unknown Organic Compound	K1-K6	13	1-5
3.	Qualitative Analysis of Proteins 3.1 Reactions of Proteins - Reactions of Casein and Egg Albumin 3.2 Identification of Unknown Organic Compound	K1-K6	13	1-5

MATHEMATICAL PHYSICS

CODE:23PH/MC/MP44

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To impart knowledge about various mathematical tools employed to study physics problems.
- To guide students to Understand Vector calculus and discuss in detail the divergence, curl and gradient.
- To enable students to learn various mathematical techniques.
- To facilitate students to apply the knowledge of vector integrations and differentiation equations to physics problems.
- To appreciate the Calculus of real variable is extended to complex variables and various interesting results are discussed.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on basics of vector calculus and complex variables.	K1
CO2	understand divergence, gradient and curl and their physical interpretation, Vector differentiation and integration, divergence theorem, Green's theorem, Stokes' theorem and appreciate its applications, math of complex number and application of Cauchy-Riemann Equations.	K2
CO3	apply the mathematical methods into various physical systems.	K3
CO4	Perform vector differentiation and integration, analyze the vector fields and apply to Electro-Magnetic fields.	K4
CO5	Develop problem solving skills and appreciate the significance of mathematical methods in Physics.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Vector Calculus 1.1 Scalar point function and vector point function – Gradient of a scalar field - Geometrical meaning of gradient, normal - Normal and directional derivatives. 1.2 Vector differentiation – Determination of velocity and acceleration from position vector - Partial differentiation of vectors	K1- K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Vector Analysis 2.1 The divergence of a vector function – Physical interpretation of divergence - The curl or rotation of a vector function - Physical meaning of Curl – Directional derivative 2.2 Gauss' law in differential form-Relations between Gradient, Divergence and Curl – Electrostatic Potential and Field – Maxwell's Equations.	K1- K5	13	1-5
3	Vector Integration 3.1 Vector Integration: Ordinary integrals of vectors - Line integrals - Surface integrals - Volume integrals. 3.2 Gauss's Divergence Theorem - Statement and physical interpretation - Stoke's theorem and Green's theorem (Statement Only) - Poisson's equation and Laplace's equations - Their applications in Gravitation, Hydrodynamics and Electromagnetism.	K1- K5	13	1-5
4	Differential Equations 4.1 Initial and boundary value problems - Applications of first order differential equations - Falling body problems - Electrical circuits (RL and RC) – Growth and decay problems 4.2 Second order differential equations with constant coefficients: The characteristic equation – General solutions - Applications of second order differential equations - (i) System of springs (ii) Electrical circuits (LCR).	K1- K5	13	1-5
5	Complex Analysis 5.1 Complex numbers – fundamental laws of algebra on complex numbers – Argand diagram – Properties of moduli – Arguments – Geometry of complex numbers – General equations of line and circle. 5.2 Functions of a complex variable – Continuity and differentiability – Analytic function – Cauchy Riemann equation – Laplace equation – Harmonic function - Elementary function - Exponential, trigonometric, logarithmic function and branch points.	K1- K5	13	1-5

OBJECTIVES OF THE COURSE

- To enable the students to understand the theoretical and practical knowledge required to perform general and electronic experiments.
- To enhance students learning through hands-on experience.
- To guide the students to observe and measure various physical quantities through scientific approach.
- To equip the students to interpret and report the measurement to draw valid conclusions.
- To facilitate the students to analyze the results of the experiment with an aim to construct or design an equipment or a device for application.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical concepts with the experiments.	K1, K2
CO2	apply the theoretical knowledge in both general and electronic experiments to acquire the necessary data.	K3
CO3	analyse and interpret the quantitative results utilizing mathematical and graphical verification.	K4
CO4	determine the various physical properties using scientific instruments.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. Resolving Power of Grating - Spectrometer 2. Newton's Law of Cooling – (i) Verification (ii) Determination of Specific Heat Capacity of a Liquid (iii) Determination of Emissivity of the Surface 3. Determination of Specific Heat Capacity of a Liquid – Using Joule's Calorimeter and Determining Resistance of the Coil using P.O Box – Applying Barton's Correction 4. Determination of Self Inductance using LCR Resonance Circuit 5. EMF of a thermocouple - Potentiometer 6. Comparison of Capacitance – Ballistic Galvanometer 7. Latent Heat of Fusion of Ice – Applying Barton's Correction 8. Determination of Specific Rotatory Power of given solution - Polarimeter 9. Characteristic RC Coupled Amplifier	K1-K6	39	1-5

OBJECTIVES OF THE COURSE

- To impart basic knowledge on the principles of Physics in electricity, magnetism and electronics.
- To familiarize students with interaction of light waves through LASER, MASER and fibre optics.
- To expose to the concept of Boolean algebra, k map and operational amplifiers.
- To guide the students to understand the algebraic operations and its implementations in digital circuits.
- To facilitate the students to appreciate the significance of physics in day-to-day life.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the theoretical and experimental background of electricity and magnetism and electronics.	K1
CO2	understand the concepts of electricity and magnetism, LASER, characteristics of optical fibre and the working of digital circuits.	K2
CO3	apply the theoretical concepts and appreciate its significance in the related fields.	K3
CO4	evaluate important parameters in the field of electricity, magnetism, fibre optics and to analyse digital circuits.	K4
CO5	develop problem solving skills by applying the theory pertaining to different field of physics.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Electricity 1.1 Coulomb's Law of inverse squares - Flux of electric field - Gauss's law –Application of Gauss's law - To determine field of a point charge, spherical charge distribution, infinite line charge distribution and cylindrical charge distribution. 1.2 Conservative nature of electrostatic field – Electric field – Electric potential – Potential at a point due to point charge - Relation between potential and field strength. Capacitance: Principle - Capacitance of a spherical plate capacitor.	K1- K5	8	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Magnetism 2.1 Magnetic field - Force on a charge in a magnetic field - Force on a charge in an electromagnetic field (Lorentz Force) – Biot-Savart law- Maxwell's electromagnetic equations (no derivations) - Physical significance of the equations. 2.2 Torque on a current loop - Force on a current carrying conductor in a magnetic field – Moving coil Ballistic Galvanometer - Figure of merit of Ballistic Galvanometer for charge and current sensitivity.	K1- K5	7	1-5
3	Properties of Magnetic Materials 3.1 Magnetization - Relation between three electric vectors B, H and M - Magnetic susceptibility - Relation between relative permeability and susceptibility- Magnetic properties of materials - Dia, para and ferro - Electron theory of magnetism. 3.2 Hysteresis - Magnetometer method of drawing hysteresis curve (Horizontal Model) - Energy loss – Retentivity - Coercivity - Uses of hysteresis curves.	K1- K5	7	1-5
4	Modern Physics 4.1 MASER: Introduction - Description and working of Ammonia MASER – Applications. LASER : Spontaneous and stimulated emission- – Population inversion, pumping and active system– Carbon dioxide LASER - Uses of LASER. 4.2 Holography: Principles – Recording of holograms – Reconstruction of hologram – Applications. Fibre Optics: Principles – Structure and classification – The Numerical aperture – Applications.	K1- K5	9	1-5
5	Electronics 5.1 Introduction to Amplifiers - Operational Amplifier - Ideal Op - Amp - CMRR - Inverting and non-inverting Op-Amp – Summing - Difference - Integrator and differentiator Op - Amp. 5.2 Boolean Algebra- De Morgan's Theorem – Verification. Algebraic simplification – Implementation of Boolean algebra into circuits.	K1- K5	8	1-5

PHYSICS PRACTICAL II

CODE:23PH/AC/P242

CREDITS:2

L T P:0 0 3

TOTAL HOURS:39

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data.	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

EXPERIMENTS	CL	Hrs	CO
1. Rigidity Modulus 'G' by Static Torsion 2. Determination of Radius of Curvature of a Lens - Newton's Rings 3. Grating – Normal Incidence - Determination of Wavelengths (λ) of Prominent lines of mercury spectrum - Spectrometer 4. Determination of Specific Heat of a Liquid – Joule's Calorimeter – Applying Half Time Correction 5. Ammeter Calibration (Low Range) - Potentiometer 6. OPAMP- Inverting and Non Inverting Amplifier 7. Specific Heat Capacity of a Solid – Method of Mixtures 8. Determination of Specific Resistance - Carey Foster's bridge 9. Coefficient of Viscosity – Poiseuille's Method	K1-K5	39	1-5

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23PH/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

BOOKS FOR REFERENCE

B.Sc. Physics Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

FUNDAMENTALS OF CHEMISTRY II

CODE: 23CH/AC/FC43

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To facilitate learning of various concentration terms and apply them for numerical calculations
- To enable comprehension of the basics of electrochemistry
- To introduce the importance of phase diagrams
- To provide fundamental knowledge of coordination complexes
- To instil understanding of the basics of thermoanalytical methods

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Define the terms prevalent in Mole Concept, Electrochemistry, Phase rule, Coordination Chemistry and Thermoanalytical methods	K1
CO2	Explain the importance of concentration terms, differentiate the types of electrochemical cells, electrodes, reactions and batteries, indicate phase changes in systems, describe the behavior of complexes and instrumentation of thermoanalytical techniques	K2
CO3	Calculate equivalent weights, number of moles, normality, molarity, molality, ppm and ppb, number of degrees of freedom, magnetic moment of complexes, sketch thermograms	K3
CO4	Analyse and categorise solutions and substances based on concentration terms, examine electrochemical behavior of different metals and their salts, outline the phases present in different systems, investigate varied structures of complexes and thermal behavior of compounds	K4
CO5	Propose preparation of solutions of varied concentrations, devise construction of electrochemical cells, reconstruct phase diagrams and formulate complexes	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Mole concept 1.1 Definition of mole and applications of mole concept in stoichiometry 1.2 Equivalent weight – calculation of equivalent weight of oxidants and reductants in redox reactions, acids and bases, molecular volume 1.3 Concentration terms used to express strength of solutions- Normality, Molarity, Mole fraction and Molality, ppm and ppb	K1-K5	7	1-5
2.	Electrochemistry 2.1 Definition of specific, equivalent & molar conductance, effect of dilution on Conductance 2.2 Ostwald dilution law, Kohlrausch's law – applications 2.3 Conductometric titration – principle and types 2.4 Electrochemical cells - definition, representation of cells and cell reactions, types of electrodes-standard hydrogen and calomel electrodes, Nernst equation- significance, standard electrode potential and its measurement, electrochemical series-applications 2.5 Commercial cells – Primary and Secondary cells, Fuel cells- Hydrogen-Oxygen, Batteries- Lead storage battery, Nickel-Cadmium battery	K1-K5	10	1-5
3.	Phase rule 3.1 Definitions - Phase, component and degree of freedom, Derivation of phase rule. 3.2 Application of phase rule to one component systems (water and carbon dioxide) 3.3 Two component systems: simple eutectic (Pb-Ag) and (Bi-Cd)	K1-K5	6	1-5
4.	Coordination Chemistry 4.1 Coordination complexes - definition, types of ligands, IUPAC nomenclature of simple mononuclear complexes 4.2 Isomerism – Structural - ionisation, linkage, ligand, coordination and hydrate isomerism. Stereoisomerism-geometrical and optical isomerism of four coordinated complexes. 4.3 Pauling theory (VBT) - geometry of complexes based on hybridization (coordination number 4 and 6) magnetic moment of complexes. 4.4 Biological coordination compounds - structural features (figurative representation only), functions of Haemoglobin and Vitamin B12	K1-K5	8	1-5
5.	Thermoanalytical Methods 5.1 TGA and DTA - Principle, Instrumentation, methods of obtaining Thermograms, factors affecting TGA/DTA, Thermal analysis of silver nitrate, calcium oxalate and calcium acetate 5.2 DSC - Principle, Instrumentation and applications.	K1-K5	8	1-5

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To impart basic knowledge on the architecture, working principles of microprocessor 8085 and microcontroller 8051.
- To enable the students to understand the BUS structure, architecture and its working, the various instructions and addressing modes, interfacing techniques and interrupt principles of microprocessor 8085.
- To train the students in examining the instructions of microprocessor 8085 and identify the addressing mode, length of instruction of every instruction and the operation modes of the interfacing devices.
- To equip the students to analyze the working mechanism of CPU, logical flow of program, functions of interfacing devices and various interrupts of microprocessor 8085.
- To facilitate the students in writing assembly language program in microprocessor 8085 to solve and evaluate various arithmetic and logical problems.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire basic knowledge on the architecture, working principles of microprocessor 8085 and microcontroller 8051.	K1
CO2	understand the BUS structure, architecture and its working, the various instructions and addressing modes, interfacing techniques and interrupt principles of microprocessor 8085, concept of embedded system.	K2
CO3	examine the instructions of microprocessor 8085 and identify the addressing mode, length of instruction of every instruction and the operation modes of the interfacing devices.	K3
CO4	analyze the working mechanism of CPU, logical flow of program, functions of interfacing devices and various interrupts of microprocessor 8085 and compare the functions of microprocessors and microcontrollers.	K4
CO5	write assembly language program in microprocessor 8085 to solve and evaluate various arithmetic and logical problems	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Central Processing Unit (CPU) 1.1 Bus Structure - Address, data and control system bus - Memory and I/O interface block diagram - CPU 8085. 1.2 Architecture: General purpose registers, ALU, accumulator, program counter, instruction register, stack, subroutines, push/pop operations, flag register.	K1-K5	12	1-5
2	Addressing Modes and Instruction Set 2.1 Addressing Modes: Direct, register, immediate, register in-direct addressing modes. 2.2 Instruction Set: Data transfer group, arithmetic group, and logic group instruction.	K1-K5	10	1-5
3	Software Program 3.1 Arithmetic Operations: Addition, subtraction, multiplication and division of single byte numbers - Square root of a positive single byte number. 3.2 Sorting an array in ascending/descending order. 3.3 Conversion of BCD to HEX and vice versa.	K1-K5	10	1-5
4	Interfacing I/O devices and Interrupt Circuit 4.1 Type of Interfacing Devices: Address decoding for I/O - Input and output ports. 4.2 8085 Interrupt circuit - Restart instructions - Hardware interrupts - Interrupt priorities.	K1-K5	10	1-5
5	Micro-Controller 5.1 Micro-Controller - 8051 – Architecture – Applications. 5.2 Embedded system concept - Embedded microcontroller Pic series – Applications.	K1-K5	10	1-5

SOLID STATE PHYSICS

CODE: 23PH/MC/SS54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To provide knowledge of crystal structure, crystal bonding and crystal imperfections and their effect on the properties of crystalline solids, theoretical models predicting the electrical and magnetic behaviour, and superconductors.
- To support the students in comprehending the relation between crystal structure and bonding, and the influence of bonding and defects on the properties of crystals, classification of solids based on their band gap, the electron theories for electrical and thermal conduction in metals, origin of magnetism, the different classifications of magnetic materials and the basic properties of superconductors.
- To help the students in applying the knowledge acquired on crystal structure, interatomic binding, and defects to understand their properties, popular theoretical models to explain observed electric and magnetic behaviour, superconductors to understand their novel applications.
- To encourage the students in developing critical thinking, analytical reasoning, and problem-solving skills.
- To enable the students in appreciating the significance of solid-state physics in many technological applications and realizing that solid-state physics is the gateway to research in material science.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the definitions and concepts connected with crystal structure, interatomic bonding, electric and magnetic behaviour, and superconductivity.	K1
CO2	summarize regular crystal structures, how X-ray diffraction can be used to find structure of crystalline solids, bonding mechanisms using their structure, the impact of bonding and imperfections on the properties of solids, the conductivity of different types of solids based on their band gap, the theories governing the electrical and magnetic properties, the basics of Superconductors and the relevance of solid-state in present-day research.	K2
CO3	utilize the knowledge of crystal structure to understand the properties of solids, the essence of the electron theories to elucidate conduction of heat and current, the magnetism theories to comprehend the origin of magnetism in matter, and the reason for superconducting property.	K3

COs	DESCRIPTION	CL
CO4	do mathematical computations based on theoretical models to describe the properties of solids.	K4
CO5	develop skills in critical thinking, analytical reasoning and solving problems related to solid state physics.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Crystal Structure 1.1 Crystalline and amorphous solids – Crystal lattice and translation vectors - Unit cell vs primitive cell - Basis - Symmetry operations – Five-fold rotation symmetry - Point group and space group - Bravais lattices – Crystal planes and Miller indices. 1.2 Bragg’s Law – Diffraction of crystals by X- rays.	K1 – K5	13	1-5
2	Crystal Bonding and Crystal Defects 2.1 Bonding in solids – Types of bonding - Primary and secondary bonds - Ionic bonding - Properties of ionic solids - Covalent bond – Properties of covalent solids - Metallic bond – Properties of metallic solids – Bond length and bond strength. 2.2. Classification of defects in solids – Types of point defects - Schottky and Frenkel defects - Equilibrium concentration of Schottky and Frenkel defects in Ionic crystals – Effects of crystal imperfections on the electrical, optical, and mechanical properties of solids.	K1 – K5	13	1-5
3	Electrical Properties of Solids 3.1 Classical free electron theory of metals – The Free electron gas – Drude-Lorentz free electron theory – Ohm’s law – Expressions for electrical conductivity – Thermal conductivity - Wiedemann and Franz ratio. 3.2 Band gaps – Metals, semiconductors, and insulators – Fermi level and Fermi surface – Intrinsic semiconductor – Extrinsic semiconductor - Hall effect – Experimental determination of Hall coefficient.	K1 – K5	13	1-5
4	Magnetic Properties of Solids 4.1 Basic definitions - Different types of magnetic materials – Langevin’s theory of paramagnetism - Curie’s law - Failure of Langevin’s Theory - Weiss theory of paramagnetism - Curie-Weiss law. 4.2 Domain theory of ferromagnetism - Origin of domains - Exchange energy - Magnetostatic energy - Anisotropic energy - Domain wall energy - Hysteresis - Explanation of hysteresis with domain Theory - Antiferro and ferrimagnetic materials.	K1 – K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Superconductivity 5.1 Introduction – Properties of superconductors: Critical temperature, critical field, isotope effect, Meissner effect – Entropy, specific heat, thermal conductivity – Types of superconductors – Type I and type II 5.2 First and second London equations drawback of London theory - BCS theory of superconductivity – Electron-lattice -Electron interaction – Cooper pair – Existence of Energy gap - application of superconductors.	K1 – K5	13	1-5

ELECTRICITY, MAGNETISM AND ELECTROMAGNETISM

CODE: 23PH/MC/EM54

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart knowledge of the basic laws and concepts relating to electrostatics and magnetostatics.
- To enable the students to understand the fundamental principles of electromagnetism including concepts like electric field, magnetic field and their mathematical representations.
- To guide the students in applying the concepts of electromagnetic principles to solve real-life problems.
- To equip the students to assess the impact of different charge and current distribution on electric and magnetic boundary conditions.
- To facilitate the students in solving and justifying static electric and magnetic fields, including the behavior of charges and currents in different media.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Acquire knowledge on basic concepts and terms related to electromagnetism, such as electric field, magnetic field, Gauss's Law, and Ampere's Law.	K1
CO2	Describe the principles behind electromagnetic phenomena, including how electric charges interact and how magnetic fields are generated in various medium.	K2
CO3	Apply Maxwell's equations to analyze and solve complex electromagnetic problems.	K3
CO4	Deduce expressions related to Coulomb's Law, Gauss's law, Biot-Savart's law, Ampere's law and Faraday's laws in various systems.	K4
CO5	Assess electric field, electric potential, electric flux, and magnetic field in different symmetry systems.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Electrostatics 1.1 Electrostatic Field - Coulomb's Law – Gauss's Law - Electric potential - Equipotential surfaces - Work done in moving a charge – Electric potential as line integral of electric field.	K1 – K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	1.2 Capacitors - Spherical Capacitor –Cylindrical capacitor - Capacitance of spherical and cylindrical capacitors – Capacitance of a parallel plate capacitor (with and without dielectric slab) – Effect of dielectric – Guard ring condenser – Fixed condenser – Electrolytic condenser – Quadrant electrometer.			
2	Steady Currents 2.1 Current and current density - Equation of continuity - Electrical conductivity – Drude–Lorentz theory – Wiedemann-Franz law. 2.2 Carey foster bridge – Determination of resistivity – Temperature coefficient of resistance – Potentiometer – Calibration of ammeter and voltmeter (low and high range).	K1 – K5	11	1-5
3	Magnetostatics 3.1 Biot–Savart Law – Steady currents – Magnetic fields due to steady currents flowing (i) In a long straight wire at a point near it (ii) Along a circular coil at a point on its axis (iii) Along a solenoid at a point on its axis- Divergence and curl of B. 3.2 Ampere’s Law – (i) Magnetic field at a point near a long straight wire carrying Steady current – (ii) Magnetic field of a long solenoid - (iii) Magnetic field of a toroidal coil – Comparison of magnetostatics and electrostatics- Ballistic galvanometer - Dead beat and BG conditions – Damping- Applications of BG.	K1 – K5	15	1-5
4	Transient currents and Alternating current 4.1 Transient currents – Growth of current in a circuit containing resistance and inductance – Decay of current in a circuit containing L and R - Growth and decay of charge in a circuit containing resistance and capacitors. 4.2 Peak value – Mean value of alternating emf – Root mean square value – Alternating E.M.F applied to a circuit with resistance and capacitance in series and parallel.	K1 – K5	12	1-5
5	Electromagnetic induction and Maxwell’s equation 5.1 Faraday’s Laws - Electromagnetic Induction - Inductance - Self Inductance - Mutual Inductance - Energy in Magnetic Fields – Relation between Self -inductance and Mutual inductance. 5.2 Maxwell’s equations in vacuum, material media – Physical significance of Maxwell’s equations – Displacement current – Plane electromagnetic waves in free space.	K1 – K5	12	1-5

OBJECTIVES OF THE COURSE

- To enable the students to understand the theoretical and practical knowledge required to perform general and electronic experiments
- To enhance students learning through hands-on experience.
- To guide the students to observe and measure various physical quantities through scientific approach.
- To equip the students to interpret and report the measurement to draw valid conclusions.
- To facilitate the students to analyze the results of the experiment with an aim to construct or design an equipment or a device for application.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical concepts with the experiments.	K1, K2
CO2	apply the theoretical knowledge in both general and electronic experiments to acquire the necessary data.	K3
CO3	analyse and interpret the quantitative results utilizing mathematical and graphical verification.	K4
CO4	determine the various physical properties using scientific instruments.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. i – d Curve - Spectrometer 2. i – i' curve of a prism- Stoke's formula - Spectrometer 3. High Resistance by Leakage - Ballistic Galvanometer 4. Comparison of EMF and Internal Resistance - Potentiometer 5. Determination of thickness of wire - Air wedge 6. Determination of m and M - Field along the Axis 7. Determination of resistance and Specific Resistance - Carey Foster's Bridge 8. Specific Heat Capacity of Liquid – Method of Mixtures – Applying Barton's Correction 9. Young's Modulus of the material of the beam – Koneig's Method	K1-K6	39	1-5

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various electronic equipment.
- To Develop proficient skills in assembling, testing, and troubleshooting electronic circuits and systems.
- To Teach effective techniques for identifying and rectifying faults or malfunctions in electronic circuits.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To Foster the ability to analyze complex electronic systems, identify issues, and devise effective solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical electronic concepts in designing the circuits.	K1, K2
CO2	apply the theoretical knowledge in troubleshooting and correcting simple electronic circuit errors.	K3
CO3	analyze the component values needed to achieve specific circuit characteristics	K4
CO4	evaluate the effects of various component values on circuit performance.	K5
CO5	develop analytic ability from the technical knowledge gained through hands-on training	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. Flasher using relay – 555 Timer 2. Study of Waveforms - Differentiator and Integrator using IC 741. 3. Light to frequency converter – using IC 555 4. Temperature to Voltage converter – using IC 741 5. OP AMP as an Adder, Subtractor, Inverting and Non- Inverting amplifier, Source follower and Multiplier. 6. Half adder and half subtractor using NAND and NOR gates (7400 and 7402) 7. 4 bit Binary adder (7483 and 7486) 8. Microprocessor application – Arithmetic operation (8 bit)- addition, subtraction, multiplication and division. 9. Microprocessor application- sorting an array in ascending and descending order	K1-K6	39	1-5

RENEWABLE ENERGY AND ENERGY ECONOMICS

CODE: 23ID/IC/RE55

CREDITS:5

L T P:5 1 0

TOTAL TEACHING HOURS:78

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of Renewable energy resources.
- To create in students an awareness of current environmental issues and energy policies.
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude.
- To provide an awareness of the importance of energy-sensitive initiatives at the regional, national and international levels.
- To explore the role of various national and international organizations in energy development.

COURSE LEARNING OUTCOMES (COs)

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	gain sound knowledge in Energy development and the need for Energy transition in a Developing country like India.	K1
CO2	explain the technological advancements and innovations in renewable energy systems and their impact on energy generation.	K2
CO3	appraise key energy issues to build their ability to emerge as an entrepreneur in the field of Renewable energy	K3
CO4	analyze national and international policies and regulations governing the deployment of renewable energy.	K4
CO5	extend their critical thinking to bring out policies and solutions to key energy issues across the Globe.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Energy Resources 1.1 Energy routes for non-renewable energy resources – Age renewables and alternatives – Moving towards renewable energy sources - Energy conservation practices. 1.2 Types of energy sources - Renewable and non-renewable sources. 1.3 Energy consumption - Energy calculation. 1.4 Evolution of energy economics – Energy Development - Energy – economy linkage – Energy transition 1.5 Current energy issues - Energy intensity – growth of renewable resources.	K1 – K5	17	1-5
2	Solar Energy 2.1 Fundamentals of solar radiation – Nature of solar radiation – Radiation on earth’s surface – Sun path chart. 2.2 Photovoltaics – Principles – Physics and operation of solar cells – Solar panels- Solar power plants - On and Off-grid photovoltaics application - Photovoltaics: country perspective - Visible challenges - Production pattern of solar cells and modules in India 104.	K1 – K5	17	1-5
3	Wind energy 3.1 Introduction – Basic principles of wind energy conversion. 3.2 Nature of wind – Power in the wind -forces on the blades and wind energy conversion – Site selection. 3.3 Classification of wind energy conversion systems – Advantages and limitations.	K1 – K5	16	1-5
4	Micro Foundation 4.1 Demand - Energy demand - Primary and global - Factors affecting energy demand 4.2 Supply- Factors affecting Energy supply 4.3 Market equilibrium - Energy market structure - Non-renewable (Oil) vs renewable energy 4.4 Energy as a public good - Market failure - Externalities.	K1-K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Energy and Environment 5.1 Mechanism to correct imperfection in energy market - Command and Control - Taxes and cap trade mechanism for internalization of environmental externalities. 5.2 Energy and climate change - Energy security - Organizations - UNFCCC (Paris Agreement) , Bureau of Energy Efficiency (India), UNDP. 5.3 Energy efficiency policies- Recent renewable energy policies in India.	K1-K5	13	1-5

OBJECTIVES OF THE COURSE

- To enable the students to understand the basics of complex circuits via various network theorems.
- To equip the students to design and explain amplifier circuits.
- To familiarize the students on transistor oscillators and their types.
- To expose the students to semiconductor device, performance characteristics and their applications.
- To guide the students to appreciate the working of Optoelectronic devices such as in LED, Photo Diodes.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire basic knowledge of different electronic circuits and their application in real life.	K1
CO2	comprehend the basic construction, working and biasing of semiconductor devices.	K2
CO3	classify the amplifier, oscillator and special function diodes principles and its types.	K3
CO4	employ mathematical and graphical analysis considering different practical issues modelling of semiconductor device; analyze the performance parameters of the system.	K4
CO5	investigate different signal processing circuits and design different application circuits using amplifiers, oscillators and special purpose diodes.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Circuit Analysis and Semiconductor Diode 1.1 Linear circuit analysis - Open and short circuits - The voltage and current divider circuit - Superposition theorem - Transfer theorems – Thevenin's theorems – Norton's theorem. 1.2 Semiconductor diode – Crystal diode rectifiers – Half-Wave rectifier – Output frequency and efficiency of Half-Wave rectifier – Full-Wave rectifier – Centre-Tap and Bridge rectifier.	K1-K5	10	1-5
2	Transistor Amplifiers 2.1 Faithfull amplification - Transistor biasing - Stabilization – Stability factor - Voltage divider bias method– Stability factor - Operating point – DC load lines. 2.2 Single stage transistor amplifier– Practical circuit of transistor amplifier–Multistage transistor amplifier - RC coupled transistor amplifier (No Derivation) – Operation – Frequency response - Advantages – Disadvantages.	K1-K5	12	1-5
3	Transistor Oscillators 3.1 Sinusoidal oscillator – Types of sinusoidal oscillators – Positive feedback amplifiers – Essentials of transistor oscillator – Barkhausen's criterion. 3.2 Types of transistor Oscillators - Colpitts's oscillator – Hartley oscillator – Phase shift oscillator.	K1-K5	10	1-5
4	Special Semiconductor Devices 4.1 Field effect transistors – JFET – Working – Channel conductance – Space charge distribution – Difference between JFET and Bipolar transistor – JFET as an amplifier – IV characteristics – Pinch Off voltage – Parameters of JFET 4.2 Uni Junction Transistor – Construction – Operation – Inter base resistor –Equivalent circuit – Intrinsic stand-off ratio – IV characteristics – Peak voltage valley current – Valley voltage negative resistance region – Relaxation oscillator.	K1-K5	10	1-5
5	Special Function Diodes and Optoelectronic Devices 5.1 Introduction - Tunnel diode- Parameters - Schotkky diode - Varactor diode. Light sources and Displays: Light emitting diodes – Surface emitting LED– Edge emitting LED - Multicolor LED - Seven segment display. 5.2 Photo detectors: Basic Parameters - Photo Diodes - p-i-n photo diode - Solar Cells - Photo Transistors - IR and UV Detectors.	K1-K5	10	1-5

ATOMIC AND NUCLEAR PHYSICS

CODE:23PH/MC/AN64

CREDITS:4

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To impart fundamental knowledge on atomic and nuclear physics.
- To enable the students to understand the microscopic nature of the physical world of atoms and nuclei.
- To acquaint students with atomic structure progresses, its constituent particles, different types of nuclei, binding energy and nuclear processes.
- To provide a sound knowledge on characteristic effect associated with atom and to explain the experimental observations which offer as an evidence for the various phenomena.
- To familiarize the students with elementary particle classification, their interactions, conservation laws, symmetries and the fundamental interactions.

COURSE LEARNING OUTCOMES:

COs	DESCRIPTION	CL
CO1	recall and relate the theory and properties of the nucleus and atomic structure.	K1
CO2	understand the various significant processes and its responses in nucleus and atom.	K2
CO3	illustrate the spectrographs, photoelectric effect, vector atom model, Zeeman effect, properties of nucleus, energy reactions and quark model.	K3
CO4	distinguish the theoretical aspect of the nuclear fusion and fission process, various effects and processes involved in atom, interactions of the subatomic particles	K4
CO5	evaluate the experimental support associated with the theory of atom and Nucleus.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Positive rays and photoelectric effect 1.1 Positive rays- Aston's mass spectrograph - Dempster's mass spectrograph. Photoelectric effect: Introduction- Photoelectric laws - Laws of photoelectric effect - Einstein's photoelectric equation - Experimental verification of Einstein's photoelectric equation - Millikan's experiment -Photoelectric cells. 1.2 Production of X-rays-Bragg's law-Bragg's spectrometer-X-ray spectra- Continuous and characteristic X-ray spectrum - Moseley's law - Compton effect - Experimental verification	K1- K5	13	1-5
2	Atom model 2.1 Introduction to atom model – Vector atom model – Electron spin – Spatial quantisation – Quantum numbers associated with vector atom model – L-S and J-J coupling – Pauli's exclusion principle – Electron Configuration -Magnetic dipole moment due to orbital motion and spin motion of the electron – Bohr magnetron – Stern-Gerlach experiment – Selection rules – Intensity rule. 2.2 Zeeman effect (qualitative study) - Experimental arrangement of the normal Zeeman effect - Expression for the Zeeman shift - Paschen back effect - Stark effect.	K1- K5	13	1-5
3	Nucleus and Radioactivity 3.1 Properties of Nucleus- Binding energy per nucleon - Packing fraction – Nuclear stability – Nuclear force - Meson theory of nuclear force. 3.2 Natural radioactivity- Properties of alpha beta and gamma rays- Geiger-Nuttall law – Alpha particle spectra –Theory of alpha decay – Tunnel effect – Beta ray spectra – Neutrino theory of beta decay – K electron capture - Gamma decay – Principles of internal conversion - Interaction of Gamma ray with matter – Nuclear isomerism – Internal conversion - Fundamental laws of radioactivity - Relation between half-life and mean life – Law of disintegration - Radioactive dating.	K1- K5	13	1-5
4	Nuclear Energy 4.1 Nuclear reactions – Q value equation, threshold value – endoergic reaction, artificial radioactivity, radioisotopes, applications. 4.2 Nuclear fission – Chain reaction – Controlled and uncontrolled, multiplication factor – Four factor formula, power reactors, reactors in India, nuclear fusion, thermonuclear reaction, C- N cycle, proton – Proton cycle, Plasma – Nuclear magnetic bottle.	K1- K5	13	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Elementary Particles 5.1 Elementary particles: Introduction- Particles and antiparticles - Antimatter - Fundamental interactions – Conservation laws -Quarks and quark model (elementary ideas only). 5.2 Cosmic rays: Introduction – Discovery- Origin of cosmic rays- primary and secondary cosmic ray – Cosmic ray showers – Van Allen Belt.	K1- K5	13	1-5

QUANTUM MECHANICS AND RELATIVITY

CODE: 23PH/MC/QR64

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart the knowledge of the fundamental principles of Quantum Mechanics, including wave-particle duality, quantization of energy and relativity, including the Lorentz transformations and relativistic energy-momentum relations.
- To enable the students to understand the basic quantum mechanical and relativity principles to solve problems related to systems like the particle in a box, harmonic oscillator, relativistic motion, time dilation, and length contraction.
- To guide the students in applying the concepts to evaluate quantum mechanics and relativity on our understanding of the behavior of particles and the probabilistic nature of systems.
- To equip the students to assess the impact of the wave function statistically and distinguish between the classical and quantum physics.
- To facilitate the students in solving complex quantum systems and relativistic scenarios, and analyze their implications.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on basic fundamental principles of quantum mechanics and relativity including wave-particle duality, quantization of energy, Lorentz transformations and relativistic energy-momentum relations.	K1
CO2	describe the concepts of wave functions, probability amplitudes, and their relevance to particle behavior in quantum mechanics and relativity implications of time dilation, length contraction, and the constancy of the speed of light.	K2
CO3	apply mathematical techniques to solve complex problems related to quantum mechanical systems, including solving the Schrödinger equations, operators and real-world relativistic phenomena's.	K3
CO4	relate the behavior of quantum mechanical systems under various potential fields and evaluate the significance of quantum phenomena in particle behavior.	K4
CO5	assess Schrödinger equation for simple problems and apprehend the use of operators	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Wave like Properties of Particles 1.1 Wave-Particle duality - De Broglie hypothesis for matter waves - De Broglie wavelength - Davisson and Germer experiment. 1.2 Uncertainty principle- Einstein's interpretation of duality for radiation- Wave functions- Superposition principles. 1.3 Properties of matter waves- Relation between wave, group and particle velocities.	K1 – K4	12	1-5
2	Schrödinger's Equations and Applications 2.1 Introduction to time dependent Schrodinger equation -Time independent Schrödinger's equation 2.2 Applications to one dimensional problem: Particle in a one-dimensional box - The step potential rectangular Potential Barrier- Examples of barrier Penetration by particles - Application to three dimensional problems: the Free Particle - Particle in three-dimensional box- Degeneracy.	K1 – K5	12	1-5
3	Quantum Mechanical Operators 3.1 Definition of an Operator- Operator algebra- Eigen values and Eigen functions. 3.2 Commutation relation between momentum and free Particle Hamiltonian operators. 3.3 Linear operators - Hermitian operators- properties- Parity operators – Properties - Commutation relation between parity and symmetric Hamiltonian operators.	K1 – K5	14	1-5
4	Relativity 4.1 The experimental background of the theory of relativity – Galilean transformations - Newtonian relativity - Inertial and non-inertial frame of reference. 4.2 Michelson-Morley experiment- Explanation of negative results- Postulates of special theory of relativity.	K1 – K5	13	1-5
5	Relativistic Mechanics 5.1 Relativistic Kinematics - Lorentz transformation equation – Consequence of Lorentz transformation equation (i) Length contraction (ii) Time dilation Experimental verification of length Contraction and time dilation concepts - Meson paradox- Twin paradox 5.2 Relativistic mechanics - Relativistic energy and Momentum - Mass-Energy equivalence- Evidence in support of Mass- Energy relation between momentum and energy.	K1 – K5	14	1-5

OBJECTIVES OF THE COURSE

- To enable the students to understand the theoretical and practical knowledge required to perform general and electronic experiments.
- To enhance students learning through hands-on experience.
- To guide the students to observe and measure various physical quantities through scientific approach.
- To equip the students to interpret and report the measurement to draw valid conclusions.
- To facilitate the students to analyze the results of the experiment with an aim to construct or design an equipment or a device for application.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical concepts with the experiments.	K1, K2
CO2	apply the theoretical knowledge in both general and electronic experiments to acquire the necessary data.	K3
CO3	analyse and interpret the quantitative results utilizing mathematical and graphical verification.	K4
CO4	determine the various physical properties using scientific instruments.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training.	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. Determination of refractive index-Narrow angled prism - Spectrometer 2. Determination of wavelength of prominent lines of mercury spectrum-Oblique incidence - Spectrometer 3. Determination of intensity of the field at a point-Field along the axis – Searle’s Vibration Magnetometer 4. Calibration of High Range Voltmeter - Potentiometer 5. Hysteresis – Magnetometer method 6. Comparison of Mutual Inductance - Ballistic Galvanometer 7. Coefficient of Mutual Inductance - Ballistic Galvanometer 8. Temperature Coefficient - Carey Foster’s Bridge 9. Determination of E.C.E of Copper using Copper Voltmeter and Tangent Galvanometer	K1-K6	39	1-5

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various electronic equipment.
- To Develop proficient skills in assembling, testing, and troubleshooting electronic circuits and systems.
- To Teach effective techniques for identifying and rectifying faults or malfunctions in electronic circuits.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To Foster the ability to analyze complex electronic systems, identify issues, and devise effective solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall and relate the theoretical electronic concepts in designing the circuits.	K1, K2
CO2	apply the theoretical knowledge in troubleshooting and correcting simple electronic circuit errors.	K3
CO3	analyze the component values needed to achieve specific circuit characteristics	K4
CO4	evaluate the effects of various component values on circuit performance.	K5
CO5	develop analytic ability from the technical knowledge gained through hands on training	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

EXPERIMENTS	CL	Hrs	CO
1. R – 2R ladder - D/A Converter (IC 741) 2. Sine wave generation - Phase shift oscillator (IC 741) 3. Karnaugh map simplification using logic gates 4. Astable multivibrator using IC 555 Timer 5. Data Selector – Study of multiplexer. 6. BCD Adder (IC 7483) 7. Decade Counter (IC 7490) 8. Ripple counter (IC 7473) 9. Microprocessor - HEX to BCD and BCD to HEX conversion.	K1-K6	39	1-5

DEPARTMENT OF VALUE EDUCATION

SYLLABUS

(Effective from the academic year 2023–2024)

LIFE SKILLS: AN APPROACH TO A HOLISTIC WAY OF LIFE

CODE:23VE/SS/HL63

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To help students grow in spirituality and to experience themselves as integrated persons
- To help students understand themselves as relational beings and appreciate their role in family and society
- To help students recognize the commonality and differences of the different religions in India
- To help students grow in an awareness of the protective laws regarding women
- To prepare students to make informed choices in family and career

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Appreciate themselves as integrated persons
- Recognize their role in family and society and become aware of the different protective laws in favour of women
- Make prudent choices for career and family
- Manage work life balance
- Live a harmonious life and be a channel of peace

Unit 1

Spiritual Self

(10 Hours)

- 1.1 Understanding spirituality-Understanding the Spiritual side of oneself
- 1.2 Role of religious practices and growing in spirituality
- 1.3 Acceptance of self – self-identity, self-worth, self-respect, self-appreciation and self- presentation
- 1.4 Nurturing self - being at home with self, being able to connect with the inner self
- 1.5 Relationship with the Divine:
Discovering the Divine in self, creation, and others – St. Francis of Assisi-
Canticle of creatures Seeking the Divine through meditation, prayer and
worship

Unit 2

Relational Self: Women in the family

(17 Hours)

- 2.1 Understanding one's self in the context of family
- 2.2 Family networks
- 2.3 Family time – prayer, meals, and relaxation

- 2.4 Family and social values: respect for others, understanding individual needs and responsibilities – give and take
- 2.5 Understanding different parenting styles – authoritarian, permissive and democratic
- 2.6 Appreciating the gift of womanhood – foundress-Mary of the Passion's vision of womanhood
- 2.7 Opting for marriage, single, religious or a life committed to a cause
- 2.8 Marriage and family, choice of life partner, marital relationships, planning of family
- 2.9 Other types of relationships - pre-marital relationships, live-in relationship and LGBT issues
- 2.10 Roles and responsibilities of women as home makers and career woman, work life balance (WLB)
- 2.11 Marriage as a sacred bond and fidelity in marriage

Unit 3

Integrated Self

(12 Hours)

- 3.1 Integrating the spiritual, relational, social/political self
- 3.2 Integrating one's past with the present and the future for holistic living
- 3.3 Social Issues- crimes against women, harassment, gender discrimination, dowry, abortion, separation, divorce and cyber-crimes
- 3.4 Legal rights of women-property, marital and adoptive rights
- 3.5 Sensitization to different religions and religious practices in family and society
- 3.6 Challenges of inter caste and inter religious marriages
- 3.7 Integration of self with family, community and society

Retreat/Workshop – Required for course completion.

NANOSCIENCE AND NANOTECHNOLOGY

CODE: 23PH/ME/NN45

CREDITS: 5

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart knowledge of the basic concepts of nanoscience, including the scale of nanometers and the unique properties of nanomaterials.
- To enable the students to understand the fundamental principles that govern the behavior of materials at the nanoscale.
- To guide the students to adopt nanoscale fabrication techniques to tailor the nanomaterial as per the applications.
- To equip the students to analyze the properties and behavior of nanomaterials for integration of nanoscale innovations in technology.
- To facilitate the students in adapting nanoscale concepts to address emerging challenges in fields such as medicine, energy, and electronics.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	acquire knowledge on basic principles and concepts of nanoscience, including the unique properties of materials at the nanoscale.	K1
CO2	describe the fundamental principles that govern the behavior of materials at the nanoscale.	K2
CO3	employ suitable nanoscale fabrication techniques to tailor nanomaterials according to specific application requirements	K3
CO4	examine the properties and behavior of nanomaterials for Real-world applications of nanoscience.	K4
CO5	analyze potential societal impacts and viable applications of nanotechnology.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Nanoscience and Nanotechnology 1.1 Introduction- Nano and nature - Scientific revolution, definition of nanotechnology, emergence of nanotechnology. 1.2 Bulk to nano transition- Nanosize effects - Size dependent phenomena - Bohr exciton radius, Quantum confinement.	K1 – K5	13	1-5
2	Properties of Nanomaterials 2.1 Definition of a nano System - Types of nanocrystals - One-Dimensional (1D) – Two -Dimensional (2D) - Three-Dimensional (3D) Nanostructured materials - Quantum Dots (0 D) - CNT. 2.2 Introduction – Mechanical behavior – Elastic properties – Hardness and strength – Ductility and toughness – Superplastic behavior – Optical properties – Surface plasmon resonance – Electrical properties – Dielectric materials and properties – Magnetic properties.	K1 – K5	13	1-5
3	Synthesis of Nanomaterials 3.1 Physical Method: Ball Milling, Sputter deposition, Ion beam techniques. 3.2 Chemical Method: Wet chemical synthesis – Sol-Gel processing, Co-Precipitation, Hydrothermal, Chemical bath deposition. 3.3 Vapour Method: Thermal evaporation - Chemical Vapor Deposition (CVD).	K1 – K5	13	1-5
4	Characterization Techniques 4.1 Structural: X-Ray Diffraction. 4.2 Optical: UV-Vis absorption spectroscopy - Photo Luminescence. 4.3 Morphological: Scanning Electron Microscopy (SEM)- Transmission Electron Microscopy (TEM).	K1 – K5	13	1-5
5	Applications of Nanomaterials 5.1 Applications in Physics: Nanoelectronics, Quantum Dot and Dye sensitized solar cells, photovoltaics, photocatalytic applications, CNT based transistor and Field emission display. 5.2 Applications in other fields of Science: Nanosensors, Nanomedicine, Nanocoatings, Nanopaints	K1 – K5	13	1-5

LASER PHYSICS

CODE: 23PH/ME/LP45

CREDITS: 5

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To familiarize the students with primary concepts essential to understanding of lasers.
- To support the students to understand the principle of laser action including quantum nature of light, how light interacts with matter, population inversion, light amplification by stimulated emission of radiation, and essential components required to construct a lasing device, and appreciate laser applications in daily life.
- To direct the students in applying the theoretical concepts to understand the lasing action in 3 level and 4 level lasers, and know the role of lasers in the field of Industry, Defence, Medicine, and Communication.
- To prepare the students to differentiate between different types of lasers based on their active medium and outline their operation based on observed energy levels.
- To encourage the students in evaluating the possible practical difficulties that affect the working of a laser.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define the basic terminologies and concepts essential to explain the operation of any laser.	K1
CO2	summarize key concepts like light matter interaction, population inversion and stimulated emission, role of photon multipliers, laser characteristics and the functionality of different types of lasers, application of lasers.	K2
CO3	use the theoretical ideas learnt in optics, quantum mechanics and atomic physics to illustrate the functioning of a lasing device.	K3
CO4	compare and contrast between the different lasing mediums, their properties and how the criteria for stimulated emission is met in each of the types and calculate and interpret the rate equation for any two level, three level or four level lasing system, lasers and conventional light sources	K4
CO5	evaluate the various factors influencing the performance of a laser.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Basic Theory 1.1 Introduction to Laser – Planck’s quantum theory - Energy levels – Population - Thermal equilibrium – Einstein’s prediction – Absorption, spontaneous and stimulated emission - Einstein’s relations – Condition for large stimulated emissions – Population inversion – Metastable state. 1.2 Basic components of a Laser - Pumping methods - Optical resonator and its action - Cavity configuration - Plane parallel cavity - Confocal cavity - Hemispherical and long radius cavity.	K1 – K5	15	1-5
2	Laser Characteristics and Rate Equations 2.1 Laser Beam Characteristics – Introduction – Directionality – Divergence – Coherence - Temporal and spatial coherence – Monochromaticity. 2.2 Laser rate equation - Two level system - Three level system - Four level system (Qualitative Treatment Only) - Line broadening mechanism.	K1 – K5	12	1-5
3	Solid-state, Gas and Chemical Lasers 3.1 Classification of Lasers (based on Active Medium) - Solid state Laser - Nd: YAG Laser – General description – Structure - Energy level diagram – Working. 3.2 Gas Laser: Helium Neon Laser - General description - Structure - Energy level diagram – Working – Carbon Dioxide Laser - General description - Structure - Energy level diagram – Working - Chemical Laser: HCl Laser and HF Laser working.	K1 – K5	11	1-5
4	Semiconductor and Liquid Lasers 4.1 Semiconductor Laser – Intrinsic semiconductor Laser - Doped semiconductor Laser - PN Junction – Population inversion - Homojunction diode Laser: structure and working – Advantages of laser diodes over LED’s. 4.2 Liquid Laser – Dye Laser - Description - Energy level diagram – Working.	K1 – K5	12	1-5
5	Applications of Laser 5.1 Lasers in Material processing: Drilling - Cutting – Different methods of cutting - Welding – Laser ablation - Lasers in Defence: LIDAR and its applications – Laser rangars – Velocity measurement – Holography (Recording and reconstruction of Hologram). 5.2 Lasers in Medicine: Cancer Therapy – Laser eye surgery – Cataract and photocoagulation - Laser Angioplasty - Optical communication using Laser - Basic Principle of optical computers.	K1 – K5	15	1-5

COMMUNICATION SYSTEMS

CODE:23PH/ME/CS45

CREDITS:5

L T P:4 1 0

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To enable student to understand the basics of communication systems.
- To expose the student to the concepts and significance of propagation of waves.
- To enhance the students knowledge on the concept of radar system.
- To facilitate the students with the principles of optical communication systems.
- To acquire the knowledge of wireless and mobile communication systems.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic principles of various types of communication systems.	K1
CO2	understand the components of modern communication systems, signals generation, modulation and processing.	K2
CO3	apply the theoretical concepts to explain various modulation methods in communication system using radio waves, micro waves and Fibre optics.	K3
CO4	analyse the distinguishing characteristics of different communication systems.	K4
CO5	develop expertise in modern digital communication systems and the future of digital wireless communication systems and networks.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Communication Principles 1.1 Types of modulation – Amplitude modulation – Modulation factor – Analysis of amplitude modulated wave – Energy distribution in AM Wave. 1.2 Frequency modulation - Analysis of frequency modulated Wave – Phase modulation – Comparison of frequency and amplitude modulation. 1.3 Pulse amplitude modulation – Pulse width – Pulse position modulation - Pulse coded modulation (Principles only).	K1-K5	13	1-5
2	Radiation Propagation 2.1 Fundamentals of electromagnetic waves – Propagation of waves – Ground waves – Sky waves – Waveguides and attenuation. 2.2 Space wave propagation – Effect of earth's curvature – Atmospheric effects - Ionosphere and its stratification.	K1-K5	13	1-5
3	RADAR Systems and Microwave Generations 3.1 Radar systems – Basic principles – Basic pulsed radar system – Block diagram and description – Radar range equation – Uses of radar – Doppler radar systems. 3.2 Microwave communication – Introduction – Generation of microwaves – Magnetron oscillator – Working – Klystron oscillator – Velocity modulation– Multicavity Klystron – Reflex Klystron.	K1-K5	13	1-5
4	Fibre Optic Communication 4.1 Introduction – Importance of optical Fibres – Propagation of light waves in an optical Fibre – Basic structure of an optical Fibre – Propagation of light wave through an optic Fibre – Acceptance angle and acceptance cone of a Fibre – Modes of propagation – Meridinal and skew rays. 4.2 Classification of optical Fibres – Fibre losses – Attenuation in optic Fibres- Material or impurity loss – Absorption loss – Radiation induced losses.	K1-K5	13	1-5
5	Basics of Wireless and Mobile Communications 5.1 Introduction - Radio transmission techniques- Cellular concept - Operational channels - Making a call. 5.2 Modern wireless communication systems : First generation networks - Second generation networks - TDMA/FDD - CDMA/FDD Standard - Mobile networks – 3G - Third generation networks - 4G networks - 5G networks - Bluetooth – Hotspot – Wi-Fi - Wireless local area networks (W-Lan).	K1-K5	13	1-5

ASTRONOMY AND ASTROPHYSICS

CODE: 23PH/ME/AA45

CREDITS: 4

L T P: 4 1 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart knowledge on the fundamentals of the universe, its various components (galaxies, stars, planets), and their organization.
- To enable the students to understand the basic astronomical phenomena, such as celestial motion and gravitational interactions.
- To guide the students to Explore the life cycles of stars, from formation to supernova or collapse, and to understand the dynamics and interactions within galaxies.
- To equip the students to assess the impact of the various telescopes, detectors, and observational techniques used in modern astrophysics research.
- To facilitate the students in exploring extreme environments, such as black holes, neutron stars, supernovae, and active galactic nuclei, and their impact on the surrounding space.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall key astronomical terms, such as galaxies, nebulae, and celestial coordinates, etc.	K1
CO2	describe the celestial objects, galaxies, classification of stars, mechanism of birth and death of a star, large-scale structure of the universe and the principles of astronomical instruments.	K2
CO3	classify and compare the stars on the Hertzsprung-Russell diagram	K3
CO4	evaluate the implications of observational evidence for the formation and evolution of galaxies and other cosmic structures.	K4
CO5	assess the validity and reliability of scientific claims in astrophysics based on evidence, considering factors like observational errors and model limitations.	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction to Astronomy 1.1 Introduction – Asian astronomy and modern astronomy - Big bang theory – Contents of the universe – Distance measuring units in astronomy. 1.2 The solar system: The sun – Planets and their satellites – Asteroids - Meteoroids, Meteors and Meteorites – Comets.	K1 – K5	13	1-5
2	Stars 2.1 The internal structure of a star - Stellar evolution – Supernova, Pulsars, Black holes and Neutron stars. 2.2 Morgan – Keenan spectral classification of stars - the Hertzsprung Russell diagram – Mass luminosity relationship of a star in the main sequence – Size limits of the star – Nuclear reactions inside a main sequence star – Proton-Proton chain reaction – Carbon Nitrogen Oxygen cycle.	K1 – K5	13	1-5
3	Our galaxy 3.1 Galaxies – General classification and properties of Galaxies – Elliptical galaxy – Spiral galaxy – Irregular galaxies – Milky way galaxy. 3.2 Rotation of the Galaxy – Redshift and blue shift – Mechanism for redshift and blueshift – Hubble’s law in relation to the expanding universe.	K1 – K5	13	1-5
4	Astronomical Instruments 4.1 Basic definitions for telescopes (magnification, light gathering power, limiting magnitude, diffraction limit) - Reflection – Reflecting telescope – Refraction – Refracting telescope – Angular resolution. 4.2 Siderial clock – Chronometer – Gnomon – spectroscope – Radio telescope – Filar micrometer.	K1 – K5	13	1-5
5	Cosmology 5.1 The expanding Universe - Thermal history of the Universe - Neutrinos thermal dark matter - Big bang nucleosynthesis - Cosmic microwave background - Recombination - Gravitational collapse and structure formation - Dark energy	K1 – K5	13	1-5

TOTAL TEACHING HOURS:65

OBJECTIVES OF THE COURSE

- To impart basic knowledge on the physics fundamentals related with medicine.
- To expose the students to medical equipment and the physics principles associated with them.
- To make the students to Apply knowledge of the basic structure and function of the human body relevant to clinical diagnostic imaging and radiation.
- To guide the students in understanding the roles and responsibilities of medical physicists in patient care and public safety.
- To provide students with required knowledge of the operation and principles used in the systems and procedures associated with the clinical track.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the fundamental physical laws to analyse behaviour and properties of a variety of physical systems.	K1
CO2	Understand the theoretical concepts and its integration across all areas of medical physics.	K2
CO3	Apply theoretical and technical skills to perform and critically evaluate procedures related to medical instruments.	K3
CO4	Analyze the essential facts, concepts, principles and theories of medical physics.	K4
CO5	Interpret the data obtained from testing, diagnostic instruments such as MRI, ultrasonic images.	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Biometrics And Audiometry 1.1 Biometrics: Introduction to man - Instrument system and its components – Problems encountered in measuring living systems – Transducers – Force, motion, pressure transducers. 1.2 Audiometry: Mechanism of hearing – Air and bone conduction – Threshold of hearing – Audiometer – Masking in audiometry – Pure tone and speech audiometer – Evoked response audiometry – Hearing aids.	K1- K5	13	1-5
2	Bioelectric Potentials, Electrodes and Recorders 2.1 Biomedical signals – Sources of bioelectric potentials – resting, action and propagation of bioelectric potentials – Bio-potential electrodes – Skin surface, needle electrodes. 2.2 Recorders: Electro-conduction system of heart – Electro cardiogram (ECG) – Einthoven's triangle — Electro encephalogram (EEG) – Brain waves – EEG instrumentation – Recording of evoked potentials – Electro myogram (EMG) – Pulse oximeter.	K1- K5	13	1-5
3	Diagnostic Radiology Computed Tomography 3.1 Radiography – Primary radiological image – Contrast agents, filters – Beam restrictor, grid – Image quality 3.2 Linear tomography – Computed tomography – Helical and multi slice – Image quality – Radiation dose.	K1- K5	13	1-5
4	Radioisotopes and Nuclear Medicine: 4.1 Radioisotopes – Radiopharmaceuticals – Technetium generator – Gamma camera – Positron emission tomography – Disposal of radioactive waste.	K1- K5	13	1-5
5	Magnetic Resonance Imaging Ultrasound Imaging 5.1 Ultrasound Imaging: Ultrasound transducer – Ultrasound imaging – Doppler ultrasound – Ultrasound image quality and bio-effects. 5.2 Magnetic Resonance Imaging: Proton and external magnetic field – Precession – Radio frequency and resonance – MRI signal – Relaxation time – MRI instrumentation – Imaging sequences – Biosafety	K1- K5	13	1-5

PROJECT

CODE: 23PH/ME/PR45

CREDITS:5

GUIDELINES FOR PROJECT

Project should be done individually. Each student will choose a topic of her interest and the student will be assigned to a supervisor.

Each candidate should submit a research proposal to the Supervisor and the abstract of the project to be developed in guidance with the supervisor.

The project will require practical work with the submission of a project report. The duration of the project work is between 3 and 6 months.

The project report should be submitted in the prescribed format containing a minimum of 30 pages. Reference should not be counted with the main pages.

Each candidate must give three periodical reviews to the internal guide on the scheduled dates prescribed by the Department.

Each candidate will submit 3 hard copies of the project thesis on the scheduled date. The student will appear for Viva-voce before a panel comprising External Examiner, Supervisor and Head of the Department.

PATTERN OF ASSESSMENT

Continuous Assessment :

BASIC PRINCIPLES OF PHYSICS

CODE: 23PH/GE/BP22

CREDITS:2

L T P:1 0 1

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To provide knowledge of the elementary concepts in Mechanics, Optics and Electromagnetism.
- To facilitate the students in developing a conceptual understanding of the working of everyday simple machines, optical instruments, and simple circuits through lecture cum demonstration.
- To enable them in interpreting and appreciating the usage of physical principles in everyday life.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	State the terminologies and principles needed to understand the basic concepts of Mechanics, Optics and Electricity.	K1
CO2	Describe the laws governing the simple machines, behaviour of light in different mediums and the significance of electromagnetism in our everyday life.	K2
CO3	Apply basics laws of mechanics to understand the working of simple machines, light behaviour to understand the working of optical instruments, and Ohm's law to explain the working of a simple electrical circuit.	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	Mechanics 1.1 Newton's laws of motion - Conservation of linear momentum. Impulse – Collision - Centripetal and centrifugal forces – First and second order of levers – Simple machines. 1.2. Experiments i. Conservation of Linear Momentum ii. Centripetal and Centrifugal Forces iii. Simple Machines	K1 – K3	8	1-3

UNIT	CONTENT	CL	Hrs	CO
2	Optics 2.1 Light – Characteristics of light- Reflection – Refraction – Interference – Diffraction - Polarization- Electromagnetic spectrum- Microscope - Telescope- Spectrometer - Laser - Stimulated emission – Principle of laser action. 2.2 Experiments i Parts of Optical Instruments ii Study of Spectrum Using Prism and Transmission Grating iii Determination of Thickness of Thin Wire Using LASER	K1 – K3	9	1-3
3	Electricity 3.1 Ohm's Law - Resistance in series and parallel - Electromagnetic induction - Lenz's law - Magnetic materials - Different types of magnetic materials - DC and AC - Three Phase AC. 3.2 Experiments i. Verification of Ohm's Law ii Study of Magnetic Properties iii Generation of EMF Using Induction Coil	K1 – K3	9	1-3

ENERGY PHYSICS

CODE:23PH/GE/EP22

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To impart fundamental knowledge on the concept of renewable and non-renewable energy.
- To equip the students to know the importance of conservation of energy and the need for alternate source of energy.
- To enable the students to be aware of the importance of sustainable energy.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	recall the principles of energy and work in Physics and how they are related to each other.	K1
CO2	understand the environmental impact of the fossil fuels and the need for cleaner sources of energy.	K2
CO3	describe the proposed renewable energy technologies and the energy conversion processes.	K3
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply		

UNIT	CONTENT	CL	Hrs	CO
1	Introduction 1.1 Energy : Sources of energy - Forms of energy - Potential, kinetic, mechanical, chemical and thermal units of energy, uses of energy, energy conversion. 1.2 Non-renewable energy – Coal, petroleum, gas, renewable energy- Solar, wind, biomass, geothermal and nuclear, advantages and disadvantages.	K1- K3	9	1-3
2	Non-Renewable Energy 2.1 Coal - Early uses as fuel - Electricity generation, Petroleum- Composition, Reservoirs – Uses 2.2 Natural Gas – Process, conversion to electrical energy.	K1- K3	8	1-3
3	Renewable Energy 3.1 Solar Energy- Solar energy conversion, Solar pond, Solar voltaic Cell conversion, wind Energy, wind mill types, Geothermal - Power plants, uses of geothermal water. 3.2 Biomass energy – Biofuel conversion process, gasification of bio mass, Nuclear: Nuclear fission and fusion, Power Reactors, Hydroelectric Power, Principle -Production of Power.	K1- K3	9	1-3

GEOPHYSICS

CODE:23PH/UI/GP23

CREDITS:3

OBJECTIVE OF THE COURSE

- To learn the basics of Geophysics and the dynamics of Earth

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- Understand the structure and evolution of our planet
- Acquire knowledge on the formation of oil and gas.
- Apply physics to the study of earth
- Describe the Earth and the Universe in their generality.
- Understand the fundamentals of Seismology for the exploration of oil reservoirs.

Unit 1

The Earth as a Planet

- 1.1 Solar System - Kepler's Law of Planetary Motion - Bode's Law
- 1.2 Characteristics of Planet - Origin of the Solar System - Earth's Structure

Unit 2

Gravity and the Figure of the Earth

- 2.1 Earth Size and Shape - Gravitation- Law of Universal Gravitation- Gravitational Acceleration - Gravitational Potential
- 2.2 Earth's Rotation - Earth's Figure and Gravity

Unit 3

Seismology and Seismic Waves

- 3.1 Elastic Theory- Elastic - an Elastic and Plastic Behavior of Materials - Elastic Waves - Body Waves - Surface Waves
- 3.2 Seismograph – Introduction - Various Seismometers - Seismic Wave Propagation- Introduction - Huygens's Principle – Diffraction - Fermat's Principle

Unit 4

Geomagnetism

- 4.1 Introduction - Discovery of Magnetism - Magnetic Properties of Material- Diamagnetic - Paramagnetic – Ferromagnetic - Curie Temperature
- 4.2 Magnetometers - Flux Gate Magnetometer - Proton Precession Magnetometer

Unit 5

Petroleum Geology

- 5.1 Introduction (Origin and Theory of Hydrocarbons) - Source Rock – Migration - Reservoir Rock - Classification of Reservoir Rocks - Physical Characteristic of Reservoir Rock (Depth, Area and Thickness, Porosity, Permeability) - Cap Rocks
- 5.2 Traps - Types of Traps (Structural Traps, Salt Dome Traps, Stratigraphic Traps, Combinational Traps)

BOOKS FOR STUDY

Baker Hugher *INTEQ. Petroleum Geology*. Mexico: Bureau of Mines, 2016.

Robert.J.Lilie. *Whole Earth Geophysics*. New Jersey: Prentice, 1999.

VISION STATEMENT

The vision of the College is to build a vibrant and inclusive learning community in a culture of excellence sustained by a sound value system that promotes responsible citizenship and effects social change.

MISSION STATEMENT

The mission of the College is to empower young women to face the challenges of life with courage and commitment, to be builders of a humane and just society, and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

EDUCATIONAL OBJECTIVES OF THE INSTITUTION

- To offer a globally relevant curriculum and promote academic excellence, equipping graduates with a comprehensive understanding of their domain of study, leading to research and innovation
- To promote professional skill development and entrepreneurship, empowering graduates to achieve professional excellence, employability, entrepreneurship and leadership qualities
- To provide a vibrant and inclusive teaching-learning environment where graduates are imbued with a strong desire for academic growth and become lifelong learners
- To contribute towards nation building by fostering in graduates a respect for values, ethics and diversity
- To be environmentally conscious and sustainable, inspiring graduates to fulfil their social and civic responsibilities

UNDERGRADUATE PROGRAMME OUTCOMES (POS)

On successful completion of the Programme, graduates will

PO 1	demonstrate a comprehensive knowledge of the fundamental principles, theories and historical developments that form the foundation of their discipline.
PO 2	apply relevant critical/creative thinking and scientific reasoning skills to their domain knowledge.
PO 3	exhibit an ability to connect their domain knowledge with other disciplines.
PO 4	display the ability to comprehend and use English and one other language effectively for oral and written expression.
PO 5	demonstrate career readiness, entrepreneurial initiative, potential for higher education, and manifest an interest in self-directed learning.
PO 6	acquire relevant digital/technological skills, and the ability to work individually and collaboratively towards innovation and leadership.
PO 7	demonstrate social and ethical responsibility, and develop a concern for environmental issues and sustainability.
PO 8	display self-awareness, attitudes of inclusivity, and effectively engage in a multicultural society with respect for democracy, peace and diversity.

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI 600086

DEPARTMENT OF CHEMISTRY

PROGRAMME DESCRIPTION

The Bachelor of Science degree in Chemistry at Stella Maris College (Autonomous) aims to provide quality education in Chemistry with an emphasis on interdisciplinary research and skill development. The interdisciplinary approach encompassing linkages and collaborations with academia, industry and research organisations encourages and stimulates critical thinking and scientific curiosity. The undergraduate programme builds on a core of courses covering the principal areas of Chemistry such as Organic, Inorganic, Physical and Analytical Chemistry. Students receive extensive hands-on experience with scientific equipment thus giving them the requisite skills for problem solving, data analysis and interpretation. Students are trained to address social and environmental issues with professional and personal integrity and ethics.

VISION OF THE DEPARTMENT

To establish a progressive learning environment and research that advances the discipline and fosters the development of innovation and discovery to address increasingly complex challenges and problems that impact society and the environment.

MISSION OF THE DEPARTMENT

To adopt an interdisciplinary approach, network with industry and research institutions to create a synergy that will catalyse progress of the individual and society.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Sc. Chemistry Programme, the students will be able to

PSO1	Core competency demonstrate competency in the theoretical concepts and practical skills in the core areas of Chemistry
PSO2	Skill Development and Problem solving strengthen their professional skills through planning and carrying out scientific experiments, recording, interpreting and solving complex scientific problems using tools and technologies
PSO3	Interdisciplinary research identify research topics through an interdisciplinary approach and carry out independent research
PSO4	Communication Skills communicate their ideas and knowledge coherently and effectively to a scientific community
PSO5	Social Responsibility implement the concepts learned to address social, economic and environmental problems using ethical and moral standards

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086**B.Sc. DEGREE: BRANCH IV – CHEMISTRY****SYLLABUS**

(Effective from the academic year 2023-2024)

GENERAL CHEMISTRY**CODE: 23CH/MC/GC14****CREDITS: 4****L T P: 4 1 0****TOTAL HOURS: 65****OBJECTIVES OF THE COURSE**

- To enable understanding of the basic concepts of atomic structure, periodicity of elements, acid-base theories, nuclear chemistry and organic chemistry
- To introduce periodic trends and properties of elements in the periodic table
- To familiarize students with theories of acids and bases and atomic structure models
- To promote understanding of the various concepts of nuclear chemistry
- To facilitate understanding and interpretation of structure and bonding of organic molecules

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the fundamentals of periodicity of elements, atomic structure, acids and bases, nuclear chemistry and organic chemistry	K1
CO2	calculate eigen values and eigen functions, categorize periodic properties of s, p and d elements, compare radioactive disintegration series and differentiate the types of reactive intermediates in organic chemistry	K2
CO3	apply the concepts of periodicity of elements, dual nature of light, electromagnetic spectrum, quantum numbers, acid-base theories, half-life of disintegration, nomenclature and classification of organic compounds to solve problems	K3
CO4	analyse elements based on their atomic structure and periodic properties, classify radioactive elements based on their stability, binding energy and mass defect and develop mechanisms based on organic reagents and reactions.	K4
CO5	evaluate the effect of electronic displacements in covalent bonds on molecular stability and chemical reactivity, investigate the applications of nuclear chemistry, explain the chemical behaviour of elements from their periodic properties and solve problems in atomic structure	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Atomic structure 1.1 Rutherford's nuclear model of the atom. Planck's quantum theory of radiation. Photoelectric effect. Bohr's theory, its limitations and atomic spectrum of hydrogen atom. 1.2 Wave mechanics: de Broglie equation, Davisson - Germer experiment. Heisenberg's principle of uncertainty. Compton Effect.	K1- K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	1.3 Postulates of Quantum mechanics; operators- Hermitian operators, Laplacian and Hamiltonian operators, Eigen functions and Eigen values of operators. Conditions for a well-behaved function, Schrodinger wave equation (no derivation). Significance of ψ and ψ^2 1.4 Quantum numbers and their significance. Normalized and orthogonal wave functions. Sign of wave functions. Shapes of orbitals (<i>s, p, d, f</i>)			
2.	Periodicity of Elements 2.1 Periodic Table, horizontal, vertical and diagonal relationships in the periodic table – Li-Mg, Be-Al, B-Si 2.2 Periodicity of properties of s, p and d – block elements with respect to atomic radii, ionic radii, covalent radii, ionization energy 2.3 Periodicity of properties of s, p and d - block elements with respect to electronegativity, electron affinity 2.4 Inert pair effect, effective nuclear charge – screening effect, Slater rules	K1- K5	10	1-5
3.	Acids and Bases 3.1 Concepts: Bronsted-Lowry, Lux-Flood, Solvent -system and Lewis 3.2 Relative strength of acids and bases: Effect of solvent, levelling effect, polarity and substituents 3.3 HSAB - Principle and its applications	K1- K4	5	1-4
4.	Nuclear Chemistry 4.1 Elementary Particles - Concept of Nuclides, representation of isobars, isotones, isotopes with examples. Nucleus structure – Liquid Drop and Shell Model. Nuclear stability – <i>n/p</i> ratio, binding energy, mass defect and magic numbers 4.2 Radioactive elements, modes of decay – Neutron, Positron Theory of α , β and γ emission, characteristics of α , β and γ particles, K-electron capture and positron emission. Half-life period, Geiger – Nuttall rule. Radioactive displacement laws – Soddy, Fajan and Russel. Radioactive decay series $4n$, $4n+1$, $4n+2$ and $4n+3$ 4.3 Detection and measurement of radioactivity - Ionization chamber, Geiger- Muller counter and Scintillation counter. Artificial radioactivity - Artificial transmutation of elements, nuclear reactions – nuclear fusion and fission	K1- K5	15	1-5
5.	Introductory Organic Chemistry 5.1 IUPAC nomenclature of organic compounds 5.2 Types of organic reaction and reagents: Nature of bond fission – Homolytic and Heterolytic. Types of reagents – Electrophiles and Nucleophiles. Substitution, Addition, Elimination and Rearrangement reactions (definition with an example)	K1- K5	20	1-5

UNIT	CONTENT	CL	Hrs	CO
	5.3 Reactive intermediates with examples – Carbocations, Carbanions and Free Radicals - Conditions favouring their formation, stability and structure, their reactions with examples. Electron displacement effects - Inductive, Electromeric, Mesomeric, Resonance, Hyperconjugation and Steric effects, Tautomerism 5.4 Concept of Aromaticity – Definition, Hückel's Rule – Application to benzenoid and non-benzenoid compounds - Benzene, naphthalene, cyclopropenyl cation, cyclopentadienyl anion and tropylium cation

SYLLABUS

(Effective from the academic year 2023-2024)

VOLUMETRIC ANALYSIS PRACTICAL

CODE: 23CH/MC/P112

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To impart the skills required to handle and calibrate apparatus used in volumetric analysis
- To instil understanding of the principle of different types of titrations
- To enhance the skill required to estimate various metal ions and acids and bases by volumetric analysis

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the principles of different titrations and calibration, concepts of molarity, normality and equivalent weight	K1, K2
CO2	differentiate between acids/bases and oxidising/reducing agents	K3
CO3	calculate the molarity, normality and equivalent weights of acids, bases, oxidising and reducing agents	K4
CO4	categorise indicators based on the type of titration and pH	K5
CO5	estimate the amount of a metal ion/acid/base present in the whole of the given solution	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Calibration Calibration of Burettes / Pipettes	K1-K2	3	1
2.	Volumetric Analysis Theory and Principle behind the different titrations, equivalent weight calculations, concentration terms-normality, molarity and molality	K1-K5	6	1-4
3.	Titration 3.1 Estimation of Na_2CO_3 / HCl 3.2 Estimation of Oxalic Acid (Permanganimetry) 3.3 Estimation of Dichromate (Iodometry) 3.4 Estimation of Iron (Dichrometry / Permanganimetry) 3.5 Estimation of Magnesium / Zinc (Complexometry) 3.6 Estimation of Chloride (Argentometry), Estimation of Hardness	K1-K6	30	5

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 3 hours

Two – Three questions related to Theory of Volumetric Analysis - 05 marks
Equations and short Procedure (10 minutes) - 05 marks

Experiment (40 marks)

Up to 2% error	-	40 marks
2.1 – 3.0% error	-	35 marks
3.1 – 4.0% error	-	25 marks
4.1 – 5% error	-	20 marks
Above 5%	-	15 marks

End-Semester Examination:

Total Marks: 50

Duration: 3 hours

Two – Three questions related to Theory of Volumetric Analysis - 05 marks
Equations and short Procedure (10 minutes) - 05 marks

Experiment (40 marks)

Up to 2% error	-	40 marks
2.1 – 3.0% error	-	35 marks
3.1 – 4.0% error	-	25 marks
4.1 – 5% error	-	20 marks
Above 5%	-	15 marks

Section	Cognitive Level	Marks	Pattern
Theoretical Principles and Procedure	K1-K2	5	Subjective
Viva	K3-K5	5	Subjective
Experiment	K1-K6	40	Subjective

**Soft Skills Course Offered to students of
B.A. / B.Sc. / B.Com. / B.V.A. / Degree Programme**

SYLLABUS

(Effective from the academic year 2023 – 2024)

LIFE SKILLS – HEALTH, ENERGY AND COMPUTER BASICS

CODE:23CH/SS/HC13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To sensitise students to the fact that good health lies in nature
- To create an awareness about energy obtained from different components of food and to plan for a balanced diet
- To enable students to understand the significance of energy conservation and strategies for conserving energy
- To provide a basic knowledge of computer fundamentals and Email configuration

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

- identify the importance of a few plants and their health benefits
- recognise the causes and symptoms of common disorders
- calculate food energy values and follow the Recommended Dietary Allowances (RDA) and appreciate the need for them.
- conserve energy and use it responsibly
- understand computer configuration for purchase of personal computer and E mail setting

Unit 1

(13 Hours)

Food and Health

1.1 Traditional food and their health benefits

1.1.1 **Six tastes** – Natural guide map towards proper nutrition

1.1.2 Nutritional value and significance of Navadhanya (Sesame seed, Bengal gram, Horse gram, Green gram, Paddy seeds, White beans, Wheat, black gram and Chick pea) and Greens (Vallarai, Thuthuvalai, Manathakkali, Pulichakeerai, Agathi Keerai, Murungai Keerai, Karuveppilai, Puthina and Kothamalli)

1.2 Causes, symptoms and home remedies for the following ailments

Common cold, Anaemia, Hypothyroidism, Obesity, Diabetes, Mellitus, Polycystic Ovarian Syndrome, Ulcer, Wheezing and Hypertension

Unit 2 **(13 Hours)**
Food and energy balance

- 2.1 Units of Energy, Components of Total Energy Requirement – Basal Metabolic Rate, energy requirements for (work) physical activity and Thermic effect of food
- 2.2 Factors affecting Basal Metabolic Rate and Thermic Effect of food
- 2.3 Recommended Dietary Allowances and Balanced Diet, Food Energy Values- Calculation

Unit 3 **(13 Hours)**

3.1 Energy conservation

3.1.1 Needs for Energy Conservation – Power consumption of domestic appliances – Electrical Energy Audit – Strategies for Energy Conservation - Modern lighting systems– Light emitting diode (LED), Compact fluorescent lamps (CFL), Green indicators and Inverter, Green building - Home lighting using Solar cell - Solar water heaters- Water and waste management - Biogas plant

3.1.2 Safety Practices in using electronic gadgets and electricity at home – Precautions - Shock- Use of testers to identify leakage

3.2 Computer fundamentals

3.2.1 Essentials of Purchasing a Personal Computer - Fundamentals of Networks – Local Area Network, Internet, Networking in real-time scenario- Computer Hacking – Computer Forensics Fundamentals – Cyber Laws - Secure Browsing

3.2.2 Configuring Email

Configure Email Settings – Attachments – Compression – Organizing Emails – Manage Folders - Auto Reply - Electronic Business Card - Email Filters- Manage Junk Mail - Calendar - Plan Meetings, Appointments - Scheduling Emails

3.2.3 Emerging Trends in IT - 3D Printing, Cloud Storage, Augmented Reality, Artificial Intelligence, Internet of Things (IoT)

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Two to three Task based components

Task based classroom activities

Case studies

Group discussions

Group presentation

Role play

No End Semester Examination

No CA test

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI-600086

**Soft Skills Course Offered by the Department of English for
B.A / B.Sc / B.Com / B.B.A/ B.S.W / B.V.A/B.C.A. Degree Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

LIFE SKILLS: PERSONALITY DEVELOPMENT

CODE: 23EL/SS/PD13

CREDITS:3

L T P:3 0 0

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To make students aware of their strengths and weaknesses
- To help them hone their communication skills
- To equip them with skills required to raise self-esteem and confidence levels
- To help them acquire competencies to achieve personal and academic excellence
- To enable students to become effective team players

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	identify strengths and weaknesses in themselves and others.	K1
CO2	relate with others through effective communication and body language.	K2
CO3	make use of interpersonal skills in team work, and organise their activities.	K3
CO4	survey the opportunities for learning and growth.	K4
CO5	evaluate their strengths, weaknesses, opportunities and threats, and develop their personality.	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1	<u>Self Awareness</u> 1.1 Self esteem 1.2 Strengths and weaknesses 1.3 Accepting oneself 1.4 Giving/receiving compliments 1.5 Giving/receiving constructive criticism	K1-K4	13	1-4
2	<u>Personal Effectiveness</u> 2.1 Interpersonal skills – Communication and listening skills 2.2 Creative thinking 2.3 Dealing with stress 2.4 Adapting to change 2.5 Team work and group dynamics 2.6 Leadership skills	K1-K6	13	1-5
3	<u>Charting the Future</u> 3.1 Time management 3.2 Goal setting 3.3 Choice of career/vocation 3.4 Career mapping	K1-K6	13	1-5

MATHEMATICS FOR CHEMISTRY I

CODE: 23MT/AC/MC15

CREDITS: 5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To understand the genesis of the basic mathematical concepts and tools required
- To apply the concepts of matrices and theory of equations in solving problems related to chemistry
- To understand the various concepts of differentiation and integration
- To familiarize with a few types of partial differential equations and solve them
- To introduce the concept of finite differences

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	recall the fundamental concepts of matrices, algebra, calculus, partial differential equations and finite difference methods	K1
CO2	understand different techniques in obtaining approximate solutions to complex mathematical problems, solving algebraic problems and to employ the various techniques in finding derivatives and integration	K2
CO3	solve the results of calculus through illustrations, equations, and to utilize several methods in interpolation, differentiation and integration	K3
CO4	analyse solutions that are obtained by using techniques of calculus, algebra and finite differences and to classify partial differential equations and obtain their solutions systematically	K4
CO5	evaluate the eigen vectors, integrals and to predict appropriate methods to find the solution of problems on differential and interpret results using appropriate numerical techniques	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Properties of Matrices 1.1 Eigenvalues and Eigenvector 1.2 Cayley Hamilton Theorem (statement only) 1.3 Diagonalization of Matrices possessing Distinct Eigenvalues 1.4 Eigenvalues for symmetric matrices	K1- K5	12	CO1-5
2	Theory of Equations 2.1 Relation Between Roots and Coefficients 2.2 Solution of Equations under given Conditions On Roots 2.3 Transformation of Equations 2.4 Reciprocal Equations	K1- K5	13	CO1-5
3	Differential Calculus 3.1 Differentiation of Hyperbolic and Inverse Hyperbolic Functions 3.2 Higher Derivatives - n^{th} derivative – Standard Results 3.3 n^{th} derivative of algebraic and rational functions of the form $\frac{f(x)}{\varphi(x)}$ 3.4 Trigonometric Transformations Integral Calculus 3.5 Methods of Integration of functions of the Following Types: $\frac{1}{(x+p)\sqrt{ax^2+bx+c}}; \sqrt{(x-a)(b-x)};$ $\frac{1}{\sqrt{(x-a)(b-x)}}; \sqrt{\frac{(x-a)}{(b-x)}}$	K1- K5	14	CO1-5

4	Partial Differential Equations 4.1 Formation of Equations by Elimination of Constants and an Arbitrary Function (Problems only) 4.2 Definition of General, Particular, Complete and Singular Integral 4.3 Solutions of First Order Equations in their Standard Forms 4.4 Lagrange's Method of Solving of Linear Equations $Pp + Qq = R$	K1- K5	13	CO1-5
5	Finite Difference Methods 5.1 Finite Differences 5.2 Forward Difference Table 5.3 Interpolation Methods 5.4 Newton's Forward Formula 5.5 Newton's Backward Formula 5.6 Binomial Method 5.7 Lagrange's Formula	K1- K5	13	CO1-5

SYLLABUS

(Effective from the academic year 2023-2024)

ORGANIC CHEMISTRY I

CODE: 23CH/MC/OC24

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enable understanding of molecules as optically active or inactive, chiral or achiral, racemic or meso, enantiomers or diastereomers and assign absolute configuration.
- To instil comprehensive understanding of types of substitution, addition and elimination reactions
- To apply learned concepts and mechanisms of carbonyl compounds to analyse and solve problems relating to nucleophilic addition, oxidation and reduction reactions of carbonyl compounds

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the basic concepts of stereochemistry, types of reactions, structure of carbonyl compounds and oxidation and reduction reactions	K1
CO2	compare the reactivity of substrates in the presence of reagents, solvents and differentiate the types of reactive intermediates in organic reactions	K2
CO3	apply the concepts of stereochemistry and kinetics in organic reactions to solve problems.	K3
CO4	analyse the interconversion of different projections of molecules, stability of conformers in acyclic and cyclic compounds and examine the mechanisms based on organic reagents and reactions.	K4
CO5	evaluate the effect of stereochemistry in chemical reactivity and product formation in organic reactions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Stereochemistry 1.1 Stereoisomerism-Definition and Types, Geometrical Isomerism - <i>E-Z</i> Notation. Optical Isomerism – Definition, Conditions for Optical Activity and its Measurement, Specific Rotation, Asymmetric Centre, and Chirality. Enantiomers, Diastereomers, racemic and meso Compounds (Definition and Examples)	K1- K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	<p>1.2 Notations for Optical Isomers with one and two Asymmetric Carbon Atoms. Specification of Configuration - <i>D-L</i> and <i>R-S</i> Notations (Cahn-Ingold-Prelog Rules), Erythro and Threo representations</p> <p>1.3 Conformational Isomerism-Interconversion of Newman Projection, Fischer, Flying Wedge and Sawhorse Projections. Conformational Analysis of Ethane, nButane and Cyclohexane</p> <p>1.4 Stereospecific and Stereoselective Reactions - Addition of hydrogen and bromine to Alkenes-Syn and Anti Addition</p>			
2.	<p>Electrophilic and Nucleophilic Substitution Reactions</p> <p>2.1 Aliphatic nucleophilic substitution reaction - S_N1, S_N2, S_Ni, and S_{NCB}. Factors governing S_N1, S_N2 Reactions - Effects of Structure, Solvent, nature of entering and leaving group. Kinetics, stereochemistry of nucleophilic aliphatic substitution, duality of mechanism, Walden Inversion. S_N1 vs S_N2</p> <p>2.2 Aromatic nucleophilic substitution reaction- S_NAr Mechanism-Benzyne intermediate formation and evidences. Aromatic electrophilic substitution reaction - sulphonation, nitration, halogenation, Friedel Crafts alkylation and acylation reaction, Effect of substituent already present in the ring, ortho / para ratio, orientation in di substituted compounds</p>	K1-K5	15	1-5
3.	<p>Addition and Elimination Reactions</p> <p>3.1 Addition: Electrophilic Addition- orientation and reactivity, Markownikoff and Anti- Markownikoff rule. Examples of Addition Reaction- Addition of Hydrogen, Halogen, Hydrogen halide, Hypohalous acid, sulphuric acid, water, hydroxylation, epoxidation, hydroboration (with Propene and Propyne as Examples), ozonolysis, mechanism of the peroxide initiated addition of HBr. Electrophilic addition to conjugated dienes - 1, 2 and 1, 4 - addition.</p> <p>3.2 Elimination: E_1, E_2 and E_{1cB} Mechanisms, orientation and reactivity (Hoffmann and Saytzeff rule) and evidences. Stereochemistry of E_1 and E_2 reactions. Syn- and Anti- Elimination and Elimination vs Substitution</p>	K1-K5	15	1-5
4.	<p>Aliphatic, Aromatic and Unsaturated Carbonyl Compounds</p> <p>4.1 Structure of Carbonyl Group, acidity of alpha hydrogen, Keto-Enol tautomerism – evidence for</p>	K1-K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	the two forms. Relative reactivity of Aldehydes and Ketones. A comparison of reactivity with aromatic carbonyls and its derivatives 4.2 Nucleophilic addition reactions: Aldol Condensation, Cannizzaro, Crossed Cannizzaro, Claisen- Schmidt, Houben- Hoesch (Synthesis of Phenolic Ketone), Benzoin Condensation, Haloform, Knoevenagel, Reformatsky and Perkin reactions 4.3 Acrolein, Crotonaldehyde, Cinnamaldehyde – Preparation and reactions.			
	Oxidation and Reduction Reactions of Carbonyl Compounds 5.1 Oxidation - Meerwein-Pondorf-Verley, Oppenaur and Baeyer-Villiger 5.2 Reduction - Clemmensen, Wolff-Kishner, LiAlH_4 and NaBH_4	K1- K4	8	1-4

SYLLABUS

(Effective from the academic year 2023–2024)

ANALYTICAL CHEMISTRY

CODE: 23CH/MC/AC23

CREDITS: 3

L T P: 3 1 0

TOTAL TEACHING HOURS: 52

OBJECTIVES OF THE COURSE

- To introduce the key concepts of Analytical Chemistry with a special reference to its applications
- To impart the understanding of the common sampling strategies for solids, liquids and gases
- To enable understanding of the importance of statistical measures
- To provide knowledge on the quantitative titrimetric analysis
- To familiarize students with separation techniques and Thermoanalytical methods

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	define terms in analytical chemistry, relate to fundamental concepts, list types of analytical techniques	K1
CO2	discuss the different types of analytical techniques, statistical analysis and factors affecting solvent extraction, chromatography, equivalent point and thermograms	K2
CO3	prepare various concentrations of solutions and laboratory samples; apply relevant statistical methods to chemical data; and the principles of titrimetric and thermometric analysis	K3
CO4	classify various analytical techniques and statistical analysis, deduct the significant figures during the mathematical operations; separate simple organic mixtures using basic separation techniques	K4
CO5	interpret analytical data using statistical techniques and evaluate the importance of analytical techniques used in separation of chemical compounds, titrimetry and thermometry	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Stoichiometry 1.1 Important Units of Measurement – S.I Units, Distinction between Mass and Weight, Concentration of Solutions – Moles, Millimoles, Milli equivalence, Molality, Molarity, Normality, Percentage by Weight and Volume, ppm. Ppb. Density and Specific Gravity of Liquids. Stoichiometry Calculations	K1-K3	6	1-3
2.	Sampling and Errors 2.1 Sampling Techniques-Sampling and Sample Handling of Liquids and Gases, Particulate Solids, Metals and Alloys. Preparation of a Laboratory Sample 2.2 Errors-Types of Errors, Accuracy, Precision, Minimization of Errors. Significant Figures. Methods of Expressing Precision: Mean, Median, Average Deviation, Standard Deviation, Coefficient of Variation, Confidence Limits, Q-test, F-test, T-test. The Least Square Method for Deriving Calibration Plots	K1-K5	12	1-5
3.	Separation Techniques 3.1 Solvent Extraction - Liquid-Liquid Extraction – Factors affecting Solvent Extraction, Soxhlet and Rotavapor Extraction 3.2 Chromatography Column, TLC, Paper and Electrophoresis- Principle, Classification, Choice of Adsorbents, Solvents, Preparation of Column, Elution, Development of Chromatogram and Rf Value	K1-K5	12	1-5
4.	Titrimetry 4.1 Calibration of Burette, Pipette, Standard Flask, Titrant, Titrand, Indicators, Equivalence Point, End Point. Primary and Secondary Standards- Criteria and Preparation. Limitations of volumetric analysis 4.2 Neutralisation Titrations- strong acid-strong base, weak acid strong base titrations, indicators, range of indicator, choice of indicator, feasibility of acid base titrations, effect of Ph on equivalence point. 4.3 Complexation Titrations- metallochromic indicators, masking and demasking agents, Factors affecting Equivalence Point 4.4 Precipitation Titrations- Mohr method and Fajans method of estimation of halides. Redox titrations - Theory of redox indicators (Ferroin and diphenyl amine)	K1-K5	13	1-5
5.	Thermoanalytical Methods 5.1 TGA/DTG and DTA - Principle and Instrumentation, Thermal Analysis of Silver Nitrate, Calcium Oxalate, Methods of obtaining Thermograms, Factors affecting TGA/DTA 5.2 DSC – Principle and Applications 5.3 Thermometric titrations - Principle, process and applications	K1-K5	9	1-5

INORGANIC QUALITATIVE ANALYSIS PRACTICAL I

CODE: 23CH/MC/P222

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To provide understanding of the fundamental principles of inorganic qualitative analysis
- To instill understanding of solubility product and common ion effect
- To impart the skills required to identify an acid and basic radical in an inorganic salt
- To introduce the synthesis of inorganic complexes

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the concepts of solubility product/common ion effect and the principles of inorganic complex preparation	K1, K2
CO2	perform various chemical reactions and synthesis in a laboratory according to given procedure and safety precautions	K3
CO3	differentiate between acid and basic radicals and identify the appropriate elimination procedure for the interfering acid radical.	K4
CO4	examine the characteristics of a given salt through various chemical tests	K5
CO5	analyse the given inorganic salt and identify the interfering acid radical and basic radical present.	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Reactions of interfering acid radicals and basic radicals 1.1 Reactions of the following Acid Radicals: Carbonate, Sulphate, Sulphide, Nitrate, Chloride, Bromide, Fluoride, Oxalate, Phosphate, Arsenite, Arsenate, Chromate and Borate 1.2 Elimination of Interfering Radicals – Fluoride, Oxalate, Phosphate, Chromate and Borate 1.3 Reactions of the Following Basic Radicals and its Group Separations. Lead, Copper, Bismuth, Cadmium, Antimony, Iron, Chromium, Aluminium, Cobalt, Nickel, Manganese, Zinc, Barium, Strontium, Calcium, Ammonium and Magnesium	K1-K5	3	1-4
2.	Inorganic Qualitative Analysis 2.1 Analysis of a given Salt Containing one Cation and one Anion (which will be an interfering ion)	K1-K6	30	1-5
3.	Preparation of Inorganic Complexes (to be tested internally) 3.1 Tetraamminecopper (II) sulphate hydrate 3.2 Tris(thiourea) copper (II)sulphate dehydrate 3.3 Potassium trioxalatoferrate (III)	K1-K3	6	1-2

Venkateswaran V., Veeraswamy R. and Kulandaivelu A. R. *Basic Principles of Practical Chemistry*. New Delhi: Sultan Chand & Sons, 2012.

PATTERN OF ASSESSMENT

Continuous Assessment:

Total Marks: 50

Duration: 3 hours

Two to three questions in inorganic qualitative analysis	-	10 marks
General Procedure	-	05 marks
Acid radical	-	15 marks
Elimination procedure	-	05 marks
Basic radicals	-	15 marks
Total	-	50 marks

End-Semester Examination:

Total Marks: 50

Duration: 3 hours

Two to three questions in inorganic qualitative analysis	-	10 marks
General Procedure	-	05 marks
Acid radical	-	15 marks
Elimination procedure	-	05 marks
Basic radicals	-	15 marks
Total	-	50 marks

Section	Cognitive Level	Marks	Pattern
Theoretical Principles and Viva	K1-K3	10	Subjective
Procedure	K1-K3	10	Subjective
Experiment	K1-K6	30	Subjective

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**General Core Course Offered to students of
B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

ENVIRONMENTAL STUDIES

CODE:23CH/GC/ES12

CREDITS:2

L T P:2 0 0

TOTAL TEACHING HOURS:26

OBJECTIVES OF THE COURSE

- To help students to gain the fundamental knowledge of the environment
- To create in students an awareness of current environmental issues
- To inculcate in students an eco-sensitive, eco-conscious and eco-friendly attitude

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- Articulate the interdisciplinary context of environmental issues
- Adopt sustainable alternatives that integrate science, humanities and social perspectives
- Appreciate the importance of biodiversity and a balanced ecosystem
- Calculate one's carbon footprint

Unit 1 (10 Hours)

- 1.1 Introduction: The multidisciplinary nature of environmental studies;
Environmental Ethics-Role of the Individual in protecting the environment
- 1.2 Natural Resources: renewable (forests and water) and non-renewable (minerals)-
energy resources: renewable and non-renewable sources, impact of over-
exploitation
- 1.3 Ecosystems: terrestrial (forest, grassland and desert) and aquatic (ponds, oceans
and estuaries); structure and function
- 1.4 Biodiversity: India as a mega-diversity nation; threats to biodiversity; *in-situ* and
ex-situ conservation of biodiversity
- 1.5 Solid Waste Management, Source Segregation and Rain Water Harvesting

Unit 2 (10 Hours)

- 2.1 Environmental Pollution: Air, Water, Noise and Plastic Pollution: causes, effects
and control measures -Impact of over-population on pollution and health –
carbon footprint
- 2.2 The Environmental Dimension of Sustainable Development: The United Nations
Sustainable Development Goals of the 2030 Agenda

- 2.3 Climate Change and Environmental Disasters: Natural Disasters: floods, earthquakes, cyclones, tsunamis and landslides; man-made disasters: Bhopal Gas Tragedy and Chernobyl Nuclear Disaster
- 2.4 Environmental Movements: Chipko, Silent Valley and Narmada Bachao Andolan International Agreements: Montreal Protocol, Kyoto Protocol and Climate Change Conferences
- 2.5 An Overview of Environmental Laws in India: Environmental (Protection) Act 1986, Biological Act, 2002, National Green Tribunal Act, 2010, Coastal Regulation Zone Notification, 2011

Unit 3

(6 Hours)

- 3.1 A study of the eco-friendly initiatives on campus
- 3.2 A critical review of an environmental documentary film
- 3.3 Ecofeminism and the contributions of Indian Women Environmentalists
- 3.4 The highlights of Environmental Encyclical-*Laudato si*-On Care for our Common Home
- 3.5 Environmental Calendar

PATTERN OF ASSESSMENT

Continuous Assessment Test: **Total Marks: 25** **Duration: 60 minutes**

Section A-10 x 1 = 10 Marks (All questions to be answered) Multiple Choice Questions

Section B - 3 x 5 = 15 Marks (3 out of 6 to be answered in 150 words each)

Other Component: **Total Marks: 25**

Any **one** of the following for 25 marks

Quiz/Scrap Book/Assignment / Poster Making/Case Study/Project/Survey/Model-Making

No End Semester Examination

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600 086

**Allied Core Course offered by the Department of Mathematics for
B.Sc. (Chemistry) Degree Programme**

SYLLABUS

(Effective from the academic year 2023-2024)

MATHEMATICS FOR CHEMISTRY II

CODE: 23MT/AC/MC25

CREDITS:5

L T P: 5 0 0

TOTAL TEACHING HOURS: 65

OBJECTIVES OF THE COURSE

- To impart knowledge in Laplace, Fourier series, Statistics for solving mathematical problems in chemistry
- To realize the application of Laplace transform to solve Differential Equations
- To appreciate the expansion of periodic functions as a Fourier series
- To teach statistical tools using correlation and regression
- To introduce the concept of group theory

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COS	DESCRIPTION	CL
CO1	recall basic mathematical concepts required for students pursuing Chemistry	K1
CO2	understand mathematical tools like Laplace transforms, Inverse Laplace transforms, Fourier series, Statistics to compute simple problems	K2
CO3	apply various techniques like Laplace transforms, inverse Laplace transforms, Fourier series, Statistics and Group theory to real life situations applicable in Chemistry	K3
CO4	analyse to use the appropriate tools in Chemistry	K4
CO5	evaluate the techniques learnt and to solve problems in real life situation	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Laplace Transform 1.1 Definition of Laplace transform 1.2 Transforms of $f'(t)$ & $f''(t)$ 1.3 Transformation of Function e^{-at} , $\cos at$, $\sin at$ and t^n , where 'n' is a Positive Integer 1.4 First Shifting Theorem: Laplace Transforms of $e^{-at} \cos bt$, $e^{-at} \sin bt$ and $e^{-at} t^n$	K1- K5	12	CO1-5

UNIT	CONTENT	CL	Hrs	CO
2	Inverse Laplace Transform 2.1 Inverse Laplace Transforms of Functions relating to $e^{-at} \cos bt$, $e^{-at} \sin bt$ and $e^{-at} t^n$. 2.2 Applications to Solutions of Ordinary Differential Equations with Constant Coefficients	K1- K5	12	CO1-5
3	Fourier Series 3.1 Fourier Series: Definition 3.2 Finding Fourier Coefficients for a given Periodic Function with Period 2π 3.3 Odd and Even Functions 3.4 Half-range Fourier Series-Development in Cosine Series, Development in Sine Series	K1- K5	13	CO1-5
4	Statistics 4.1 Correlation 4.2 Scatter Diagram and its Uses 4.3 Karl Pearson's Coefficient of Correlation 4.4 Regression 4.5 Definition and Uses 4.6 Difference between Regression and Correlation 4.7 Graphic Method 4.8 Regression Equations: Regression Equation of Y on X and X on Y	K1- K5	13	CO1-5
5	Group Theory 5.1 Groups–Definitions and Examples 5.2 Properties of a Group 5.3 Order of an Element 5.4 Subgroups 5.5 Permutation Groups 5.6 Cyclic Groups	K1- K5	15	CO1-5

INORGANIC CHEMISTRY I

CODE: 23CH/MC/IC34

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To give an understanding of the general trends in the s- and p-block elements.
- To impart understanding of the biological significance of sodium, potassium, magnesium and calcium and the preparation and properties of industrially important compounds.
- To create interest in the chemistry of boron, carbon, nitrogen, sulphur and halogen compounds
- To enhance critical thinking skills through structured problem solving

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the types of bonding and properties of s and p block elements	K1
CO2	Illustrate the bonding involved in the s- and p-block elements and their compounds	K2
CO3	Analyse the bonding and properties of s- and p- block elements and their compounds based on the periodicity of elements	K3
CO4	Evaluate the bonding, properties of s and p block elements based on their position in the periodic table	K4
CO5	Integrate structure and bonding of s- and p- block elements and their compounds to their properties	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Chemical bonding 1.1 Types of Bonds - Ionic, Covalent, Metallic, Coordinate Bonds and properties- melting point, conductivity, solubility, speed of reaction, Lattice Energy - Born-Lande Equation, Born-Mayer and Kapustinskii equations (derivation not required) - Factors affecting Lattice Energy, Born Haber Cycle and its Applications	K1- K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	<p>1.2 Covalent Bond – Lewis Structures of Simple Molecules and Ions, formal charge, Valence Shell Electron Pair Repulsion Theory- effect of lone pair, effect of electronegativity, application of VSEPR theory on BF_3, $[\text{BF}_4]^-$, NH_3, H_2O, PCl_5, SF_4, ClF_3, I_3^-. Covalent Character in Ionic Compounds - Polarisation and Fajan's Rules</p> <p>1.3 Valence Bond Theory (VBT) – Hybridization of orbitals (Acetylene, BeF_2, Ethene, BF_3, CH_4, H_2O, NH_3)</p> <p>1.4 Molecular Orbital Theory (MOT) – Bonding, Antibonding and Nonbonding Orbitals, Linear combination of atomic orbitals, rules for linear combination of atomic orbitals, Application of MOT to He_2, N_2, O_2, O_2^-, O_2^{2-}, CO, NO, HF, Comparison between VBT and MOT.</p>			
2.	<p>Chemistry of s-Block Elements</p> <p>2.1 Group 1 Alkali Metals: Position of Alkali Metals in the Periodic Table, difference between lithium and other group I elements, biological importance of Na, K, Discussion of Alkali Metal Group with respect to their Oxides, superoxides Hydroxides and oxo salts. Extraction of Lithium from Spodumene. Importance of Cryptates and Crown Ethers (complexes, crowns and crypts)</p> <p>2.2 Group 2 Alkaline Earth Metals: Position of Alkali Metals in the Periodic Table, difference between beryllium and other group II elements, biological importance of calcium and Magnesium, Physical and Chemical Properties with respect to Oxides, peroxides, Hydroxides, Halides and Sulphates. Extraction of Beryllium</p>	K1-K5	10	1-5
3.	<p>Chemistry of p-Block Elements – Groups 13 & 14</p> <p>3.1 Boron Family: Periodicity in the Properties of Boron Group with respect to their Oxides, Hydroxides and Halides. Preparation, properties and Bonding of B_2H_6. Preparation, Structure and uses of Boron Nitride and Borazole</p> <p>3.2 Carbon Family: Comparison of Carbon Group Elements - Hydrides, Oxides and Halides. Silicates: Classification and Structure. Silicones- Preparation, Properties and uses</p>	K1- K5	12	1-5
4.	<p>Chemistry of p-Block Elements–Groups 15, 16 & 17</p> <p>4.1 Nitrogen Family: Comparison of Nitrogen group Elements with respect to Oxides, Hydrides and Halides. Preparation, Properties and Structure of</p>	K1- K5	20	1-5

UNIT	CONTENT	CL	Hrs	CO
	Hydrazine, Hydroxylamine, Hydrazoic Acid. Oxyacids of Nitrogen and Phosphorus - Preparation, Properties and Structure. Structure and Applications of Phosphonitrilic Compounds 4.2 Oxygen Family: Comparison of Oxygen Group Elements with respect to Hydrides, Halides, Oxides. Preparation, Properties and Structure of Oxyacids and Peracids of Sulphur. Thionic Acids 4.3 Halogen Family: Comparison of Halogens with respect to the Elements, Hydrides and Oxides. Preparation and Structure of OF_2 , Cl_2O , I_2O_5 and Cl_2O_7 , HClO_4 . 4.4 Interhalogen Compounds: Preparation and Structure of ICl , BrF_3 , IF_3 , IF_5 and IF_7 . Basic Nature of Iodine. Pseudohalogens and Polyhalides			
5.	Chemistry of Group 18 elements 5.1 Occurrence, Position of Noble Gases in the Periodic Table. Preparation, Properties and Structure of Compounds of Xenon - XeF_2 , XeF_6 , XeO_3 , XeOF_2 as per VSEPR Theory 5.2 Clathrate Compounds and its Applications	K1- K5	8	1-5

OBJECTIVES OF THE COURSE

- To provide an understanding of crystal systems
- To explain the various cubic lattices
- To impart a comprehensive knowledge on closed packed structures
- To introduce the concept of electrical polarizability and magnetic susceptibility
- To enlighten on concepts of ionic equilibria

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Define the various terms and principles involved in the study of solid state structures, electrical and magnetic properties of materials, ionic and solubility equilibria	K1
CO2	Discuss the characteristic features of crystalline structures inclusive of liquid crystals, types of magnetic materials, acid-base systems and sparingly soluble salts	K2
CO3	Interpret the XRD patterns of cubic systems, solve problems based on acid-base systems, pH of various solutions and buffers and applications of electrical and magnetic properties of materials.	K3
CO4	Analyse various parameters of crystal systems, dipole moment of materials, dissociation constants of acid-base systems, salts using significant mathematical expressions	K4
CO5	Assess concepts related to solid state structures, electrical and magnetic properties of materials and chemical equilibria	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Solid State 1.1 Elements of Symmetry in a cube, Crystalline and amorphous Solids, Isotropy and Anisotropy, Interfacial Angles, Symmetry in Crystal Systems 1.2 Unit Cell, Seven Crystal Systems, Space Lattice and Bravais Lattices 1.3 Law of Rational Indices, Weiss indices, Miller Indices, X-Ray Diffraction-Bragg's Law, Derivation of Bragg's Equation, Representation of Planes. 1.4 Experimental Technique-Powder Method, X-Ray Diffraction Patterns of a Cubic System-Primitive, Body Centered and Face Centered Cubic Lattice	KI-K5	13	1-5
2.	Closed Packed Structures of Ionic Crystals 2.1 Closed Packed Structures- CCP and HCP, Percentage Void, Packing Efficiency, Radius Ratio Rule 2.2 Simple Structures: Types - AX (NaCl, ZnS, NiAs), AX ₂ (CaF ₂ , TiO ₂ , CdCl ₂ and CdI ₂) 2.3 Point Defects – Schottky and Frenkel Defects, Non-Stoichiometric Defects 2.4 Liquid Crystals – Types, Structures, Textures and Applications	K1-K5	13	1-5
3.	Electrical & Magnetic Properties of Atoms and Molecules 3.1 Electrical properties: Polarisation, Clausius-Mossotti equation, Debye equation, polarisability and frequency 3.2 Dipole moment and molecular polarisabilities and their measurements. 3.3 Magnetic properties: Magnetic permeability, magnetic susceptibility, Diamagnetism, Paramagnetism, Ferro and Anti-ferromagnetism	K1-K5	10	1-5
4.	Ionic Equilibria 4.1 Proton Transfer Equilibria-Bronsted Lowry Theory, Protonation and Deprotonation (pK _a , pK _b , pH, pOH, K _w and pK _w), Polyprotic Acids, Amphoteric Systems (H ₂ O) 4.2 Buffers: Acid, Basic and Single salt buffer, buffer capacity, buffer action, Derivation of Henderson-Hasselbach Equation 4.3 Hydrolysis of Salts (weak acid & strong base, weak base & strong acid, weak acid & weak base), Hydrolysis Constant, Relation between K _h , K _a (K _b), K _w and Degree of hydrolysis	K1-K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
5.	Solubility Equilibria 5.1 Solubility, Solubility Product, relation between molar solubility and solubility product of a sparingly soluble salt, Common Ion effect 5.2 Applications of solubility product in determination of solubility of sparingly soluble salts, predicting precipitation reactions, precipitation of soluble salts and in qualitative semi micro inorganic salt analysis	K1-K5	6	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600086

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SYLLABUS

(Effective from the academic year 2023-2024)

INORGANIC QUALITATIVE ANALYSIS PRACTICAL II

CODE: 23CH/MC/P332

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To enable understanding of solubility product and common ion effect of the ions present in the inorganic substance
- To impart the skills required to identify the acid and basic radicals present in the inorganic substance
- To enhance the skill required to identify the interfering radical and eliminate it using the appropriate procedure

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recollect the concepts of solubility product and common ion effect.	K1, K2
CO2	Differentiate between non-interfering and interfering acid radicals and identify the appropriate elimination procedure for the interfering radical.	K3
CO3	Apply the concepts of solubility product and common ion effect in separating the two acid and two basic radicals present in the given inorganic salt.	K4
CO4	Examine the characteristics of a given salt mixture through various chemical tests	K5
CO5	Analyse the given inorganic salt mixture, identify the acid and basic radicals present in the inorganic salt mixture and eliminate the interfering acid radical present	K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	1.1 Principles and Techniques in Inorganic qualitative analysis of Acid and Basic Radicals: Solubility Product Principle, Common Ion Effect	K1-K3	3	1-2
2.	Reactions of interfering acid radicals and basic radicals 2.1 Use of organic and inorganic reagents in spot tests (Equations Relating to Reactions and Confirmatory Tests)	K1-K6	6	1-5
3.	Qualitative Analysis 3.1 Analysis of a salt mixture containing two cations and two anions (simple and interfering)	K1-K6	30	1-5

FUNDAMENTALS OF BIOCHEMISTRY I

CODE: 23CH/AC/FB33

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To facilitate understanding of fundamental biochemical principles involving biological mechanisms
- To explain the significance of clinical haematological tests and enzymes in biochemical processes
- To enable understanding of carbohydrate metabolism
- To introduce the principles and methodologies involved in the digestion and absorption of carbohydrates

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the fundamentals of biochemistry, biomolecules and bioenergetics	K1
CO2	Relate blood buffers with the pH of blood, digestion and absorption of carbohydrates with carbohydrate metabolism	K2
CO3	Analyse the metabolism of glucose, hormone action and mechanism of enzyme action	K3
CO4	Evaluate free energy, enthalpy and entropy in a biochemical process, spontaneity of a biochemical reaction, glucose levels in blood through haematological tests and pH of blood	K4
CO5	Summarise the steps involved in different stages of carbohydrate metabolism, mechanism of enzyme action and coagulation of blood	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Biochemistry 1.1 Molecular Logic of Living Organisms 1.2 Water – Physical Properties and Hydrogen Bonding of Water-Solvent Properties of Water, Hydrophobic Interactions, the Ionic Product of Water, the pH Scale. Acid Base Indicators- Phenolphthalein and Methyl Orange	K1- K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
	1.3 Maintenance of pH of Blood, Bicarbonate Buffers, Acidosis and Alkalosis, Buffers and electrolytes in the body			
2.	Blood 2.1 Blood - Composition of Blood, Blood Coagulation – Mechanism. Haemophilia and Sickle Cell Anaemia 2.2 Clinical significance of RBC, WBC and Platelet Count in blood	K1- K5	5	1-5
3.	Bioenergetics 3.1 Enthalpy, Entropy, Free Energy, Standard Free Energy, spontaneous and non-spontaneous. Exergonic and Endergonic Reactions 3.2 High Energy Compounds ATP and ADP, Structural Basis for the Role of ATP as the currency of the cell	K1- K5	4	1-5
4.	Carbohydrates 4.1 Classification of Carbohydrates 4.2 Haworth's Structure and Reactions of Glucose, Fructose and Sucrose. Polysaccharides – Homopolysaccharides -Cellulose, Starch - Amylose and Amylopectin (Structural Elucidation not required) 4.3 Digestion of di and polysaccharides in the body, maintenance of glucose level in Blood-significance of HbA1c 4.4 Carbohydrate Metabolism - Metabolism of Glucose - Glycolysis, TCA Cycle (structures not required), Glycogenesis, Glycogenolysis, Gluconeogenesis. Oxidative phosphorylation and electron transport chain	K1- K5	15	1-5
5.	Enzymes 5.1 Definition of Enzymes, Coenzymes and Apoenzymes 5.2 Nomenclature and Classification of Enzymes 5.3 Enzyme Specificity - Factors affecting Enzyme Action 5.4 Mechanism of Enzyme Action - Michaelis- Menten Theory (No Derivation) – Fischer's lock and key model and Koshland's induced fit model	K1- K4	5	1-4

SYLLABUS

(Effective from the academic year 2023-2024)

FUNDAMENTALS OF CHEMISTRY I

CODE: 23CH/AC/FC33

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To impart introductory knowledge of organic compounds and concepts in organic chemistry
- To facilitate learning of the fundamentals of polymer chemistry
- To enable understanding the important structural aspects and functions of amino acids, proteins and carbohydrates
- To instil knowledge about the kinetics of zero, first and second order reactions and the effect of temperature on rates of reactions.
- To introduce the basics of acid-base theories and buffer solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	identify various organic functional groups, label compounds, define terms related to polymers, biomolecules, kinetics and ionic equilibrium	K1
CO2	compare types of organic intermediates and reactions, indicate the uses of polymers and study of ionic equilibria, discuss structures of biomolecules and summarise the kinetics and equilibrium conditions of reactions	K2
CO3	classify molecules and calculate various physical parameters of compounds	K3
CO4	predict functionality of different organic molecules, biomolecules and polymers, differentiate between various reactions using kinetics and analyse the strength of acids and bases	K4
CO5	evaluate and estimate physical parameters to study reaction mechanisms of various molecules	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Organic Chemistry 1.1 Identification of common functional groups in Organic compounds (alcohols, amines, alkyl halides, aldehydes, ketones, carboxylic acids, esters and amides) 1.2 Nature of bond fission- homolytic and heterolytic, types of reagents - nucleophile and electrophile (examples)	K1-K4	6	1-4

UNIT	CONTENT	CL	Hrs	CO
	1.3 Types of intermediates - carbocations, carbanions and free radicals - definition, structure and examples 1.4 Substitution, Addition and Elimination Reactions- definition with an example each			
2.	Polymer Chemistry 2.1 Classification of Polymers, types of polymerisations - addition (cationic, anionic and free radical mechanism) and condensation 2.2 Thermosetting and Thermoplastics –Definition with examples, Structure and Applications of Polyethylene, Polyvinylchloride, Nylon 66 and Bakelite, Natural and synthetic rubber, vulcanisation of rubber 2.3 Biodegradable and non-biodegradable polymers	K1-K5	10	1-5
3.	Chemistry of Biomolecules 3.1 Amino acids – Classification based on R groups, Zwitter ion and isoelectric point- definition and illustrations, chemical reactions of amino acids- Ninhydrin test 3.2 Polypeptides-Introduction and nomenclature, Proteins-Structure (primary, secondary, tertiary and quaternary) and functions, Denaturation and Renaturation of proteins 3.3 Carbohydrates- Classification, structure of Glucose and Fructose –Fischer and Haworth projections, Structure and uses of Maltose and Sucrose, Starch-structure and reaction with iodine, Uses of starch and cellulose 3.4 Analysis for carbohydrates- Molisch, Barfoed, Tollen's and Fehling's tests, preparation of Osazone derivative	K1-K5	10	1-5
4.	Chemical Kinetics 4.1 Rate of reaction, Order and Molecularity 4.2 Zero order, First order, Pseudo-unimolecular and Second order reactions. 4.3 Determination of order – Graphical, Half - life, Integrated rate equation and Ostwald's isolation methods 4.4 Energy of activation - Effect of temperature on reaction rates-Arrhenius equation	K1-K5	7	1-5

UNIT	CONTENT	CL	Hrs	CO
5.	Ionic Equilibrium 5.1 Acid-base concept - Arrhenius, Lowry Bronsted and Lewis Concepts 5.2 Strength of acids and bases- Dissociation constants of acids (K_a), bases (K_b) and water (K_w), pK_a , pK_b and pK_w 5.3 Definition of pH and pOH, significance of pH scale 5.4 Buffer solutions – Types, buffer action, Derivation and importance of Henderson- Hasselbach equation	K1-K5	6	1-5

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To impart basic knowledge on elasticity and other properties of matter.
- To train the students to acquire the basics of surface tension and viscosity.
- To enable the students to understand moment of inertia and the oscillation of a body.
- To familiarise the students on the wave nature of light.
- To illustrate the students to the concept of special theory of light.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the basic ideas of physical properties of different states of matter, motion of a rigid body, relativity and wave nature of light.	K1
CO2	understand the elastic nature of solids, surface tension, viscosity of liquids, oscillation of a rigid body, constant nature of velocity of light in free space and physical optics.	K2
CO3	apply the knowledge obtained to determine the bending moment, modulus of elasticity, coefficient of viscosity, surface tension, period of oscillation, transformation equation and wavelength.	K3
CO4	study the distinguishing characteristics of solid, liquid and light.	K4
CO5	impart analytical skills to solve problems related to properties of matter, liquids, relativity and wave nature of light.	K5
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Properties of Matter 1.1 Elasticity: Moduli of elasticity – Poisson's ratio-Young's modulus – Bending of beams - Expression for bending moment - Depression at the loaded end of the cantilever - Depression and elevation at the mid-point of a loaded beam - Torsion in a wire – Torsional oscillations – Torque per unit twist- Expression for period.	K1-K5	6	1-5
2	Surface Tension and Viscosity 2.1 Introduction - Experimental determination of surface tension and interfacial surface tension by drop weight method –Variation of surface tension with temperature. 2.2 Viscosity - Streamline and turbulent flow – Critical velocity - Expression for critical velocity- Poiseuille's method for determining coefficient of viscosity of a liquid (Variable Pressure Head) - Variation of viscosity with temperature.	K1-K5	7	1-5
3	Mechanics 3.1 Dynamics: Moment of Inertia – Definition - Compound pendulum - Expression for the period of oscillation - Centre of suspension and Centre of oscillation – Minimum period of oscillation of a compound pendulum - Determination of 'G'.	K1-K5	6	1-5
4	Relativity 4.1 Newton's laws of motion and its limitations - Inertial frames of reference – Newtonian relativity – Galilean transformation equations. 4.2 Postulates of special theory of relativity - Lorentz transformation equations - Length contraction - Time dilation - Twin paradox and Meson paradox 4.3 Relativistic Momentum (no derivation) – Mass-Energy relation- Physical significance.	K1-K5	13	1-5
5	Optics 5.1 Interference: Introduction - Interference due to reflected light – Newton's rings – Measurements of wavelength - Air wedge – Determination of diameter of a thin wire by air wedge. Diffraction: Introduction - Fraunhofer diffraction - Transmission grating - Normal incidence – Determination of wavelength. 5.2 Polarisation: Introduction - Plane of polarization - Polarisation by refraction - Brewster's law - Polarization by reflection - Double refraction – Nicol prism – Nicol prism as a polarizer and analyser – Polaroids - Uses of polaroids	K1-K5	7	1-5

PATTERN OF ASSESSMENT

Continuous Assessment Test: **Total Marks: 50** **Duration: 1 hour 30 minutes**

Section	Cognitive Level	Marks	Pattern
A	K1	10	10 x 1 = 10 marks (Multiple-choice All questions to be answered)
B	K2	10	5 x 2 = 10 marks (All questions to be answered in BRIEF)
C	K3, K4	20	1 × 20 = 20 marks (1 out of 2 questions to be answered - only theory) Each question will have 2 sub division with one K3 level and one K4 level question of equal weightage
D	K5	10	2 x 5 = 10 marks (2 out of 4 to be answered - only problems)

Other Components:

Total Marks: 50

Seminar/Presentation/Quiz/Assignments/Problem solving

All K1 – K5 levels to be assessed

End Semester Examination: Total Marks: 100

Duration: 3 hours

Section	Cognitive Level	Marks	Pattern
A	K1	20	20 x 1 = 20 marks (Multiple-choice All questions to be answered)
B	K2	20	10 x 2 = 20 marks (All questions to be answered in BRIEF)
C	K3, K4	40	2 x 20 = 40 marks (2 out of 4 questions to be answered - only theory) Each question will have 2 sub division with one K3 level and one K4 level question of equal weightage
D	K5	20	4 x 5 = 20 marks (4 out of 6 to be answered - only problems)

CODE:23PH/AC/P132

CREDITS:2

L T P:0 0 3

TOTAL HOURS:39

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data.	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

Experiments	CL	Hrs	CO
1. Determination of 'g' - Compound Pendulum. 2. Young's Modulus 'E' by Non-Uniform Bending- Pin and Microscope 3. Young's Modulus 'E' by Uniform Bending-Scale and Telescope 4. Rigidity Modulus 'G' - Torsional pendulum 5. Surface Tension and Interfacial Surface Tension – Drop Weight Method. 6. Determination of the Refractive Index of the material of a prism - Spectrometer. 7. Determination of resistance and Specific Resistance - Post Office Box 8. Characteristics of a Zener Diode 9. Verification of Newton's Law of Cooling for two liquids	K1-K5	39	1-5

ORGANIC CHEMISTRY II

CODE: 23CH/MC/OC44

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enable understanding of the structure and reactivity of important functional groups in organic chemistry
- To introduce the mechanisms of important name reactions
- To facilitate understanding of colour and dye chemistry
- To enhance knowledge of the synthetic applications of the nitro, amino and active methylene groups

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall IUPAC nomenclature, preparation and structures of organic compounds containing important functional groups	K1
CO2	Compare various functional groups based on their structure and properties and explain the theories of dyes	K2
CO3	Illustrate the preparation and properties of organic functional groups and dyes	K3
CO4	Analyse important name reactions and discuss their mechanisms	K4
CO5	Predict the products of given organic reactions with mechanism	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Alcohols, Phenols and Ethers 1.1 Aliphatic Alcohols: Reactions with reference to C-OH Bond Cleavage and O-H Bond Cleavage. Di and Trihydric Alcohols- Action of HIO_4 and Uses. 1.2 Phenols: Nomenclature, acidity of phenols- Effects of substituents – Comparison of Acidity with Alcohols. Hydrogen Bonding. 1.3 Reactions: Acid Character, Ether Formation, Ester Formation, Reactions involving Benzene Ring- Nitration, Sulphonation, Halogenation, Nitrosation, Friedel-Crafts reaction, Coupling reactions, Kolbe's and Riemer-Tiemann reactions 1.4 Reactions of Ethers and Epoxides. Cleavage of Ether Linkages by HI.	K1- K5	13	1-5

2.	Carboxylic Acids and their Derivatives 2.1 Nomenclature and Classification of Aliphatic and Aromatic monocarboxylic Acids, Preparation and Reactions. Acidity (Effect of Substituents on Acidity) and Salt formation, mechanism of Reduction and substitution in Alkyl or Aryl Group 2.2 Preparation and Properties of Unsaturated Carboxylic acids - Acrylic, Crotonic and Cinnamic acids. Preparation and Properties of Dicarboxylic Acids - Oxalic, Malonic, Succinic, Glutaric, Adipic and Phthalic Acids 2.3 Action of heat on α , β , γ - Hydroxy and Amino carboxylic acids. Stereospecific addition reaction of maleic and fumaric acids 2.4 Preparation and Reactions of Acid Chlorides, Acid Anhydrides, Amides and Esters. Acid and Alkaline Hydrolysis of Esters. Trans-Esterification	K1- K5	15	1-5
3.	Nitro and Amino Compounds 3.1 Aliphatic and Aromatic Nitro Compounds- Classification, general properties and preparation by nitration. Nitroalkanes - Tautomerism and reactions - Distinction from alkyl nitrite 3.2 Aromatic Nitro Compounds - reduction of Nitrobenzene in acidic, neutral and alkaline media and electrolytic reduction 3.3 Aliphatic and Aromatic Amines - Preparation, Reactions - Basicity of Amines, Effect of substituents on basicity of amines. Separation of mixture of amines by Hinsberg and Hofmann method 3.4 Distinguishing primary, secondary and tertiary amines. Ascent and descent of series in aliphatic amines 3.5 Diazonium Salts - Preparation and reactions - Replacement reactions (Sandmeyer, Gattermann and Gomberg reactions) and Coupling Reactions	K1- K5	15	1-5
4.	Synthesis involving Active Methylene Group 4.1 Malonic, Acetoacetic and Cyanoacetic Ester: Characteristic reactions of active methylene group and synthetic applications 4.2 Diazomethane and Diazoacetic Ester: Preparation, Structure and Synthetic Applications	K1- K5	12	1-5
5.	Colours and Dyes 5.1 Complementary Colours and Photochemistry of Vision 5.2 Theories of Dyes, Classification of Dyes based on chemical structure and application 5.3 Preparation and uses of Azo Dye - Methyl Orange and Bismarck Brown; Triphenyl Methane Dye -Malachite Green, Para Rosaniline and Crystal Violet; Phthalein Dye - Phenolphthalein and Fluorescein; Vat Dye – Indigo; Anthraquinone Dye - Alizarin	K1- K5	10	1-5

ORGANIC CHEMISTRY PRACTICAL I

CODE: 23CH/MC/P442

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To impart the skills required to perform chemical reactions in a laboratory
- To instil understanding of the classification of organic compounds based on their structure and property
- To enhance the skills required to perform confirmatory tests and prepare derivatives for various functional groups

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the procedure for the analysis of functional groups present in organic compounds	K1, K2
CO2	identify various functional groups based on their structure and property	K3
CO3	distinguish various functional groups based on the structural characteristics	K4
CO4	perform chemical reactions (microscale approach) in a laboratory according to standard procedure and safety precautions	K5
CO5	analyse a given organic compound qualitatively and determine the functional group present with its characteristics	K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Theoretical Principles 1.1 Theoretic principles of the reactions of organic compounds containing simple functional groups	K1-K3	5	1-2
2.	Analysis of Organic compounds not containing Nitrogen 2.1 Qualitative analysis of unknown organic compounds containing simple functional groups - Acids, Phenols, Carbohydrates, Aldehydes, Ketones and Esters. 2.2 Preparation of Derivative	K1-K6	17	1-5
3.	Analysis of Organic Compounds containing Nitrogen 3.1 Qualitative analysis of unknown organic compounds containing simple functional groups - Amines, Amides, Nitro compounds, Anilides, Halo compounds and Sulphur compounds (Thiourea). 3.2 Preparation of Derivative	K1-K6	17	1-5

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To provide an understanding of the biochemical importance of lipids, proteins, hormones and micronutrients
- To enable understanding of lipid and protein metabolisms
- To introduce the principles and methodologies involved in digestion and absorption of lipids and proteins

COs	DESCRIPTION	CL
CO1	recall the classification, structure and metabolism of lipids, proteins hormones and vitamins	K1
CO2	explain the use of biochemical techniques in the study of proteins, lipids, hormones, vitamins and micronutrients	K2
CO3	analyze the metabolisms involving lipids, proteins, hormones, vitamins and minerals	K3
CO4	evaluate mechanism of metabolism of protein, lipid and hormones using biochemical tools	K4
CO5	integrate the cause of a disease in human body and the metabolism	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Lipids 1.1 Classification of Lipids and Fats 1.2 Definitions and Significance of Iodine Value, Acid Value, Saponification Value, RM Value and Acetyl Value 1.3 Lipid Metabolism- Oxidation of β fatty acids, Biosynthesis of Fatty Acids, Ketone bodies and Ketosis. Digestion and Absorption of Lipids 1.4 Risk factor of HDL, LDL and total cholesterol in the body	K1- K5	12	1-5
2.	Proteins 2.1 Amino Acids – Classification based on R Groups 2.2 Chemical Reactions of amino acids - with ninhydrin, mineral acid, formaldehyde, FDNB and CO ₂ 2.3 Structure of Proteins - Peptide Bond, Primary, Secondary and Tertiary structures. 2.4 Classification of proteins based on shape, composition and solubility. Properties of proteins - denaturation,	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	amphoteric nature, ion binding capacity and solubility 2.5 Protein Metabolism - transamination, oxidative deamination and Urea Cycle. Digestion and absorption of proteins			
3.	Hormones 3.1 Definition, Classification of Hormones (Steroid and Non-Steroid Only) 3.2 Mechanism of Hormone Action 3.3 Functions of Insulin and Thyroxine. Clinical significance of TSH, T3 and T4	K1- K5	5	1-5
4.	Biochemistry and Nutrition 4.1 Vitamins (fat & water soluble)- sources, metabolic functions, deficiency diseases, daily requirements- vitamin A and vitamin C (Structure) 4.2 Principal elements- Calcium, Phosphorus, Magnesium, Sodium, Potassium, Chlorine, Sulfur- sources, function, recommended dietary allowance, deficiency - Calcium, Phosphorus- absorption and retention, product of Ca and P in serum. 4.3 Trace elements: Chromium, Selenium, Cobalt- sources, function, deficiencies	K1- K5	5	1-5
5.	Analytical techniques in Biochemistry 5.1 Centrifugation – Principle and applications of sedimentation and ultracentrifugation 5.2 Electrophoresis – Principle and applications of SDS-PAGE 5.3 Ultrafiltration – Principle and applications of Dialysis 5.4 Chromatography – Principle and applications of Thin layer (TLC) and High-Performance Liquid Chromatography (HPLC)	K1- K5	5	1-5

SYLLABUS

(Effective from the academic year 2023–2024)

BIOCHEMISTRY PRACTICAL II

CODE: 23CH/AC/P242

CREDITS: 2

L T P: 0 0 3

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To understand the principles of biochemistry chemistry through laboratory techniques
- To impart the skills required to perform various chemical reactions in a laboratory
- To instill understanding of the classification of organic compounds based on their structure and property
- To understanding of the principles behind the various techniques involved

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the concepts of normality, equivalent weight, R_f value and Beer Lambert's Law	K1
CO2	differentiate between titrations, colorimetric and chromatographic techniques	K2
CO3	calculate the normality, equivalent weights and R_f value	K3
CO4	compare the reagents used in volumetric titration, colorimetric and chromatographic techniques	K4
CO5	estimate the amount of a given substance using volumetric analysis	K5, K6
CL – Cognitive Level		
K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Volumetric Estimations 1.1 Principle and theory of Volumetric Analysis 1.2 Principle and theory of Chromatography and Beer-Lambert's law	K1-K3	3	1-3
2.	Estimations 2.1 Estimation of Oxalic Acid / Fe^{2+} (Permanganimetry) 2.2 Estimation of Glucose 2.3 Estimation of Glycine by Sorensen's Titration	K1-K6	30	1-5

UNIT	CONTENT	CL	Hrs	CO
	2.4 Estimation of Ascorbic Acid 2.5 Estimation of Acid Value / Saponification Value / Iodine Value of Edible Oil 2.6 Estimation of Enzyme Catalase in Chow chow / Radish			
3.	Group Experiments 3.1 Estimation of Phosphorus by Colorimetry 3.2 Estimation of DNA/RNA by Colorimetry 3.3 Separation of Amino Acids by Paper Chromatography	K1-K4	6	1-4

FUNDAMENTALS OF CHEMISTRY II

CODE: 23CH/AC/FC43

CREDITS: 3

L T P: 3 0 0

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To facilitate learning of various concentration terms and apply them for numerical calculations
- To enable comprehension of the basics of electrochemistry
- To introduce the importance of phase diagrams
- To provide fundamental knowledge of coordination complexes
- To instil understanding of the basics of thermoanalytical methods

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Define the terms prevalent in Mole Concept, Electrochemistry, Phase rule, Coordination Chemistry and Thermoanalytical methods	K1
CO2	Explain the importance of concentration terms, differentiate the types of electrochemical cells, electrodes, reactions and batteries, indicate phase changes in systems, describe the behavior of complexes and instrumentation of thermoanalytical techniques	K2
CO3	Calculate equivalent weights, number of moles, normality, molarity, molality, ppm and ppb, number of degrees of freedom, magnetic moment of complexes, sketch thermograms	K3
CO4	Analyse and categorise solutions and substances based on concentration terms, examine electrochemical behavior of different metals and their salts, outline the phases present in different systems, investigate varied structures of complexes and thermal behavior of compounds	K4
CO5	Propose preparation of solutions of varied concentrations, devise construction of electrochemical cells, reconstruct phase diagrams and formulate complexes	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Mole concept 1.1 Definition of mole and applications of mole concept in stoichiometry 1.2 Equivalent weight – calculation of equivalent weight of oxidants and reductants in redox reactions, acids and bases, molecular volume 1.3 Concentration terms used to express strength of solutions- Normality, Molarity, Mole fraction and Molality, ppm and ppb	K1-K5	7	1-5
2.	Electrochemistry 2.1 Definition of specific, equivalent & molar conductance, effect of dilution on Conductance 2.2 Ostwald dilution law, Kohlrausch's law – applications 2.3 Conductometric titration – principle and types 2.4 Electrochemical cells - definition, representation of cells and cell reactions, types of electrodes-standard hydrogen and calomel electrodes, Nernst equation- significance, standard electrode potential and its measurement, electrochemical series-applications 2.5 Commercial cells – Primary and Secondary cells, Fuel cells- Hydrogen-Oxygen, Batteries- Lead storage battery, Nickel-Cadmium battery	K1-K5	10	1-5
3.	Phase rule 3.1 Definitions - Phase, component and degree of freedom, Derivation of phase rule. 3.2 Application of phase rule to one component systems (water and carbon dioxide) 3.3 Two component systems: simple eutectic (Pb-Ag) and (Bi-Cd)	K1-K5	6	1-5
4.	Coordination Chemistry 4.1 Coordination complexes - definition, types of ligands, IUPAC nomenclature of simple mononuclear complexes 4.2 Isomerism – Structural - ionisation, linkage, ligand, coordination and hydrate isomerism. Stereoisomerism-geometrical and optical isomerism of four coordinated complexes. 4.3 Pauling theory (VBT) - geometry of complexes based on hybridization (coordination number 4 and 6) magnetic moment of complexes. 4.4 Biological coordination compounds - structural features (figurative representation only), functions of Haemoglobin and Vitamin B12	K1-K5	8	1-5

UNIT	CONTENT	CL	Hrs	CO
5.	Thermoanalytical Methods 5.1 TGA and DTA - Principle, Instrumentation, methods of obtaining Thermograms, factors affecting TGA/DTA, Thermal analysis of silver nitrate, calcium oxalate and calcium acetate 5.2 DSC - Principle, Instrumentation and applications.	K1-K5	8	1-5

B.A. / B.Sc. / B.Com. / B.V.A. Degree Programme**

SYLLABUS

(Effective from the academic year 2023 - 2024)

LIFE SKILLS: PERSONAL AND SOCIAL

CODE:23CH/SS/PS13

CREDITS: 3

L T P: 3 0 0

TOTAL TEACHING HOURS: 39

OBJECTIVES OF THE COURSE

- To enable students to understand the working of Indian Governance and laws
- To empower students as citizens by teaching them how to use the RTI, the PIL and the FIR
- To provide students an insight into the strengths and virtues essential to improve wellbeing
- To bring about awareness of societal dynamics
- To create awareness, impart knowledge and hone skills necessary to make sound financial decisions

COURSE LEARNING OUTCOMES

On successful completion of this course, students will be able to

- demonstrate knowledge of the working of the government
- file RTIs, PILs and FIRs
- improve their quality of life
- exhibit social consciousness
- exhibit prudent behaviour in managing personal finance

Unit 1 (13 Hours)

Legal Literacy

- 1.1 Structure of Government- Central and State, Urban and Rural
- 1.2 Laws pertaining to Women (CEDAW) and Children (POCSO)
- 1.3 Right to Information Act 2005, drafting and filing an RTI
- 1.4 Introduction to PIL, Landmark PIL cases -Vishaka Vs. State of Rajasthan, Hussainara Khatoon Vs. State of Bihar, MC Mehta Vs. Union of India
- 1.5 Importance of FIR and lodging an FIR

Unit 2 (13 Hours)

2.1 Understanding Self

- 2.1.1 Psychological wellbeing - meaning, components and barriers
- 2.1.2 Gratitude- meaning, nature and expression
- 2.1.3 Resilience- meaning, nature, benefits and simple techniques for building resilience.

2.2 Understanding Society

- 2.2.1 Concepts of class, caste, gender, disability, race, culture, religion, ethnicity, context and language
- 2.2.2 Importance of societal analysis
- 2.2.3 Social indicators of development – HDI, GDI, Poverty Index, Hunger Index
- 2.2.4 Issues and challenges for social change in India

Unit 3

(13 Hours)

Personal Financial Planning

- 3.1 Meaning, Need and Importance of Personal Financial Planning
- 3.2 Core concepts in Financial Planning – Budget, Savings and Investment
- 3.3 Converting non-essential expenditure into Savings and Investment
 - 3.3.1 Forms of Savings – Deposits, Insurance
 - 3.3.2 Types of Investments – Securities, Real Estate and Gold
- 3.4 Digital transformation in Finance
 - 3.4.1 De-Mat Account
 - 3.4.2 Net Banking and Mobile Banking

TOTAL TEACHING HOURS:39

OBJECTIVES OF THE COURSE

- To impart basic knowledge on the principles of Physics in electricity, magnetism and electronics.
- To familiarize students with interaction of light waves through LASER, MASER and fibre optics.
- To expose to the concept of Boolean algebra, k map and operational amplifiers.
- To guide the students to understand the algebraic operations and its implementations in digital circuits.
- To facilitate the students to appreciate the significance of physics in day-to-day life.

COURSE LEARNING OUTCOMES:

On successful completion of the course, students will be able to

Cos	Description	CL
CO1	recall the theoretical and experimental background of electricity and magnetism and electronics.	K1
CO2	understand the concepts of electricity and magnetism, LASER, characteristics of optical fibre and the working of digital circuits.	K2
CO3	apply the theoretical concepts and appreciate its significance in the related fields.	K3
CO4	evaluate important parameters in the field of electricity, magnetism, fibre optics and to analyse digital circuits.	K4
CO5	develop problem solving skills by applying the theory pertaining to different field of physics.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Electricity 1.1 Coulomb's Law of inverse squares - Flux of electric field - Gauss's law – Application of Gauss's law - To determine field of a point charge, spherical charge distribution, infinite line charge distribution and cylindrical charge distribution. 1.2 Conservative nature of electrostatic field – Electric field – Electric potential – Potential at a point due to point charge - Relation between potential and field strength. Capacitance: Principle - Capacitance of a spherical plate capacitor.	K1- K5	8	1-5

UNIT	CONTENT	CL	Hrs	CO
2	Magnetism 2.1 Magnetic field - Force on a charge in a magnetic field - Force on a charge in an electromagnetic field (Lorentz Force) – Biot-Savart law- Maxwell's electromagnetic equations (no derivations) - Physical significance of the equations. 2.2 Torque on a current loop - Force on a current carrying conductor in a magnetic field – Moving coil Ballistic Galvanometer - Figure of merit of Ballistic Galvanometer for charge and current sensitivity.	K1- K5	7	1-5
3	Properties of Magnetic Materials 3.1 Magnetization - Relation between three electric vectors B, H and M - Magnetic susceptibility - Relation between relative permeability and susceptibility- Magnetic properties of materials - Dia, para and ferro - Electron theory of magnetism. 3.2 Hysteresis - Magnetometer method of drawing hysteresis curve (Horizontal Model) - Energy loss – Retentivity - Coercivity - Uses of hysteresis curves.	K1- K5	7	1-5
4	Modern Physics 4.1 MASER: Introduction - Description and working of Ammonia MASER – Applications. LASER : Spontaneous and stimulated emission- – Population inversion, pumping and active system– Carbon dioxide LASER - Uses of LASER. 4.2 Holography: Principles – Recording of holograms – Reconstruction of hologram – Applications. Fibre Optics: Principles – Structure and classification – The Numerical aperture – Applications.	K1- K5	9	1-5
5	Electronics 5.1 Introduction to Amplifiers - Operational Amplifier - Ideal Op - Amp - CMRR - Inverting and non-inverting Op- Amp – Summing - Difference - Integrator and differentiator Op - Amp. 5.2 Boolean Algebra- De Morgan's Theorem – Verification. Algebraic simplification – Implementation of Boolean algebra into circuits.	K1- K5	8	1-5

OBJECTIVES OF THE COURSE

- To disseminate basic knowledge on the fundamental principles and the working of various scientific equipment.
- To enable the students to understand the experimental procedure in determining various physical properties.
- To impart necessary technical skills to handle the equipment, perform the experiment and record the data.
- To facilitate the students in analyzing and drawing inferences from the acquired data.
- To guide the students to precisely evaluate and propose scientific solutions.

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	Description	CL
CO1	acquire knowledge of the fundamental principles and the working of various scientific equipment.	K1
CO2	comprehend experimental procedures in determining various physical properties.	K2
CO3	devise technical skills to troubleshoot and handle errors in measurements.	K3
CO4	analyzing and drawing inferences from the acquired data.	K4
CO5	evaluate and propose scientific solutions.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

EXPERIMENTS	CL	Hrs	CO
1. Rigidity Modulus 'G' by Static Torsion 2. Determination of Radius of Curvature of a Lens - Newton's Rings 3. Grating – Normal Incidence - Determination of Wavelengths (λ) of Prominent lines of mercury spectrum - Spectrometer 4. Determination of Specific Heat of a Liquid – Joule's Calorimeter – Applying Half Time Correction 5. Ammeter Calibration (Low Range) - Potentiometer 6. OPAMP- Inverting and Non Inverting Amplifier 7. Specific Heat Capacity of a Solid – Method of Mixtures 8. Determination of Specific Resistance - Carey Foster's bridge 9. Coefficient of Viscosity – Poiseuille's Method	K1-K5	39	1-5

STELLA MARIS COLLEGE (AUTONOMOUS), CHENNAI - 600086

B.Sc. DEGREE: BRANCH IV- CHEMISTRY

SYLLABUS

(Effective from the academic year 2023-2024)

ORGANIC CHEMISTRY III

CODE: 23CH/MC/OC54

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enhance knowledge of heterocyclic compounds and their application as intermediates of industrial importance
- To enable understanding of functional groups and chemoselective reactions
- To introduce the mechanisms involved in various rearrangements and organic syntheses
- To interpret the pattern of reactivity, mechanism and the ability to analyse the products of organic reactions

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

CO	DESCRIPTION	CL
CO1	Recall the fundamentals of organic chemistry to identify the structures, preparation and reactions of organic compounds.	K1
CO2	Illustrate the structure and reactions of heterocyclic compounds, carbohydrates, natural products, molecular rearrangement with examples and protection of functional groups.	K2
CO3	Distinguish between the properties of heterocyclic compounds, carbohydrates, natural products, reaction mechanism and protection of functional groups.	K3
CO4	Classify and synthesise heterocyclic compounds, carbohydrates, natural products, molecular rearrangements and interconversion of functional groups.	K4
CO5	Predict the product of the reaction mechanism and elucidate the structures of natural products and biomolecules.	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Heterocyclic Compounds 1.1 Classification, Preparation of Furan, Pyrrole, Thiophene and Pyridine. Reactions - Electrophilic and Nucleophilic Substitutions, Oxidation and Reduction reactions. 1.2 Condensed Ring Systems- Indole, Quinoline, Isoquinoline - Comparison of Reactions. Preparation of Quinoline by s Synthesis and Isoquinoline by Bischler-Napieralsky Synthesis. Mechanism of Electrophilic	K1-K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	and Nucleophilic substitutions, oxidation and reduction reactions. Relationship between Indole, Isatin and Indigo Substituents			
2.	Carbohydrates 2.1 Classification by various methods. Explanation of Diastereomer, Enantiomer, Anomer, Epimer, Building of Carbohydrates from D-Glyceraldehyde, D and L Sugars 2.2 Monosaccharides - HIO ₄ Oxidation, Mechanism of mutarotation, osazone formation. Haworth structure, structural elucidation of Glucose and Fructose, Determination of configuration and ring size. Interconversion of Glucose and 2.3 Fructose. Ascending and Descending the Sugar Series Disaccharides -Formation of Glycosidic Bond: H Structure of Sucrose, Maltose, Lactose. Difference between Maltose and Cellobiose. Polysaccharides-Structure and Reactions of Starch and Cellulose. Applications of Cellulose- acetate and xanthate	K1-K5	15	1-5
3.	Natural Products 3.1 Occurrence and Extraction of Terpenoids, Carotenoids, Steroids and Alkaloids in nature 3.2 Alkaloids- Definition and Classification, General Properties, Determination of the chemical constitution of the alkaloids, functional group analysis, estimation of groups- OH, NH ₂ and OCH ₃ , degradation and synthesis. Structural Elucidation of Piperine, Nicotine 3.3 Terpenoids- Classification, Isoprene Rule, General Properties, Structure Determination of the following Monoterpenoids Citral, α -Terpeneol and Camphor.	K1-K5	18	1-5
4.	Molecular Rearrangements 4.1 Classification - Anionotropic, Cationotropic, Free Radical, Inter and Intramolecular rearrangements 4.2 Pinacol-Pinacolone, Beckmann, Hoffmann, Curtius, Lossen, Schmidt, Wolff and Benzilic acid rearrangements (mechanism, evidence for intermediate formation - migratory aptitude) 4.3 Claisen and Cope (Sigmatropic rearrangement), Fries rearrangement (evidence for intramolecular nature and allylic carbon attachment)	K1-K5	10	1-5
5.	Functional Group interconversion and Designing Organic Synthesis 5.1 Protection of Functional Groups Need for and methods of protection of NH ₂ , -OH, >C=O, >C=C and -COOH Groups	K1-K5	10	CO1-5

UNIT	CONTENT	CL	Hrs	CO
	5.2 Functional Group Modifications by Reduction, Oxidation, Addition, Elimination, Displacement and Addition-Elimination Processes

PHYSICAL CHEMISTRY-II

CODE: 23CH/MC/PC54

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enable understanding of basic concepts in Physical Chemistry
- To provide an understanding of Gibbs phase rule and phase equilibria
- To facilitate understanding of the theory and technique of the separation of miscible and immiscible liquids
- To enlighten on the theory of colligative properties

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Outline the fundamentals of thermodynamics and phase equilibria.	K1
CO2	Illustrate the isothermal and adiabatic changes for ideal gases, real gases, change in enthalpy of chemical reaction	K2
CO3	Apply the second law of thermodynamics to thermal cycles and the principle of phase equilibria to one and two component systems	K3
CO4	Analyse the concept of entropy as a function of state variables, Kirchoff's equation, Maxwell's relations, Clausius-Clapeyron Equation to phase systems and ideal and non-ideal solutions	K4
CO5	Evaluate the Joule-Thomson Effect, spontaneity of process in terms of ΔS , entropy of mixing, and investigate the applications of Carnot's Theorem, Maxwell's relations, standard free energies, Gibbs-Helmholtz equation, Gibbs phase rule for one and two component systems and colligative properties	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Introduction to Thermodynamics 1.1 Types of Systems, Extensive and Intensive Properties, Different Forms of Energy. First Law – Statements, Internal Energy and Enthalpy, State and Path Functions and their characteristics 1.2 Isothermal and Adiabatic Changes for ideal gases - Work Done, Internal Energy Changes, Thermodynamics of Real Gases obeying van der Waal's Equation of State, Isothermal and Adiabatic Changes for Real Gases- Work	K1- K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	<p>Done, Internal Energy Changes, Difference between Heat Capacities at Constant Pressure and Volume of ideal and real gases</p> <p>1.3 Joule- Thomson Effect, Inversion Temperature</p> <p>1.4 Thermochemistry- Change in enthalpy of Chemical reaction, Endothermic and Exothermic reactions, Kirchhoff's equation (Variation of enthalpy with temperature), Enthalpy of formation, Enthalpy of combustion and bond energy, resonance energy.</p>			
2.	<p>Second Law of Thermodynamics</p> <p>2.1 Need for Second Law, Different Forms of stating the Law, Carnot's Cycle and Carnot's Theorem, Thermodynamic Scale of Temperature</p> <p>2.2 Concept of Entropy, S as a Function of T&P, P&V and T&V. Entropy Changes in a Phase change (Trouton's Rule), Entropy Change for Irreversible Processes (Clausius Inequality) Comparison of ΔS for Reversible and Irreversible Processes, Criteria for Spontaneity of Process in Terms of ΔS, Entropy of Mixing and Entropy as a Measure of Disorder, Third Law Statement</p> <p>2.3 Helmholtz and Gibb's Energies, Maximum and Net Work done, Variation in A & G in Terms of P, V and T, Condition for Equilibrium and Spontaneity, Maxwell's Relations, Standard Free Energies, Gibbs-Helmholtz Equation and its Application in Chemistry</p> <p>2.4 Chemical Equilibria: Law of Mass Action, Equilibrium Constant and Free Energy, Significance of K, Application of Law of Mass Action to Homogenous systems, Le Chatelier's Principle, van't Hoff Equation (Reaction Isochore) and van't Hoff's Reaction Isotherm.</p>	K1- K5	15	1-5
3.	<p>Introduction to Phase Equilibria</p> <p>3.1 Phase, Component, Degree of freedom, Gibbs Phase rule, Thermodynamic derivation of Phase rule, Phase diagram of One component system – water, sulphur and carbon dioxide, application of Clausius-Clapeyron Equation to phase systems</p> <p>3.2 Measures of Concentration- Molality and Mole Fraction, Partial Molal Properties, Concept of Chemical Potential, Gibbs-Duhem Equation</p> <p>3.3 Raoult's Law (with conditions for deviations) and Henry's Law, Real Solutions, Concept of Activity and Activity Coefficient</p>	K1- K5	12	1-5
4.	<p>Separation of Liquid Mixtures using Phase Equilibria</p> <p>4.1 Phase Diagrams of Binary liquids -Mixtures of Volatile Liquids (Fractional Distillation, Low and High Boiling Azeotrope), Lever Rule and fractional distillation</p>	K1- K5	9	1-5

UNIT	CONTENT	CL	Hrs	CO
	4.2 Distillation of immiscible liquids - Steam Distillation, Solubility of partially miscible liquids- Phase Diagram (Nitrobenzene & Hexane and Water & Triethylamine) 4.3 Nernst Distribution Law, Conditions, Derivation, Applications			
5.	Phase Equilibria in Real Systems 5.1 Two-component systems- Cooling curves, Simple eutectic system (Pb-Ag), Phase diagram of compound with congruent melting point (FeCl ₃ -water system) 5.2 Phase diagram of compounds with incongruent melting points (sodium sulphate water system) efflorescence, deliquescence 5.3 Colligative Properties – Depression in Freezing Point, Elevation in Boiling Point and Osmosis van't Hoff Factor, Abnormal Molar Mass, Degree of Dissociation and Association	K1- K5	14	1-5

BIOCHEMISTRY PRACTICAL

CODE: 23CH/MC/P551

CREDITS: 1

L T P: 0 0 2

TOTAL HOURS: 26

OBJECTIVES OF THE COURSE

- To enable students to perform simple qualitative tests to analyse amino acids and proteins
- To instill understanding of the principle involved in titrimetric and spectrophotometric estimations of biomolecules
- To enhance the skill required to use separation techniques like paper and thin layer chromatography

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the chemistry of amino acids and proteins and the principle of volumetric estimations of biomolecules and chromatography.	K1
CO2	distinguish amino acids through their structural characteristics and apply the appropriate formulae for quantitative estimations of biomolecules	K2
CO3	perform chemical reactions under laboratory conditions using safety precautions and determine the unknown concentration of a sample with a calibration graph.	K3
CO4	select a suitable method for qualitative and quantitative analysis.	K4
CO5	evaluate qualitatively the given amino acid/protein and estimate quantitatively the given biomolecule	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Qualitative Analysis of Amino acids and proteins 1.1 Reactions of Amino Acids - Reactions of Tryptophan, Tyrosine, Arginine and Cysteine. 1.2 Reactions of Proteins - Reactions of Casein and Egg Albumin 1.3 Identification of unknown amino acid /protein	K1-K6	8	1-5

UNIT	CONTENT	CL	Hrs	CO
2.	Quantitative Analysis 2.1 Theory and principle of volumetric estimations 2.2 Estimation of Glycine by Sorensen's formalin method 2.3 Estimation of Glucose by Benedicts method 2.4 Estimation of Ascorbic acid by Dye method 2.5 Estimation of Catalase activity 2.6 Estimation of Vitamin A/Protein by colorimetry 2.7 Estimation of DNA/RNA by Spectrophotometry	K1-K6	14	1-5
3.	Chromatography (Demonstration only) 3.1 Separation of amino acids by paper chromatography 3.2 Separation of o- and p-nitrophenol by thin layer chromatography (TLC)/column chromatography	K1-K2	4	1-2

TOTAL HOURS: 39

OBJECTIVES OF THE COURSE

- To impart the skills required to handle instruments
- To enhance the skills required to determine the heat of solution and stability constant of complexes
- To give an understanding of colligative properties and use them to calculate the molecular weight of a given solute
- To construct phase diagrams to determine UCST of partially miscible liquids

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recollect the theory and principles of physical chemistry experiments	K1
CO2	demonstrate the theoretical concepts in physical chemistry through experiments	K2
CO3	calculate the heat of solution, molecular weight of solute, UCST, pK_a of weak acids and stability constants from experimental data	K3
CO4	analyse the experimental data with that of theoretical values	K4
CO5	estimate the heat of solution, molecular weight of given solid, UCST, pK_a of acids, stability constant of complexes	K5, K6
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	1.1 Theory and principles behind the experiments 1.2 To prepare and standardise various solutions	K1-K3	3	1-3
2.	Heat of Solution, Phase Equilibria and distribution law 2.1 Determine the heat of solution of oxalic acid by solubility method 2.2 Determination of Molecular Weight by Rast Method (alpha naphthol/ naphthalene /biphenyl /p-dichlorobenzene/acetanilide/m-dinitrobenzene as solute/solvent) 2.3 Construction of the Phase Diagram of Phenol - Water system and determination of Upper Critical Solution Temperature (UCST), Critical Solution Composition (CSC) and the composition of the given mixture	K1-K6	20	1-5

UNIT	CONTENT	CL	Hrs	CO
	2.4 To study the effect of added impurity (NaCl / Succinic Acid) on UCST and determine the given percentage composition 2.5 To determination of equilibrium constant of the reaction, $I_2 + I^- = I_3^-$ using the given distribution coefficient			
3.	pH metry, Conductometry and Spectrophotometry 3.1 Determination of strength and pK_a of a monobasic acid (Acetic acid) 3.2 Determination of strength and pK_a dibasic acid (oxalic acid) 3.3 Verification of Ostwald's dilution law (benzoic acid) 3.4 Spectrophotometric study of iron salicylate (Jobs method)	K1-K6	16	1-5

B.Sc. Chemistry and B.Sc. Plant Biology and Plant Biotechnology Degree
Programmes**

SYLLABUS

(Effective from the academic year 2023-2024)

BIOANALYTICAL TECHNIQUES

CODE: 23ID/IC/BA55

CREDITS: 5

L T P: 5 1 0

TOTAL HOURS: 78

OBJECTIVES OF THE COURSE

- To enable understanding of the principles of microscopy, centrifugation and separation methods
- To facilitate understanding of extraction, separation and purification methods
- To introduce the principles of spectroscopic and spectrochemical techniques

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the fundamentals of microscopy, centrifugation and electrophoresis, separation methods and spectroscopic techniques	K1
CO2	illustrate the knowledge of microscopy, centrifugation and electrophoresis, separation methods and spectroscopic techniques	K2
CO3	analyse microscopic images and the separation method from yield of precipitate and spectroscopic data	K3
CO4	evaluate the texture and amount of the substance in the sample by gravimetry and spectroscopic techniques	K4
CO5	integrate the results from microscopy, separation methods and spectroscopic data of the sample material	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate K6 – Create		

UNIT	CONTENT	CL	Hrs	CO
1.	Microscopy: Principle, Construction and Application 1.1 Light microscopes – Compound, Phase Contrast, Differential Interference Contrast and Confocal Microscopes. 1.2 Preparation of Specimen for Light Microscopy – Paraffin Techniques – Fixatives: FAA, Carnoy's, Dehydration and Infiltration, Embedding and Sectioning (Paraffin Blocks), Staining and Mounting. 1.3 Electron Microscopes – TEM, specimen preparation for TEM. 1.4 Maceration and leaf clearing	K1-K5	16	1-5

UNIT	CONTENT	CL	Hrs	CO
2.	Centrifugation and Electrophoresis 2.1 Principle, types and applications of Centrifuge. 2.2 Density gradient and Differential Centrifugation. 2.3 Electrophoresis: Principle, Techniques and applications of Agarose gel electrophoresis, Polyacrylamide gel electrophoresis 2.4 Immunoelectrophoresis	K1-K5	15	1-5
3.	Separation Techniques 3.1 Separation by solvent extraction: Nernst distribution law, Principle of extraction by chemically active solvents, Soxhlet extraction, Factors influencing the Extraction Efficiency. 3.2 Gravimetric analysis: Separation by Precipitation-Nucleation, Crystal Growth, Solubility Product, Principle, Factors affecting Solubility, Purity of Precipitates, Co-precipitation and Post Precipitation methods of Filtering, Drying - Ignition & Incineration of Precipitate. 3.3 Chromatography - GC and HPLC - Principle, instrumentation and applications - quality control, air pollution, food analysis comparison of GC and HPLC	K1-K5	16	1-5
4.	Spectroscopic Techniques and Spectrochemical Methods 4.1 Introduction to Spectroscopy, Beer-Lambert's law statement and deviation; UV - Visible-instrumentation and applications - estimation of Mn 4.2 Nephelometry and Turbidimetry - Principle, Instrumentation and Applications - determination of TDS of water sample 4.3 Principle, Instrumentation and Applications - Atomic absorption Spectroscopy (estimation of Ca), Flame photometry (estimation of K/Na) and Fluorimetry (estimation of Fluorescein)	K1-K5	15	1-5
5.	Practical Demonstration Experiments Botany <ul style="list-style-type: none"> Techniques of maceration and leaf clearing Preparation of permanent slide using plant specimen Isolation of chloroplast by differential centrifugation Separation of DNA using Agarose gel electrophoresis Chemistry <ul style="list-style-type: none"> Verification of Beer Lamberts law (KMnO_4) Separation of organic compounds - benzoic acid and benzaldehyde in ether Estimation of Ca - AAS Estimation of fluorescein - Fluorimetry Gravimetric estimation of Ba as BaCrO_4 	K1-K5	16	1-5

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To enable understanding of transition metal ions in biological systems
- To promote a comprehensive understanding of the theories of bonding in coordination compounds.
- To introduce concepts related to electronic and magnetic properties of transition metal complexes
- To facilitate understanding of the structure and bonding of organometallic compounds
- To provide an insight into the chemistry of inner transition elements

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the basic concepts of coordination chemistry, transition, inner transition elements and organometallic compounds.	K1
CO2	Explain the theories of bonding, structure, electronic and magnetic properties and stability of coordination compounds	K2
CO3	Describe the chemistry of Lanthanides and Actinides and the importance of coordination compounds in qualitative and quantitative analysis.	K3
CO4	Analyse the role of metal ions in living systems and their significance in diagnosis and medicinal therapy	K4
CO5	Evaluate the characteristics of transition and inner transition elements and assess the applications of organometallic compounds	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Transition Elements 1.1 General group trends with special reference to electronic configuration, colour, variable valency, magnetic and catalytic properties, ability to form complexes. Stability of various oxidation states and EMF (Latimer & Ebsworth diagrams) Difference between the first, second and third transition series	K1- K5	15	1-5

UNIT	CONTENT	CL	Hrs	CO
	<p>1.2 Ti, V, Cr, Mn Groups, Fe, Co, Ni Groups - A Comparative Study with respect to Oxidation States, Oxides and Complexes</p> <p>1.3 Biological Importance of Transition Metals- Biological Roles of Mo, Fe, Co, Cu, Zn in Proteins, Vitamins and Enzymes. Heme proteins-hemoglobin and myoglobin-general structures and functions. Biological role of Cytochromes and carbonic anhydrase.</p>			
2	<p>Chemistry of Coordination Compounds</p> <p>2.1 Introduction – Ligands- Monodentate, Bidentate and Polydentate ligands, Coordination Sphere, Coordination Number, Chelate Effect, Nomenclature of Coordination Compounds Isomerism – Linkage, Ionization, Hydrate, Coordination, Coordination Position isomerism. Geometrical and Optical Isomerism of 4 and 6 – Coordinate Complexes.</p>	K1- K5	10	1-5
3	<p>Theories and Applications of Coordination Compounds</p> <p>3.1 Sidgwick- Effective Atomic Number Rule (EAN), 18 Electron Rule and stability, Valence Bond Theory (VBT)- Hybridization, Geometry and Magnetic Properties of Coordination Compounds, Drawbacks of VBT</p> <p>3.2 Crystal Field Theory - Crystal Field Splitting in Octahedral, Tetrahedral and Square Planar Complexes. Qualitative crystal field splitting diagrams, high- and low-spin complexes, Factors affecting magnitude of Crystal Field Splitting, Calculation of CFSE. Spectrochemical series. Jahn Teller Effect.</p> <p>Applications of Coordination Compounds in Qualitative and Quantitative Analyses Potassium Ferrocyanide, Potassium Ferricyanide, Alizarin, Ferriox, DMG, Oxine, Cupferron and EDTA</p>	K1- K5	20	1-5
4	<p>Inner Transition Elements</p> <p>4.1 Lanthanides – Lanthanide Series, their position in the Periodic Table, Properties of Lanthanides with respect to electronic configuration, oxidation states, colour, spectral and magnetic properties</p> <p>4.2 Lanthanide Contraction and its consequences. Separation of Lanthanides - solvent extraction and Ion Exchange</p> <p>4.3 Actinides – Actinide Series, Position in the Periodic Table, Properties of Actinides with respect to electronic configuration, oxidation states, colour, spectral and magnetic properties. Actinide Contraction and its Consequences. Comparison between Lanthanides and Actinides</p> <p>4.4 Extraction of Thorium from Monazite and Uranium from Pitch Blende</p>	K1- K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
5	Organometallic Compounds 5.1 Metal Carbonyls – Nomenclature, 16- and 18-electron rule. Preparation, Properties and Structures of Ni and Fe Carbonyls 5.2 Preparation and Structures of Metal Alkyls and Aryls of Li, Al and Ti. Structure of Metal Alkene Complexes –Ziese’s salt 5.3 Ferrocene - Preparation and reactions (acetylation, alkylation, metallation, Mannich Condensation), Structure and Aromaticity - Comparison of aromaticity and reactivity with that of benzene (No MO treatment)	K1- K5	10	1-5

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To instil understanding of the concepts of electrochemistry, chemical kinetics, catalysis and surface chemistry
- To facilitate prediction of the spontaneity of an electrochemical reaction from its thermodynamic parameters, order of a reaction and type of adsorption isotherm from experimental data
- To enhance critical thinking skills through solving numerical problems in electrochemistry, chemical kinetics and surface chemistry

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	Recall the fundamentals of electrochemistry, chemical kinetics, catalysis and surface chemistry	K1
CO2	Solve numerical problems in electrochemistry, chemical kinetics, catalysis and surface chemistry.	K2
CO3	Analyze the order of a reaction, type of adsorption and spontaneity of an electrochemical from given data.	K3
CO4	Evaluate the rate constant of a reaction with and without catalyst, cell potential, spontaneous cell from electrochemical series	K4
CO5	Estimate the potential and thermodynamic parameters of an electrochemical cell, adsorption constants from adsorption isotherm data, thermodynamic parameters, order of a reaction and a possible mechanism for a chemical reaction	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1.	Electrochemistry I 1.1 Migration of Ions, Conductivity, Ostwald's Dilution Law, Variation of Conductance with Dilution, Types of Conductometric titration, Kohlrausch's Law, Ionic Mobility, Transport Number and Ionic Conductance 1.2 Transport Number - Determination by Hittorf's and Moving Boundary Methods 1.3 Debye Hückel Theory of Strong Electrolytes, Debye-Falkenhagen effect, Wien effect 1.4 Activity Coefficient, Mean Activity Coefficient and Ionic Strength	K1- K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
2.	Electrochemistry II 2.1 Concept of Electrochemical Cell, Galvanic Cell, Reversible and Irreversible Cells, Half Cells, Electrode and Cell Reactions, Nernst Single Electrode Potential, Cell Representation, Terminology and Conventions 2.2 Reversible Electrodes, Standard Hydrogen Electrode, Calomel Electrode, and Equation of EMF of Cells- Standard Electrode Potentials, Sign Convention, Electrochemical Series- Significance, Applications. Weston Cadmium Cell, EMF Measurement- Poggendorff's Compensation Method, Redox Potential 2.3 Applications of EMF Measurements: Application of Gibbs - Helmholtz Equation in the Calculation of ΔG , ΔH , ΔS , Temperature Coefficient of EMF of Galvanic Cells, Equilibrium Constant, Determination of pH using Glass electrode, Standard Hydrogen electrode and Quinhydrone Electrodes, Potentiometric Titration 2.4 Types of Reversible Cells, Concentration Cells with and without Transference. Liquid Junction Potential (cell reversible with respect to cations and anions) Derivation - Significance of Salt Bridge	K1- K5	15	1-5
3.	Chemical Kinetics 3.1 The Rate Equation, Order and Molecularity of Reactions with Examples, Derivation of Rate Constants for Zero, First, Second (Equimolar and Non-Equimolar Reactant Concentrations) and nth Order Reactions, Characteristics of Fractional Order Reactions, Half Life Time, Methods of Determination of Order of Reaction 3.2 Collisions and Encounters, Effect of Temperature on Reaction Rate, Concept of Activation Energy, Energy Barrier, Effect of Catalyst, Arrhenius Equation, Calculation of Arrhenius Parameters 3.3 Theories of Reaction Rates, Collision Theory of Bimolecular Reactions, Limitations of Collision Theory, Activated Complex Theory of Bimolecular Reactions, Transition State Theory –Thermodynamic Derivation of Rate Constant for TS, Eyring's Equation (No Derivation), Significance of ΔH^* , ΔG^* & ΔS 3.4 Photochemical Rate Law, Kinetics of Hydrogen-Chlorine, Jablonski diagram - Laws of photochemistry- Quantum Efficiency	K1- K5	16	1-5
4.	Catalysis 4.1 Catalytic Reactions - Characteristics, Homogenous	K1- K5	12	1-5

UNIT	CONTENT	CL	Hrs	CO
	Catalysis - Acid-Base Catalysis, Kinetics of catalysis 4.2 Enzyme Catalysis - Michaelis – Menton Mechanism, Effect of Temperature, pH and substrate concentration on catalysis 4.3 Heterogenous Catalysis - Kinetics of Surface Reactions, Unimolecular and Bimolecular Surface Reactions, Effect of pH on Catalysed Reactions			
5.	Colloids and Surface Chemistry 5.1 Colloidal systems - classification, preparation and properties of colloids 5.2 Adsorption - Physisorption and Chemisorption-Types of Adsorption Isotherms, factors affecting adsorption 5.3 Freundlich Adsorption Isotherm - Limitations. Derivation of Langmuir Adsorption Isotherm; BET Adsorption Isotherm - Postulates and Equation. Determination of Surface Area	K1- K4	12	1-4

OBJECTIVES OF THE COURSE

- To enable understanding of the basics of spectroscopy and its approach in characterisation of compounds
- To give an overview of NMR and Mass spectroscopic instrumentation techniques
- To facilitate interpretation of the spectra of molecules and structural elucidation

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall the principles, laws, approximations, rules and interaction of electromagnetic radiation with matter	K1
CO2	categorise molecular interactions by choosing suitable spectroscopic methods and interpreting the corresponding data	K2
CO3	apply the concepts of various spectroscopic techniques to solve problems related to structure, purity and concentration of chemicals.	K3
CO4	compare the spectral pattern and assess the parameters important for structure determinations.	K4
CO5	integrate spectral data and elucidate the structure of organic compounds	K5

CL – Cognitive Level

K1 – Remember | K2 – Understand | K3 – Apply | K4 – Analyse | K5 – Evaluate

UNIT	CONTENT	CL	Hrs	CO
1.	Rotational and Vibrational Spectroscopy 1.1 Electromagnetic spectrum and its interaction with matter, quantization of energy, electronic, vibrational and rotational energy levels, absorption and emission spectra. Boltzmann distribution (only formula) Born-Oppenheimer approximations. 1.2 Microwave Spectroscopy: Rotational Transitions, Theory of Rotational Spectroscopy, Rotation of Heteronuclear Diatomic Molecules, Selection Rule, Forbidden Transitions, Instrumentation. Calculation of Moment of Inertia and Reduced Mass 1.3 FTIR and Raman Spectroscopy: Principle, Hooke's law and harmonic oscillator, Normal degrees of freedom, modes of vibration- stretching and bending vibrations, vibrational frequencies,	K1- K5	20	1-5

UNIT	CONTENT	CL	Hrs	CO
	<p>instrumentation, cell sampling techniques, factors affecting the fundamental vibrational frequencies.</p> <p>1.4 Characteristic Frequencies of Functional Groups and Aromatic Compounds. IR Pattern of simple Organic Compounds</p> <p>1.5 Raman Spectroscopy: Rayleigh and Raman scattering, stokes and anti-stokes lines, (quantum treatment) comparison with IR, mutual exclusion principle.</p>			
2.	<p>UV Visible Spectroscopy</p> <p>2.1 Theory of Electronic Spectroscopy, Laws of Light Absorption- Beer-Lambert's Law- verification and its limitations. Definitions of chromophore, auxochrome, bathochromic and hypsochromic shifts. Franck Condon Principle, Types of electronic transitions Block Diagram of Double Beam Spectrophotometer</p> <p>2.2 Factors affecting UV Absorption, Solvent effect</p> <p>2.3 Calculation of λ_{max} of conjugated dienes and α, β-unsaturated aldehydes and ketones using Woodward – Fieser rules</p> <p>2.4 UV Spectra of simple Organic Compounds (Toluene and Cresol)</p>	K1- K5	10	1-5
3.	<p>Nuclear Magnetic Resonance Spectroscopy</p> <p>3.1 Theory of NMR Absorption- Magnetic Properties of Nuclei (Magnetic Moment, g Factor) and Theory of Nuclear Resonance. Larmor Precession Frequency, Resonance Condition and Relaxation Processes</p> <p>3.2 Standards Employed in NMR, Factors Affecting Chemical Shift – Electronegativity, Hybridization, Shielding and Deshielding, van der Waals Deshielding, H-Bonding, Diamagnetic and Paramagnetic Anisotropy</p> <p>3.3 Spin-Spin Coupling, (n+1) Rule and its Origin, Pascal's Diagram, Chemical Shift Values, spin-spin decoupling.</p> <p>3.4 Instrumentation and Sample Handling. Coupling constant, vicinal, geminal, allylic, long-range coupling, factors affecting the coupling constant</p> <p>3.5 Introduction to ^{13}C NMR Spectra, Spin Decoupling Techniques – Advantages</p> <p>3.6 NMR Spectra of Simple Organic Compounds – $\text{CH}_3\text{CH}_2\text{OH}$, $\text{C}_6\text{H}_5\text{CH}_3$, CH_3CHO, $\text{C}_6\text{H}_5\text{CH}_2\text{COOCH}_3$, $\text{C}_6\text{H}_5\text{OCH}_3$, $\text{C}_6\text{H}_5\text{CHO}$, $\text{C}_6\text{H}_5\text{CH}=\text{CH}_2$ and CH_3COOH</p>	K1- K5	20	1-5
4.	<p>Mass Spectrometry</p> <p>4.1 Basic Principle, Molecular Ion peak, Base Peak,</p>	K1- K5	10	1-5

UNIT	CONTENT	CL	Hrs	CO
	Nitrogen Rule, Isotope Peaks and Metastable Peaks, McLafferty Rearrangement, Retro Diel's Alder Rearrangement 4.2 Instrumentation, determination of molecular formula. Fragmentation Patterns of Simple Organic Compounds ($C_6H_5CH_2CH_3$, $CH_3CH_2CH_2CH_2CH_2OH$, C_6H_5OH , C_6H_5CHO , $CH_3COCH_2CH_3$, $C_6H_5OCH_3$, $C_6H_5COCH_3$, $CH_3CH_2CH_2COOH$)			
5.	Composite Spectral Problems 5.1 Structural elucidation of simple organic compounds by combined spectral techniques	K1- K5	5	1-5

PATTERN OF ASSESSMENT**Continuous Assessment:****Total Marks: 50****Duration: 90 minutes**

Section	Cognitive Level	Marks	Pattern
A	K1	8	$8 \times 1 = 8$ (8 MCQs)
B	K2	7	$7 \times 1 = 7$ (Answer in a line or two or Fill in the blanks or Match the following)
C	K3/K3	15	$3 \times 5 = 15$ marks <ul style="list-style-type: none"> Four questions to be set Three questions to be answered out of four. Questions can be set with or without subdivisions
D	K4/K4	10	$2 \times 5 = 10$ marks <ul style="list-style-type: none"> Three questions to be set Two questions to be answered out of three Questions can be set with or without subdivisions
E (Internal Choice)	K5/K5	10	$1 \times 10 = 10$ marks <ul style="list-style-type: none"> One question to be set with either/or pattern Questions can be set with or without subdivisions

Other Component:**Total Marks: 50**

Seminars / Quiz / Problem Solving / Assignment / Model preparation

End-Semester Examination:**Total Marks: 100****Duration: 3 hours**

Section	Cognitive Level	Marks	Pattern
A	K1	15	$15 \times 1 = 15$ (15 MCQs)
B	K2	15	$15 \times 1 = 15$ (Answer in a line or two or Fill in the blanks or Match the following)
C	K3/K3	30	$6 \times 5 = 30$ marks <ul style="list-style-type: none"> Seven questions to be set Six questions to be answered out of seven. Questions can be set with or without subdivisions
D	K4/K4	20	$4 \times 5 = 20$ marks <ul style="list-style-type: none"> Five questions to be set Four questions to be answered out of five Questions can be set with or without subdivisions
E (Internal Choice)	K5/K5	20	$2 \times 10 = 20$ marks <ul style="list-style-type: none"> Two questions to be set with either/or pattern Questions can be set with or without subdivisions

B.Sc. DEGREE: BRANCH IV – CHEMISTRY

SYLLABUS

(Effective from the academic year 2023-2024)

BIOCHEMISTRY

CODE: 23CH/MC/BC64

CREDITS: 4

L T P: 4 1 0

TOTAL HOURS: 65

OBJECTIVES OF THE COURSE

- To provide knowledge on concepts of Biochemistry and its applications
- To enable understanding of the composition of blood, maintenance of pH of blood, blood coagulation and related disorders
- To facilitate understanding of the structure, classification and functions of biomolecules
- To create an awareness on genetic engineering, its application and ethical issues
- To introduce various biochemical reactions, metabolic pathways and bioenergetics

COURSE LEARNING OUTCOMES

On successful completion of the course, students will be able to

COs	DESCRIPTION	CL
CO1	recall terms in biochemistry and genetic engineering, draw structures of biomolecules, relate to fundamental concepts and significance of biochemistry	K1
CO2	classify biomolecules, explain biochemical reactions and summarise the applications of genetic engineering	K2
CO3	apply the concepts of biochemistry in the structure and functions of biomolecules and their metabolic pathways	K3
CO4	analyse the structure and metabolic pathways of biomolecules and compare the tools and techniques in genetic engineering	K4
CO5	evaluate the bioenergetics in metabolic pathways and explain the classification, structure, functions, reactions and mechanism of action of biomolecules	K5
CL – Cognitive Level K1 – Remember K2 – Understand K3 – Apply K4 – Analyse K5 – Evaluate		

UNIT	CONTENT	CL	Hrs	CO
1	Introductory Biochemistry 1.1 Molecular Logic of Living Organisms 1.2 Relationship of Biochemistry and Medicine 1.3 Blood - Composition of Blood, Blood Coagulation – Mechanism. Haemophilia and Sickle Cell Anaemia Maintenance of pH of Blood – Bicarbonate Buffer, Acidosis, Alkalosis	K1-K3	10	1-3

UNIT	CONTENT	CL	Hrs	CO
	Structure of Biomolecules 2.1 Amino Acids– Classification Based on R Groups and their Metabolism, Zwitter ions, isoelectric point, peptide bond formation, Chemical Reactions - with Mineral Acid (HNO ₂), Formaldehyde, FDNB, and CO ₂ , Ninhydrin Test, Action of Heat on α -, β - and γ - Amino acids 2.2 Proteins - Primary, Secondary, Tertiary and Quaternary Structures. Sequencing of Proteins -N Terminal and C Terminal Determination. Ramachandran Plot 2.3 Lipids– Classification of Lipids as Saponifiable and Non-Saponifiable, Definitions and Significance of Iodine Value, Acid Value, Saponification Value, RM Value and Acetyl Value 2.4 Nucleic Acids – Structure and Functions. Nucleosides, Nucleotides, Structure of DNA, RNA - Types and Differences. DNA Replication and Protein Synthesis 2.5 Genetic Engineering: Definition, overview of tools (type II restriction enzymes) and techniques (creating genetically modified organism through microinjection and agrobacterium mediated recombination), Applications	K1-K5	18	1-5
3.	Metabolism 3.1 Carbohydrate Metabolism - Glycolysis, TCA Cycle, Glycogenesis, Glycogenolysis, Gluconeogenesis, Oxidative Phosphorylation, Electron Transport Chain 3.2 Proteins - Transamination, Oxidative Deamination and Urea Cycle. Inborn Errors of Amino Acid Catabolism –Albinism, Alkaptonuria and Phenyl Ketonuria 3.3 Amino Acids: Synthesis - Gabriel's Synthesis, Strecker's Synthesis. Preparation of Tryptophan from Indole 3.4 Lipids - Oxidation of Fatty Acids, Biosynthesis of Fatty Acids, Ketone Bodies	K1-K5	15	1-5
4.	Enzymes 4.1 Definition of Enzymes and Coenzymes (TPP, NAD, NADP, FAD, ATP) Cofactors-Prosthetic Group of Enzymes 4.2 Classification of Enzymes (with Examples) 4.3 Enzyme Specificity - Factors affecting Enzyme Action 4.4 General Mechanism of Enzyme Catalysis - Michaelis - Menten Theory – Fischer's Lock and Key Model, Koshland's Induced Fit Model 4.5 Mechanism of Inhibition (Competitive, Non- Competitive, Allosteric) 4.6 Structure and Function of Carboxypeptidase A	K1-K5	14	1-5
5.	Vitamins and Hormones 5.1 Vitamins: Definition, Classification (as water and fat soluble), sources, structure and functions of Vitamins A and C 5.2 Definition, Classification of Hormones (Steroid and Non-Steroid Only) Source and Functions of Insulin, Thyroxin and Sex Hormones, Mechanism of Hormone Action	K1-K5	8	1-5
